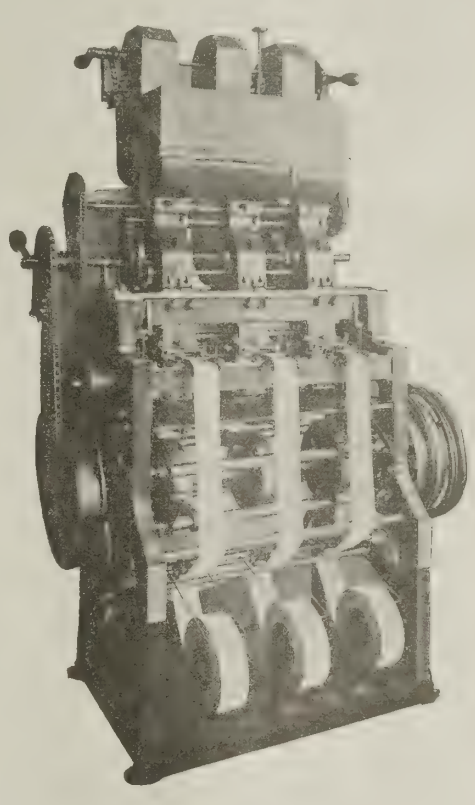
This organization has perfected a cigarette packing machine which will pack cigarettes in pouch packages of twenty, without the use of the pouch making machine. The machine automatically counts the cigarettes, measures and cuts off the tin foil, and completes the package, the wrapper for which is fed automatically, in one operation. The machine requires one-half horsepower and can be supplied with a motor drive if the customer desires. This machine is a decidedly forward step in the economical wrapping of cigarettes in the pouch package. It is known as their Model H-2.

The Comas Model D2 packer

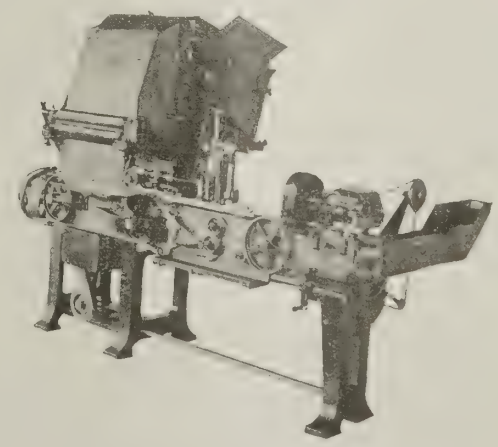
The Comas Cigarette Machine Co., has supplied a large number of cigarette packing machines, known as their Model D-2, to the Latin-American trade, and have recently shipped a large consignment of machinery to El Buen Tono, of Mexico City, and also a large number of machines to the Chilean Tobacco Monopoly. The Model D-2 Cigarette Packer packs cigarettes in the wrapper of paper only. Its efficiency and production are well known in the Latin-American markets.



Comas improved automatic feeder

The Comas Cigarette Machine Co., several years ago, perfected a very efficient Automatic Tobacco Feeder, to take the place of the hand feeding on cigarette making machines. This Feeder has been sold in large numbers to the largest cigarette manufacturers in the United States and foreign countries. The most recent factory to be equipped with the Comas Automatic Tobacco Feeders is that of Piccardo & Co., of Argentina. The Comas Cigarette Machine Co., is prepared to furnish automatic tobacco feeding machines for any hand-fed machine now on the market.

It is a well known fact that the automatic tobacco feeder feeds much more regularly than the old style hand feeding, and that hand-fed machines of low production, with the use of the Comas Automatic Tobacco Feeder, can be speeded up to a much higher rate of production without lowering the quality of the cigarette made.



The Comas Cigarette Machine Co. still enjoys a splendid market for its tucked-end, or Spanish Form Cigarette Machine, popularly known as the Comas Standard. The word "Standard" was incorporated because this machine became the standard of the entire manufacturing world for tucked-end machines.

In addition to the above mentioned machines, the Comas Cigarette Machine Co., supplies an open-end, or American Form cigarette machine, known as the Comas American Machine. This machine is equipped with compression wheels and can handle the coarsest kind of tobacco. It is the simplest of all open end, or American form of cigarette making machines and can be operated with unskilled labor.

The Comas "Standard" cigarette machine

The Comas Cigarette Machine Co., maintains a show room at its factory in Salem, Virginia, where its machines are being constantly demonstrated to visitors from all parts of the world. The entire personnel of the factory always welcomes visitors to its plant.

Open-end Comas cigarette making machine

In passing, it might be well to call attention to the ability of the Comas Cigarette Machine Co., to duplicate parts for its machines. Careful records are kept of machines in the field,

and with their modern methods of production, interchangeable parts can be furnished from stock on short notice.

In order to supply the quick demands of the cigarette industry, the Comas Cigarette Machine Co., carries machines in stock, and as soon as a customer advises the Company of the size of cigarette or package which they desire, special parts are immediately made up and assembled for quick shipment.

Research Work

In addition to the development of new machines, the Comas Cigarette Machine Co. makes a constant effort in research work covering the needs of cigarette manufacturers, and gives its entire attention to the serving of the cigarette and tobacco industry.

The officers of the company are: F. V. N. Painter, chairman of the Board; S. C. Markley, president; C. Markley, vice-president, and Douglas Bunting, secretary and treasurer.

American Machine & Foundry Company

Free drawing, even burning, uniform quality, and careful manufacture, combine the four virtues that help to form the perfect cigar. Every cigar manufacturer dreams of the day when he can put the perfect cigar in the smoker's mouth, with a minimum of effort to himself. Perfection is a state that is seldom attained, at least in the mortal sphere, but perfection in cigar manufacturing comes closest to those manufacturers who have stabilized their shapes, and placed the volume of their business on a machine production basis.

Machinery in the cigar manufacturing line is an innovation of the last few years introduction, at least as far as complete machine manufacture is concerned. Approximately six years ago the first "out and out" cigar machines made their appearance in the cigar manufacturing field; that is, machines that in a single series of uninterrupted operations weighed and bunched the filler, rolled it in the binder and delivered the bunch to a wrapping station, where it was wound with the finest of Sumatra wrappers and deposited on an inspection table as a completed cigar. In six years' time many improvements have been added to the original model, and year by year the American Machine & Foundry Co., creators of the "out and out" cigar machines, come closer to reaching that ultimate goal of the perfect smoke.

Despite the fact that the cigar machine is still passing through the development stage, it can be safely said that from the cigar manufacturers' standpoint, the machine from the day of its original installation has at least cut in two the usual trials and tribulations of hand manufacture. Machinery has removed from cigar manufacturing the element of human uncertainty, and has substituted the exactness of mechanical accuracy. Today the machine manufacturer knows that every cigar that leaves his factory is an exact duplicate of its predecessor, and that when it reaches the smoker's mouth it will draw easily and with a uniform burn.

It has been frequently and truthfully said that machine made cigars smoke with the ease and free burning qualities of a cigarette. Properly adjusted, it is almost impossible to produce a "plugged" cigar by machine manufacture. Hand work must of a necessity reflect to a certain extent the temper and individual characteristics of the workman, and be the variation ever so slight it is practically impossible to sit a hundred cigar makers at their benches and not produce a hundred variations of the master cigar you are trying to build.

After experimenting with both hand and machine manufacture from a sales standpoint, the sales manager will tell you almost without exception that he has a minimum of complaints regarding his machine made cigars. Of course, cigar machinery, like any other type of machinery, needs some care and attention. A cigar machine isn't an automatic apparatus into which you can throw a handful of tobacco, a piece of binder, and a wrapper leaf, and have a cigar drop out of the slot, on the principle of the nickel in the slot machine.

Probably more care has to be taken in the preparation of stock for machine manufacture than is necessary in the average hand factory, but time and trouble experienced in the preparation of stock is more than repaid by the elimination of worry on the machine floor.

Financial saving, often emphasized as the cardinal virtue of machine manufacture, is greatly over-estimated. In fact, it is doubtful if the machine-made cigar is produced at any great saving over the hand-made product, but when quality of workmanship and uniform manufacture is taken into consideration, the machine manufacturer is far in advance of his hand-made competitor. If this fact was more generally appreciated by the jobber, the retailer, and the smoker, the demand for machine-made "smokes" would far exceed the supply.

There are a few facts, however, that any manufacturer contemplating the use of machinery must bear in mind. A cigar machine is not a flexible piece of apparatus. It can't make perfectos this week, coronas next week, club-house the following week, and then shift over to panatellas. A machine will produce a perfect duplicate of any master cigar it is designed to make, and it will produce them at the rate of from three to four thousand every eight-hour working day. Further, a machine will roll either a right or a left hand leaf, but both right and left hand leaves can't be rolled on the same machine, so at least a pair of machines must be installed on each shape desired. A pair of machines will produce, in round figures, two million cigars per year.

As was said earlier in this article, a cigar machine requires mechanical supervision, and a good mechanic can supervise six machines as well as two. If the mechanic's time is not used to the limit of his ability, then a further cost for excessive mechanical supervision must be made against your machine cigars. In short, no manufacturer should contemplate an installation of less than six machines, and when he installs his machinery he should be satisfied that his business to the extent of at least six to eight million a year is stabilized on two or three standard shapes.

Another factor frequently overlooked by the average cigar manufacturer in considering the question of machine installation, is the saving of productive space in his factory, and the ability of comparatively inexperienced workers to turn out perfect cigars. Anyone familiar with the problem of hand cigar making knows that it requires anywhere from six months to a year to train a reasonably skillful hand worker, and during this training period many cigars are spoiled.

Machine operators can be trained in from two to four weeks, and while the speed of the machine may be reduced during the training period the completed work will still measure up to a salable standard. Foot for foot of floor space a machine factory will probably produce at least 50 per cent more cigars than a hand factory, and this is no inconsiderable item, particularly where plants are located in large cities, and factory space is at a premium.

To summarize the problem of machine work and hand work from the cigar manufacturer's standpoint, after an experience with both types of production, an expert authority declares that machine work produces in the long run the most uniform product, and gives the most satisfaction to the ultimate consumer. It reduces labor problems to a minimum, and largely eliminates waste in the factory, both of material and space. However, the manufacturer debating the problem of machine installation should bear in mind that no great reduction in cost is to be anticipated, and that his business must be reasonably stabilized, with regard to the shapes he desires to produce.

Modern Machinery to Produ Short Filler Cigars

Modern machinery methods are recognized the only way in which cigar manufacturers c continue to produce high grade short fil cigars, on a quantity production basis, that w enable them to give the smoker a good, mod ate priced cigar, and still make a profit.

It is almost an axiom in the cigar indust that there are only two kinds of cigars—go ones and bad ones.

To produce short filler cigars that will co within the classification of "good cigars"—v rious kinds of machinery are essential to p pare the tobacco, produce the bunch econon cally, and reduce manufacturing costs.

A short filler cigar which contains too sm scrap is unpopular with the smoker because the tendency of the scrap to come out in t mouth. Tobacco improperly prepared, whe the foreign matter, dust, etc., have not been r moved, produces a kind of cigars which fall the unwelcome classification of "bad cigars and are equally unpopular with the man wh buys them.

The salvation of the cigar industry lies in th ability to give the smoker a grade of short fill cigar that will be as acceptable as the hig priced long filler cigars, at a relatively low pric Cigar manufacturers are realizing this, as th number of short filler brands now being sold c the market will indicate.

Among the machinery manufacturers wh have devoted years of experimenting and d veloping machinery to produce good short fill cigars is the Miller DuBrul & Peters Mfg. C of Cincinnati, Ohio. A record of fifty-thr years of service and leadership in the produ tion of equipment of every nature for the ma ufacture of cigars has placed this firm in a enviable position with reference to their m chinery equipment for short filler work. The produced some of the first machinery of an type for this phase of the cigar business, an have constantly improved existing methods an developed new ones to enable the manufacture to keep up with the parade and combat steadi mounting costs in cigar production.

As a result of this constant application to study of the needs of the trade, the Miller D Brul & Peters Mfg. Co. are today offering wh is considered by many to be the most comple and modern line of short filler cigar machine to be found anywhere in the world.

The New Durex Bunching Machine

First, of course, among these items should b placed the new Durex Quality Productio Bunch Machine. After years of experimentin and the elimination of those objectionable fea tures which have caused large producers c short filler cigars to look askance upon the ide of manufacturing bunches automatically, th only thoroughly practical automatic bunchin machine that can be secured, is offered to th trade.

The machine is built on an entirely differen principle of feeding the filler than has ever bee used on a short filler bunching machine. Unt this machine was developed, existing types fe the tobacco by gravity and, of course, violentl agitated the filler. This throwing of the tobacc and the attendant agitation naturally caused th smaller and lighter pieces of tobacco to fall t the bottom of the hopper and naturally wa placed in the first bunches made. Lack of uni formity resulted, and the blend which was mad before the tobacco was placed in the machin was lost—resulting in a cigar very differen than was desired.

The feeding mechanism on the Durex is op erated so as to feed the filler forward horizon tally with a steady positive movement that de livers it just as it has been placed in the hoppe —large and smaller pieces together.

Another exclusive feature of the Durex i the forming matrix. This is a patented devic that conforms to the shape of the molds, and i

tively measures the filler to that shape and
's it in perfect control until the completed
h is placed in the mold cavity automatically.
he matrix has an expansion feature that
nits of the use of larger sized filler than
r machines can handle satisfactorily. The
ntage of using large filler is obvious from
point of view of the smoker as has been
ted out earlier in this article. The matrix
res that the bunches will be uniformly filled
ughout their length and will be of the fine
gy type that are essential.

laces Bunches in Molds Automatically

rior to the development of the Durex, some
r manufacturers were not kindly disposed
ard any machine that was planned to place
bunches in the molds automatically, because
felt that the bunches should first be in-
ted by the operator, who eliminated the bad
ches. Their contention was well taken to
ertain extent, and such a procedure would
oubtedly be necessary on any machine that
not absolutely control the filler at all times.
lowever, with the Durex this objection is
inated because the construction of the ma-
he make positive the turning out of a uni-
m product, and the usual bunch inspection is
necessary. The fact that no other types of
chines the operator is required to pick up the
nch and inspect it might be taken as an ad-
sion that the machine did not uniformly
duce bunches good enough to go to the mold.

Easy to Operate and Care For

A type of clutch construction scientifically
nned to make the operation of the machine as
y as possible for the operator, is another fea-
e of the Durex.

Because the bunches are automatically placed
the mold, the machine can be operated con-
uously, one bunch being formed while the
ceding one is being placed in the mold. This
ures much greater production than on a ma-
ne where the operator must stop it with every
nch, and start again for a new one.

The necessary adjustments of the machine
ve been made so simple, that any one of them
n be made either with the fingers or by simply
rning a screw with a screw driver. This is
ite a factor in the maintenance and upkeep of
e machine.

Capacity

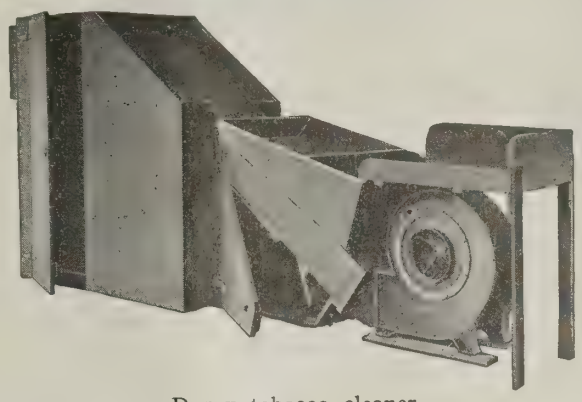
The machine is designed to operate at 20
. P. M. and as a bunch is made at each revo-
ltion it can be readily seen that big production
n be secured with a battery of them.

The big factory of the Miller DuBrul &
eters Mfg. Co. has been taxed to capacity for
veral months taking care of unfilled orders
r the new Durex, but increased production
cilities have now placed them in position to
ke care of any additional demand on their
anufacturing capacity.

They are merchandising the Durex on a
nique "Safety first" plan that is well worth
oking into by manufacturers with a capacity
r volume short filler production.

Short Filler Preparing Machinery

The production of high grade short filler
igars does not begin with the machine on which
e bunches are made, although it is, of course,
controlling factor. But the preparation of the
ller that goes into the bunches plays an impor-
ant part in their success with the smokers.



As previously pointed out, there are two
hings that have always mitigated against the
ig popularity of short filler cigars. One is the
act that the small scrap usually used has a ten-
ency to come out in the smoker's mouth, and
he other, the finding of all sorts of foreign mat-
er, etc., in the cigars, which ruin what might
ave been an otherwise good smoke.

The Miller DuBrul & Peters Mfg. Co. pro-
luce a set of three machines, each one of which
as a vital place in the factory of any cigar
anufacturer who expects to build up a stead-
ly increasing demand for his short filler goods.

Durex Tobacco Cleaner

Many of the largest producers of short filler goods in the world, use one or more of the Durex Cleaners to insure that their filler will be free of the objectionable dust and foreign matter such as nails, pins, screws, bread, meat, buttons, bones, apple cores, hairpins, coal, stones, dirt and any number of other things.

The machine consists of a blower and a wooden section fitted with a hopper into which the cuttings are fed. By a special construction of

Durex tobacco cleaner

chambers the air current carries the tobacco up, and out, while the heavier substances are separated. The machine also catches the fibrous hairs and burlap lint so commonly found in tobacco, and which if not completely moved, gives a bitter taste when burning.

The cleaner soon pays for itself by doing all the work quickly, with less labor as compared to hand picking, and by removing all substances which might injure or break the knives of cutters through which the tobacco is passed.

It has a cleaning capacity of 1,500 to 2,000 pounds of cuttings a day, requires 2 horse power for operation and occupies a space 3 feet 6 inches by 14 feet 6 inches.

Durex Conical Sifter

The sifter is one of the most practical to be found, and is used for screening and separating scrap from small cuttings and for obtaining a uniform size of cut filler.

It consists of a series of three screens of different mesh, the fine sand screen being made of

Durex conical sifter

brass, the center one of galvanized iron with soldered meshes, and the last one of heavy iron wire.

The very small particles of tobacco and the sand which comes out in the smoker's mouth are eliminated by this machine, and the filler the right size for use in the cigars is separated from the large pieces, which come out in the end of the sifter ready to be cut into the proper size.

The savings accomplished by this sifter in eliminating the proper size filler before it passes through the cutter, which would reduce it to a size so as to make it unusable except for pickadura, make it a big dividend payer.

The sifter weighs 650 pounds net, occupies a floor space of 28 feet by 7 feet, and is belt driven.

Durex Power Scrap Cutter

This power cutter is designated to cut damp tobacco. It is a real cutter, not a tobacco breaker or grinder, and saves the waste that results from breaking the dry tobacco into small irregular pieces, which reputable manufacturers will not permit to go into their cigars. It is solidly built of the very best materials and will give years of service under the most severe conditions.

The cutter has its own rotary sifter and is constructed so that the dust is kept inside the machine. The tobacco is fed into the trough at the top from where it is carried by an endless belt and compression rolls to the circular knives that cut the tobacco lengthwise. Then the tobacco is cut crosswise by two straight chop knives which are fastened to the flywheel.

From there the tobacco drops into the rotary sifter where it is thoroughly cleaned and prepared ready for use in the highest grade short filler cigars.

It can also be equipped with a box support which raises the cutter up and enables the tobacco and siftings to drop into boxes instead of on the floor.

With a cutting capacity of 250 to 300 pounds of damp tobacco per hour, the machine will serve efficiently in the largest factories, and will give uniform satisfaction in every case.

Millhiser Bag Co., Inc.

Many experienced smokers prefer their tobacco in a cloth bag, due to the fact that it eliminates excess weight and bulk in the pocket. Manufacturers of smoking tobacco can bag their brands attractively and profitably with cloth bags made by the Millhiser Bag Co., Inc., of Richmond, Va., in all sizes and colors, plain and printed.

The Millhiser Bag Co., Inc., also manufactures cloth pouches, which are greatly appreciated by smokers, and are ideal containers for cut plug smoking tobacco. These tape pouches are self-reducing to fit contents down to the last pipeful. A size and color is provided for every idea, and attractively printed.

In addition to building up a large domestic trade, which is continually growing, the Millhiser Bag Co., Inc., are also doing a considerable foreign business, and are rapidly adding to their hosts of satisfied clients.

Pulte-Korreck Machine Co.

The inevitable demand for cigar machinery soon to be experienced is going to find the Pulte-Korreck Machine Co., of Grand Rapids, Mich., fully prepared to fill orders promptly. The small manufacturer who will find himself and his few cigarmakers unable to meet the increasing demand for his product will find the installation of one or more Wolverine Bunch Breakers to be a boon to him. These little, inexpensive devices can be made to earn their initial cost in thirty days. Experienced hand bunch makers find the Pulte-Korreck machine superior to most other types of machines since they closely conform to the natural motions employed in hand bunch making.

A binder leaf is placed upon the machine bed just as it is placed on the table for hand work. The filler is broken in the hand, and placed on the near end of the binder leaf. Now, just as every move in quantity production counts in hand work so also is this true in machine operation. The Wolverine Bunch Breaker lever operates away from you, causing the bunch to be rolled away from you, just as in hand work.

To the operator of this machine these advantages mean nothing more than an increased output, more money and a higher quality of workmanship. But to the manufacturer other and even more important advantages are evident.

True, the increase in production of 40 per cent over hand work is in itself sufficient to warrant the immediate investigation of such a machine. But, other features overshadow this.

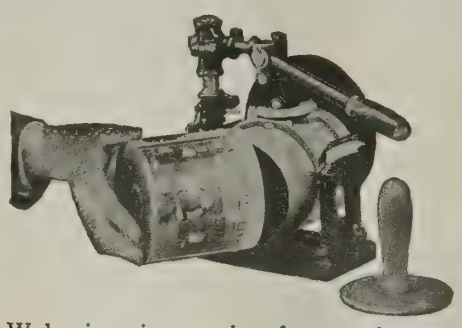
To the manufacturer using a very tender binder leaf the yield per pound of binder leaves is small comparatively. While the tender binder leaf will cost him less than others his yield is so small as to nearly offset the saving made. But

Wolverine bunch breaker

this saving in binder leaf can be made 100 per cent if Wolverine Bunch Breakers are employed. Where human hands will not work tender binders without tearing them, the Wolverine Bunch Breaker will.

Imagine the resultant saving then, where human hands require two or three binders, and the Wolverine Bunch Breaker needs but one. A comparatively equal saving is effected when using other grades of binders. The reason for this lies in the fact that at all times it is possible for the operator to have that "feel" of the bunch when being rolled in the machine.

Cigar Packers



The demand is likewise felt in the increased orders being received for cigar packers. The General Cigar Co. have recently equipped several of their factories with the Model B-2 Cigar Packer for 100 cigars. For a number of years

Wolverine cigar packer for straight packing

this style of packer has been used in a few of their factories with the result that wherever possible they are installed in other branches able to use them.

The outstanding features of the Wolverine Cigar Packers soon assert themselves in use. They absolutely insure against over-pressure of the cigars when packer is once adjusted. This is made possible by means of "stops" on both the side lever as well as the top lever. Each

Wolverine cigar packer for round cans

cigar in every box is uniformly pressed. The increased speed in packing together with the absence of wrapper breakage loss soon pays for the device.

Another popular product of this company is their Wolverine Cigar Packer for Round Cans. The demand for a compact device for packing glass jars and round cans resulted in the introduction several years ago of the Model E Packer. It met with instant favor, and today many popular brands are packed in cans with the aid of this device.

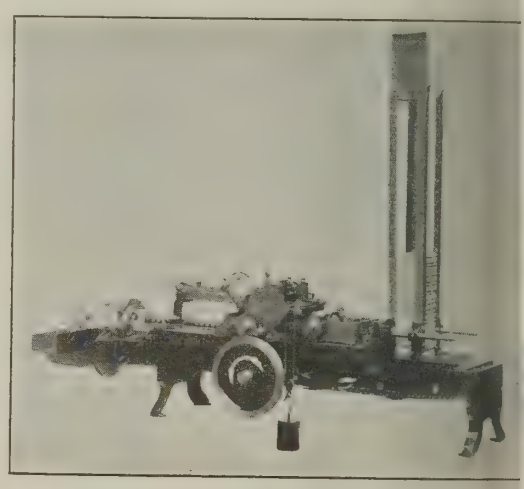
When once adjusted each pack will be uniformly pressed with no loss due to broken wrappers. The speed with which cans may be packed warrants your immediate investigation. The machine is small, occupies very little space and can be set aside when not in use.

The Pulte-Korreck Machine Co. operates on a broad policy of shipping machines on thirty days' trial. A new illustrated circular just off the press describing their various products can be obtained by applying to the Pulte-Korreck Machine Co., 231 Ionia avenue, N. W., Grand Rapids, Mich.

Knopp & Biehler Stamping Machine

The Knopp & Biehler Stamping Machine is a device for putting revenue stamps on cigarette packages, cigar packages, or packages of playing cards. It is the invention of Joseph G. Biehler, of 308 Hague street, Rochester, N. Y., and his associate, Rudolph Knopp, and is 46½ inches long and 14½ inches wide. The body stands less than 15 inches above the table. The hopper for the cigarette packages can be carried as high as necessary to give it the desired capacity. The machine weighs 140 pounds and is one of the most ingenious, simple, reliable, and rapid pieces of automatic machinery that has been introduced to the tobacco industry. A one-sixth horsepower electric motor is sufficient to drive one of these machines.

The machine carries the cigarette packages stacked in an upright hopper, and carries the revenue stamps in a horizontal magazine. A separate feed mechanism is provided for the cigarette packages, and a separate feed mechanism for revenue stamps. The operation of the feed mechanisms is timed to co-ordinate them, and to bring each package and a stamp together in just the desired relation.



If it is desired to place the stamp on but one side of the box, the feeding of the stamp will be delayed, relative to the package. If the stamp is to be put on the side of the box, with a portion of it overlapping the end of the box, the feeding will be timed normally. To place the stamp three sides of the box, that is, with the cen of the stamp on the end of the box and the er overlapping the sides of the box, the feeding the stamp will be advanced. All this is secur by simple adjustments that can easily be ma

The stamps are fed from the magazine by selecting device, which works with unerri accuracy to feed but one stamp at a time. suction device presses against the upper pa of the end stamp in the magazine, and at t right instant a pump operates to make a vacuu This causes the stamp to adhere to the sucti device, which then swings back, bending t upper end of the stamp away from the stam remaining in the magazine.

A clamp then swings in the back of this stan and holds the remaining stamps in place. Th the feed mechanism draws the selected stan endwise down past the dope wheels, which p on the glue. The stamp is then fed, proper timed, into the path of the cigarette packag so that it takes the desired position on t package, according to the setting of the m chine, and adheres thereto.

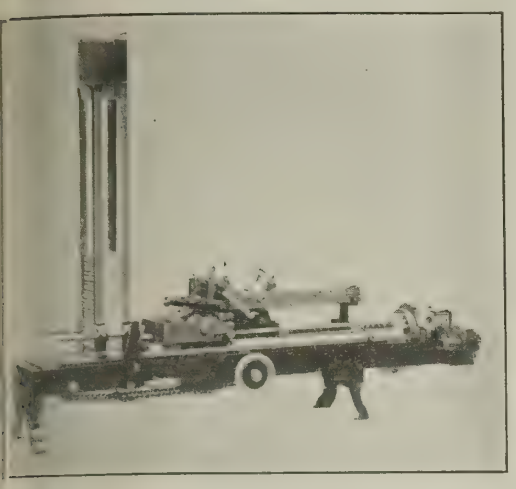
The packages are fed into the machine in pile, which the hopper is adapted to receiv They are fed from the bottom of this pile b feed chains and dogs, that first spaces them apa to receive the stamps thereon, and then clos them up end to end in a continuous row.

The packages are delivered from the machir in a pile, side by side, by a stacker which M Biehler has recently added to the machine, ar

The Knopp & Biehler stamping machine

which is a marvel of ingenuity, simplicity an effectiveness. This stacker comprises a cantin disc, that has two slots therein which cross eac other at right angles, with an open center in th disc. As the end package leaves the machine one or the other of these slots is always in a horizontal position to receive it. As soon a the package is completely delivered to the disc the disc makes one-quarter turn, and stands th package on edge.

The next package to enter the disc hori zontally, forces out the vertical package on t the stacking table, leaving it standing on end A rotating cam then pushes it along the stack ing table far enough to give clearance for the next package. The edge of the package that receives the stamp is displayed on the stacking table, so that the packages are readily inspected, and show for themselves that the stamp is in place on each package.



A number of the original machines are in

CIGAR MAKERS' TOOLS

ilar use in the factories of the Liggett & lvers Tobacco Co., where they run 210 pack- s a minute each. These machines have given d satisfaction for a number of years. The roved machines have been adopted by the

Stamps more than 200 packages per minute

bacco Products Corp., and several are now use in as many different shops, running 220 kages a minute each, with very satisfactory ults.

One of these machines is putting 220 stamps minute on Stroller packages, which are soft kages. What this means can be better ualized by the statement that a stack of boxes r 15 feet high is fed through each machine a minute, while the machine sticks a revenue mp on each box as it passes through.

Other improvements that have been made ke this machine flexible and adjustable, so t one machine can be worked on a great iety of different sized packages. The ad- tments that fit it for each particular size kage are quickly and easily made.

The John B. Adt Co.

Established in 1865, the John B. Adt Co., of ltimore, Md., has devoted the 58 years of its istence to the manufacture and improvement machinery designed for the economical pro- ction of tobacco products. The Adt machines e shipped to all parts of the world. Among em may be mentioned granulators, cutting achines, steam and furnace dryers, coolers, em rollers, packers, ordering and casing ma- ines and others for special purposes.

Special attention is called by the John B. Adt ., to its "Perfection" Steam Dryers, a perior machine for drying uniformly manu- ctured tobacco, even the most delicate kinds, ithout discoloration. In combination with the oler and conveyor apron attachments it turns t the product in excellent condition for ciga- ttes and smoking mixtures.

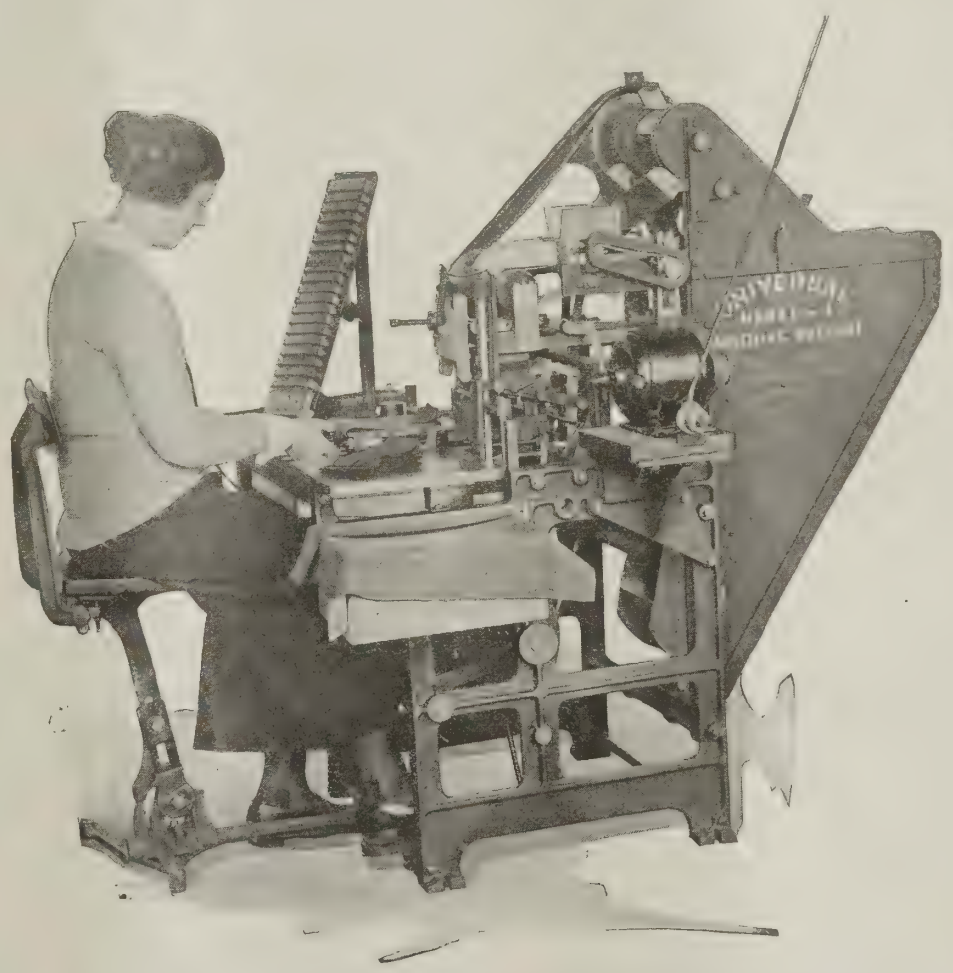
The Adt cutting machines insure constant ecision cutting, so vital for high-grade ciga- ttes. They have large capacity and production sts are kept low. The model B1 cutter is a werful machine of enduring quality. The ankshaft is placed at the base of the machine d double connecting rods, equalizing the pull, ive the crosshead. Crankshaft bearings are tra long and fitted with oil reservoirs. The osshead is fitted with renewable bronze shoes d works between hardened steel guides. This sures accurate cutting.

The Adt stem flattening machines make it ssible to utilize the tobacco stem, formerly a aste, in every kind of manufactured tobacco.

The Adt dissolver works under pressure and uickly dissolves all flavoring extract to a soluble ndition without loss of aroma. The casing d ordering machines expedite the condition- g of the tobacco uniformly and in a superior anner and progressively prepared it for rther manipulation.

The Adt tobacco preparing machines are in- stalled in the principal tobacco manufacturing factories of this and other countries.

W. F. Robertson Steel & Iron Co.



The W. F. Robertson Steel & Iron Co., of Cincinnati, Ohio, are large manufacturers of No. 9 Hold Fast wire hogshead hoops, having a capacity of about 15,000 per day. Hold Fast wire hoops are made from special quality soft wire, particularly adapted to hogshead use. The W. F. Robertson Steel & Iron Co., are unusually well located to serve the tobacco trade, because of the low "commodity" or "special iron" freight rates now in effect on carload lots from Cincinnati to various points throughout the tobacco belt.

Furthermore, they have the advantage of cheap river rates, with corresponding quick service to many points. Hence, by bunching orders, several less-than-carload buyers at any given point can obtain the benefit of the favorable carload rate.

The W. F. Robertson Steel & Iron Co. carry a large stock, and can generally make immediate shipment upon receipt of orders. During the busy tobacco season sometimes supplies of Wire Hoops are allowed to run low, hence their exceptionally quick service is advantageous.

Universal Tobacco Machine Co.

Due to intense competition, higher efficiency demands, and burdensome labor conditions, machinery is slowly, but surely, supplanting the hand worker in all branches of the tobacco industry. Of special significance is the growing appreciation of mechanical equipment throughout the various stages of cigar manufacture.

Universal Model L bunching machine

The Universal Tobacco Machine Co., of 116 West 32nd street, New York, has long been known as a manufacturer of tobacco stripping and booking machines. The products of this company have conclusively demonstrated that leaf tobacco can be stripped mechanically to far greater advantage than by hand.

The Model L Universal Short Filler Bunch Machine, illustrated on this page, has been developed to a point of efficiency, speed and accuracy that completely overcomes all of the objections that cigar manufacturers have experienced in the past in connection with short filler bunch making machines. It is the result of expert engineering skill aided by the experience of practical cigar manufacturers.

The machine is receiving widespread attention because it gives complete and uniform results regardless of the condition of the filler tobacco that is being "worked" on it. And it does not easily get out of order. It fills a very vital need as it makes possible the production of a five cent cigar at a profit.

The advantages of using the Model L machine for working short filler (large, mixed or fine scrap), may be summed up as follows:

1. Straight or shaped work, both well done.
2. Makes right or left-hand bunches perfectly.
3. Uniform size and weight of bunches assured.
4. A very substantial saving in labor costs.
5. Handles scrap or short filler of unequal sizes.
6. A long, even rolling for better smoking qualities.
7. Damp or dry tobacco handled with equally good results.
8. Low cost of upkeep; does not easily get out of order.
9. The easily adjustable weighing scale meets all requirements as to changes in sizes and weather conditions.
10. Fluffy filler because the tobacco is lifted from a hopper—a decided improvement over the gravity method of feeding.

The daily production of the machine will vary from 4,000 to 5,000 bunches, depending upon the shape and size bunch that is being "worked" and it will make practically any size, straight or shaped bunch. It is necessary, however, when changing shapes or sizes to install a new plunger in the machine.

The machine is made with either a straight or

a curved rolling table. Both right and left-hand bunches can be made on the same machine when equipped with the straight table. It will work scrap or short filler of unequal sizes and should large stems, nails or other foreign matter get in the tobacco, they will not clog or cause damage to the machine.

The filler for each cigar bunch is automatically lifted from a hopper in a manner directly, opposed to the gravity method usually employed in bunch making machines. After being lifted from the hopper the filler spreads out on a traveling belt which carries it to an automatic weighing scale, which is so accurately balanced that it registers the smallest fraction of stock that is placed upon it. Therefore, manufacturers are assured of a positively uniformity of weight of filler in their cigar bunches with the Model L machine.

The weighing scale can be quickly adjusted for the exact quantity of tobacco required for different sizes of cigars. When the scale balances under the weight of the proper amount of filler, the feeding device automatically stops. The Model L operator in the meantime has placed the binder on a rolling apron and the (accurately weighed) filler is automatically deposited into the apron pocket and rolled into a bunch. The bunch is then placed in the cigar mould by the machine operator.

Besides the Model L Universal short filler bunch machine, the Universal Tobacco Machine Co. manufactures many other tobacco stock and labor-saving machines and devices, including the following:

Model M Universal tobacco stripping and booking machine, Model M Universal (non-booking) tobacco stripping machine, Model F Universal tobacco stem crushing and booking machine, Model F Universal (non-booking) stem crushing machine, Model J Universal leaf counting device, Model K Universal gum cleaning device, Model W Universal butt cutting device, Model E-1 Universal one plate wrapper register, Model D-2 Universal two plate wrapper register, Model C-3 Universal three plate wrapper register, Model S Universal cigar banding machine.

National Can Co.

Tin cigar and tobacco containers are gaining favor with the public, and the National Can Co., of 36-39 Washington street, N., Boston, Mass., are specializing in providing these attractive and artistic packages for cigar and tobacco manufacturers.

The advantages of the decorated cigar can are many. It protects to the greatest extent the aroma and condition of the cigar, as well as protects the cigar itself, while in transit. The beautiful effects done in lithographing these cans, not only make a perpetual advertisement for the cigar, but make an unusually fine and attractive sales appeal.

The sizes that appear to be most popular are those holding twenty-five and fifty cigars, and the Natural Con Co. are making them for both Londres and Perfecto shapes. They are also equipped to furnish containers for smaller numbers.

A Mongrel Tobacco

Fred B. Griffin, general manager of the Connecticut Tobacco Association, says: "In some sections of Massachusetts the farmers grow a mongrel tobacco. This tobacco is very hard to sell. Some crops look like Broadleaf, and some resemble Havana. While we have been able to pool a certain amount of this as No. 1, we have quite a quantity of this tobacco that will have to be sold at lower pools. I wish, as far as possible, the directors would discourage the growing of this tobacco. It is not a standard type of tobacco, and I believe, in the long run, the grower that raises the regular type of Havana Seed or Broadleaf will make more money."

Minnich Machine Works

One of the greatest labor saving devices in the market is the electric-driven casing press, manufactured by the Minnich Machine Works, of Landisville, Pa., specially for tobacco warehouses. Using this press, one man can press and nail over 100 cases in ten hours. Two men can do more than four, without any labor in pressing.

The Minnich No. 51 is a tobacco casing press used by leaf tobacco packers.

This press is equipped with two levers, new steel beam and triple link chains.

A great feature is the Minnich patent unshifting pawl, so the levers need not be used to release pressure. It has an adjustable hopper and two follower boards.

It is remarkably compact, durable and quick in operation.

If Minnich reputation rested on this little casing press alone the name would still have a leading place among manufacturers of such machines. Minnich No. 51 seems to be—and is—one of the necessities of the tobacco trade. It is in use wherever tobacco is handled.

Its sales are growing, the result of recommendation by users to those looking for one of the best machines of its kind. Minnich No. 51 is a big time and money saver at a low price. As many users write, it will stand all kinds of hard wear.

A Case Against Tobacco

Another charge against tobacco which will be made the most of by those who are planning a crusade against the filthy weed, is found in the report of Mr. Foote, the commissioner of public safety, who says that careless smokers last month caused sixty-five fires with a property loss of more than a hundred thousand dollars.

Users of tobacco must prepare for an attack on their pet vice. They must look to it that nothing is "put over" on them as the beer and whiskey drinkers claim was done to them with the adoption of the dry amendment and the dry law.

Tobacco has been a subject of attack from the time King James issued his famous counterblast until the present. Caverly wrote long ago:

"How they who use fusees
All grow by slow degrees
Brainless as chimpanzees,
Meager as lizards;
Go mad and beat their wives;
Plunge, after shocking lives,
Razors and carving knives
Into their gizzards."

There have been plenty who have written in its praise, from Walter Raleigh and Rare Ben Johnson to Kipling, whose famous phrase, "A woman is only a woman, but a good cigar is a smoke," is often quoted.

It conduces to philosophy, as witness the verses of George Wither:

"The Indian weed; withered quite,
Green at noon, cut down at night,
Shows thy decay; all flesh is hay,
Thus thinke, then drinke tobacco.

And when the smoke ascends on high,
Thinke thou beholdst the vanity
Of worthy stuffe, gone with a puffe,
Thus thinke, then drinke tobacco.

The ashes that are left behind
May serve to put thee still in mind,
That unto dust return thou must,
Thus thinke, then drinke tobacco."

The best case in favor of the weed has been made out by experiments of Professor M. V. O'Shea at the University of Wisconsin. His conclusions, set forth in a book, "Tobacco and Mental Efficiency," may be summarized thus:

Smoking is good for the minds of smokers and bad for the minds of non-smokers—in the experiments smokers did better mental w after smoking and non-smokers worse w Tobacco seems to slow down mental proce but Professor O'Shea says that in the long men who like to smoke and who do smoke p ably accomplish more intellectually, despite slowing down, than they would if they were prived of tobacco. He adds that "men who used tobacco have achieved as much in e field of activity as the men who do not use He found that most literary women smoke, fifty-five per cent of the congressmen answered his queries don't smoke, and that s per cent of our school superintendents, ar still larger proportion of our university pr dents and deans, use tobacco. — *Broc (Mass.) Times.*

Mr. Duke's Philosophy

James B. Duke, former chairman of the I ish American Tobacco Co., arriving on the *jestic* from a trip to Europe, said: "I am ceedingly optimistic regarding the tobacco look. The consumption of tobacco will incr as long as population increases.

"I was not forced out of the British Ameri Tobacco Co., as has been stated. I have b trying to resign for three or four years, an eventually was able to have them accept resignation. There has never been the sligh bit of discord between the British Ameri Tobacco Co., or the Imperial Tobacco Co., me. There has been no discord among Toba Products, British American, or Imperial. B ish American Tobacco has a very efficient m agement, and they can get along without me.

"There was something said to me abou merger between Tobacco Products and Bri American Tobacco but I don't know anyth about it and I don't care anything about it. have resigned to look after my own business.

"I am getting ready to retire as rapidly possible, because it doesn't do any good to m money any more, as the government takes away from you as fast as you make it."

Chemists and Tobacco

The use of tobacco for smoking purposes h ing been attacked on the theory that the comb tion of the weed produces carbon monoxide quantities injurious to the health of the smo and of those who breathe the fumes, a report chemists will have some interest. The expe who have conducted tests for the Americ Chemical Society say that the carbon monox produced is not sufficient to cause apprecia damage.

Thus goes another scare raised by the ar tobacco crusaders. It goes as did the sc raised by Thomas A. Edison, who said that t fumes from cigarette paper would destroy t brain tissue. Both go because they are exa gerations. The truth always lies between e tremes. The fact is that carbon monoxide do follow the combustion of tobacco—but it do not follow that any smoker has asphyxiat himself with the gas produced by cigar, pipe cigarette. The fact that men smoke cigarett without making imbeciles of themselves answe Mr. Edison.

Tobacco is used because people like to use The dispute over the effects of smoking goes because people like to exaggerate. A commo sense view of the case is that the moderate u of tobacco is not harmful to a noticeable exte Considering the pleasure derived from smokin it is safe to say that the possible sorrow fro smoking is at least offset by the contentme achieved.

The medical view of tobacco smoking is indu gent. Sometimes it is humorous, especial when the physician tells a patient he shou smoke or not smoke, after learning that th patient does not or does. Or when chemis deem it necessary to prove that smokers are n gassing themselves into the grave.—*Louisvil (Ky.) Times.*

Machinery in Cigarette Making

(*Continued from page* 19)

c ored. It is well blended to a standard degree c quality; clean, pure and of a most inviting ɐpearance. No hand has touched it since it ʍs unpacked from the original warehouse ɟckages. Automatic machines, cutters, dryers, ɔnveyors and other machinery carries the to- ɟcco throughout the factory during the whole ɯanufacturing process. Experts supervise the ɟbacco as it passes through every stage of the ɯanufacturing process and other experts are ɯnstantly watching every part of the machinery ɹ insure its proper working. The tobacco is ɹw ready to be rolled into cigarettes.

The machines employed in rolling, forming ɐd making cigarettes are the most ingenious ɟ all in the factory.

Making the Cigarette

The shredded tobacco in the "Saratoga" is ɹd into the cigarette-making machines where is taken by drums and rollers and combed. hen canvas revolving belts convey it to "pin- ɔllers" and thence to a metal hopper, from ɥhich it is fed in an even stream to a narrow ɹrip of thin paper which is afterwards rolled to ɔrm cigarettes. The cigarette wrapping is fed to the machines in rolls holding enough paper to make about 60,000 cigarettes. The paper is moved by rubber wheels and is stamped, embossed, or otherwise marked as it passes away from the roll and receives the prepared tobacco.

The rolled cigarette is "sized" or treated with a cohesive substance for gold treatment when gold-tipped cigarettes are required, or it may be tipped with cork.

All these operations are done in a perfectly efficient manner. It would be quite impossible to get cigarettes so uniformly good and measuring up to such absolute standards by hand work. When we watch the hundreds of thousands of cigarettes the machines in a great modern factory are turning out every working day in the year, it is very rarely we can find a single cigarette with a blemish.

Women and girls, dressed in neat uniforms, tend the cigarette-making machines. Sharp eyes and much experience in the working of the machines are possessed by these employes. Their tasks are light, but they have to exercise eternal vigilance to keep the manufacturing processes in operation with the precision of a clock.

Making the Packages

The rolled, bunched, counted, stamped and tipped cigarettes, after inspection are ready for the packing machines. These, making the pouch form of package, pack 50 packages per minute. The machine counts the cigarettes fed to it from a hopper and wraps 20, or any desired number, so carefully that there is no crushing and no possibility of injuring the cigarettes. Two operators supervise the packing machines. One cares for the feeding and one inspects the wrapping.

Machines which pack the cigarettes in oblong boxes, or in cans, are slightly different in some of their details, but work on the same principles as the ordinary pouch machines. A box packing machine counts, wraps and pastes any number of cigarettes in a square or oblong package or box. It wraps the cigarettes in tin foil, or other wrapper, and then in glaced paper. This packing is done in a uniform and very neat manner. Attachments for inserting pictures or coupons or advertising matter in these packages are furnished by the makers. These machines have a daily capacity of from 25,000 to 30,000 packages when operated on 10-hour shifts.

The splendid automatic machines in a modern cigarette factory operate with extraordinary uniformity in turning out tobacco products which everywhere bring honor to trade and country.

Labor Chief Advises Workers to Accept Machinery as Beneficial

Samuel Gompers Points Out Ways in which Mechanical Devices Help the Trades —He Shows the Futility of Opposition—Cites Various Instances Where the Adoption of Machinery Has Brought Vastly Greater Compensation to Operatives.

MACHINERY has a prominent advocate. "Accept the machine, organize the workers," Samuel Gompers tells the American Federation of Labor in the September issue of *The American Federationist,* the official organ. Resistance against new machinery was useless, he said, and presented this conclusion after reviewing the discussion at the Chicago convention last month of the Cigarmakers' International Union, his own craft. An amendment to the Constitution to remove all obstacles to organization of all wage workers in the cigarmaking industry was under debate.

"For quite a number of years I haven't worked at the trade of cigar making," said Mr. Gompers, "but I did work at the bench for a period of twenty-six years of my life, and during all that time I was a hand workman, and for the last twenty years of working at the trade I worked at the Spanish system of cigar making. My personal pride in the trade is really very great.

"I remember working in one of the large shops in New York City, and when we were fairly well organized, as trade unionism was then understood, the question of molds was before the union. In the old Turner Hall in Orchard street, New York, the members divided as to those who would favor a strike against the molds and those who would favor molds. And I remember going with a crowd of the boys who voted to strike against the introduction of the molds if an attempt was made to introduce them.

"And I remember the time when, as a result of that vote, Conrad Kuhn, president of that organization, came to our shop and said, as he did to other shops. 'This shop is on strike,' and not a mother's son of us remained in the shop a minute after. We struck, and it was a hard struggle, we lost and the molds were introduced.

Cannot Fight Machinery

"I am free to say that from that time there came some light to my mind, and I realized then for the first time that it was absolutely futile for workmen to protest against or go on strike against the introduction of a new machine, a new device or a new tool.

"In the old time when the cotton spinning jenny was introduced and the machine put into the textile plants, the men in the industry, enraged at seeing their trade taken away from them, a trade they had to serve several years to acquire, destroyed the machine. Was the machine destroyed? Yes, but was the idea destroyed? No. The blue prints were in existence for that machine, and in any event the scheme and the plan were in the mind of some one who had burned the midnight oil. The machines in the textile industry became universal in every modern country.

"The conditions of the textile workers are not what they ought to be by any means, but were the conditions of old, when the men worked by hand, better than those that now prevail? By no means. The hours of labor were from sun up to sun down, and as soon as artificial light was discovered the men and women and children worked from early morning until late at night, until organization took place among them and reduced their hours of labor from sixteen to twelve, to ten, to nine, and in many instances to eight, and their whole condition was improved.

"The water carriers of Egypt protested when pipe lines were being laid to carry water to some central parts of the cities, because it did away with their trade of carrying water. The rickshaw runners of China raised a revolution because horses were put to wagons to carry people. In some of our cities hack drivers protested against the erection of railroad stations because it took away their jobs.

"Some years ago I had occasion to travel in the southern states, and there I saw, in the middle of the rivers, colored men who were dredging with buckets and long poles. They were getting 20 to 30 cents a day. Wherever men are cheap no machinery is used in industry or any other way. It is only when men are dear and wages are high that machinery is brought in.

The Typesetting Machine

"The Typographical Union has been mentioned. The late President Prescott went before the people and pleaded with them to recognize the Mergenthaler machine, and instead of what would have occurred—girls running typewriting machines to operate the Mergenthaler typesetting machine—it was the printer that was given a chance to learn the trade over again. What has been the result? Wages higher in the printing trades, hours of labor lower, the eight-hour day prevailing in the industry, and on the newspapers the 44-hour week, and the International Typographical Union, to secure the 44-hour week for the printers in the book and job trade, has expended more than $15,000,000. And it has more members and more money in its treasury than before the strike took place.

"The garment workers sewed with the needle, and then there was a riot and a revolt when the sewing machine came in. There are now many tailers who do nothing but make fine clothes by hand sewing. But what has happened to the men in the garment industry? Working, instead of in the old-time sweatshops, in sanitary factories, working not more than eight hours a day, working not more than forty-four hours a week, and a better organization than ever obtained in the industry.

"The miners of old worked with the pick and shovel, and they were slaves in the mines. From miserable conditions, slavish conditions, electrical power has been employed, and the men are earning more wages, working shorter hours, not because they opposed the machine, but because they accepted it.

"The shoe workers, the old cobblers that made shoes before the time of many of you, worked long hours and for a mere pittance. The modern shoe industry requires about sixty-four operations, sixty-four different people to do certain parts of it before the shoe is completed. I ask anybody whether he knows of any trade where the union has recognized the machine or improved tool where the conditions of the working people were made worse. It is not the order of nature and things. The better we organize the more thoroughly will we be in a position not only to defend that which we have, but to move onward and forward for the things which ought to be ours and which we can obtain."

Visconsin's Crop in Retrospect and Prospect

pes, Fears and Sad Reality Reviewed—Plight of Producers Not Pleasant—Might Have Salvaged More from Frosted Fields by Waiting Before Cutting Tobacco.

EDGERTON, Wis., Sept. 23.—As the tail of the 1923 crop is being finished, a al description of the crop harvested, ca general opinion of the crop will rips be appropriate.

king the conditions in the north s a sufficient history of the spring ing season will be remembered by ly bearing in mind that tobacco in orth got off to a splendid start. The weather and hot days of July and half of August held up the general so that the northern crop in general be said to be a thirty-day crop, much as the spurting period of its th was of about that length of time.

Made Good Progress

bout twenty-five per cent, roughly, he northern growing areas enjoyed ient moisture to progress satisfac- ry during the drouth. This came in form of localized showers at hap- rd periods of time, but of sufficient ture volume to cause satisfactory th and progress of the crop steadily ughout the summer. When the ral drouth in the north was broken— t August 20, this tobacco in the favored sections had reached a stage eap full advantage of the marvelous ving weather that followed.

Visited by Hail Storms

Vever, eight or ten severe hail ms zig-zagged about this territory t the time it was ready to harvest. s was in scattered streaks here and e that visited small portions of t every northern county. This ered the supply of promising early hern binders somewhat appreciably.

Early Crops Duly Harvested

the main, this tobacco got safely in sheds. It was earlier than the age crop, and the state has probably er produced binders of appreciably r spread, texture, and luxuriant color. s early fancy tobacco was savagely peted for by several firms early in field, and prices up to thirty-three s a pound were paid for it when it still in the field, and in face of the that the general crop in the south mised to produce the finest binders he history of the state.

The Destructive Frosts

hen just at the time that the late cco had about made up the time lost ing the dry spell, and the crop showed nishing indications of quality, and that packers require when they de- be desirable binders, the devastating sts of September 12 and 13 wrote *finis* n the same destructive cruelty and oughness as did the Japanese earth- ke.

eptember 12 saw about 55 to 60 per t of the northern in the fields. Prac- lly all of the tobacco out at that time wrecked. Of the tobacco in the sheds that time, perhaps ten per cent of it s cut down immediately after rains, and in no condition to cure out as binders. The rest of it will produce more than its share of the finest kind of binders, fit for the best cigar ever rolled.

Situation in Southern Section of State

The growing season enjoyed in the south, up to the time immediately preceding the frost, was ideal all the way.

In the last half of August, the unevenness of the stand had about completely disappeared, and the stand was of record-breaking promises. Field after field greeted the eye, about September 1, with a stand, spread, and color to astound the observer. About eight to twelve per cent of the southern crop was harvested safely, when everything was lovely. Then as the bulk of the work was threatening to get under way, the weather turned very rainy, and very cold at night. Hundreds of acres were mudded in the pile, and many panicky growers harvested their crops, standing green and gumless, in the worst kind of weather. The good growers stood their ground valiantly, and refused to harvest their crop under such conditions. Many were fearful of frost, however, and eyed the thermometer with open uneasiness as it dipped perilously low each night, for that time of the year. Finally it happened, and in one night, practically every crop in the field in the state was irreparably damaged. Crops that growers fondly regarded as the best they ever had grown were grievously perplexing to their owners 48 hours later. They did not know whether it would pay them to harvest it at all or not. It formed the most dismal aspect of blasted hopes, and withered leaves, ever known in the history of the state.

Cut Prematurely

Following the frost, many fields were immediately cut down while greasy and green, some without even being suckered. It will be a terrible mess to handle. Other fields were left standing. After a few days of sun, the weather again changed into long, dreary, rainy days. Last Friday was the first day the sun was out, and farmers foolishly cut down many fields. A week of sunshine now would make fairly good stemming out of many of the fields still out, especially the lower leaves. The production yield per acre will be cut about five hundred pounds, and many of the fields harvested may prove to be of doubtful stemming value.

Buying in Northern Division

Reports come in from the north, that one operator there is paying fifteen cents for ridge fields which are high enough up, in the hope that the lower leaves may be used for binders. Other reports say that this is merely adjustments on frozen crops, bought as binders previous to the arrival of the calamity.

Riding for the shedded portion of the early tobacco is on as hard as ever. Prices up to thirty cents have been reported to have been paid in the south. Where portions of the crops were frosted, on account of being un-harvested, they went along at from six to eight cents straight.

Stemming Buyers

One of the big five stemmers had buyers out offering five to eight cents for fields not so badly frozen. Also, there are rumors of ten cents being offered for the salvaged poundage in sheltered spots.

The Pool "at Stake"

The fate of the pool is again "at stake" as the rehearing of the famous trial of last winter is resumed. The political side of the "venture" must not be lost track of. The pool is largely under the protecting wing of the marketing commission, and the state has been almost solidly "progressive" for a long time. The initial day was Saturday. It will take a day or two to get down to the meat of the affair.

Sampling the 1922 Crop

Sampling of last year's crop goes on. There is some black rot prevalent, but not of an alarming nature. Inquiries on the '22 are beginning to be received.

The popular estimate of the total yield of the fancy crop of '23 binders that actually materialized as binders safely and properly harvested, is in the neighborhood of thirty thousand cases. What there is of it, will be as fine a lot of binders as a manufacturer ever worked.—BADGER.

Edward W. Dixon Passes Away

WINSTON-SALEM, N. C., Sept. 24.—Edward Watkins Dixon, aged 65 years, prominent and influential citizen of Winston-Salem, died at his home 407 Summit street, this morning at 10:40 o'clock, after an illness covering a period of about five weeks. He was critically ill several days and death was not unexpected to members of the family and close friends.

Mr. Dixon was a citizen of the finest type. He came to Winston-Salem in August, 1909, as manager of the local branch of the Imperial Tobacco Co., which position he was still holding.

Mr. Dixon was a native of Pittsylvania county, Va. He was born March 25, 1858. He was a member of one of the oldest and most prominent families of Virginia. He was a graduate of Randolph-Macon College.

New Porto Rican Inspection Tax Law

At the special session of the Porto Rican Legislature a new bill was passed and the act went into effect September 17, to protect Porto Rican tobacco. A special Inspection Tax is levied instead of the former Stamp Act. Under this act all cigar manufacturers, leaf tobacco dealers and packers will receive the stamp free of charge. The Inspection Tax act calls for five cents a thousand cigars or fraction thereof, and ten cents for each 100 pounds of leaf tobacco or fraction thereof.

Joseph Holzman Dies in Vienna

A cablegram was received in New York, Monday, announcing the death of Joseph Holzman, the leaf tobacco importer of 185 Water street. Mr. Holzman passed away very suddenly last Friday in Vienna, presumably from pneumonia. His wife and youngest son, Harold, were with him when the sad end came.

Mr. Holzman was 65 years of age. For forty years he had been engaged in the leaf tobacco business, in the Water street section of New York, and his honorable dealings and straightforward business methods won for him the confidence and esteem of everyone with whom he came in contact. For this reason, the news of his untimely passing comes as a shock to his many friends.

Mr. Holzman and son, Harold Holzman, had been in Europe for some time, attending the tobacco inscriptions in Amsterdam and Rotterdam, at the conclusion of which they journeyed to Vienna, where they were joined by Mrs. Holzman, and were visiting relatives of Mrs. Holzman when he was taken ill.

For many years it had been Mr. Holzman's regular custom to visit the tobacco sales in Holland, and his splendid knowledge of tobacco enabled him to buy intelligently; and his purchases were always made with a view to satisfying and supplying the requirements of his large clientele, all of whom implicitly trusted his judgment and integrity. He knew the wants of his customers and had the will and the ability to gratify every reasonable want.

Fortunately for the leaf tobacco house of Joseph Holzman, the business is left in excellent hands. The sons have been thoroughly schooled in the correct business practices and naturally inherited the noble characteristics of their deceased father.

Joseph Holzman was essentially a family man, and in his domestic relations was a most devoted husband and father. Besides the widow, he leaves three sons, Samuel B., Abraham and Harold W.; four daughters, Saidy (Mrs. Holzman), Bessie H. (Mrs. Greenwald), Mamè H. (Mrs. Slater), and Freda (Mrs. Zeirler).

The body is to leave Europe October 3, in the S. S. *Majestic*, due to arrive in New York October 9. Funeral services and interment will follow at the convenience of the family.

Market Observations

By A. LERT

The most interesting development in seedleaf circles during the past week was the publishing of the prices of the Connecticut Leaf Tobacco Association's various grades of 1922 Connecticut Broadleaf. Judging from reports which have been received, a large proportion of this tobacco has been spoken for, for some time by most of the leading manufacturers. While the sampling has not been completed, the probabilities are that there there will be little binder tobacco available in Connecticut after these of-

[Th]e cigar industry on the whole has [be]moving along rather actively and [in] the threatened trouble in Tampa [ha]l at least for the time being, it [sh]l not be surprising to see record [ma]facturing conditions and progress [in] the next thirty or sixty days.

[C]o-ops. Get Reverses

[AN]DERSON, N. C., Sept. 22.—Rather [a] sledding has been the lot of the [To]co Growers' Co-operative Associa-[ti]n its court action in the past few [da]. In Nash county superior court at [Sa]ville, N. C., last week, Judge George [Co]nnor denied the permanent re-[str]ing order sought by the association [ce]st certain of its members to enjoin [th] from allowing their non-member [ac]ts to sell their tobacco save through [th]ssociation, and also held that where [a] rop was covered by a lien or mort-[ga]this lien or mortgage took prior [to] over the association contract.

[It] is understood here that an effort is [be] made to advance all cases now in [co]ion affecting the control of the co-[op]tive association, for an early hear-[in]the Supreme Court of North Caro-[li]In addition to the ruling by Judge Connor, virtually the same question is involved in a five-hour argument before Judge T. H. Calvert, in Wake county superior court also last week. Judge J. Lloyd Horton, of Pitt county, in superior court, also has held much the same as has Judge Connor.

In Nash county superior court, where Judge Connor made a ruling, the specific case in question was that of the co-operative association against J. W. T. Eason. The plaintiff sought a permanent injunction whereby the defendant would be held responsible to the association for the tobacco raised on his land, which he had rented to tenants, and whereby five cents a pound penalty could be collected for tobacco which the tenant, not a member of the association, sold on the open market.

The gist of the court's ruling in dissolving the temporary injunction and denying a permanent restraining order was, it is explained, that where a landlord, who is a member of the co-operative association, makes a valid, binding lease for money rent and the tenant is not a member of the association, the tenant can sell his tobacco on the open market and the landlord is not subject to a restraining order. A number of similar cases where the question of landlord and tenant was the issue were also tried and settled the same way.

The other specific case in which the mortgage of lien was involved was that of the co-operative association against W. H. Brannan. Here the court held that the mortgagee or lienee had prior claim and that the crop should be turned over to them. A report, however, is to be made to the court upon the amount of tobacco and its disposition. The ruling in both these cases is declared to have great significance and the hearing was followed with greatest interest. Not only were permanent restraining orders denied the association, but Judge Connor issued an order prohibiting the association from charging a member landlord the five cents a pound penalty for tobacco which his non-member tenants sold on the open market. Judge Connor's ruling was in line with the decision handed down by Judge Horton in Greenville last week.

Dark Tobacco Co-ops. Elect Directors

(*Special Telegram to* TOBACCO)

HOPKINSVILLE, Ky., Sept. 24.—The election of directors for the Dark Tobacco Growers' Co-operative Association, which was held throughout the dark tobacco district today, brought a number of changes in the personnel of that body.

The selections were made by the delegates in each of the twenty-three districts, into which the dark district had been divided, who were elected Saturday by the votes of the members.

Some of those who were not re-elected were among the prominent members in the association during the past year.

In every district the race was warm and a deep interest was shown by the members.

Among those not re-elected were N. P. Hutson, of Murray, who was defeated by J. B. Swann; Charles Rogers, of Owensboro, who was defeated by George Rudy; Ed Williamson, of Fulton, defeated by E. A. Hilliard; W. B. Ford, of Carthage, Tenn., defeated by Terry Humble; J. B. Hewlet, of Princeton, defeated by Dixie Satterfield; Jesse Farley, of Henderson, defeated by W. H. Cabbell; G. W. Hull, of Calhoun, defeated by A. B. Tichenor.

Some of the old directors were not candidates for re-election, these being, R. L. Jackson, of Dixon, who was succeeded by W. H. Ogden; Claude Cocke, of Clarksville, Tenn., succeeded by W. W. Riggens; R. E. Cooper, of Hopkinsville, succeeded by Dr. O. L. Barnes; Reams Farmer, of Adams, Tenn., succeeded by Jerry Long; P. A. Day, of Logan

Points Out Menace to the Tobacco Industry

In a letter to Charles Dushkind, managing director of the Tobacco Merchants' Association, commenting on an anti-tobacco communication which was published in a recent issue of the *New York Herald*, Clarence J. DuBrul, president of the Miller, DuBrul & Peters Mfg. Co., makers of tobacco machinery, agrees with one assertion of the writer, and points out the menace to the industry created by the action of careless smokers. Mr. DuBrul says:

"I was greatly interested in reading the letter, which appeared in a recent issue of the *New York Herald*, not so much because of the obvious propaganda of the anti-tobacco interests, but because the writer of the letter, consciously or otherwise, has touched upon the only thing that can help to cause another prohibition amendment—one against tobacco.

Clarence J. DuBrul

"While, of course, his inferences to a great extent are the exaggerated expressions of a professional reformer, and he has resorted to the over useful plan of introducing staggering figures to carry his point, at the same time he sounds a warning that everyone interested in the furtherance of the tobacco industry, and the suppression of unfavorable propaganda and legislation, can well give ear to.

"I refer to his statement—'No indulgence ignores the comfort of the rest of the world so completely as tobacco. No habit makes its victim so indifferent to the rights of others.' There lies a real menace to the peace and comfort of the tobacco industry in these United States of America.

"While we can easily discount the statements of the evil effects resulting from the ashes of the 5,839,707,747 cigarettes being spread out, and while no one will spend any uneasy nights in fear of our cities being buried under a similar avalanche, we cannot overlook the thoughtlessness of many smokers who dispose of their cigar and cigarette butts and lighted matches wherever they may fall.

Fires Due to Careless Smokers

"Statistics indicate that a large percentage of summer fires are caused by the careless smokers who throw their finished butts or matches out of open windows, to light on and ignite awnings below them.

"Everyone is familiar with the man who is careless of the rights and comforts of others as to smoke in crowded elevators.

"Large hotels are compelled to keep constant watch on the smokers in the lobbies, who, when they have finished their smokes, carelessly toss the remnant of their cigar or cigarette into the nearest waste-paper basket, on the floor covering or the hardwood floors themselves. Also, the thoughtless individual who burns holes in the table and bed linens.

"If anti-tobacco legislature ever does become an actuality in this country, the smokers can blame only those members of their fraternity who, through their carelessness and complete disregard of the rights and comforts of others, brought it about.

"Smoke With Caution"

"I would like to paraphrase that splendid slogan of the American Automobile Association, 'Drive with Consideration,' to make it read 'Smoke with Consideration,' and see it given national prominence in every possible way, where it can reach the smoker, and drive home its message of warning. Retailers could display it in their stores; it should have a place in every form of advertising that reaches the smoker. The smokers should be made to realize that in their hands alone lies the continued privilege of enjoying their cigars, cigarettes and pipes. They can dispel the dark cloud of propaganda that is forming on the horizon of the tobacco industry, or by their indifference to the rights of others, add to it, until finally it bursts and wipes away the last vestige of their rights to enjoy the 'blessed weed.'

Appeal to T. M. A.

"I would like to see the T. M. A., with its splendid organization and its reputation for getting things done, get behind a movement of this sort and enlist the smokers themselves in a campaign of self-interest, whose motto could well be—'Smoke with Consideration.'"

MACHINERY IN TOBACCO INDUSTRY

We are living in what may be very justly termed the Machinery Age. Industry and commerce is now very largely carried on by machinery.

Everywhere labor-saving devices are used in order to expedite the movement of commodities, supplies and raw materials in factories. This general use of machinery is the result of the increased employment of capital in industries.

All branches of manufacturing have been revolutionized in recent years by the use of modern machinery and the improved processes they enable manufacturers to employ.

The tobacco industries have, perhaps, felt the benefits of the increased use of machinery more than most others. It resulted in greater outputs, cheaper costs and improved products. Machinery has changed the whole aspect of tobacco manufacturing during the past two decades.

The expansion following its widespread use has enabled manufacturers to employ more highly technically educated officials and men.

And these efficient experts have assisted in standardizing and developing to the utmost every small detail of the innumerable processes in the vast field of tobacco treatment between the harvesting of the leaves in the fields to the marketing of the various products in the world's markets.

Every step taken in bringing about increased production has been the result of technical study. And every advance thus made has led to further improvements in a cumulative manner in each unit of production.

And, or course, each improvement made in each tobacco process unit has resulted in corresponding improvements being made in many other allied industries.

American inventive genius has always been in the forefront in inventing and improving tobacco machinery. Away back in the early colonial days, patents were secured for tobacco machinery.

The ingenious automatic cigarette-making machinery brought to a successful accomplishment in the early seventies was the result obtained by American inventors. The impetus given to cigarette making by their general adoption in our factories stimulated inventors to improve the machinery, methods and processes in all the tobacco industries and paved the way for the wonderful prosperity of our tobacco industries today.

Great, however, as the results have been, there cannot be any doubt that within another decade we shall witness even greater triumphs resulting from new inventions and improvements in tobacco machinery and processes. There can be no finality in the status of perfection of tobacco products.

The latest trend of inventors has been towards the perfection of machinery for the automatic manufacturing of cigars. Many of the country's brightest minds are now concentrated upon the problem of cigar making machines.

Great success is already attained in this new branch of the industry. There are plants now in operation which are turning out excellent cigars, which are quite indistinguishable from the finest hand made cigars, where the tobacco is completely transformed from the leaf to the finished and boxed cigars entirely by machinery.

It seems now that in the immediate future the hand-made cigar will become as rare as the hand-made plug. The foundation for the machine manufacture of cigars is soundly laid and the superstructure is well advanced.

LETTER CARRIER AND LECTURER

Through the trees the evening breeze came sighing. In the grass, numerous insects sang the chorus of a song at twilight. Gold and red faded from the western sky. Stars appeared. Softness and languor were mingled with the darkness of a summer night. Off duty, alone, seated on a bench in the park, a postman smoked a cigar. In the dark, toward the hall where he was billed to lecture on "The Curse of Nicotine," a zealous disciple of Dr. Pease was toddling. A glow of fire at the end of a cigar caught the attention of the "anti." The aroma of burning tobacco incensed the lecturer.

A nearby tree cast a friendly shadow, yet there was light enough for the lecturer to see that the smoker wore the uniform of a letter carrier. "Woe!"

Provoked by the thought that the odor of a vile weed would attach to the clothing of a public servant and, horrible possibility, a contaminated garment might impart a scent of tobacco to letters received or sent by those doing their utmost to discourage smoking, the lecturer proceeded to reprimand the postman.

In uttering his displeasure and reproof, in denouncing the custom of smoking, in voicing total condemnation of the tobacco habit, the lecturer started to give the fuming postman a snappy part of the lecture that was to be delivered later that evening.

Apparently the letter carrier was tired and disinclined to hear a lecture. Nor did he care to be hectored by a stranger. "G'wan," he requested, disgustedly, "don't talk to me."

"I will talk," the lecturer insisted, "I must tell you that your filthy cigar smoke is most offensive. Moreover, by smoking, while in uniform, you will give the smell of tobacco to the mail you handle."

"I'm not on duty now. I can smoke if I choose. I don't have to get your permission. This is a free country," the letter carrier declared. "It's an outrage," the lecturer retorted. "No letter carrier ever should be allowed to smoke."

"Pooh!" exclaimed the letter carrier as he blew out a cloud of smoke.

Half an hour afterward, to a small and not entirely sympathetic audience, the lecturer attempted to describe what had occurred. "Unable to answer me in any other way, the rude fellow deliberately puffed a mouthful of smoke in my face. It was awful. Unavoidably, I was environed by the poisonous fumes of tobacco. I almost choked, I nearly strangled. Quickly I made my escape from the sickening vicinity of that wretched cigar."

If the lecturer intended to be truthful in describing his chagrin and discomfiture, he didn't succeed. Either he was ignorant of facts concerning tobacco smoke or he was guilty of gross exaggeration when he suggested that a whiff of vapor from a cigar is poisonous.

In tobacco smoke, however dense it is, even in big quantities, there is practically no carbon monoxide. Nor would any cigar, in burning, give forth a gas capable of poisoning a man.

Carbon monoxide is a deadly gas. While tinkering a motor car, more than one amateur mechanic has been killed by carbon monoxide. In every garage where used automobiles closely housed, carbon monoxide may be gerous. In tunnels open to motor traffic, elimination of carbon monoxide is an engin ing problem having the importance of life death. Anti-tobacco agitators might serve manity more acceptably by warning peopl beware of carbon monoxide. But no, they w time attempting to show, in tobacco smoke, and dangers that do not exist.

To demonstrate scientifically the fact tha bacco smoke may be re-breathed with pe safety, a number of smokers recently placed in a closed room. In there, with al doors and windows tightly shut, they sm persistently. Each making his choice, smoked cigars, cigarettes and pipes. Ha Manila, Porto Rican, domestic and Me cigars contributed to the smoke cloud. Ci of various wrappers, descriptions and c were consumed to insure the completenes the experiment. Puffs from Turkish, Vir and blended cigarettes assisted the air to bec thicker and more blue. Burned steadily expertly in well-seasoned pipe bowls, nume brands and mixtures of smoking tobacco, in ing the best products of Kentucky, the Carol Virginia and Tennessee, some of the mixt being strongly flavored with Perique, incre the opacity of the atmosphere. The air gre irritating to eyes that the smokers had to goggles for protection. But not a man Nor did one falter. Vigorous smoking tinued for an hour and a half. Then the a the room, so filled with dense tobacco sm was analyzed by scientists.

In that roomful of tobacco smoke, the ca monoxide was inconsequential, infinitesima dangerous gas of any kind there wasn't en to poison a baby mouse. The harmlessne tobacco smoke, to those who breathe it, was vincingly attested.

Oft repeated, an accusation may be bel by those who have no opportunity to know ter. In the past, the unsubstantial stater of "antis" obtained some credence, perhaps cause a denial of the ill effects of tobacc not been made authoritatively.

Where research seemed inadequate, or v information as yet was indefinite, there cou a difference of opinion. Even on vital ma experts did not always agree.

Utilizing shamelessly whatever room was for doubt, opponents of tobacco proc to crowd into their arguments anything might persuade people to think unfavorat smoking.

Ancient superstitions, wrong deduction titious statements, allegations that ha foundation in fact, were the principal we in the armory of the "antis."

Today, they are divested of advantages once had. The effects of tobacco on the h system, generally, have been ascertained. stead of being detrimental, under variou cumstances, smoking has been shown to least, mildly beneficial. Truth, demonstrat scientists is an effective refutation of the ments frequently made by anti-tobacco agit One by one, the cherished theories of to phobes have been exploded.

The stale lies, concerning cigarettes laughed at; only derision is evoked by the fying announcement that poison, enough a cat, can be found in any cigar. No se person believes the assertion that pipes a sidious destroyers of health.

Investigators eminent in medical scien not argue that the use of tobacco is injuri men. Leaders in research could not be ir to recommend the prohibition of tobacco.

Those most vociferous in associating with smoking usually are on par wit lecturer who reported that he was "poison a whiff from a cigar.

In extenuation, the molested letter c who blew smoke in the lecturer's face, plead that such action was justifiable and sary in the abatement of a nuisance.

ne Production and Consumption of Tobacco Shows Large Increase

Since Colonial Days Acreage Devoted to Tobacco Has Steadily Been Increasing—Notable Changes Brought About by Experiment Stations — Many Difficult Problems Solved — Various Saving Systems Inaugurated — Interesting Facts.

VER since early colonial days when the settlers learned from the Indians the comforts of tobacco, the acreage devoted to the crop has steadily been increasing, and in recent years the per capita consumption has ne steadily greater than it was a quarter entury ago. Through most of this period, wer, the increase in the total production bacco was brought about by regular ad- s to the acreage, new sections adapted to rowing of the plant being discovered in is parts of the country. The per acre in many of the areas which grew tobacco ome time did not hold its own. In the place little was known about the relation- between different soils and different types bacco. The plant had been improved only ly by breeding; diseases and pests were understood.

Noticeable Change Wrought

the last 25 or 30 years, however, a notice- change has been brought about in the co-growing industry, largely due to the ef- made by careful investigators at a number periment stations and in the United States rtment of Agriculture. The yield per acre. d of going down hill, is now on the up , and it is probable that the adoption of ew methods and improved varieties, and ore careful selection of types for different that our tobacco production can be greatly sed without the development of any new or extension of acreage in the old ones. department has worked on all sorts of co problems from the planting of the seed e placing of the finished product in the of the manufacturers; it has even gone r as to investigate some of the manufac- s' problems, and now has information bids fair to save much money for the er and all others interested in supplying ublic with smokes.

ny of these difficulties which the soil men, ntomologists, the chemists, plant breeders, logists, and bacteriologists have worked are extremely interesting. Even the ists were greatly surprised at many of the s. For instance, everyone used to think he fermentation of tobacco in the curing ss was caused by bacteria, just as is the ntation of apple juice in the manufacture der and vinegar, but they found out that e case of tobacco bacteria had nothing to ith it. It was found that the leaves of co contain certain chemical compounds n as enzymes, which, under certain con- s of moisture and temperature, produce ntation. This discovery has led to great vements in the curing of the leaf. Tests made to find out the limiting temperatures e pile of tobacco, and now it is possible e use of the thermometer to control the g and greatly to increase the percentage gh grade tobacco.

g Saving in New Curing Method

re exact curing methods are now used, in e principal tobacco-growing districts. In orthern districts where it was thought to ressary to cure tobacco in cases, it was that bulk curing could be carried on just was in the southern districts. The adop- of this method, since the limitation of rature and moisture have been understood, ved the investors many millions of dollars. ry tobacco man, and a great many other , are acquainted with the marvelous de- velopment of the shade-grown tobacco industry in the Connecticut Valley. This present extremely prosperous industry is built upon the foundation of Government investigation. Formerly this district had produced a domestic-wrapper tobacco, the best of which sold for around 20 cents a pound. Wrapper tobacco from Sumatra at the same time sold for $3 a pound or more. By making tests of the tent method of growing tobacco it was found that under these cheese cloth shades conditions could be produced very favorable to the growing of Sumatra tobacco in Connecticut. What this meant to the cigar-making industry may be realized from a description of this Sumatra leaf. It is large, very thin and elastic, and of a beautiful, satiny texture. A pound of it will cover a thousand cigars. Although it costs from 10 to 20 times as much as the domestic wrapper, it is largely used by the trade and the growing of this crop under cloth has become the principal industry of a large section of the valley.

Another discovery, for which the tobacco grower shows his appreciation by its use, is that of the steam sterilization of tobacco beds. Before this tobacco innovation was thought of, the grower sometimes had great difficulty in growing plants for transplanting into the field. They would become diseased in the bed with resulting large losses. Weeds also caused much trouble to the young plants. Now the careful tobacco grower eliminates both of these difficulties by going over the bed with a steam sterilizer, which kills the weed seeds and destroys the disease organisms which would attack the young plants. As a result, the production of good healthy young plants is now relatively easy.

Diseases Difficult Problem

If disease attacked the tobacco plant only during the early stages of its growth in the bed the tobacco grower would have an easy time indeed, but there are many other diseases which ravage the plants in the fields. One of the most destructive of these is the one known as mosaic, which interested and puzzled plant pathologists for a long time. They have now found out that it is a specific infection, that a certain definite germ causes the trouble. In addition to this, they learned that insects are a factor in carrying it from plant to plant. Following the discovery other investigators learned that the same disease or at least a similar one, attacks other agricultural plants—the potato, for instance.

In the South the growers have suffered a great deal through losses produced by a wilt which has been named the Granville tobacco wilt. The Department of Agriculture worked out a rotation system which has greatly reduced the losses. No cure has been found for the disease, but the farmer now knows how to keep out of its path.

In regions of thin, light soil, tobacco farmers have long talked about a supposed disease which they called "sand drown," a very expressive name which, however, did not tell the truth. It was not too much sand, according to recent discovery, but the lack of magnesia, a fertilizing element which is not generally recognized by farmers as being useful to plants. Usually enough of this element occurs in the soil to take care of the demands of any crop, but on these particular soils it has been found that the lack of magnesia caused the sickly appearance of the plants, which led growers to believe that some disease had gained entrance to their fields. By adding a small amount of magnesia to the fertilizer it is possible to make up for that taken out by the leaching of rain. It is now no longer necessary for tobacco farmers to suffer loss from "sand drown." All they have to do is to change the plant's rations slightly.

Great Advance in Breeding

Some of the greatest advances have been made in the field of plant breeding. One particularly interesting variety has been developed by the department. It is now known as Maryland Mammoth, and the word mammoth describes its outstanding characteristic. Most tobacco varieties can not be fed too heavily without danger that a plant with a large, coarse-textured leaf will be produced. The heavy leaf brings a low price, which usually more than offsets the increase in yield. The Maryland Mammoth has a great capacity for growth. It can be fed heavily with fertilizers and will pay good returns for them, while at the same time it produces a leaf of excellent quality. This variety was such a luxuriant growth that difficulty was experienced in getting it to produce seed. It was during the progress of the experiments in trying to solve the seed production problem that the momentous and fundamental discovery was made of the influence of the length of day upon the growth, flowering and fruiting of the plants. This discovery has attracted the attention of scientists throughout the world, and promises to produce great scientific and practical results.

Tobacco-breeding work has produced valuable results in other sections. In the burley districts the growers formerly discarded their tobacco ground after one or two years because of the destructive effect of black root rot, to which burley tobacco was particularly susceptible. Tests run on a large number of plants brought out the fact that some of them were resistant to the disease, and now resistant varieties make it possible for these tobacco growers to continue growing burley tobacco on their fields year after year. The same principle has been applied to other varieties in many regions. In Pennsylvania and Wisconsin, as a result of much experimental work and adaptation of varieties, large areas are now devoted to the growing of broad leaf and Havana seed leaf tobacco.

In the districts where tobacco is cured without artificial heat, there is occasionally a great loss because of bad curing, which, of course, makes it impossible to get the maximum price for the leaf. Since more than half of the tobacco produced in this country is cured without artificial heat, bad weather is a big factor in determining whether there will be a profit or loss. Experiments carried on by the department have shown that a certain amount of heat used at the critical time will make it possible to cure the tobacco just as it would be cured if the most favorable weather conditions existed from start to finish. In the sections where heat is ordinarily used for the curing, that is, in what is known as the flue-cured tobacco districts, improvements have been made in the ventilation of barns which have resulted in greatly improving the quality of the tobacco. In preparing cigar tobacco it is packed and allowed to ferment, and sometimes big losses are experienced because of too much moisture in the leaves. Through investigations the most desirable moisture content has been determined, and it is now possible to avoid much of this loss.

Sixty Billion Cigarettes a Year

The great increase in the popularity of the cigarette, which is now being produced at the rate of about 60,000,000,000 annually in this

country as compared with 5,500,000,000 in 1905, has resulted in the change in the demand for different types of tobacco. In the Carolinas and Virginia, where a large part of this tobacco is produced government experimenters found it possible to get a more desirable leaf for this purpose, not by changing the type of variety but by modification of the harvesting methods. They found that by picking the individual leaves instead of cutting the stalk with the leaves attached, a lighter and more desirable cured leaf was produced, and this practice is quite generally followed at present.

While plant breeders, soil specialists and pathologists were working out some of these problems, entomologists were also doing their share for the improvement of the industry. Among many other things they have found a satisfactory method for fighting the horn worm, a most important pest to the growing crop of tobacco. Years ago growers depended upon applications of Paris green, often with the result that the tobacco was badly burned and the crop a partial failure. Arsenate of lead was developed as a substitute, and an employee of the department developed the first hand apparatus for applying the poison dust to the plant. Horse-drawn dusting machines also have been developed, with resulting saving of labor in addition to practically eliminating damage formerly caused by the horn worm.

Insect Damage Reduced

In northern Florida and southern Georgia the bud worm caused much damage, and in the early days this pest was poisoned with a mixture of Paris green and corn meal, but when rain fell soon after application there was great damage to the plant. Now arsenate of lead is used along with the meal with great success, and it is estimated that by its use the growers in this locality save as much as $100,000 each year.

The tobacco beetle, which is very destructive to stored and manufactured tobacco, is now controlled by fumigation, a process worked out by the department. In addition to these pests, of which the beetle and the horn worm together in warehouses and in the fields caused enormous damage, there are a number of other minor destroyers for which effective control methods have been devised. Poison bait is now used to combat the cut worms.

Other means for fighting the flea beetle and the thrips, and recently it has been found that the tobacco crambids and wire worm may also be attracted by the poison bait.

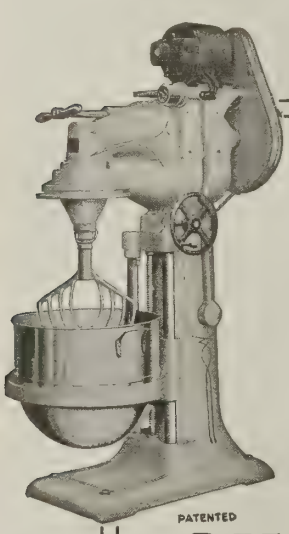
This résumé of these various activities in the interests of the tobacco industry leads to the belief that there is nothing more to be done, but there still remain many problems confronting growers, handlers, and manufacturers, and scientists of the department are at work on them. Only recently work has been done on the solution of the problem of producing a cheap substitute for the cedar wood used in cigar boxes, and results obtained so far give promise that the problem has been solved by the use of a cedar oil with which paper inserts for boxes can be impregnated.

The Firpo Cigar

Tobacco manufacturers in Argentine are making the Firpo, a new cigar—which is probably very strong. The "letters from the people" columns of the daily press are overflowing with outbursts of patriotism. Sporting goods stores have Firpo, as a manikin, in their windows. The police are so busy keeping sidewalks clear, before windows in which the Firpo manikin or picture is displayed, that they can pay but little attention to the automobile traffic.

Truly, the human race is not nearly so interested in the Ruhr, the Balkans or Corfu as in the Dempsey-Firpo slugging match. The prize ring is the quickest, though, perhaps, the roughest, means to fame and wealth.—*Fall River (Mass.) Globe.*

Significant



James B. Duke, who has been a leader in tobacco business for many years, made a significant statement yesterday. After explaining that he had resigned from the British American Tobacco Co., he said: "I am getting ready to retire as rapidly as possible, because it doesn't do any good to make money any more as the government takes it away from you as fast as you make it." Our tax laws are not only driving able men out of business, but they are forcing capital into tax exempt securities and away from constructive enterprise. The gentlemen of the incoming Congress will do well to keep this fact in mind when considering tax legislation.—*Boston Post.*

"Good Times Ahead"

Reports made by a dependable observer are advantageous in any endeavor to ascertain actually what is the outlook for trade. On the judgment of a man who knows cigar business from coast to coast, reliance can be placed. An experienced and important salesman who recently completed a long cross-country trip declares unhesitatingly that he is able to see good times ahead. He believes firmly that conditions are favorable. To him, the situation seems promising, despite anything that pessimists may say. He predicts that sales will be increased largely in coming months. In his opinion, the demand for cigars is becoming strong throughout the United States. He prophesies that the Christmas season of 1923 will be very good indeed.

Prosperity is wrapped up in the supposition that a manufacturer can be sure of fair prices and an unfailing market for his output. Success is facilitated where the merchant has assurances that goods will sell readily and steadily.

"What people in the cigar industry need most at present is the proper psychology," the salesman asserts.

IF YOU MIX "Gum Trag" IN YOUR SHOP YOU SHOULD INVESTIGATE THE QUALITIES OF THE READ 3-SPEED PASTE MIXER.

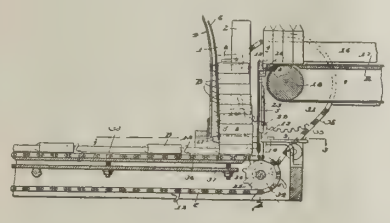
Patents Recently Granted

By U. S. Patent Office

1,467,018. MACHINE FOR SEALING CIGARETTE PACKAGES OR THE LIKE. James N. Tzibides, Brooklyn, N. Y., assignor to R. J. Reynolds Tobacco Company, a Corporation of New Jersey. Original application filed Aug. 2, 1920. Serial No. 400,690. Divided and this application filed June 3, 1921. Serial No. 474,604. Renewed May 22, 1923. Eighteen Claims.



1,467,018

A machine for handling cigarette packages or the like after a seal has been freshly applied over the end thereof comprising a passageway along which the packages may be fed in a column, a pusher for recurrently advancing the packages along the passageway, means synchronized with said pusher for inserting a new package into the passageway in advance of the pusher each time the pusher is retracted, and means for holding the portion of the freshly applied seal on the rear side of the rearmost package against the package while the pusher is being retracted and the new package is being inserted.

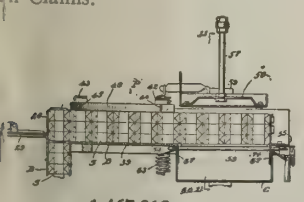
* * *

No. 1,467,020. MACHINE FOR HANDLING PACKAGES. James N. Tzibides, Brooklyn, N. Y., assignor to R. J. Reynolds Tobacco Company, a Corporation of New Jersey. Original application filed Aug. 2, 1920. Serial No. 400,690. Divided and this application filed June 3, 1921, Serial No. 474,604. Renewed May 22, 1923. Eighteen Claims.

1,467,020

A machine of the character described comprising a runway for packages, a hopper extending downwardly from the delivery end of the runway and adapted to receive a plurality of packages in superposed arrangement, and means at the delivery end of the runway to cause the packages to drop in predetermined position into the hopper.

* * *



No. 1,467,021. LABEL-APPLYING DEVICE. James N. Tzibides, New York, N. Y., assignor to R. J. Reynolds Tobacco Company, Winston-Salem, N. C., a Corporation of New Jersey. Filed

(*Continued on page 64*)

machine of the character described for closing the ends of cigarette packages or the like of the end-opening type and affixing stamps thereover, combination of means for applying a seal of a stamp to the side of each package adjacent the open end with the end of the stamp projecting beyond the end, and means for concomitantly folding the open ends and folding the stamp over said ends.

"United" Buys Canadian Namesake

WINNIPEG, Can., Sept. 25.—The string of tobacco stores operated by the United Cigar Stores of Canada, Ltd., has been purchased by the United Cigar Stores of the United States, it was stated today. The amount involved was said to be close to $1,000,000. The American corporation has operated stores in many Canadian cities under the name of "Service Tobacco Shops."

Am. Can Co. Dividend

A quarterly dividend of one and one-quarter per cent has been declared on the common stock of the American Can Co., payable November 15, 1923, to stockholders of record at the close of business October 31, 1923. Transfer books will remain open.

Bayuk Cigars, Inc.

Quarterly dividend of 1¾ per cent on First Preferred stock, and 2 per cent on the Second Preferred stocks of Bayuk Cigars, Inc., have been declared payable on October 15, 1923, to the stockholders of record September 29, 1923.

Foreign Exchange Rates

In the subjoined table the quotation on sterling represents dollars and decimals of a dollar; all others represent cents and decimals of a cent. Quotations preceded by the decimal mark indicate a price measured in fractions of a cent.

Parity of exchange is given as reported by the United States Mint, except in countries with a silver standard, where parity fluctuates with the price of silver.

Universal to Reduce Expenses

emarks to stockholders accompany-nual report of Universal Leaf To-Co., W. A. Willingham, who be-president on May 30 of this year, ns the reduction from $3 to $2 in arterly dividend rate on the com-stock. The company's policy, he s will be from now on one of strict chment, together with operation on orrowed money from banks. In his he says:

ur company has adopted a policy sict retrenchment in so far as op-g expenses and outlays of capital ncerned, which constructive policies esult in substantial reductions in ing expenses as compared with the us year.

l ring the year the management ar-l to discontinue practice which has led since the formation of company elorsing the notes of affiliated com-. At the time of issuing this state-the contingent liability existing as ne 30 on account of such endorse-had been greatly reduced and be-he next annual statement is issued l be eliminated.

accordance with by-laws of your ny a minimum of 1 per cent of nding preferred stock must be in the sinking fund annually for ment. During the year there has placed in the sinking fund preferred amounting to $850,500, bringing of that fund to $945,500, equivalent o about 10 per cent. of outstanding

bacco sales since June 30 have exceeded rate of business done dur-e past year which, together with a increase in trade inquiries, leads us lieve the current year will be a sat-ory one.

ur president assumed his position ay 30, 1923, after having been one s officials since organization. It be the policy of your president to re the company on less borrowed from the banks. After careful of the company's position and cts, and in order to conserve its cash resources, it shall be my recommendation to the next meeting of the board of directors that the dividend heretofore paid on the common stock be at the rate of $2 for the next quarter instead of $3. This recommendation has the approval of your company's finance committee."

The consolidated balance sheet of the Universal Leaf Tobacco Co., Inc., as of June 30, 1923, follows:

Assets: Cash, $2,378,869; accounts and notes receivable, $2,917,832; marketable securities, $9,845; inventories, $11,594,811; deferred assets, $526,979; investments, $2,095,982; preferred stock sinking fund, $945,500; land, buildings, machinery, etc., less depreciation, $2,876,027; good will, organization, etc., $5,023,300; total, $28,369,145.

Liabilities: Common stock, $5,379,300; preferred stock, $9,500,000; subsidiary companies' profit participating managers' shares, $268; dividends payable, $349,479; loans payable, $7,112,073; accounts payable, $253,427; deferred charges, $23,000; surplus, $5,751,598; total, $28,369,145.

Umbrella Tobacco Proves Right to Name

Wherever a group of tobacco growers get together these days they each try to impress each other that they have the largest leaf and it is a fact that quite a few of them do have stalks in their fields of unusual size.

During one of the story telling sessions a Drumore farmer, who is one of the township's most successful tobacco growers, and this year has one of the finest crops he ever grew, told of an incident which happened in his tobacco patch. In working in the tobacco with his two boys, who help him all during the summer, a heavy rain came up and they all hurried toward the house. When they arrived at the house one of the boys was missing and after the rain was over he was looked up and found under one of the stalks, perfectly dry. The variety of tobacco this farmer grows is known as "Umbrella Tobacco" and it proved its right to its name in this instance.—*Lancaster New Era.*

New Orleans News

NEW ORLEANS, La., Sept. 22.—While business in general has slowed up during September, for several reasons, it is predicted that there will be a wholesome revival with the advent of cooler weather in October. Absentees who sought relief from the hot period in New Orleans by wandering away to the seaside and mountains are returning home.

Several thousand carpenters have been on a strike, which has delayed an immense amount of construction, now partially held in abeyance, a condition which has been considerably aggravated by a strike of all the longshoremen, both white and colored, along the river front, thus placing an embargo, as it were, on the handling of both inward and outward bound ocean freights. The situation is critical, but an early adjustment of the trouble is looked for.

The harvesting of the cotton, rice and sugar cane crops, now reaching maturity, will increase the demand for labor, quicken the circulation of money, and give an added impetus to trade. Cane grinding begins Oct. 15.

L. M. Haynie, in charge of the cigar department of H. T. Cottam & Co., is "doing" Shreveport, Alexandria, and the adjacent sections of the State.

C. B. McClemrock, manager of the distributing branch of the General Cigar Co., in Magazine street, has just returned from a trip to northern Louisiana.

Manuel Trelles, in charge of the factory end of M. Trelles & Co., has left for Memphis to confer with the factory's distributors at that point, Sternberg & Son. He is accompanied by his daughter, whom he has enrolled as a pupil at Mount Ida School, in Newton, Mass., a suburb of Boston. Miss Trelles will be met at Memphis by a number of young ladies from Tennessee and adjoining states, also pupils and matriculants of the seminary; she will journey with them to the Bay State, chaperoned by one of the members of the faculty.

Good Report from Pacific Coast

Max Borkowitz, of 151 Water street, New York, was a recent visitor. Mr. Borkowitz is an experienced leaf tobacco man, and represents the Industrial Tobacco Co., Inc., packers of Porto Rico and Wisconsin leaf tobacco. He is identified with the well known house of Max Maier, United States representative of A. L. Van Beek, Rotterdam exporter of Sumatra and Java tobacco. Mr. Borkowitz made a careful survey of the local industry and was cordially received by cigar manufacturers and dealers in leaf tobacco. He reports conditions on the Pacific coast, from which he had just returned, as good. This was his first trip to New Orleans.

Louisiana grown tobacco (not Perique), cultivated in Lafayette parish, has been placed on exhibition at the Illinois State Fair, being held at Springfield. H. C. Fondren, formerly with the United States Department of Agriculture and now connected with the Southern Pacific Railroad, is in charge of the exhibit.

Convalescing

Charles Koen, vice president of U. Koen & Co., has a host of friends in this city, both in and out of the trade, has successfully undergone a major surgical operation and is once more at home on the road to recovery. He has not in good health for several months.

President Roussel of the St. J Perique Tobacco Growers' Associ with headquarters at Lucher, La., gone east on a business trip. This independent Perique tobacco grower sociation, not affiliated with the operative tobacco growers' associ recently formed, with headquarte Convent, La., of which Sigur Marti this city, is president.

In Good Demand

The City Cigar & Tobacco Co., tributors in Carondelet street, rep healthy increase in their country ness. Middy, Nickel Ford and the man, all nickel sellers, are provi very attractive line of merchandise agricultural sections. Henry the F is a brand that is making steady adv with the more discriminating eleme

Miss Esther Hincks, who owns operates the Continental Hotel stand, at Shreveport, spent a few da New Orleans during the week, sto up on Christmas candies and cigars.

Abe Caro, representing Optimo, Robert S. Faust, representing the A ican Cigar Co., makers of Chancello Preferential, were callers upon Fox last week. U. Koen & Co., tribute Optimo, Chancellor and P ential cigars. "Jim" Fox, of U. & Co., who dashes in and out of Orleans bi-weekly, reports better ness results upon his last trip th the Shreveport territory than at since 1919.

Harry Herzog, travelling repre tive of Personality, is now journ through southwest Texas and r business as good.

"Bob" Heard has given added a tiveness to his cigar stand in the mercial Bank building, at Shrevepo introducing a number of improve in the display of goods.

Taking On More Cigarmake

A number of Jacksonville, (Fla.) makers visited New Orleans durir past fortnight and several of them taken on by M. Trelles & Co. Ar ments were effected to employ mor ing the month of October. "The always cigar makers available fc manufacture of the cheaper gra goods," according to Uvaldo Trelle cigar makers qualified by trainin experience to make the higher gr cigars are not so easily obtained. are born; not made." The fact now working at its production ca and its proprietors are looking fc eagerly to the time when they v able to take charge of their recen quired headquarters, from which th barred for the time by prior leases

Making Improvements

The United Cigar Stores, Inc templates altering the entire front first floor, and installing new show in the new store to be established Corner of Canal and St. Charles a pivotal point along the pror boulevard of the city. The im ments will approximate an expe of $20,000.

Falk & Babin, in Carondelet Wa move into the new headquarters, leased by them, at 1229-31 North street, about October 7. This is story brick structure, in the imm vicinity of the historic and busy Market of New Orleans, and around the corner from the Marin

Nothing but rdy constitution saved him. He is ly recovering from the attack now hopes to resume his activities in his ibuting plant shortly.

Keeping Up His Good Record

on Bainrauch, formerly in charge of Schulte stores in New Orleans, with quarters at Canal and Royal streets, city, but subsequently transferred to Schulte stand in the Rice Hotel, ston, Texas, is maintaining his repu- n as a salesman and manager in his field of effort in the Bayou City. He a legion of friends in New Orleans are glad to learn of his success.

Made Many New Friends

seph Dispenzerie, of New York city, came to New Orleans to "fill in," ng the absence of Chief Bainrauch, he Schulte stores, has returned to nam, and to the Schulte store at 47th t and Broadway. He made a host iends for himself and for the Schulte es while here.

-op. Receiving Stations to Open Oct. 9

ENDERSON, N. C., Sept. 23.—Delivery obacco by members of the Tobacco wers' Cooperative Association in this on of North Carolina, known as the oelt, is to begin on Tuesday, October vo weeks hence, according to recent nouncement by T. C. Watkins, ware- e manager for the association. At point which is one of the largest de- y stations in this section, every prepa- n is being made for the receipt of ber growers' crops, and it is ex- d that the turn-in will be heavy, once ed.

obacco men who went from this city various cooperative markets in the h Carolina belt have returned here reparation for the beginning of de- ies, and the force at the local ware- e will be entirely adequate for the s.

Hearings on Importations of Brier Wood Pipes

WASHINGTON, D. C., Sept. 25.—Hearings were held here yesterday before the United States Tariff Commission in connection with alleged unfair method of competition under Section 316 of the Tariff Act relative to the importation of brier wood pipes from France. This is the first time that the Commission has held any hearings under this section of the Act and it was punctuated, especially during the early part of the hearings, by legal arguments of attorneys representing the importers, the American manufacturers and the Commission itself.

The American manufacturers were represented by Thomas J. Doherty, of De-Vries & Doherty, New York and Washington attorneys. The importers were represented by John R. Rafter and George C. Davis, with whom were associated, also on behalf of the importers, Arthur L. Davis, Edward I. Kleinfeld and David Walker, the latter representing the National Council of American Importers and Traders, Inc.

The case as set forth officially by the Commission was an "investigation of alleged unfair methods of competition and unfair acts in the importation and sale of brier wood pipes." The complaint was originally filed with the Commission in January of this year by John D. Burger, president of the Reiss-Premier Pipe Co., which was supplemented later by further evidence filed with the Commission in August.

Before any real procedure had begun at yesterday's hearing Mr. Rafter, on behalf of the importers, made two motions, both of which were at least temporarily overruled by the Commission. He asked first for a definition of "cost of production" as set forth in the complaint and secondly he asked that the Commission dismiss the complaint against the importers.

Mr. Rafter also asked the Commission that he be allowed to see the original complaint filed with the Commission by the Reiss-Premier Co. He was also refused this request on the ground that it is contrary to the Commission's rules. He tried to insist that the complaint be made more definite, as he called it, especially as regards the words "cost of production." Mr. Rafter also filed with the Commission yesterday answers on behalf of the various importers involved in the case.

Arguing on behalf of the domestic manufacturers, Mr. Doherty said that the importation of the cheap pipes from France was not only injuring the domestic manufacturers, but, if persisted in, will ultimately put them out of business. He said that they faced the same situation prior to the time they were given sufficient protection under the tariff laws. The domestic manufacturers, said Mr. Doherty, are facing extermination because of the importation of these cheap French pipes.

Mr. Doherty told the Commission that the pipes are actually being sold in the United States for less than it costs the American manufacturer to produce them here. He told the Commission that certain of these low grade brier wood pipes, which are manufactured at St. Claude, France, have been and are being imported into the United States at less than their cost of production here. Large quantities of these pipes, he said, are being imported, in fact, enough to flood completely the American market, and enough to

Indiana News Items

INDIANAPOLIS, Ind., Sept. 22.—There has been a decided increase in the cigar and tobacco business recently, according to I. D. Shane, retailer. The increase is from ten to fifteen per cent over any similar period. Although, he said, increased business may be due partly to State Fair visitors, he would attribute it largely to returning vacationists.

Proportionately, the retailers in Indianapolis fared better this week than the distributers. The annual Indiana state fair was a drawing card that brought thousands of dollars into the city and the trade benefitted more than in previous years. Some dealers say the automobile has been responsible for the larger state fair crowds during the last few years. It is possible for the out-of-town visitor to come and go almost as he pleases. It was noticed, also this year that the crowd appeared to have more money to spend than last year. This doubtless, is due to improved economic conditions. Certain it is, the retail trade here did a big business. For the most part special inducements were offered visitors.

Courtesy Week

The trade took an active part in "Courtesy Week" so called because everybody was asked to remember the visitors were not as familiar with the city as the "natives" and to spare no pains to direct and take care of the crowds. Special window displays were shown by many bearing out the courtesy idea.

Salesmen returning this week end report conditions out in the state as fair. In the agricultural districts trade seems to be improving as the corn harvest draws nearer. There is an impression that farmers will have considerable ready cash when the crop is sold and dealers are buying more readily. The larger industrial cities also report plenty of work and retail business good.

Mrs. Fendrich's Will

The will of the late Mrs. Sadie Negley Fendrich, Evansville, was filed in probate court recently. Charles S. Fendrich, well known cigar manufacturer, husband of the late Mrs. Fendrich, and Joseph William Fendrich are named trustees of a trust fund created by the will, and executors of the estate. Application for letters of administration which are filed with the will, show that real estate owned by the estate has an estimated value of $100,000, and the value of personal property is estimated at $10,000.

Bankable Forging Ahead

Increasing demand for Bankable cigars has brought to the Lebanon factory a business which for the month of August excelled that of any month since the establishing of the business there a year ago, according to N. Smith, owner of the factories there and in Frankfort. Business is better now than it has ever been in Bankable's history, he said. At t ent the demand is greater than production. Since last winter busi has been more than doubled. In A the increase in sales over those March was 23 per cent. In May the crease over April was 22 per cent. June there was a small increase. increase in July over June was 18 cent, and in August there was an crease of 30 per cent over July.

Get New Railroad Switch Franc

The board of public works recently proved the franchise asked by the Bauermeister Wholesale Tobacco Terre Haute, for a new switch their place at First street and Wa avenue. The company agreed with city that if this franchise was grant would surrender two franchises switches into their property. The switch will leave the main line of th I. & T. H. railroad at First and E streets and enter the company's gro just south of Mulberry street.

Funeral of Henry Schulz

The funeral of Henry Schulz, pi cigar manufacturer of Indianapolis, died Sept. 17 at his home, 590 West Woodruff Place, was held Sept. Mr. Schulz was born in Sonne Germany, March 29, 1838. He Germany in 1859 and was nine m on his way to this country, landi New Orleans in December of that He lived in St. Louis two years, after the civil war, he settled in In apolis where he married Mary Eliz Wolf, July 12, 1866. He entere cigar manufacturing business, h business places at the Pembroke cade, the C., I. & W. rai freight house, and school No. 8. he became associated with T. Igoe & Co., cigar merchants, Me and Washington streets. He retired business several years ago.

New Independent Warehous

Work on the construction of a independent tobacco warehouse for ison, Ind., is to be pushed on the struction of the warehouse on the lot between West street and C avenue. Several Madison tobacco are behind the plan and the new house will open with the season this ter for independent buying, it is sai

Sumatra Laborers Prote

WASHINGTON, D. C., Sept. 26.— Department of Labor has just re a report stating that tobacco labor Sumatra are vigorously protestin decreasing credit balances due eac borer at the close of the annual t harvest, and in several instances have been narrowly averted.

The report says the decreases in of pay grew out of reductions i number of plants tended by each and the corresponding decrease rate of pay per thousand plants.—I

Tampa Tidings

AMPA, Fla., Sept. 22.—Manuel Corral orral, Wodiska y Ca., has returned o Cuba, and Frank Sierra of the same pany leaves tomorrow for Havana. he same boat Pancho Arango goes to ana to join the Tampa colony there. e Cosio is expected to return from a next week.

. L. Van Dyke of the Eli Witt Co., ck from Asheville, and Hoyt Wood-, of the same company, leaves for obacco fields of Connecticut.

adiaz, Annis & Co. are receiving doc-ntary evidence that Ruy Lopez meets favor of the consistent smoker. oh Falkner introduces them, and is ing fast. The Don Julian brand also ell to the front.

orris Scadron has returned from New k where he spent some time in the in-t of his Nordacs. This cigar is be-ing well planted on the map, north n cast, and the Turner-Taylor Co. are oducing them in Jacksonville.

igarette Consumption in Argentina

ASHINGTON, D. C., Sept. 26.—The entine Republic, like all Latin coun-s, is a large consumer of cigarettes, by far the largest consumption is of cigarettes locally manufactured. whole market for both domestic and orted cigarettes seems to be already oughly covered by existing importers dealers, and by local up-to-date fac-es of extensive capacity.

igarettes are made in Buenos Aires by machinery and by hand, and the stry is a very important one and has lecided effect upon the reduced im-tation of cigarettes. The local cig-te industry is overwhelmingly in the ds of the following three companies, given in the order of their importance: cardo & Co., Compania Nacional de acos, and J. S. Onagoity & Co., all of nos Aires. The first of the above ntioned companies is known here as the bacco trust." It also has a factory in sario and another one in Cordoba. It absorbed about 19 local concerns nufacturing cigarettes (some of them nufacturing tobacco also) and two con-ns manufacturing tobacco but not cig-ttes. It makes the well known and ular brand "43" and Reina Victoria, ich are sold in greater quantities in s country than any other two brands. The Compania Nacional manufactures opular brand called Pour la Noblesse, al the third firm puts out the Dolar garettes. These brands are chiefly a ixture of Brazilian and Havana to-co, the cheapest grades being made of anixture of Brazilian with Paraguayan Argentine tobacco. There are also all factories here making cigarettes of rkish and of Virginia tobacco, or a nd of these tobaccos, and selling for tty much the same price as the im-ted cigarettes containing the same ss of tobacco. It is estimated that er 40 per cent of the tobacco used in t Argentine cigar and cigarette indus-es is of national production, although bacco of all classes, and cigars and cig-ttes, are also largely imported.

Practically all the various brands of garettes of any importance that are d in the United States or Europe, are ported into this country and sold at rying prices, since the shops here do t have fixed prices for anything, and e same cigarettes will be sold at en-tely different prices in two different ops.

In the five years preceding the war, 09-13, the imports of cigarettes aver-ed about 80,000 pounds annually, of which Great Britain and Uruguay each supplied about 30 per cent, Italy and Cuba each about 11 per cent, and the United States a little more than 2 per cent. During the war the imports of cigarettes declined to half the pre-war figure, but in 1920 and 1921 they rose to three times the pre-war figure. In this war period and after Great Britain is credited with about 50 per cent of the imported cigarettes, Uruguay about 30 per cent, the United States about 10 per cent, while Italy and Cuba lost the greater part of their trade.

Cigarettes may be imported into Argentina in any sort of a container, metal, paper, or other, and so far as is known, there is no special law requiring that the containers must be labeled or printed in any special way. While cigarettes manufactured locally can not contain more than twelve in a package, imported cigarettes can contain a larger number. Neither the weight of the box nor the size of the cigarette need be standard. Foreign cigarettes are weighed along with their immediate containers, and every 15 grams, or fraction thereof, is considered a package. At present it is not illegal to sell imported cigarettes at a price higher than the selling value marked on the fiscal stamp, but it is illegal to do this in case of domestic goods. This matter has been brought to the attention of the Internal Revenue Authorities, and if the Budget and Tax Laws of 1923, now before Congress should be approved all tobaccos will have to be sold at the price shown on the fiscal stamp.

It may be mentioned that the retail prices of the locally manufactured cigarettes are 20, 30, 40 and 60 centavos for 12; imported cigarettes retail, "Capatan" at 45 centavos for 10; "Players" at 30 centavos for 12; and two American brands popular in the United States at 80 and 90 centavos for 20.

Greene County's Great Tobacco Crop

GREENEVILLE, Tenn., Sept. 22.—W. D. Morrow has recently made a number of trips out through Greene County and reports that never in the history of the county has there been such a tobacco crop, says the *Sun*. Conservative estimates have placed the amount of tobacco to be sold in Greeneville this year at from twelve to fifteen million pounds. Mr. Morrow states that he believes it will be nearer eighteen million. The past season was ideal for the growth of the weed and despite its immense size which is unlike anything ever seen before, it is fine grained and of good quality. Mr. Morrow says that many Greene Countians find themselves up against a very serious problem on the housing question. Although hundreds of new barns and shacks have been erected, the yield is so much larger per acre than was anticipated, that the additional accommodations will not be able to care for the crop.

The average yield per acre in Greene County has been 840 pounds. Mr. Morrow said that he has found several planters who thought their crop would easily weigh 1,200 pounds per acre, and some even estimated it as high as 1,600 pounds per acre. This is unprecedented, and the unusual heavy weight and size, together with the immensely increased acreage is going to swell the 1923 crop to a very large figure, and Greeneville will probably be known by this time next year as the largest Burley tobacco market in the world. Every available roof in the county has been pressed into service and is crammed full of the fragrant weed.

Greene County planters, being old experienced men in the raising of this crop, have learned long since that to cure prop-

San Francisco Fall Cigar Trade Opening Up We

Strike Situation Still a Blur on the Fair Face of Business—Petri Preparing to Move Plant to Country Place—Unaffected Factories Show Improvement—News Notes.

SAN FRANCISCO, Cal., Sept. 18.—The strike situation seems to be no better yet. It has become in part an open *vs.* closed shop fight. The Petri Cigar Co. has taken steps to be prepared for a long fight and for future fights. They have purchased a three-story and basement brick building at Pittsburg, Cal., a small place to the northeast of San Francisco, with 30,000 feet of floor space. Here they will equip a duplicate factory with machinery, and train a new set of workers, where they will be away from the influence of the city and where living expenses will be cheaper.

Among the factories not affected by the strike, conditions seem to be improving. Their local patronage appears to be veering back again, and they are calling on the leaf houses for more raw material.

Harold Horn, the "kid," who represents the Golden State Leaf House, is sending in some very encouraging orders from the northwest. Crops there have been A1, and the prospects for a good fall and winter trade more than usually good.

Mack Horn, who was formerly with the Golden State Leaf House, but who branched out for himself in Los Angeles the first of the year, has been calling on his old friends and reports that business in the Angel City in the tobacco leaf line is on the mend.

Leo Michaels, representing the Tobacco Products Corporation on the Coast, has returned from Los Angeles much enthused over the wonderful things they are doing down there.

J. R. Eppler, who has been in charge of the city office of the General Cigar Co., has been sent to Los Angeles as manager of the business there. A. F. Olsen, his assistant, has become manager of the San Francisco office.

Stephen L. Crocker, president of t P. Lorillard Co., left last week for t south part of California. The compa is putting on its big billboard campai for 16 oz. Climax.

G. H. Burton, an old-time cigarmak of Modesto, has been in the city negotia ing the exchange of some land for ci apartments.

Brown F. Elroy, of Stockton, has be in the city looking over the trade. H was formerly salesman with Helmrich.

Milton Glass, of the American Tobac Co., has returned to Los Angeles, whe he will spend some time rallying t trade of the surrounding territory.

Old-Timer Passes Out

Max Ordenstein, an old-timer in t cigar business, and former representati of Garcia y Vega, passed away a fe days ago at the age of 75.

S. Bachman & Co. have the concessi at the Sciots Show that has been in se sion during the past week. The sal force of the organization donated the services free; and the firm donated profits to the Sciots, taking their pay advertising benefit.

V. Nieto has returned from his vis to the factory at Tampa, Fla., and w soon be again on the road. He repor that Havana leaf is higher, and that fa tory margins will necessarily be c closer.

H. L. Judell & Co. are just getting a large shipment of Alhambra cigar They report orders coming in well fro the boys on the road. Their Chancello are gaining steadily and deliveries a excellent. Norwood Dreams are ove sold.

Summed up, fall cigar trade is openi up well in all directions, and the feelin of the trade is cheerful.

Charles Denby 2 for 15c.

They satisfy the smoker because they are good, and the merchant because they sell.

Pay Big Rent for Small Space

CAGO, Sept. 22.—William H. Kalis nted a cigar store, a 9 by 30 foot in the building at 6317-6319 South d street, for 10 years, at an aver- ntal of $500 a month. Mr. Kalis ntil recently, a partner in the Mut- igar Co. which had two stores in op.

strat-Christian Co. is getting mat- shape for a Charles Denby news- campaign.

Pohley has resigned as local rep- ntative of the Consolidated Cigar He is well known here and has in the cigar business for many

Brenning is the new owner of the stand located in the Kesner Build-

ry Sanders of Clarence Hirsch- Co., was a recent visitor to the t factory of the Mazer Cigar Co. t Hand Made, a big seller here, is uted by the house of Hirschhorn. ncis Braynard takes his hat off to of the boys. He is with Estabrook ton, importers of Boston. He two orders a few days ago that 'Dreams." One for 50,000 imported was booked by Mr. Braynard from ice Couthoni who has a number of stands here. The other for 30,000 aken for the University Club. F. Estabrook of Estabrook & Eaton is arrive Oct. 1.

Humler has secured the cigar ge in the New Brown Hotel at ville. It is reported that the rent 000 a year.

Twenty Per Cent Payment

rl E. Hummell, who acted as Trus- r the benefit of creditors in the of Dell Bros., who recently failed, nt the creditors a first and final d of 20 per cent.

C. Gale, vice president of Valle & ampa, was here for several days over the trade. Flor de Cuba has l call here.

Hinsdale Club of Hinsdale, and anston Club of Evanston, Ill., both stocked Pancho Arango cigars.

b Mesick has returned from Detroit he cleaned up a great bunch of for Cuesta Rey cigars.

A. A. Derrig, Chicago sales manager for Seidenberg & Co., El Roi Tan distributors, after a sick spell of three weeks, has returned to his desk.

Back from Gotham

Doc Rosobro, is back from a short visit to the New York-Tampa Cigar Co.'s New York office. He is very busy just now with his introduction campaign on Personality cigars through the Ryan & Raphael Cigar Co.

The Dragon Cigar store, on Wabash avenue, shows Don Julian cigars to good advantage in a neat window display.

El Verso cigars are still advertised on the bill-boards and one can't help but notice them in making the rounds of the city.

Back in Business Harness

Credit Manager Silberstof of the General Cigar Co., is back at his desk after several weeks of illness.

Lozano cigars are featureed by Hoyle's Cigar store at 439 South Wabash avenue.

S. O. Deutsch at Congress street and Wabash avenue features Robert Bacon cigars in the window display.

At B. W. Nathan, 601 South Wabash avenue, is a large display of El Verso cigars.

A large Shrine cigar sign is placed at the Reliable Drug store 18th and Wabash avenue.

Harry Friedlander has connected with the New York-Tampa Cigar Co., and is working the smaller trade here, introducing Personality with the Ryan & Raphael Cigar Co.'s sales force.

The Secret Is Out

"The subtle suggestion of quality can only be acquired by the sale and display of merchandise with a reputation." This is why Pancho-Arango cigars are handled by so many of the stores here. The sale of this fine cigar placed by the Wm. J. Seidenberg Corp., increases daily in the Chicago market.

On the bill-boards is still shown the large ads of Corina cigars, one of the big selling, clear Havana cigars here.

All of the United Cigar stores offer the new Harding 2 cent postage stamp. They had these on sale, days before the local post office offered them for sale to the public.

A Notable Display

At Aronsons Cigar store, 2365 Cottage Grove avenue, is seen one of the best cigar windows ever put in a store here.

onnecticut Reports Big Broad Leaf Tobacco Sale

rican Cigar Co. Said to Have Purchased 5,000 to 6,000 Cases of 1922 Crop—Warm Rain Adds Desirable Finish to Hanging Leaf—Live Trade News.

ARTFORD, Conn., Sept. 24.—Mr. Syl-, Mr. Israel and Mr. Wise, of the ican Cigar Co., were visitors at the of the association, and it is un-od that they placed an order with sociation for 5,000 to 6,000 cases of eaf, which is about 25 per cent of tire packing.

n Puts "Weed" in Fine Fettle

warm rain of the last two days uch welcomed by the growers, as ped the tobacco down in the finest that the 1923 crop has been in since put into the sheds. Growers have wanting such a rain so as to run lors and soften up the leaf, which howing up to be uneven colors and to the touch. However, this rain w put on the finishing touch and mining the cured leaf now it shows be a beautiful leaf and with much quality than any of the last sev-rops have had.

re can now be no possible danger polesweat, unless it may be in the ut crops which did not start off fast, owing to the continued cold er; but thus far it has not been by the damp weather.

Early Start at "Taking Down"

ew growers ventured to take down of the 1923 stalk cut on Saturday y were anxious to get started strip-well remembering their experiences t year when several growers did t their crops down until late in the . Other growers simply let this go by, believing that the tobacco ot yet ready to put into the bundle, re willing to wait until a later date they start, as they are satisfied in own minds that the tobacco is not ently cured to put into the bundle, at the leaf needs to be thoroughly out at least once more before they t down. The leaf has now a thor-dampening and when it dries out much of the green part of the leaf lisappear which, if taken down and the bundle before it dries out, is to cause trouble and may develop anker, and will heat up easily.

Sampling Broadleaf

ing the past week the Connecticut Tobacco Association had a corps mplers working on the 1922 broad-and by the end of this week the of sampling the crop will practically mpleted and the samples ready to the trade. However, as fast as samples come in they are imme-ty pooled and then are ready for the t and several customers have ex-d the samples that are already in ave placed their orders.

ts generally conceded among most of growers that the prices announced week are conservative, and some ain that they are too low. How-the prices were made after much sion and are thought to be fair both buyer and grower.

e assorting of shade tobacco started with all the warehouses open for eason, and it is expected that the work will continue until next spring without any interruption, except the probable waiting for tobacco. It will give employment to hundreds of tobacco workers, and as much of the work is now done on a piecework basis, the amount that each worker earns depends entirely upon himself.

District Warehouse

The members of the association in the Glastonbury district who recently organized themselves for the purpose of building a warehouse for their tobacco, have purchased a suitable plot of land near a spur track of the trolley line and will go ahead building the warehouse as soon as possible. The building committee is headed by C. E. Goodrich with H. P. Smith, R. G. Tryon, G. W. Trip and William H. Meyers. The capitalization is $100,000 in preferred stock at $25 per share, and $105,000 in common stock at $10 per share. Preferred stock will bear a dividend of 8 per cent and will be offered for public sale, carrying a bonus of 2 per cent upon redemption. The Connecticut Valley Tobacco Association will have oversight of the warehouse operations.

The association officials now think that they are far better equipped with warehouse room than they were last season, as Glastonbury is to build a warehouse, also the South Windsor districts are working out plans for warehousing their own tobacco, and already the East Hartford growers have purchased the large warehouse originally built by Sutter Bros. It has a railroad frontage and spur track to the door.

The Bushnell Cigar Co., of this city, which bought out the business from Captain T. J. Bannigan about three years ago, has filed a petition in bankruptcy, giving liabilities as $6,279 and assets as $3,479. The store is located near the railroad station, and has been used as a cigar store for about 25 years, nine of which were under the management of Captain Bannigan.

Recently a reception was given to ex-Senator E. E. King of East Hartford by Orient Lodge, A. F. & A. M. of East Hartford, in honor of his birthday. Mr. King has been prominent in the lodge, being a past master, and was very active in its hundredth anniversary held a year ago. Mr. King was local representative for P. Dennerlien & Son and had full charge of their warehouse when they operated it in handling leaf tobacco. He is treasurer of the Connecticut Valley Tobacco Association, Inc., and president of the East Hartford Trust Co.

Some of the Windsor tobacco growers are going to insure a plant supply by a sterilizing outfit and have purchased one of the big fire engines from the city of Hartford which has been given up. It is a horse drawn outfit and discarded in favor of motorized engines. Not only does the owner, Mr. Hastings, intend to use it for sterilizing seed beds, but in case of drouth to use it for pumping water for the tobacco beds.

Wilson Mart and Co-op Court Cases

WILSON, N. C., Sept. 22.—Sales continue very heavy on Wilson's famous Auction Mart and the quality of the offerings, poor. Although the market has been running this season since August 28, primings and ground leaves continue to show up in great quantities on each sale, and it looks like there is no end to them. According to report of Sales Supervisor, sales for the season up to Thursday night, September 20, have amounted to 11,477,550 pounds. Average, $20.56.

Court Decisions Against the Co-ops

Recent Court decisions at Greenville, Nashville, Kinston and Raleigh have now made it very clear that the Co-operative Tobacco Association has no right to penalize a member five cents per pound for tobacco sold upon the auction floors by his tenant, who was not a member, and now sets at rest confusing reports covering the right of non-members to dispose of their tobacco as they may see fit and proper. The Association has lost within the past week every case brought by them against their members who permitted their tenants, who were not members, to sell on the Open Markets. In the case of the Association against E. D. Bowen of Green County, before Judge J. Lloyd Horton, heard at Greenville, September 15, the full text of his Honor's decision is as follows:

"STATE OF NORTH CAROLINA
COUNTY OF GREENE
IN THE SUPERIOR COURT

Tobacco Growers Co-operative Association, a corporation
vs.
E. D. Bowen

Order Dissolving Restraining Order

"This cause coming on to be heard before Hon. J. Lloyd Horton, upon the temporary restraining order heretofore issued in this cause, at Chambers in Greenville, N. C., on Saturday, September 15, 1923, and being heard upon the complaint, affidavits and oral testi offered by both plaintiff and defe and a serious question having been r by the answer and evidence offered whether E. D. Bowen is a memb said Association, and it being ma appear to the satisfaction of the that most of the tobacco grown upc lands of the said E. D. Bowen is tivated by tenants who are not me of the Association; and it also made to appear to the satisfaction Court from admissions of counsel f plaintiff that the plaintiff associati deducting from the first advance m its members five cents a pound fc failure of its members to deliver t bacco grown by their tenants wh non-members, and the Court being opinion that under the contract whi plaintiff alleges that the defendant s and which is at issue in this cause, *the plaintiff has no right or author deduct any sum on account of the f of the landlord to deliver the te portion of the crop according to the spective rental agreement, and th such conduct the plaintiff has bre its contract with its members.*

"And it being further made to a to the satisfaction of the Court fro missions of counsel that unless en and restrained by this Court, that it pose is to deduct from any advance to the plaintiff, five cents per pour all tobacco which the defendant's t sell upon the open market, or deli any other person regardless of w said tenants be members of said ciation, which this Court is of o they have no right or authority under said contract, and the doi such would be a breach of the cc on the part of the plaintiff.

"It is therefore Ordered, Adjudg Decreed by the Court, *That the porary restraining order heretofore in this cause be and the same is dissolved and set aside and the def is hereby permitted to sell and deli tobacco upon the open warehouse flc otherwise as he may see fit* upon er into bond in the sum of $1,000 ditioned to pay to the plaintiff al

(*Signed*) J. LLOYD HORTON, Resident Presiding Judge of the Superior rt of the Fifth Judicial District of th Carolina."

ge Connor Also Decides Against the Co-ops

a sweeping decision Thursday at nville, the County seat of Nash nty, Judge Geo. W. Connor refused petition of the Co-operative Associa- to compel the landlord to pay five s a pound for all tobacco grown on farm, regardless of whether the nt was a member of the association also refused the petition to compel non-member tenant to either deliver obacco to the pool or pay five cents pound damages.
here was a big array of counsel on sides. There were a number of ndants and different phases of the cco situation as applicable to the bers were passed upon by the Court. cases from Nash County included e of Geo. R. Finch, Sol. Bissett and V. Finch.
he Attorneys for the pool took the tion that the landlord who is a mem- is either compelled to make his non-ber tenants deliver their part of the cco at the time of renting, since by ue of the fact that he was a member owning the land, that his member- controlled all the crops grown on his l, that his tenant should at the time renting agree to either join the as-ation, or permit his landlord to de- r all of his tobacco to the association, that if he did not his landlord would be compelled to pay five cents per pound for every pound of tobacco grown by his tenant and sold on the Open Market. They further stated this was the policy of the pool, and that they had instructed all their warehousemen to follow this procedure in dealing with heir member landlords.

The Court dismissed the injunction issued against these defendants *and enjoined the Association from collecting any sum from the landlords for his non-member tenants' tobacco.*

In another case the Court decided the question of the status of a mortgage on tobacco of a member of the pool and decided, *"That the owner of the Mortgage was entitled to his money, and that it should be paid before the association collected its share."*

Have Met Their Waterloo

In all of the cases so far tried involving the right of the Association to penalize members whose tenants not being members, sold on the Open Markets, *they have not found a Judge in North Carolina who has not decided against them,* and cases of a similar nature have been tried in almost every County in eastern North Carolina before half a dozen or more different Judges.—McFARLAND.

New Bern Average, $16

NEW BERN, N. C., Sept. 22.—Total sales for the week, 52,650 pounds; average price per 100 pounds, $16.00. Sold to date of 1923 crop, 243,546 pounds; average price per 100 pounds, $16.39. Prices steady, but sales light due to farmers being busy with the cotton crop. —M. E. TYSON.

Salaries Paid to Co-op Officials

RICHMOND, Va., Sept. 22.—Commenting upon an editorial discussing the salaries paid to the higher officials of the Tobacco Growers' Co-Operative Association, which appeared in the *Progressive Farmer*, Oliver J. Sands, general manager of the association, said:

"It may be of interest to those who hold the opinion that the association officials are overpaid to learn that the salaries of all the head officials in the leaf, sales, finance, warehouse and field service aggregate less than 40 cents on each $100 worth of tobacco handled for the grower. When we were seeking efficient department heads we found men who would not take positions in the association at the rate of $50,000 per annum for the simple reason that they were making more money on the outside."

The editorial in question, appearing in the *Progressive Farmer*, was as follows:

"The forces fighting co-operative marketing are making much of the fact that R. R. Patterson, as the head of the sales department for all bright tobacco from North Carolina, South Carolina and Virginia sold through the Tobacco Growers' Co-Operative Association, gets a salary of $30,000.

"But the critics neglect to say that before coming with the association Mr. Patterson was getting almost $30,000 for handling much less tobacco and putting himself to far less trouble. In proportion to work done, Mr. Patterson is not getting as much in his effort to make money for farmers as he was getting before to make money out of farmers.

"And that's that. But 'that ain't all.' In proportion to the quantity of tob handled, Mr. Patterson probably gets than anyone of the hundred leading in the same line of work handling co-operative tobacco. Let's find out their salaries are. One thing we know: When the Tobacco Growers' Operative Association set out to ge sales manager it first called on ano big man who spends his time buying selling non-co-operative tobacco whose annual income was $100,000. you are a tobacco 'co-op' and someb says to you: 'Oh, you folks in the operative association are paying a $30,000 a year to handle and sell your bacco for you,' just say this: 'Yes, pay $30,000 a year with our eyes c and pick our man, and he sees how m he can make for us. But you folks the outside are paying as high as $1 000 a year and you don't pick or con your man and his job is to see how m he can make out of you.'"

Court Decision Against Co-operatives

REIDSVILLE, N. C., Sept. 22.—A cision rendered in Superior Court Greenville, N. C., by Judge J. L. Hor who holds that tenants who are not m bers of the Co-operative Marketing sociation can legally sell their tobacc auction without penalties against landlords, has been read here by tob men with a good deal of interest. J Horton signed a judgment dissolvin temporary restraining order which been sued out by the Co-operative M keting Association against three farm of Greene County.

The court held that the association

control over tenant crops when enant did not belong to the organi- and when the landlord pooled his no right existed to collect five cents nd liquidation damages from him obacco sold by his tenants outside ool.—REIDSVILLE TOBACCO BOARD OF E.

eresting "Events" at Greenville

EENVILLE, N. C., Sept.24.—The past was another busy week on the to- market. While there were no block two sales on one floor at the same were necessary to clear the floors he next day's sales. The sales for week were in round numbers, 2,- 00 pounds. This brings the sales to almost up to 7,500,000 pounds. The ge for the past week was just a fraction under 20 cents.

all lots of better tobacco are now ng on the market. But the great continues to be lugs and tips. The of these seems larger than ordinar- . The grade of tips is the lowest for years and this accounts for low ge in prices. Good tobacco is look- p some. But it is still mostly in the s of the farmers. With tips and lugs of the way, if they ever get out, s will show a much better average.

Penalizing Landlords

e Co-op house is doing business now. t 100,000 pounds have been re- d. Advances have not been satis- ory. In fact there is much dissatis- on. One farmer and tenant had pounds of tobacco. This farmer co-op, but his tenants are not. They their 840 pounds on the open mar- and got a few cents over $101.00. He his 840 pounds to the co-op house was advanced $49.52. He was then *alized* five cents per pound on the nts, leaving him about $7. He re- d to take it and left all with the e. He says he expects to deliver all part of his crop to them and abide the lt as he always sticks to his contract. he will NOT have to plant tobacco year.

nother farmer was penalized for his nt's share and did not get advances gh to pay the penalty. A bill for was presented to him and he may to pay it if they can make him.

nd this *penalizing* is being done in tion of decision from Judge Horton about ten days ago, declaring that landlord could not be penalized for tenant share of the crop when the nt was not a co-op. Judge Connor handed down the same decision, only w days ago. And some other judge given the same decision.

ut, what is the Constitution between ds?—KING.

cky Mount Average, $20.60

OCKY MOUNT, N. C., Sept. 22.—Total s for the week 1,131,344 pounds; rage price per 100 pounds $20.60 Sold late of 1923 crop, 2,487,380 pounds; rage price per 100 pounds $20.75. lity of the offerings still very com- n, practically no good tobacco show- up.

A New Duke Film

CHARLOTTE, N. C., Sept. 22.—Man delights in viewing his handiwork and recalling mental pictures of the stages of his progressive development.

But J. B. Duke, tobacco king, goes one better, for he is having filmed the development of the Catawba River Valley in North and South Carolina, where his hand has turned a listless river into a gigantic generator of electric energy.

"The Romance of the Catawba" is the picture's title, and it will depict the development of the valley from Indian days to the present. It is not a commercial picture and its vivid scenes will never flash upon the silver screen of the movie theater.

It will be shown only for the pleasure of Mr. Duke and the few friends of the man who in the last two decades has played with millions in realizing his dream of Southern progress through hydro-electrical current.

The picture is to be six reels and in it will be woven a plot which will tell a coherent story of the passing of time from the idle roaming of Catawba Indians to churning turbines, generating current to light cities, moving street cars, and humming spindles in many cotton mills.

Tobacco Breaks at Kinston, N. C.

KINSTON, Sept. 22.—Tobacco breaks here are showing a tendency to slump slightly in quantity, while price increases are apparent. Pressure by tobacconists partial to the grower has resulted in slowing up marketing of the new crop. Monday's sales totalled about 350,000 pounds, nominal for the time and the market, and Tuesday's were of reasonable proportions. Market observers for two weeks have consistently advised planters and tenants to "sell gradually." The average price the past two days is estimated to have been the highest of the season.

With sales at the rate of 1,500,000 pounds a week through the remainder of September and October, the season will be prolonged at least until January 1 or 10. Breaks automatically fall off toward Thanksgiving. The local crop is generally estimated to be from 27,500,000 to 30,000,000 pounds, and other millions are being brought here from distant points. With present prices, obtaining through the season, the cash turnover on the local market will be the largest in several years and one of the largest in history.

Owensboro Outlook

OWENSBORO, Ky., Sept. 22.—I have to report a week of chiefly unfavorable weather which has furnished only moderate intervals suitable for tobacco cutting. Thus there has only been a small percentage of the outstanding crop cut during the week; and it will probably require a week or ten days of favorable weather to entirely finish the cutting.—J. S. PHELON.

Leases Business

HAYWARD, Wis., Sept. 22.—G. B. Karibalis has leased the Ed Dedde pool, cigar and billiard hall business.

Burley, Aircured, Green River, Fired Dark, Maryland, Virginia and Seed Leaf Tobaccos.

On all markets. We air dry and steam dry on most of the loose markets, and have the latest improved Philadelphia Textile Steam Dryer in our Louisville Factory for handling Leaf and Strips. Orders and correspondence respectfully solicited.

Paducah Prospects

LUCAH, Ky., Sept. 22.—If there have any sales made of old tobacco in sads during the past week they have en reported.

weather during the week has been unfavorable on the growing crop. ave had several heavy rains which d cutting and the tobacco in the has not been benefitted because of xcessive moisture. However, I say that there has been any injury If weather conditions will change orable, I can't see but what the crop e in better shape by reason of the rains. It is time though that the vas going into the house because it ly well matured and the time for has come. However, it is seldom we have a killing frost before the e of October.

Weather Fine for Firing

weather has been fine for firing uring the tobacco that has recently out in the house, and I think farmers ing a better job of curing than ever e. The crop is curing a good brown ht brown color generally, and farmre being taught by the Association lessons in curing tobacco that have badly needed and will add much to alue of the crop. While the crop is lerably damaged on account of black r rust, the greater part of the crop d be of fair quality, having good and size with fair body.

have seen a great deal of the crop field during the past week, and no the best bodied and most substantial tobacco will come out of the later gs. With favorable weather for the ten days the crop should be harvested od shape and the out turn should be t. There is no question about the yield, and there is considerably an average crop in this respect. hink there will be a good demand for tobacco and no doubt the inferior s will command a better price, because the European markets are wanting cheaper tobacco and to get it they will have to take the commoner grades.—W. B. KENNEDY.

Co-op Court Activities

LEXINGTON, Ky., Sept. 21.—Suits against every Ohio tobacco grower who has broken his contract to deliver to the Burley Tobacco Growers' Cooperative Association is being prepared by the legal department of the association. Abe D. Waldauer, associate of Aaron Sapiro, returned yesterday from Indiana, where he filed a number of suits and where the Indiana contract breakers have formed an organization to fight the tobacco cooperatives' suits, though many growers have refused to join the antis and have settled the claim against them without trial.

Suits to Be Filed

Suits also will be filed in some Kentucky cases soon and in the dark district at least one case against a warehouse man who induced growers to sell crops pledged to the dark association. Evidence in connection with the activities of one warehouse man in the Burley district also is being scrutinized and if the facts warrant it a suit will be filed.

"Loyal growers may depend on it that their interests will be fully protected," Mr. Waldauer said on his return from Indiana. He went to West Baden, Wednesday, to meet Mr. Sapiro, who addressed the farm mortgage bankers of Indiana in session at that resort and was given an enthusiastic reception by the bankers. In his address, Mr. Sapiro was frequently compelled to stop by the applause from his audience.

ansylvania Tobacco Sales Go Merrily Along

ral Transactions Consummated During Past Few Days —Buying Restricted to Choice Binder Crops Showing Binder Possibilities—Prices Hold About 24 to 26 and 4 to 7.

CASTER, Pa., Sept. 24.—The early ir of the 1923 crop, which started eek before the tobacco was in the is going merrily along and several onal sales were consummated dure past few days. Buying has thus en restricted to only the very choice which show binder possibilities and of the seedleaf of more doubtful has been touched by the packers. es in the sales that were made last have held to their original level of 24 to 26 cents for the "wrapper" s and from 4 to 7 cents for the ."

ssman & Sons have been practically ly purchasers thus far, but a numf other buyers are showing keen st and are busy scouring the county ops of good quality. It is not to thered from this that these high crops are scarce for a very high ntage of the growers report that have raised better cigarleaf this than they have grown for a numf years past. It is only natural, ver, that the choicest tobacco should e the first offers, and it is these that have been contracted for.

Prices Regarded as Fixed

unusually high prices paid in the sales are looked upon by the rs as setting the price level for sales of the better quality seedleaf. is much tobacco in Lancaster which will rank favorably with has already been sold and it is than likely that the average price e 1923 crop will be somewhat higher it has been for several seasons. average price of the "wrapper" last season was 17 cents, which onsiderably higher than the 1921 e.

A Peculiar Case

re is one instance related in packing s of a sale made in the extreme rn end of Lancaster county which, it undoubtedly has a humorous , has yet an element of pathos. A r by the name of Markely, whose eaf was of fine enough quality to irst prize at one of the local fairs neighborhood, was approached by er and asked to name a price for op. Entirely out of touch with the e world, knowing nothing of marnditions and unable in the slightest e to calculate with any certainty he should receive for his leaf in that his operations for the year l show him a profit balance, ely, who grew about 15 acres, that he would consider 15 cents a l for his wrappers a fair price. what amazed that the buyer, with no ing or protestation, agreed on the to buy at that price. Markely was nded a few days later upon learning he had parted with his seedleaf at about 10 cents a pound below the et figure.

A Triangle Incident

the radical, this incident would sh ample material for a long and ing tirade upon the iron heel of the ng industry which grinds the helprower in the dust and makes of him e, subject to the whims of the ruthuyer who pays what he likes for the co that he purchases. For the averacker, the matter is merely a humorne and good for a laugh. For the imal observer, the incident—humorous sthetic as you choose—is indicative existing condition which is good either the packing nor the growing try and which will, if allowed to ue, result in some upheaval which or may not prove desirable.

("Upheaval" or no "Upheaval," the grower should subscribe for a good trade paper, TOBACCO, say, and keep himself posted on market conditions. That would be both wholesome and desirable.—Editor.)

The Supreme Arbiter

The more progressive and intelligent grower realizes that supply and demand fixes the price of his seedleaf and that the buyer is but the helpless instrument of a far more powerful force—the American public. He is a business man, this up-to-date grower, and he knows to a penny what his crop cost him to produce. When he names a price he does it with a fair profit in mind, knowing, however, that a glutted market cannot absorb a season's output at a high price. But this type of grower is more or less of a rarity, and the average tobacco farmer pits himself against the buyer who visits his farm to purchase his crop, with the idea of "do him or he'll do you." We have no wish to idealize the packer for there are many of this gentry who deserve all the hard thoughts of the growing fraternity; but there is a middle ground—and it is a matter of pride to say that the majority of Lancaster packers fall into this category—which the buyer may follow in his dealings with the grower.

Frost Not Serious

That harbinger of disaster, the first frost, which came last week and sent the growers scurrying to the fields to harvest their tobacco and get it under cover before damage resulted, turned out to be a "frost" in the facetious sense of the word. A warm, rainy period set in on the heels of the cold snap with the result that the cutting stopped almost as suddenly as it had begun. The rise in temperature and the moisture have worked wonders with the portion of the crop that was still under-developed and it is likely that the end of the season will see a very good crop go under roof with only a small percentage of unripened tobacco being cut. Growers whose leaf was fully developed and ready for the harvest are holding off since it is extremely injurious to the quality of the tobacco to store it in the curing shed in the midst of a damp, murky period.—KEYSTONE.

Frost Gets Ontario Tobacco

WINDSOR, Ont., Sept. 22.—Essex county tobacco growers face a loss of $1,000,000 from last week's frosts, Justus Miller, county agricultural representative, said today.

Most of the loss will fall on the burley growers, he said. About half of the Virginia leaf crop had been harvested. Loss to the remainder is estimated at 60 per cent, while that of the burley growers will be about 75 per cent. The corn crop will be of average size and excellent quality.

Labor Statistics

WASHINGTON, D. C., Sept. 26.—The Bureau of Labor Statistics of the Department of Labor has just issued its monthly statement of employment in selected industries.

There were 29 chewing and smoking tobacco establishments which reported an employment of 3,650 in August as compared with 3,871 in July, a decrease of 5.7 per cent. The payrolls in these establishments amounted to $54,428 in August

PORTO RICAN TOBACCO

The day of prosperity for the Porto Rican Tobacco Industry has arrived

The phenomenal success of many of the advertised brands of "mild Havana cigars" is largely due to the use of Porto Rican Tobacco either exclusively or blended with other tobacco as a filler.

In the past it was not always possible to tell whether the tobacco sold as Porto Rican was all grown on that Island or mixed with a Foreign Tobacco, but now

The Government Guarantees

the source of all tobacco—either in the leaf, scraps, or in cigars—shipped from Porto Rico.

This is done by means of stamps affixed to every barrel or bale of tobacco and on all boxes of cigars or "little cigars."

The White Guarantee Stamp

on shipments of tobacco guarantees that it is of pure Porto Rican growth; on boxes of cigars that the contents were manufactured from tobacco grown on that Island.

North Carolina Production

HENDERSON, N. C., Sept. 24.—According to the Bureau of Markets of the State Department of Agriculture, the forecasted yield of tobacco in North Carolina from the 1923 crop is 355,000,000 pounds, or 696 pounds per acre for 510,000 acres, with a condition percentage of 86 per cent. It is declared that the quality, except where the conditions have been too wet, is good. More than the usual amount of wax was found at harvest. The crop seems to be curing fairly well, except in certain regions where the crop is faulty. In the eastern part of the State, the report says, the quality and yield are not as good as was expected, the continued wet weather being responsible.

The Dark Tobacco Pool Gets Federal Loan

WASHINGTON, D. C., Sept. 21.—Kentucky made its first sizable utilization of the new Federal farm loan facilities today when the Federal Farm Loan Board, after hearing a delegation of Kentuckians, authorized a loan of $2,500,000 to the Dark Tobacco Growers' Co-Operative Association.

The credit will be extended by the Louisville intermediate farm credit bank, a part of the new agricultural relief system established by a law enacted last autumn.

The sum will become available immediately. It is a part of a $4,000,000 credit planned by the association to carry its crop over the marketing period.

At the same time, approval was obtained for a credit of $1,500,000 from the War Finance Corporation. This sum will be used largely in payments to growers in the Green River District. The payments, according to arrangements already made, will be effected at once. The $2,500,000 loan will be used to meet notes held by local banks.

Association in Good Standing to Absorb Credit

R. E. Cooper, director of warehouses for the association, and R. D. Farmer, treasurer, both of Hopkinsville, appeared before the board and convinced members that the association was in excellent shape to take on the credit. They were accompanied by Nicholas Dosker, Louisville, vice-president of the National Bank of Kentucky, and James B. Davis, president of the Louisville intermediate bank.

Application had been made to the Louisville intermediate bank for the loan, but, because of the policy involved, it was deemed advisable to have the Federal board pass on it. Although the association's earlier plan had called for the full $4,000,000 credit from the War Finance Corporation, the fact that that body will soon go out of existence led officers to decide to take advantage of the new credit system. Thus the association is establishing its standing in the new intermediate bank arrangement.

The $2,500,000 loan is for six months. That obtained from the finance corporation will run three months.

Philadelphia Working With Less Feverish Ru

Cigar Factories Running on More Even Keel, Following Rec Flood of Orders for Fall Stocks—Demand for High Price Cigars Less Active—Various Trade Notes.

PHILADELPHIA, Sept. 25.—Despite the fact that distributors and jobbers, outside the city district, have not been sending in a volume of orders sufficient to carry on the rush which almost overwhelmed the makers at the time the distributors were preparing for increased sales incident to the opening of fall, conditions in the factories generally were reported as having been more satisfactory during the past week than for months past.

There are still aplenty of orders and production has slackened down only to the extent that it was enforced by restricted help, absent from duties in celebration of religious holidays last week as was the case the week before. The outstanding fact, however, is that labor is now much more responsive to urgings to speed up production without sacrificing workmanship than it has been for some time, and, therefore, manufacturing conditions are far more satisfactory to the proprietors.

The larger makers report that there is some decline in the demand for the higher price grades, but an increase for those priced just a little below the top. The benefit to the employers lies in the fact that labor realizing the changing character of the market either through its own observation or because the circumstances have been brought home to it very directly is no longer insistent on being given only the high price grades to make. It is satisfied now if given sufficient of the medium priced goods to keep busy and does not much demur if otherwise lost time can be made profitable in making up the cheaper grades.

Urge Prompt Action

Although the market as outlined is improved, the manufacturers are confident that in the very near future when the holiday business comes in there will be another rush and probable disappointment to those with belated requisitions. Several of them, therefore, during the week sent out advices to their distributors to get in their special holiday orders promptly, in order that there can be certainty of early deliveries, and that advantage can be taken of the present fine conditions for turning out a high grade product in the special packings for the festival season.

Cigar box manufacturers have been continuously busy, turning their attention to the special packings for the Thanksgiving and Christmas trade, while the demand for staple lines has eased off a little.

Leaf Men Wait for Lower Prices

Leaf market conditions of the week showed a very decided slowing down in the placing of orders for immediate delivery and almost as large a one for future deliveries. Those leaf dealers who had previously planned a mid-September journey to Havana to purchase the new crop have postponed their trip until later, hopeful that by so doing they can get the benefit of reduced prices.

Notable Bayuk Activities

There will shortly be placed on the market by Bayuk Cigars, Inc., what it regards as a distinct novelty and one which it anticipates will be most salable. It is a new packing of Philadelphia Hand Made, arranged in convenient pocket package. The labels on the cardboard packs of five cigars, retailing for 50 cents, are identical with those on the regular Hand Made boxes. Ten of these packets are put up in a carton with stand and head piece for counter or show case display, and they are most attractive. A stock of the new packing is on hand and will be ready for distribution some time during the week. The big event of the week in Bayuk affairs was the outing of the Havana Boosters Club in a two-days celebration, in or about a boathouse on the Neshaminy Creek at Croydon, Pa. The Club was self contained; it journeyed to the boathouse headquarters from Philadelphia with its chef and an abundance of raw and finished materials for repast and the 26 members participa including three newly elected, Ed Collins, William Leonard and Fred I enjoyed almost hotel conveniences. Indig had become qualified for initi on the very eve of the outing by promotion as Credit Manager to suc the late William G. Kimber, Jr. D the two days of the outing all manne land and aquatic and indoor sports enjoyed. Among the week's visitor Bayuk's headquarters, 3rd and Sp streets, were Bernard C. Wagner o Wagner Cigar Co., Peoria, Ill.; J C. Baum, Jersey City distributor, a Goldberg, of Coatesville. Victor C. M closed during the week a successful paign for the Bayuk line with Pat McRee, Richmond, Va., distributors

Several of the Philadelphia manu turers and jobbers are interested i financial embarrassment, announced ing the week, of Antonio Terriz Williamsburg, Blair County, Pa., ret

One of the smaller, but very w known, retailers of the Central section, retired from its ranks durin week when Joseph Sussman sold ou establishment at 207 Arch street, w he conducted for many years, t Ratner, new to the trade, but w brother long has been established at and Spring Garden streets. Suss successor at 2nd and Arch streets Berk.

Mrs. Jennie Silberman Teller, known in trade circles, passed away ing the week at the age of 62 in the Palace Hotel, at Atlantic City. She mother-in-law of Jacob Loeb Langs and was a cousin of Frank Teller, of the former well known cigar manu turing firm of Frank Teller & Co.

York County News

RK, Pa., Sept. 24.—More than half
1923 crop of tobacco in southern
county is now in the sheds. The
ng of tobacco started the week of
mber 10. The York county crop
off to a late start this year and in
to permit the plants to further
re the growers had been occupying
selves with other duties about their
s.

e sudden change in weather about
weeks ago which brought cold nights
threats of frost spread alarm among
growers who at once determined to
and house the most mature tobacco
s. They employed extra labor, in-
ng women and children and worked
into nights to get the tobacco into
sheds to prevent it from being dam-
by frost.

e cold spell has since been followed
varm weather and the farmers, who
not completed the cutting of their
cco are allowing the remainder of
crop to stand. Under the present
favorable weather, there is every
on to believe that this tobacco will
fully mature.

though the York county crop was
ted late and was held back by drouth,
growers are unanimous in the opin-
that it will be as good, if not better,
former years, and good prices are
cted. No sales have thus far been
rted, but tobacco manufacturers and
rs are said to be visiting farms and
ing inspections of the crops. The
ers do not hesitate to show their
cco, because the crop is clean and
er hail cut nor broken. The York
nty crop has also been free from
t diseases, such as are reported from
e of the other tobacco growing sec-
s of the United States. About 2,000
s were set out in tobacco this year
his county, or about 300 acres more
n 1922.

Lancaster County Prices

ancaster county's tobacco crop will
ize big figures this season, which is
nly indicated in the prices now being
d for crops that have passed from the
ds of the growers. Sales are being
le daily and the figures are 25 cents
better in every transaction. The
at of impending frosts is hurrying
work of harvesting the crop and in
ny sections whole families are assisting
the work of cutting the crops now
dy for the knife.

During the past week a number of
s have been reported from the east-
section of the county. Harry Bair,
near Intercourse, sold his crop of two
a half acres to the Hoffman interests
25 and 10 cents, and Peter Clark, of
same section, sold three acres at 25
10 cents. John Long, of near Iron-
e, is reported to have sold 12 acres at 26 and 5 cents. Agents for the buying interests have been in the field for some weeks past looking over the crops and their eagerness to buy is proved by the taking up of crops as soon as they are housed.—*Lancaster (Pa.) New Era.*

Baltimore Market

BALTIMORE, Md., Sept. 20.—Gieske & Niemann, leaf tobacco merchants, make report as follows:

MARYLAND.—Receipts for the week were 1,324 hogsheads, and sales totaled 1,819 hogsheads. All grades continued in active demand with a firmer tone on all desirable tobaccos.

OHIO.—Receipts for the week 90 hogsheads; no sales reported.

Mayfield Market to Open on November 20

MAYFIELD, Ky., Sept. 22.—At a recent meeting of the Directors of the Mayfield Tobacco Board of Trade, it was unanimously decided to open the Mayfield Tobacco Market on the 1923 crop under date of November 20.

The 1923 Crop

On account of the recent excessive rains and "Wild-fire" the quality and, of course, the quantity will be considerably reduced compared with early estimates. However, it is difficult, in fact almost impossible, to make an intelligent report as to quality until the crop begins to move. We would not estimate eighty to ninety per cent of the crop harvested.

The 1922 Stocks

The Association controls practically all stocks, of which the larger per cent is held by the organization in the Western District, consisting largely of short to medium lengths and common to medium light colored and nondescript grades, all in good, sound keeping condition. In addition to the Association stocks, we would estimate not exceeding 250,000 pounds visible independent stocks at the various markets of origin, and these stocks are largely held at this market, consisting principally of the short to medium lengths of the snuff style tobaccos. —WRIGHT, SMITH & Co.

Briar Pipe Hearing

(*Continued from page* 45)

shut out entirely the American pipe manufacturer unless he is given some relief.

Leopold Demuth, of William Demuth & Co., pipe manufacturers, and S. M. Frank, a pipe manufacturer, were the principal witnesses today and following their direct testimony they were cross-examined by Mr. Rafter on behalf of the importers and members of the Commission. Both testified that the foreign competition is seriously handicapping their business. They stated that they had not been able to find out definitely what the importers were purchasing their pipes for, but they stated that they had heard rumors, apparently well backed up by facts, to the effect that it was very much cheaper than they could produce them for.—LAMM.

The Pipe Tariff Hearing Up Again Oct. 17

(*Special Telegram to* TOBACCO)

WASHINGTON, D. C., Sept. 25.—The Commission will resume the hearings on the pipe tariff rates on October 17.

Labor Statistics

(*Continued from page* 59)

as compared with $59,033 in July, a decrease of 7.8 per cent.

In six chewing and smoking tobacco establishments which reported for August, 1923, there was an employment of 1,297 as compared with 1,207 for August, 1922, an increase of 7.5 per cent. The payrolls amounted to $36,962 in August this year as compared with $31,335 in August last year, an increase of 18.0 per cent.

In 153 establishments manufacturing cigars and cigarettes the employment in August amounted to 28,780 as compared with 29,620 in July, a decrease of 5.7 per cent. In these same establishments the payrolls in August were $476,059 as compared with $528,695 in July, a decrease of 10.0 per cent.

There were 100 cigar and cigarette manufacturing establishments reporting an employment of 21,185 in August this year as compared with 23,948 in August last year, a decrease of 11.5 per cent. The payrolls in these same establishments amounted to $351,384 in August, 1923, as compared with $422 390 in August, 1922, a decrease of 16.8 per cent.—LAMM.

Greene County

(*Continued from page* 47)

erly Burley tobacco must have a free circulation of air, or it will become house burned, and no matter how fine the tobacco is in the field, if it becomes house burned by crowding in the barn, the price drops to nothing.

The Greeneville tobacco market will open on December 4. There will be two sets of buyers and two sales going on at the warehouses throughout the day, and it is thought that about four million pounds will be sold before Christmas. At an average of 25c., and it is thought the market will be around this figure, Greene Countians will have $1,000,000 for Christmas money, which should buy a very wholesome supply of gifts.

In Perfect Condition

BECAUSE HIS CIGARIST ENCASED THEM IN THE RACINE WAX-LINED INDIVIDUAL CIGAR POCKETS.

MADE BY
RACINE PAPER GOODS CO., Racine, Wis.

Connecticut

(*Continued from page* 51)

The officers of the association look for a very busy week, and, from present indications, several large blocks of broadleaf will be sold. The tobacco association had a very fine exhibit of tobacco at the Eastern States Exposition held last week at Springfield, Mass. The exhibit was arranged by Judge Hickey, chief of the Field Service Department, and it was in charge of Mr. Hickey, assisted by his brother, C. M. Hickey of East Hartford, and S. F. Brown of Windsor, Conn., vice-president of the association. A section of a tobacco shed, with green tobacco hanging, was set up with a painted background of a tobacco field; samples of 1922 tobacco grown by members and two four-foot cigars were also in the exhibit. The exhibit was finely arranged and attracted great attention from the thousands of visitors, who learned much about tobacco in its unmanufactured state. Photographs of the fields in different sections of the valley, taken during the past growing season, also formed a part of the exhibit.

* * *

Tops, Not "Gobs"

In quoting the prices fixed by the Connecticut Valley Tobacco Association, on 1922 broadleaf last week, the linotype machine made "Tops" read "Gobs," and it escaped the eagle eyes of our usually alert proofreaders and got into print. But, of course, that does not change the price of broadleaf tops.

* * *

Only a Few Exceptions

Young man don't swear. There is no occasion for it outside of a printing office where it is useful when the paper is behind time. It also comes in handy in proof-reading and is "indispensable" when the ink works bad and the press begins to "buck." It is sometimes brought into use when the foreman's mad; and it has been known to entirely remove the tired feeling of the editor when he looks over the paper after it has been printed. Outside the printing office it is a foolish habit.

Chicago

(*Continued from page* 49)

The brand that is featured is the C cago Motor Club. The entire winc space is given over exclusively to t brand.

Redencion, from Marcelino Perez Co., is just cleaning up at the two sto of A. M. Seckbach & Bro.

A large Webster cigar display has b put in by the Bigenold Drug Co., 4 street and Cottage Grove avenue.

Still Going Forward

troit Cigar Production Making Good Headway

Industry Is Progressing on Its Way Toward Rounding Out a Record Output—Sudden Changes in Weather Temporarily Affect Retail Business—Notable Activities.

ITROIT, Mich., Sept. 29.—The cigar dstry in Detroit is fast on its way to- rounding out a record production t923. September production will be cess of August, and August produc- this year was well ahead of the sponding period for 1922. The ap- ching holiday season gives every in- cion of being a winner.

ie sudden switch in weather condi- during the past few days from typi- all weather to the sultry, sticky kind, slowed up retail trade slightly.

Swing Around the Circle

m T. Gilbert, president of Webster r Co., left Sunday night for a trip maha, Kansas City, St. Louis and s in the middle west, to visit his dis- itors. Webster cigars continue to in popularity daily in Detroit, while all other sections shipments are red sent forward by express.

Making Great Strides

Bill" Lakin, general field marshall for tt & Bond, Newark, N. J., manufac- rs of Blackstone cigars, leaves for east. For the past week Mr. Lakin assisted the sales force of C. T. er in promotion work on Blackstone s in the motor city. All three sizes Blackstone cigars have proved their ularity in this market. Cabinet, at a ; Londres and Panatela at two-for- arter, are going well. The House of er has given Blackstone cigars a derful distribution, and the aggres- salesforce of this dynamic associa- has made the Blackstone brand the st selling quality, Sumatra wrapped ce in this market.

Going Strong

Producto cigars made by the G. P. Cigar Co., are going strong in this ket. Reports from the Detroit branch H. P. Cigar Co. on Grand River nue, show this brand going better at any time since it was introduced mokers hereabouts. There has been ortage on the dime size and two for arter.

Makes Good Report

R. Tobin, representing the Falk To- o Co. is back in town after a very essful trip through the state. He re- s Herbert Tareyton and Johnnie ker cigarettes, Serene Mixture, Her- Tareyton Smoking Mixture and r products of Falk Tobacco Co., go- over big. Mr. Tobin will now spend e time in Detroit directing a cam- n on Herbert Tareyton cigarettes.

Gaining Steadily

he Bernard Schwartz Cigar Corp. is ull production schedule at all three ts, and is still behind on orders for . Dun cigars. This brand has shown eady increase in this section during past six months and is now one of first sellers in all sizes.

Holiday Orders

t the San Telmo Cigar Co. plant, con- ditions are practically the same. Robert Bacon, Joan of Arc, Court Royal and Saturday Evening Post cigars are in big demand in all sections and orders are already coming in for holiday packing.

Personality More Popular

Personality cigars, the quality product of New York-Tampa Cigar Co., are going well. John T. Woodhouse, local distributor, reports the demand for all sizes showing a steady increase.

A Healthy Family

El Javana, Dime Bank, Humo, Detroit Hand Made, Miss Detroit and Macico Cigars, the products of Mazer Cigar Mfg. Co., are all big factors in this market. Humo cigars lead the field by a big margin as the swiftest selling eight cent, two for fifteen cent, cigar.

Hava-a Java cigars made by Jacobstein Bros., are being introduced in this territory through N. Nalbaudian & Co., local jobbers and are taking hold very well. Robert Emmet Moriarity, formerly with Fulds Cigar Corp., will act as factory representative for Michigan and Northern Ohio.—JIM.

Vote to Dissolve Griffin Tobacco Co.

HARTFORD, Conn., Sept. 29.—Termination of the corporate existence of the Griffin Tobacco Co. was voted at a special meeting this week at the company's Hartford office, 81 Commerce street.

All of the issue of common stock, 3,000 shares, now owned by the American Sumatra Tobacco Co., was voted by Ambrose Hardenbergh of New York, secretary of the Griffin Tobacco Co., in favor of the termination.

More than 1,200 shares of the 1,500 shares of preferred stock was voted in favor of the termination by persons or by proxy.

No opposition was expressed by any one to winding up the affairs of the company, and the action followed a vote of the directors August 16, at a meeting in New York to dissolve.

It was voted this week to make February 10, 1924, the limit for the presentation of claims against the company.

As a part of the steps to close the business of the company the office and warehouse at 81 Commerce street, and the 1,769 acres of land with buildings, located in Bloomfield, will be sold. The company has raised shade grown this year on 460 of the 1,769 acres. The crop will be sold also.

The capital stock of the Griffin Tobacco Co. is $300,000 in common stock and $150,000 in preferred.

The controlling interest in the company was acquired about four years ago by the American Sumatra Tobacco Co., which also acquired land at the southeast corner of Grove and Mechanic streets and planned to erect a large warehouse. Fred B. Griffin, now general manager of the Connecticut Valley Tobacco Association, was treasurer and general manager of the company for some time, and after the purchase by the American Sumatra Tobacco Co. became a vice-president of the latter company.

The officers of the Griffin Tobacco Co. are: President, William A. Tucker, New York; vice-president, Charles F. Griffin, Bloomfield; secretary and treasurer, Ambrose Hardenbergh, New York; assistant treasurer, F. M. Arguimbau, New York; directors, the above officers and William M. Kahn, Hartford; Julius Lichtenstein, New York; Louis Leopold, New York. Mr. Leopold is chairman of the directors. P. Polumbaum of New York is assistant secretary.

August Internal Revenue Tax Collections

WASHINGTON, D. C., Oct. 1.—Taxes collected on tobacco products in August amounted to $28,907,587.74, as compared with $31,579,015.42 collected in the same month of last year, according to an announcement just made by the Bureau of Internal Revenue.

Taxes collected on large cigars in August of this year amounted to $4,072,201.67 as against $4,150,454.56 collected in August of last year. On small cigars taxes collected this year amounted to $56,259.73 as against $90,747.42 for August of last year. On large cigarettes the taxes collected this year totaled $6,847.35 as against $7,242.78 for the same month of last year.

The bureau's figures also show that in August of this year $17,575,427.25 was collected as taxes on small cigarettes as compared with $19,121,858.95 for August of last year. Taxes collected on snuff of all descriptions for August of this year amounted to $609,460.83 as against $621,865.91 for August of last year. Also the tax collected in August of this year on chewing and smoking tobacco totalled $5,901,600.95 as against $6,843,865.54 for August of last year.

The taxes collected in August of this year on cigarette papers and tubes totaled $110,269.64 as compared with $138,576.48 for August of last year. The special taxes collected on manufactures of cigars, cigarettes and tobacco totaled $573,042.13 in August of this year as against $601,989.03 for the same month of last year and the miscellaneous collections under repealed laws relating to tobacco amounted to $2,478.09 in August of this year as compared with $2,414.75 for the same month of last year.—LAMM.

An Effective Aid to Foreign Trade

WASHINGTON, D. C., Oct. 3.—As an evidence of what the new Tobacco Section of the Department of Commerce is able to do for the trade, a direct sale has been made of 1,000 hogsheads of tobacco to foreign consumers.

A foreign trade opportunity reached T. L. Hughes, chief of the section, a short time ago, which he sent out to the trade and as the result of that opportunity, the sale of 1,000 hogsheads was made. This is only one of a number of instances which have already occurred at the department since the Tobacco Section has been formed.—LAMM.

A Review of the Cigar Leaf Tobacco Situation

By A. LERT

Any disaster which happens to leaf tobacco in the field, whether it be frost, hail or wind, cannot be accurately analyzed at the time. Reports regarding the recent frosts in Ohio and Wisconsin have varied considerably, and on the whole surveys made by intelligent resident buyers from some of the leading leaf houses are not entirely in accord as to the extent of the damage.

Tobacco Frozen in the Shed

There is one thing certain, however, and that is over one half of each of these crops was destroyed and it is problematical at this time to in any way accurately estimate what damage occured to the Wisconsin tobacco that was frozen in the shed.

It is fairly safe to figure on the tobacco that was frozen in the field,—that this will not make leaf tobacco in any shape. However, the tobacco frozen in the sheds may or may not be suitable for binder or filler purposes, and time alone can tell the story.

The Shade Grown Outlook

The Shade Grown Packings are reported to be assorting very fancy light grades which will prove a boon to those who have been more than short of light tobacco for many months. Fortunately, the labor question in Hartford, the Shade center, is better than in years and the probabilities are the tobaccos will be shown, at least the first priming, the forepart of next month.

Pennsylvania Prospects

There has been a decided stiffening in Pennsylvania on old tobacco and there is but a very limited amount left of the 1921 crop, which is fast changing hands.

Havana Situation

The arrival in Havana of some of the larger manufacturers as well as New York dealers has already absorbed an additional quantity of desirable tobacco from this crop and it is quite evident that at the prices the tobacco is moving and with the rapidity, there will be little fluctuation, if any, in price and there will be little available tobacco after the New Year.

Porto Rican Shipments

Shipments of Porto Rico have increased with the arrival of the new tobacco and on all sides—packers, manufacturers and consumers—it is perhaps the most satisfactory crop that has come from this Island in a great many years.

Cigar Production

Business on the whole is steadily improving and in fact a great many factories are now oversold and with the problem on hand, which is always a healthful one, of short shipments and orders in excess of what the factories actually have on hand.

Marcelino Perez & Co. Moving to Tampa

Marcelino Perez & Co., manufacturers of clear Havana cigars in bond, including the well-known Tuval, Redencion and Pontchartrain brands, are removing their business and distributing headquarters from 709 Sixth avenue, New York, to Tampa, Fla., where their factory is situated, and expect to be settled in their new quarters within the next few weeks.

Manuel L. Perez, in charge of distribution, states that there will be no changes in the management, and that each member of the organization will continue to follow his duties, as formerly. He declares that the move has been decided upon to insure constant personal contact with the factory, and that the change will insure prompt and efficient consideration to the trade.

It is anticipated that the factory output will be practically doubled in the near future to meet the increasing demand for the high-grade brands manufactured by this enterprising company.

Fred Marsh, of the sales staff, will continue to operate here as the New York representative of the organization.

A Coming Nuptial Event

A coming event which is arousing great interest in the tobacco industry is the wedding of Miss Margaret Anna Golden, daughter of Mr. and Mrs. Peter Golden, of 361 Eightieth street, Brooklyn, and Thomas F. Sullivan, editor of the *United States Tobacco Journal*, which will be solemnized at a nuptial mass in St. Anselm's R. C. Church, 83rd street and Fourth avenue, Brooklyn, at 10 A. M., Thursday, October 11.

Miss Golden has been for several years secretary to Percival S. Lowe, the well-known Water street leaf tobacco broker, and has gained the respect and admiration of the many clients of this organization by her amiable manner and assiduous attention to the duties appertaining to her position.

Mr. Sullivan possesses a host of friends in the tobacco industry and has made an enviable reputation as an authoritative and trenchant writer on tobacco topics. He is a graduate of Manhattan College, New York, and served in the United States Army during the World War. Before entering tobacco trade journalism, he was engaged in metropolitan newspaper work and conducted classes in journalism and advertising for the Knights of Columbus school here.

The Unfavorable Grecian Conditions

WASHINGTON, D. C., Oct. 3.—The Department of Commerce has a report from American Consul Leland B. Morris at Saloniki, Greece, stating that unfavorable conditions continue in the marketing of the tobacco crop there.

As a result of the large crop this year, the Consul reports, prices of old stocks have declineed, and of the 1922 crop there remains unsold about 1,500,000 pounds of Eastern Macedonian tobacco and almost 1,000,000 pounds from Western Thrace. The Tobacco Merchants' Association, the report continues, has asked the Ministry at Athens to suppress the export tax on tobacco, which would be a large factor in relieving the unsatisfactory situation. —LAMM.

Internal Revenue Collections for August, 1923

WASHINGTON, D. C., Sept. 29.—The following comparative data of tax-paid products indicated by monthly sales of stamps are obtained from the statement of Internal Revenue collections for the month of August, 1923. (Figures for August, 1923, are subject to revision until published in the annual report.)

Waxes Wroth Over Pool Criticism

JOHNSON CITY, Tenn., Sept. 29.—Phil S. Taylor, nephew of two of Tennessee's ex-governors, a farmer and tobacco grower, recently replied to the statement of E. S. Rees, local warehouseman, who in an interview recently declared that in Kentucky he had "talked with many members of the so-called co-operative movement and found, contrary to the propaganda being spread over this section, that there is a great deal of dissatisfaction and unrest among the members."

In his statement, Mr. Taylor says:

"The local papers for some days have carried statements from E. S. Rees, tobacco warehouseman, to which I want to reply.

"Mr. Rees, in common with the organized tobacco buyers and warehousemen of east Tennessee, seems exceedingly disturbed because the farmers of this and adjoining counties are themselves organizing for the sale of their tobacco. These good dealers who have for years made money handling our tobacco are now having fits and 'jim-jams' when the producers of this commodity assert their right to sell co-operatively through their own association, instead of patronizing the warehouses operated by these gentlemen. This attitude on the part of the dealers strikes me as being akin to the attitude once taken by King George of England, who once upon a time advised certain of his American colonists that he was their king; that his will was their law; that his rule and his reign was absolute and that no man or set of men dare be independent of the king!

"Mr. Rees' article is as full of error and evasion as his system of selling tobacco is full of unfairness to the farmer. It is a typical utterance of those who long have dominated the tobacco business and who are more interested in getting profits out of the farmer than in getting profits for the farmer. His article is also somewhat tinged with humor w we consider the fact that in it he line so fraternally with the tobacco peopl Greeneville, against whom he has w a relentless war for the last ten ye This humor is made even more deli ful when we behold the pin-hooker Greeneville playing Jonathan and D with Mr. Rees.

"Mr. Rees' first error lies in the st ment that the Burley Association yet on hand of its 1922 crop 65,000 pounds. Mr. Rees should have st that the association yet holds about 000,000 pounds and that they han 197,000,000 pounds through the pool that this 40,000,000 pounds is largel the higher grade tobacco which wil all probability soon be sold at from to 60c. per pound. It might be wel state here that the association has ways sold its entire holdings prior to opening of the buying season for the ceeding crop. It might also be wel remind Mr. Rees and the farmers of country that the pool handled aroun per cent of the total Burley produc of last year and that it is absolutely tain that it was only because of the that this tobacco was pooled and sol safe methods instead of on the auc floor that the price of all tobacco did go to pieces. It is also a significant that tobacco is the only one of the st commodities produced by the Amer farmer which has not sold away u the cost of production since the W War. There is hardly the shadow doubt that it is the Burley pool an alone which has stabilized the tob market during the last two years averted a repetition of the disast prices paid the farmers in 1920. No can deny that the pool prevents flo markets and protects against ruinous clines in prices which are the logica sults of dumping tobacco on the au floor in the manner practiced on the markets.

"Mr. Rees states that the selling of the association are between $1.50 $2 per 100 pounds and that these p

e way above the cost of handling to-
e under his system. If Mr. Rees
daken the pains to look up the facts
ould have found that the actual ex-
n of handling the pool tobacco was a
l less than 90 cents. He would also
v found that not a bank in Kentucky
lning money on tobacco warehouse
ots at more than 6 per cent and that
i the first time in the history of the
:co business when a tenant farmer
n go to his bank and get credit there
is crops. All men with whom I
k in Kentucky were agreed that the
m which thus enabled the tenants to
t loans without sacrificing their
had been a great stabilizing influ-
on business conditions.

"r. Rees then takes a fling at J. C.
c and Ralph Barker, officials of the
ry Association, and intimates that
are robbing the farmer on salaries.
e grant these men are paid $40,000
ar for selling about 200,000,000
ds of Burley for the 90,000 farmers
belong to the pool, I should like to
nd Mr. Rees that if he handled all
tobacco through his tobacco ware-
e at 30c. per pound, his commission
o at rate of 3 per cent would bring
n in $1,800,000. And as his fees for
hing tobacco run around 20c. per 100
ds, he would pick up another $400,-
(or weighing. In other words, Stone
Barker would mop up more than
0,000 instead of only $40,000 if they
l sell the Burley in their pool in the
way that Mr. Rees would sell it in
s warehouse! How would that salary
2,200,000 suit Friend Rees and his
s? By the way, it is very interesting
ote that Mr. Rees last season sold
thing over 80,000 pounds of tobacco
is warehouse in Johnson City at a
range around 28 cents per pound.
brought, gross, around $225,000. At
r cent his commission on this was
t $6,750. He charged, at 20c. per
pounds, about $1,600 for weighing
crop. Thus the tobacco growers of
county and others around paid Mr.
about $8,350 for the rare privilege
rading with him for about four
ths last winter! As J. C. Stone,
ident of the Burley Association,
s a salary of $24,000 per year, the
reader will at once see that Mr.
was paid more in proportion for his
months of service to the tobacco people of this country than Mr. Stone was paid for handling more than 200 times as much tobacco for the farmers of Kentucky, Tennessee, Ohio, Indiana, West Virginia and Missouri! Does the kind reader now wonder why Friend Rees, almost with tears in every word, begs and pleads with the farmers of Washington County to stay out of the pool?

"Next, Mr. Rees grows very sarcastic about Aaron Sapiro, the California attorney who organized the tobacco pool. It is enough here to state that this is the same Mr. Sapiro who first organized the first fruit growers' pool in California which has liberated the orange, prune and lemon grower of that state from their bondage, has revolutionized their marketing system, made them prosperous, built up their country and raised California bank deposits into third place in all the United States. He is also the same Sapiro who is now assisting the wheat growers of the great Northwest and Canada in their attempts to pool their wheat and thus avert the bankruptcy which hangs over them. Shame upon the man who would deride the work which this man Sapiro is doing to better the conditions of the producing masses all over our land! Mr. Rees next gloomily states that there is a movement on foot in Kentucky to cut out next year's tobacco crop, and says that the pool members will be forced everywhere to reduce their acreage. If Mr. Rees had read the contract which the farmers are signing who join this pool he knows very well that there is no such power vested in this organization. And he also knows that arbitrary commands such as he speaks of are clearly illegal and could not be enforced.

"I wonder why Mr. Rees has only talked with two of the committee who went over to Kentucky. There were, as I recall, eleven men from Washington and Carter counties who made this trip. In addition to Squire Moore and Mr. Matthews, named by Mr. Rees as being opposed to the pool, there were: Squire M. M. Mauk, D. B. Pence, Henry C. Black, Ross Smalling and his brother, George Treadway, George Anderson, W. G. Boren and myself. I suggest that any man interested talk with some of these parties. We spent nearly a week, traveled through five or six of the big Burley counties and found only one man who opposed the pool. We talked with men from all classes—from poor tenants to multi-millionaires, like ex-Senator Camden. We chose our own routes of travel and questioned whomsoever we desired to question. We were free and unfettered and every avenue of information was open to us. It is little short of insult for Mr. Rees to insinuate that we were either hoodwinked or deceived. On our return we reported to the Chamber of Commerce of Johnson City, which had asked us to make the trip. This report was practically unanimous as to all essential points concerning the pool. It is true that Mr. Mathes stated that he would not join the association unless 75 per cent of the tobacco men of this county signed up. Esquire Moore has since repeatedly stated that his reason for not joining was that he did not feel free to sign the contract himself until his tenants agreed to do so. It is safe to say that if these gentlemen really oppose the organization they do so because of local conditions and not because of anything they heard or saw in Kentucky.

"Mr. Rees takes his final fit in reviving the ghost of the distant Night Rider days. By inference he would lead us to believe that this band of 90,000 farmers scattered over the six Burley producing states are not law-abiding citizens, but desperate characters bearing the blazing torch and wielding the deadly dagger of anarchy. Mr. Rees knows as well as any other well-informed man that this organization does not countenance, aid or abet lawlessness, disorder or mob violence. He also knows that the very reverse of this is true and that the Burley Tobacco Growers' Co-operative Association really represents a great, enlightened and well-organized movement on the part of the producers of this commodity to better their economic and social condition. It is not too much to assert that the mind of all of those who have studied the rural problems of the world have reached one large, definite conclusion, and that is that only through the instrumentality of co-operative marketing can the farmers of the world avoid ultimate serfdom.

"In conclusion, I believe that the Burley Association now being so bitterly assailed by the entrenched forces of greed is a long, long step in the right direction for our people to take. That it will ultimately gather into its ranks the great body of our farmers and by its better, safer, surer methods of marketing vastly improve their conditions, I have not a single doubt.

"Finally, if Mr. Rees or any of his allies would care to, I should be glad to have them meet me at Johnson City, Jonesboro or any other point in this county where we can publicly discuss this matter at greater length before the farmers of this county. Such a discussion would afford more time for both of us than newspaper space will permit, and I feel that the farmers of this county are entitled to a full, frank and fair discussion of the issues involved."

Big Demand for Porto Rican

Isador Cohen, leaf dealer and packer, of 145 Water street, is experiencing a big demand for Porto Rican tobacco.

Opens New Establishment

TERRE HAUTE, Ind., Sept. 29.—Charles Metcalf has opened a new cigar and confectionery business here.

The Production Figured for August, 1922-3

WASHINGTON, D. C., Oct. 2.—The Bureau of Internal Revenue has announced that in August this year there were 616,-264,768 large cigars manufactured as compared with 641,164,181 manufactured in the same month of last year. Also there were 37,506,487 small cigars manufactured in August this year as compared with 60,498,280 manufactured in August of last year. The Bureau's figures also show that in August of this year there were 5,858,334,123 small cigarettes manufactured as against 6,373,890,-453 manufactured in August of last year. There were also 951,021 large cigarettes manufactured in August this year, the Bureau announces as compared with 1,-005,642 manufactured in August of last year.

There were 3,385,893 lbs. of snuff manufactured in August of this year as compared with 3,454,811 lbs. manufactured in the same month of last year. Also there were 32,786,654 lbs. of tobacco manufactured in August of this year as against 38,020,972 manufactured in the same month of last year.

There were 12,437,485 large cigars manufactured in Porto Rico in August this year, the Bureau announces, as compared with 13,697,405 in the same month of last year. Also there were 1,000,000 small cigars manufactured in August this year as against 2,000,000 in the same month of last year. There were 30,000 large cigarettes manufactured in August in Porto Rico as against 10,000 last year and 42,000 small cigarettes manufactured as against 5,030 in August of last year.

The Bureau also announces that in August of this year there were 16,645,275 large cigars manufactured in the Philippine Islands as compared with 18,253,658 manufactured in the same month of last year. In August also there were 141,660 small cigarettes manufactured as compared with 62,530 in the same month of last year. There were no large cigarettes manufactured in the Philippines in August this year according to the Bureau, while in the same month last year there were 300 manufactured.

To Appeal Porto Rican Stamp Case

WASHINGTON, D. C., Sept. 21.—An appeal will be taken in the October term of the Supreme Court by José E. Benedicto, as Treasurer of Porto Rico, against the final decree of the Federal Court for the District of Porto Rico, granting a permanent injunction against the Porto Rican Government from requiring guaranty or other stamps on Porto Rican tobacco or tobacco products under authority of an Act of May 13, 1921.

The plaintiff in the case is the Porto Rican-American Tobacco Co. of Porto Rico, which secured the injunction on the ground that the act authorizing the stamp is null and void and obnoxious to the Organic act of Porto Rico in that it undertakes the double object of protecting Porto Rican tobacco against fraud through a system of inspection and at the same time to raise $100,000 annually for another and distinct purpose, an advertising campaign through the New York agency.

The War Department, acting on behalf of the Government of Porto Rico, will contend before the Supreme Court that the act in question is not both a revenue law and an inspection law, and therefore is not obnoxious to the Organic act.

Pipe Sales Are Increasing

Pipe sales show a considerable increase over last year, leading manufacturers say. Preference is given to briars in the dark Italian finish. The Eastern trade likes straight stem pipes, while the West is inclined to the bent variety and New England to the "poker" pipe. Leading bowl types are the Hungarian, the ball and the egg shapes. Better quality merchandise is in demand. Pipe sets are beginning to move well for the holiday trade.—*New York Times.*

uth Carolina Auction Tobacco Sales in August

COLUMBIA, S. C., Sept. 29.—The South Carolina Department of Agriculture, mmerce and Industries, has issued its report showing the tobacco sales during gust, at 27 auction warehouses, on 20 South Carolina markets.

The report shows that the average price secured for tobacco sold for producers he auction markets, was $23.80 per hundred pounds.

The report includes the independent warehouses only. The Tobacco Growers operative Association does not make its report until the end of the season.

"We hasten to thank you"

The American Tobacco Co.
INCORPORATED

"We have the latest sales reports of Blue Boar Cigarettes—very gratifying, indeed.

"Part is due to the wonderful cooperation of dealers in displaying Blue Boars—part to the cigarette itself—and now we've begun to advertise it.

"To show our appreciation we have authorized our Division Managers to give $150,000 in cash to dealers who display Blue Boars on counters.

"Thousands of dealers have already been visited—but if by chance you have not been presented with an award—just drop us a postcard saying that you have Blue Boars on display, and our local Division Manager will call on you—with cash in his hand to give you if they are displayed on your counter when he calls.

"Blue Boars are winning a leading position—increasing success. This means extra profit for you."

rida Rotarians Interested In Bright Leaf

KE CITY, Fla., Sept. 29.—At a re- meeting of the Rotary Club the ion of bright tobacco growing in mbia County was fully discussed the view of interesting our farmers e growing of tobacco. A committee appointed to investigate the matter, ing all possible information as to ing, caring and marketing. Alex , a member of the committee, had ared a questionnaire covering prac- y every phase of the tobacco indus- which was sent to W. L. Taylor, ber of the Gadsden County Tobacco at Quincey, Fla., with the request all possible information be fur- d. Mr. Taylor, who has been en- d in tobacco growing in this state number of years, contributes in the wing article valuable information in ection with the growing of tobacco, h is well worth careful reading by interested in tobacco culture:

right tobacco is used exclusively for ettes, pipe smoking and for chew- The grades unfit for these purposes aps finding their way into snuff fac- s.

he finest leaf possessing certain qual- is used as a wrapper for plug to- or twists. The bulk of the better es are prepared and manufactured cigarettes, and the remainder is pre- l for pipe smoking or for plug.

reparation of seed beds, growing the s, preparing land for crop trans- ing and cultivating, are all practi- the same as for cigar types, except less fertilizer is required, and the vation is not necessarily quite so in- ive.

find it a little difficult to answer orically your questions and at the time give just the information that d be most helpful, so I submit the wing, which I think embraces an- s to practically all of your queries. eed beds should be prepared in the part of December or early in Jan- . Select a naturally moist but well ed location, preferably along the in of a stream or pond, and far enough from any cultivated lands to be free from seeds of weeds and annual grasses. Enough wood, preferably hard wood, such as oak, etc., should be piled on the plat to cover the entire surface with two or three layers so as to burn up clean. This burning over the bed will destroy most dormant insects and their eggs, kill roots of shrubbery and perennial grasses, and sterilize the soil. The ashes are rich in potash and lime and correct any undue acidity of the soil and afford food for the young plants. After the burning, when the soil has sufficiently cooled, a good application of a complete commercial fertilizer should be applied broadcast, and chopped in lightly with hoes. The soil should be thoroughly pulverized and raked very fine for a depth of about two inches, laid off in beds three feet wide, any desired length, and slightly raised, with a fifteen inch space between beds as a walk way.

"When the bed is well prepared the seeds should be planted by thoroughly mixing a level teaspoonful of seed with a half peck of cotton seed meal or very slightly moistened sand or ashes, or some similar medium for obtaining an even distribution of the seeds. After seeds are thoroughly and evenly mixed with cotton seed meal or earth, sow as evenly as possible over bed, allowing the quantity named above for forty square yards. After seed are broadcast on the beds, they then should be well firmed by packing with a board or tramping them in with the feet. Beds should then have a covering of cheesecloth raised at least two feet from the ground. Where large beds are required it is better to have cheesecloth high enough above beds to permit of walking upright under the cheesecloth.

"Surface of beds must be kept slightly damp from time of planting seed until plants are up and have had several days growth, otherwise the little plants will die. At any time before setting should the beds become too dry, growth will stop, and it will be necessary to frequently water the beds.

"For the crop, select a well drained plat, and run rows so that water after heavy rains will drain away. Plow and harrow thoroughly as for any truck crop. Bed as for corn, with rows four feet apart. Apply two-thirds the fertilizer in water furrow list on with turn plow, open list with shovel after a few days and relist. Leave in this condition until ready to plant. Then repeat this treatment and knock off top of list with board, such as is used for covering cotton. Set plants on this flattened list about eighteen inches to two feet apart. Transplanting is not different from the transplanting of other plants, except that they should be well watered. The plants will be tender and should be given the best start possible. The transplanting should be done the latter part of March and early in April, and the plants four to six inches high at time of transplanting.

"Cultivation should be about the same as for cotton, but rather frequent. Apply remaining fertilizer on sides of row at first plowing after transplanting.

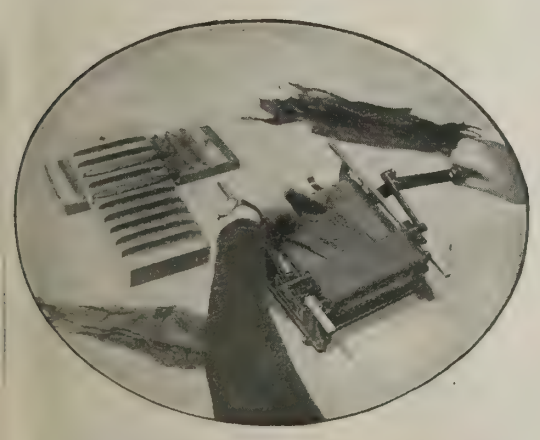
"As soon after transplanting as the plants begin to show new growth they should have a pinch of poisoned meal put in the bud of each plant. This may be done with the fingers or a perforated tin can (an old tomato or baking powder or similar can with nail holes in the bottom and wired to a stick of convenient length) containing the meal can be shaken over each plant. This to destroy bud worms and cut worms. For the best results this should be repeated weekly or oftener. It is absolutely essential in growing cigar wrappers to poison in the bud twice a week. Some growers of bright tobacco do not poison the buds at all. But it pays to do this. Use a tablespoonful of paris green thoroughly mixed with a peck of sifted corn meal. Once a week, or oftener if worms appear, the crop should have a dusting of paris green or calcium arsenate. This is applied with a "dry powder duster," or "blow gun," and a good man can easily poison fifteen acres a day with this implement. It is not, however, effective against budworm injury.

"When the bloom buds first appear in the top of the plants, every plant should be topped—that is, the top of each plant containing the embryo buds should be pinched out. In a short time after this the crop will be ready for harvesting. This should be from the first week in June till the last of July.

"The amount and kind of fertilizer per acre will vary according to the character and fertility of the land on which the crop is to be grown. Light land that will yield twenty bushels of corn per acre would require one to one and a half tons of commercial fertilizer per acre. This must be composed only of certain elements that experience has proven are not obnoxious to the plant, and that will promote growth and the development of desired qualities in the leaf. Cow-penned land that is rich enough, with a small application of high grade sulphate of potash, should make excellent tobacco. Plenty stable manure would take the place of cow penning. But it is probable that formulas used in the south Georgia district would suit your conditions.

"The yield per acre is from 500 pounds to 1,500 pounds. An average of 800 pounds is considered good. The past two years' prices have been good, averaging, I am told, about 30 cents.

"Satisfactory crops of bright tobacco have been grown on a great variety of soils. The only safe guide is a trial. In a general way, a light pebbly surface soil, with a porous clay, or sand and clay subsoil, is considered best. Alluvial soils containing plenty of vegetation or decomposed organic matter, with good drainage, is ideal.



"The labor cost per acre for growing the crop should not exceed $40, estimating labor at $1.50 per day.

"Bright tobacco is subject to the same insect pests that attack our cigar tobacco, but the value is not reduced to the same extent by reason of the leaf injury.

"This type of tobacco is also subject to all the diseases that affect cigar tobacco.

"Owing to the fact that it is grown in the open, and the sunlight has better access to the soil, fungus diseases are per-

Cleveland Business Going Along Very Smoothly

General Conditions Are About All That Could Be Desired—Labor Situation On Satisfactory Plane—Side Lines Are Helping to Swell Cash Receipts—Trade Doings.

CLEVELAND, Ohio, Sept. 29.—Business conditions in general are about all that can be desired through this way. With labor troubles at a very low figure; no unemployed to speak of, and wages at par it is no wonder that Old Man Business is going around the course with a series of eagles and birdies. The general tone of affairs is being reflected, too, in conditions in the cigar, cigarette and tobacco game. Dealers are, or almost all of them, feeling the same way about business as the embryo Sarazen who made 100 for the very first time. And say Man! It's a beautiful feeling. Brands with a quick turnover are naturally getting the pole position in the race and are meeting with a major portion of the dealers' attentions. Dealers find that the brands with the quickest turnover are those of standard reputation and quality. Side line, or specialty lines, are still proving themselves vital factors in the business of many of our local retailers. Humidors, brushes, gum and candy are live articles that are making good. In this respect, too, complete lines of sporting goods are making the cash registers ring even more joyfully. All of these are very valuable additions to the money making lines that seem to pay every dealer who investigates them.

Advertising Campaign

The J. C. Newman Cigar Co., in a big advertising campaign on their John Silver cigar, offered a cash award to the dealer showing the best window display of that brand. Louis Klein was the winner.

In Our Midst

Right in the thick of things, cigarly talking, was Herb Mesick who comes here in the interests of Cuesta, Rey & Co. Mr. Mesick has things going in fine shape through this territory and Cuesta-Rey's and White Heathers can be seen in nearly every good store in this neck of the woods. The stores that haven't got them have their orders in and are awaiting delivery from the busy factory.

Detroit Hand Mades

Saw Tom McDonald in town here the other day. He is sponsor for the fine showing Detroit Hand Mades have made in this territory, and was more enthusiastic than ever about the wonderful way orders keep coming in day after day, his wildest dreams never picturing the fine success this brand has been in this market. The Baer-Wolf Co. takes care of the distribution end of this Mazer product.

With Mendelsohn Co.

Comfort Schwartz, very well known cigarman through here, has joined the sales force of the Mendelsohn Co., local manufacturers. He will lend his knowledge of the game, his hard work, and his winning personality to the promotion of Paramount and Decision cigars.

Back in the Game

R. E. Herberson, after a short respite from the cigar game is back on the job again with the selling staff of the Associated Cigar Manufacturers and will see that Rey-Omas get the right sort of handling.

Harry Burrows On Job

Harry Burrows, Falk Tobacco Co. representative, is back with us again, after being out for a while on the sick list. Mr. Burrows is our idea of a real hustler, and the big success of Tareyton cigarettes and Johnny Walker tobacco and cigarettes is almost entirely due to his never tiring work.

Two Big Sellers

"They are our best sellers," a very prominent local cigar merchant told me. He was talking about San Felice and El Verso, the Deisel-Wemmer Co.'s twin sellers. From the many reports this cigarist is not alone in his experience. The Weideman Co. takes care of all local orders for these brands.

Back Again

Charley O'Donnell returned just the other day from a month's long trip over his big territory and has nothing but good news to tell us about the fine way things are going for Phillip Morris and English Oval cigarettes.—HERB.

Western Business Good

Julius Marqusee, of Julius Marqusee & Son, Inc., 141 Water street, has returned from a comprehensive tour of the West. Mr. Marqusee found business conditions very satisfactory, and is optimistic regarding the future of that section of the country.

Booking Up-State Orders

Leopold Holzman, of Strouse & Holzman, 197 Water street, leaf dealers and importers, is visiting the principal cigar manufacturers of New York State this week, and is booking some good orders.

Returns from Cuba

George M. Beyea has returned from Cuba, after surveying conditions on the island for S. Ruppin, Inc., importers of Havana tobacco, of 175 Front street.

Buys Fancy Wrappers

Louis Sensenbrenner, of A. Sensenbrenner & Sons, cigar manufacturers, of San Diego, Cal., arrived in New York last week, and has replenished his stock of fancy wrappers by making judicious purchases in the local leaf market.

San Francisco Trade Is Hopefully Marking Ti

Fire and Water, Two of Nature's Blessings, Have Brought Bu ness to a Temporary Slow-Down—Overhead Expense S Stays Over Head—Promotion Activity Keeping Up.

SAN FRANCISCO, Cal. Sept. 25.—While fire and water are absolutely necessary to a certain amount of human activity and enjoyment, it is very essential that the fire and water should be at the right time, and in the right place. So when fire after fire swept over different parts of central California, destroying homes and timber, and sweeping away fifty odd blocks of Berkeley's beautiful residence district, people considered that it was too much and at the wrong time and in the wrong place.

Rain Threatens Damage

And now the rains are coming at the wrong time and the wrong place, threatening damage to ungathered crops, especially in the bean fields and the raisin districts. About $17,000,000 is the estimated toll of the fires. This seems large in itself, but after all, it is but a small fraction of the accumulated wealth; liable temporarily, however, to curtail some of the unessential expenditures of quite a body of people, while replacing homes, clothing, furniture, etc.

Such things produce a check sometimes more psychological than real; but the trade in San Francisco has really a mark-time spell; not really falling off, but showing little sign of the fall gain that is bound to come.

Expense Not Conducive to Chain Elongation

There is still some complaint of the high cost of overhead in the shape of rents, etc. Harry Bercovich, head of the H. Bercovich Cigar Co., running a chain of some dozen stands, says that with prices slipping back to pre-war levels, and costs sliding up, there is little incentive to get ambitious about adding links to his chain.

There is constant promotion activity, however. Arnold Pollack, factory agent for Heineman Bros., of Baltimore, Md., and one of the best known cigar brokers on the Pacific Coast, has placed the popular Lord Baltimore 10c cigar with Reese Bros. for distribution.

A Laudable Ambition

Joseph Rinaldo & Co. are not satisfied with the splendid success they have already had in building the San Felice into a popular cigar in San Francisco, but they are now starting on a fresh campaign in connection with the factory representatives to make it the most popular cigar in the city. Factory representatives are also making the same sort of a campaign on the east side of the bay.

Dingman & Van Dyke are getting their factory busy again on their choice specialty brands, the Val Leau and the Lafayette. In common with other small factories they found the summer exceptionally dull; but the fall trade seems to be starting with more of an impetus than they had reason to expect.

Making Steady Gains

Kyne & Farrell are expressing s faction with the fine run they have on White Owls. Their stand at the ner of Mason and Turk streets is favorably located. They find, too, improving call for Manilas. The Fi ing Bobs and the Alhambras, distrib by H. L. Judell & Co.; and the La sular, distributed by Marx Bros., ar steady gainers.

Clung to His Cigar

Dr. Chas. P. Steinmetz, the electr wizard, has been visiting the city, has been received with almost r homage by all lovers of scientific search and development. Not only he given to the world the great achi ment of long distance transmission electric power, but he advocates the centration of that power under a cen control, for the purposes of economy. interesting story is told of Dr. St metz and his cigar. Dr. Steinmetz i socialist, and like most socialists, qui stickler for his personal rights and erties. So when the General Electric sued an order for its employees to card their cigars, Dr. Steinmetz ref point-blank. As he was too valuable lose, the company yielded, and raised salary materially. The great scien kept his cigar, but refused the sal having it distributed among the yo engineers. He said that he needed cigar, as it added to his enjoyment, enabled him to think better by reason the satisfaction that it gave.

Conspiracy Inquiry Ends

The legal inquiry as to the charge conspiracy in restraint of trade has b completed in San Francisco, but no fi ings have been announced. Audit claim there was little of real interest the case; and do not consider that seri points were developed.

Clarence Marx of Marx Bros., tributors of La Insular, had an interv at close range with a new phase of C fornia climate, when the Boies Springs, where he was taking a vacat was gathered into the fire area and hotel went up in smoke. No one was dangered.

Five Cent Cigars Popular

The Boquet Cohn stores, while th run of trade is in the main for high cl and high priced goods, have been havin good run on five cent cigars, small cig of Havana tobacco, by people who en a short smoke but a good smoke. good seller has been the new pack Juan de Fucas, in a large box with p tition leaving 125 on each side.

The Ellis street store of A. C. Hirs field & Co., who recently handed o their accounts to their creditors, has b taken over by Chad Milligan and Hon Penn. It is one of the desirable sta of the city.

rards are heavily advertised on the h-side. In almost every store ilow on 63rd street and Cottage Grove ue, is a Girard display. The P. J. ey Co. is going over big with this l.

and new, is the Pancho Arango ts size packed in tins to retail at 5 s. Hundreds of dealers now have size on sale.

arlson Bros. are placing with the ers Hav-a-Tampa; a mild Havana e by the Hav-a-Tampa Cigar Co. of pa. Many stores now feature this

he Miles Cigar Co., 28 East Monroe t shows several sizes of Personality, ild Havana that is now being placed

Urge First Hand Information

arge Blue Boar cigaret ads are shown he daily newspapers. "Don't wait someone to urge you, learn now why man tells another about Blue Boars," the American Tobacco Co. to the king public, in these ads.

he South Side Tennis Club now ures Pancho-Arrango made in bond rs.

Fine Displays

very fine Melachrino cigarette dis- is shown at the store of Jos. Cow- 55th street and Ellis avenue. The ground is of solid blue plush. The cago office is putting out some classy lays these days.

an Alto, made in Lima, O., by the San Cigar Co., has a steady sale. The l sales force has San Alto placed in dreds of Chicago stores.

Showing 'Em Off

he Smoke Shop at 31st street and tage Grove avenue believes in featur- cigars and at present in the display dows are shown Chancellor, Mozart, imo, El Producto, La Preferencia, Charles Denby ads.

t the Arcade cigar store, 3569 Cot- Grove avenue, is a fine window dis- of Girard cigars.

ack Wismer is still picking off orders Andrez Diaz & Co., of Tampa. He several of the better dealers here hing his brands.

In Conspicuous Places

hesterfield cigarette window displays are very numerous around the city at present.

John Collins of "Ohio Flats" and "Tiffin" fame has no kick to make about his business. Several big dealers here sell his cigars and one may always see them featured in the window displays.

The Charles Barker Co., 4351 So. Halsted street is placing thousands of Garcia Bouquet, mild Havana signs, featuring this brand. They are shown on many of the store windows.

Doing Effective Work

Doc Rosobro is still in the city. Since June, Mr. Rosobro has opened 40 jobbing accounts for the New York-Tampa Cigar Co. He features Personality, Jenny Lind, El Toro and Portina and covers a number of states in the middle and north-west.

Frank Patton, with Gonzales & Lauchez of Tampa, was a recent caller. He secured a good sized order from Crocker-Asher Cigar Co., his local distributers.

In Handy Package

The new White Owl packing of 10 for 75 cents has been placed with the trade by the General Cigar Co. Quarter page newspaper ads. feature this new handy package.

Sabaroso, a 2 for 15 cent cigar, made by Vetterlein Bros., is featured in all the H. M. Schermerhorn stores.

To Maintain Record

The usual run of Benson & Hedges cigarettes for holiday use will be on sale again this year. Harvey Vreeland has booked many orders from the Chicago dealers.

"It Pays to Advertise"

The newspaper campaign on Van Dyck keeps up and the call for this cigar is very heavy at present.

Manuel Fernandez, with a clear Havana factory in Jacksonville, Fla., was a recent caller on the Chicago trade.

Says Business is Good

Geo. Becker of Park & Tilford is in Chicago. Mr. Becker reports business very good and states that orders for imported cigars are larger this year than ever before.

Much in Evidence

Melachrino cigarettes continued to be shown in large newspaper ads. Many Melachrino displays are also being shown in the windows.

Herbert Tareyton at 25 Cents

A brand of cigarettes that is being advertised in the Chicago newspapers is Herbert Tareyton. The ad. calls the attention of the reader to the fact that Herbert Tareyton is a quarter again.

Don'ts for Cigar Salesmen

Don't argue—illustrate. Don't ever tell a prospect that he is mistaken. Don't ask the prospect a question to which he can say "No." Don't talk price; talk quality, even though your price is low. Don't run down the other fellow's goods; talk the reason why of your goods.

Don't say anything against the goods on which the prospect looks with favor for you will offend his judgment, on which every man prides himself.

Don't contrast your goods with those of a competitor which the prospect has been using or knows about; talk your goods and let the prospect do the contrasting.

Moving Forward

El Producto cigars move ahead fast. Window displays and large newspaper ads. help to increase the sale. Five popular sizes of El Producto have been widely distributed here by Clarence Hirschhorn & Co., 217 West Randolph Street.

Pancho Progress

Pancho Arango Sports, the new 5 cent short smoke of this well known clear Havana cigar, is now on sale in all the Chicago stores. They are packed in wood and tin boxes of 50.

J. Lewis, who has a very nifty retail store at Lake and Dearborn Sts., has just added to his large stock, several sizes of Pancho Arango cigars. M. Goffin, at 151 West Lake St., is another downtown dealer who has stocked Pancho-Arango cigars. J. P. Brill, who represents the Wm. J. Seidenberg Corp., in the middle west, is no longer connected with this firm.—H. L. H.

Headquarters for Show Exhibitors

The Hotel McAlpin has been appointed official headquarters for the show exhibitors, and for banquets and meetings, in connection with the 2nd International Tobacco Industries Exposition, to be held at the 71st Regiment Armory, January 28 to February 2, 1924.

McAlpin Hotel Convenient

The McAlpin Hotel is within two short blocks of the Armory and special service will be given to all people connected with the tobacco industry because of their congregating at this hotel. It also houses the official executive offices of the National Exposition Co., which is in charge of the exposition. This arrangement will help to keep everybody under one roof during the week of the Show, which will make it convenient as well as pleasant for all concerned.

NEW YORK, THURSDAY, OCTOBER 4, 1923

BALANCING SUPPLY AND DEMAND FOR SUMATRA WRAPPER

We have before us a report of the tobacco section of the Deli Planters' Association, that remarkable organization which furnishes the world with Sumatra wrapper. From this report we get a view, as of April 1, 1923, of the state of things in that part of the world of tobacco.

It is a lugubrious document, in so far as it reflects the things the Sumatra grower must have been thinking about when he cast up his accounts for 1922. For if the statistician of the association is strictly veridical, the last two years have yielded him a loss instead of profit, whether or not the ultimate smoker of Sumatra wrapped cigars noticed any difference. The mathematics of the matter can be simply explained: The price of labor, of rice, of freight, of materials, of fertilizer, etc., was so high that the cost of production of a kilogram of Sumatra tobacco amounted to about 3.40 Dutch florins, whereas the average selling price was around 3.90 leaving a bare matter of 20 U. S. cents with which to face taxes and overhead.

But what intrigues our interest as we contemplate the Dutchmen who have essayed to put Sumatra on the tobacco map and to keep it there is not the dry statistical details of profit or loss. What do those Dutchmen propose to do to escape from the hard times through which they are passing? Do they, like the wheat farmers of the United States, smothered by the superabundance of their own product, wail for the government to do something for them (raise the tariff, loan the farmer money so he can hold his wheat until the price rises to $1.75, etc.)?

Do they, like the erstwhile night riders of Kentucky attempt to settle the problem created by overproduction by riding through the land, each burning the other's tobacco barn?

They do not. Children of the race which pumped dry the polders of Holland, winning gardens from vast stretches of salt water, schooled by generations of team work and co-operation, they looked over their situation and said, simply: "There is too much Sumatra tobacco; we will raise less in 1923. Not a bale more than 195,000. Every Sumatra planter will reduce in proportion to his acreage in 1922." And it has been accordingly so done. What is more, they have provided a central bureau, which, every year, before the crop is planted, will carefully weigh, in the Dutch manner, every known circumstance or fact which has been bearing on the extent of the probable demand for Sumatra tobacco, and apportion the acreage accordingly—to each planter his share—to the end that supply and demand shall balance as nearly as human forethought can determine.

Such self regulation is possible because of the altogether unique position of Sumatra tobacco. The number of growers is relatively small and they are very closely organized; the entire crop is grown only for wrappers, and all of it is sold in Holland.

WE'RE COMING, WE'RE COMING!

"We're coming, we're coming,
A brave little band.
On the right side of temperance
We now take our stand.
We don't like tobacco,
And we sometimes think
That men who use it
Are very apt to drink."

The little piece of alleged verse is one from a song which was a favorite about the time the waiter removed the last glasses from the tables, back in '98.

As we sat in our comfortable office chair today, idly watching the blue smoke-rings from our Roi-Tan float lazily away and trying to center our interest on the editorial page of the leading New York daily, we were at peace with the world. Apparently, the coal strike was settled. Haddock was down a cent, and Mrs. Ladies' Home Journal Irene Castle Treman was just fooling about her divorce after all.

The type on the page blurred. We could hardly believe our eyes as we read an editorial tucked away near the alley. In part it was as follows:

"Apparently satisfied that the war against rum has been won, some of the delegates to the Anti-Alcoholic Congress at Copenhagen are turning their attention to the other great scourge of mankind, tobacco. The chief speaker was Professor Martin Hartmann, of Leipsic, who, though a German by the accident of birth, seems to have a truly American reformer's heart. 'Smoking,' he tells us, 'killed Lord Carnarvon.' And further, 'smoking tends to retard growth, and has caused a reduction in the average height of Americans and Englishmen during the last century.' Look about on the streets at our dwarfed and shambling race; go out to the tennis courts or the golf links; look over the crowd in the Yale Bowl at a football game. Puny, stunted, anemic young people—are they fit to breed another generation which, by the inevitable law of the smoker's progress, must be even worse?

"One thing only this fearless prophet omitted. He should have reminded the Congress of the famous revelation by the first of the now-it-can-be-tolders, the Rev. Dr. Clarence True Wilson of the Methodist Board of Temperance, Prohibition, and Public Morals, who told us a few years ago that the Tobacco Trust had sent doped cigarettes to our army in France, and that soldiers had to be taken out of the line because they were sapped and corrupted by the drugs. Professor Hartmann should have been interested in this explanation of the way Germany won the war."

As we read the editorial through, the fragrance of the Roi-Tan disappeared. A suspicious odor like that of burning cloth assailed our nostrils. The cigar had burned up. It was cold and wet and clammy. We could taste the rank poison which we had absorbed. Our head commenced to ache; we began to feel listless; our clothes felt much too large for us; we were literally shrivelling—and then we lit a cigarette. Oh, shade of Anna Eva Fay, what are we coming to? At the present rate of progress, in the year 2000 we will be legislated out of bed in the morning and have for breakfast a drink of double-distilled, chemically pure cold water and some nice sterilized vitamined breakfast food. Coffee, of course, will be forbidden. And by that time, even bacon and eggs will have been proven a contributive cause to moral delinquency, and therefore tabooed. An entirely new race of millionaires will be with us in the shape of cigarette bootleggers, pipe bootleggers, and cigar smugglers. Our typewriter fairly seems to tremble as we write the word "reformer."

May the red-blooded men in America rise and plant their feet with all energy, swiftly a surely on that part of the anatomy of these p misguided imbeciles which is not intended prayer. If we haven't enough insane asylu for heaven's sake, let's build some more! Eitl let them shut up, or let's get together and s them up.—*Earnshaw House-Organ.*

IRISH TOBACCO OR THE STORY A FORLORN HOPE

Starting a discussion on tobacco growing Ireland is almost, but not quite, like writing monograph on the snakes of Ireland. A lit tobacco is grown in Ireland, but not enough be worth mentioning, except as a monumen example of bulldog persistency, unconquera optimism, and a Micawberishness such as ev Dickens himself could hardly have dreamed

Some twenty years ago there was great i terest in tobacco raising in certain counties Ireland. Tobacco growers' associations we formed, warehouses built, considerable tobac was sold—generally at less than the cost production. Very naturally the newly awaken ardor for growing the weed collapsed in fair short order, but a few enthusiasts have manful held on in spite of the fact that not in yea has Irish tobacco been sold at enough to cov cost of production.

Who are these Irish tobacco enthusiasts, a what keeps them at the apparently hopele proposition? They are a few well-to-do lan owners who every year go down into the pockets to induce about 40 small farmers plant about an acre each in tobacco—guarante ing them enough to pay for their time an labor. By such means did a total of 52 acr get planted in 1922. Each year these singul patrons of an impossible industry buy the enti crop (which in 1922 amounted to 35,000 pounds and either sell it for enough to make their loss something less than total, or hold it in storag waiting for a rise in price that seemingly wi never come. Thus one crop piles upon anothe in the warehouses. None of the 1921 or 192 crops has been sold and only part of the 191 crop. The total amount on hand, as we lear from the Journal of the Irish Department Agriculture, is now 101,596 pounds.

The hope that springs eternal in these Iris breasts is that eventually the attitude of th British Government as to imperial preference will change, so that Irish tobacco will have som chance in competition with that grown in mor favored soils. While far-off observers ma doubt whether this will ever happen, they wi not withhold admiration for such optimisti clinging to a forlorn hope, and the gallan struggle to keep alive a fainting industry unt such time as the winds of fortune blow mor kindly.

REGARDING FAIR TRADE LEAGUE

We are indebted to Mr. Edmund A. Whit tier, secretary-treasurer of the Fair Trad league, for calling our attention to an erro which was made in an article, "No Tarif Revision," in our issue of April 16, in whic we used the term, Fair Trade league, wher we should have said Fair Tariff league, thu classing the Fair Trade league among the op ponents of the protective tariff.

With the purposes and activities of the Fai Trade league we are in full sympathy, a must be any honest individual or organiza tion. As its name indicates, it stands fo "fair trade"—that is, fair dealing and hones business methods. It opposes and expose misbranding of goods, infringement of trad marks, misleading advertisements and othe dishonest or irregular business practices. It purposes are vastly different from those o the so-called Fair Tariff league, and we deeply regret our unintentional confusion o the two organizations.—*Marion (Ohio) Daily Star.*

Lone Indian Girl Last of Tribe Guards Connecticut Cigar Store

Bears Reputation of Being "Dumb Belle" Because She Is Wood — Silent Sentinel Rounding Out Quiet Life in Old Whaling City of Nutmeg State — Indian Figures Divided Into Classes — Interesting Narrative of By-Gone Cigar Store "Fashions."

By JAMES P. NEILAN

AN INDIAN MAIDEN has faithfully stood daily for thirty years at the entrance to R. N. Siebler's cigar store at 159 Bank street, New London, Conn. She is made of wood, decorated in prismatic colors and is highly ed by her owner.

'You don't see many of those cigar signs adays," said Mr. Siebler, addressing a to- o salesman, who had just dropped into his e for a business chat.

No, indeed," replied the salesman. "I have eled all over Connecticut for the past quar- of a century, visited every cigar and tobacco blishment in the state and I can assure you old-time cigar store wooden images are very ce. I can recall only one other figure of an an in Connecticut and that is fronting a ninent cigar store in Stamford."

hen Mr. Siebler became reminiscent.

I placed the order for that Indian girl with oodcarver in New York City about thirty s ago and paid a visit to the carver when the ge was nearly completed. The workman a veteran in ship-carpentry and well along ears—apparently on the shady side of sev- . When he saw me he stopped chiselling for w minutes, during which time he informed that the Indian girl he was making probably ld be the last he would carve.

'The fad has died out for these wooden fig- ,' he explained. 'My father turned out es of them in his time and I have made y of them myself. I believe I am the only in New York now making them.' "

ne of the objects of deep interest to travelers n abroad a half century ago was the carved ges of Indians in front of cigar stores. se effigies were made in New York. About y persons were at work on them. These ually went out of business.

he woodcarvers who made these images were usually ship carpenters by trade. They acquired their skill by working at ships' figureheads. Occasionally a German wood carver tried his hand, but as a rule he was too slow. A good workman would finish a life-sized figure in two days and was paid at the rate of $4 to $4.50 a day. The painters received $2 a day for their work. An erroneous idea prevails that discarded masts of ships were used as the material for a figure; but these, from warping and weather-cracks, were unsuitable for carving. The ends of such new spars as had been found too long for the purpose were often used. The only wood used was yellow pine.

R. N. Siebler and His Faithful Friend

Indian figures were divided into classes. An Indian with his hand shading his eyes was a "scout." If he had a gun, or a bow and arrow in his hand, he was a "hunting chief." If his head, except the scalplock, was shaved and the body partly naked, he was a "Captain Jack." A figure carrying a small basket was a "flower girl," and another nearly similar, but with a robe, was a "shawl figure." A running figure constituted a "fly figure."

"Fashions in fancies," as the non-Indian figures were called, change greatly. During the Civil War the "girl of the period" was in great demand. "Punches" succeeded and were followed by "Bucks." Then followed the "dudes" which were soon supplanted by "baseball" players. Ten Indian figures to one fancy was the proportion in which they sold.

One large firm in New York manufactured these figures by casting them in zinc alloy. The merits of metal, as compared with wood, are that it lasts longer and keeps better, if used where it is not liable to rough usage. If any part of a metal figure was damaged the piece could be recast and soldered on to the original casting. But this applied to places like New York, where the necessary appliances were at hand. On the other side of the Atlantic the price was in favor of the wooden figure, ranging in price from $17 to $100, while that of metal figures ranged from $25 to $175. Wooden figures also receive paint better, so that it wears away gradually and does not come off in flakes.

n Opportunity for Foreign Capital in Bulgarian Tobacco Trade

Bulgaria's 1923 Tobacco Crop Estimated at 50,000,000 Kilogrammes — Excellent Prices and Extensive Markets Have Greatly Encouraged Growers to Increase Tobacco Acreage—Now Cultivated in Many New Districts — Cost Is Very Moderate.

By NICHOLAS PETCOFF

(Special Bulgarian Correspondent of TOBACCO)

FOREIGN CAPITAL is offered good opportunity in Bulgarian tobacco trade. It is estimated that Bulgaria's tobacco crop will amount this season to 50,000,000 kilogrammes as compared with 27,000,000 kilo- nmes last year. The excellent price which cco has fetched of late, the wide markets to it and the general good return which its ure has afforded have greatly encouraged garian producers. The area planted has almost doubled.

n many districts tobacco has been cultivated year for the first time, replacing corn. total area under cultivation amounts to 500,- decares. Apart from the increase in the area ted, the quality of the crop is excellent.

he usual output of one decare (0.2471 acre) bout 80 kilogrammes of leaf tobacco. But year the figure reaches 100 and even 120 grammes. Special care has been taken by growers in anticipation of profitable results.

Money Much Needed

The tobacco dealers, however, fear that an awkward situation may arise in view of this year's large output, and the shortage of money wherewith to purchase it. It is anticipated that prices will fall, but even if the figure of 30 levas per kilogramme is reached (one dollar being equal actually to 100 levas), the growers should make a good profit as the real cost of production is not above 18 levas per kilogramme.

The increased area planted this year has not been confined to the more ordinary varieties. Districts such as Kirdjali, Nevrokop, Dubniza, Perushtiza, etc., which produce the high-class "Bassma," brands (Egyptian and Xanthie type tobacco), have also an increased crop to show, which would be sure of finding a good market in England and America.

Opening for Outside Buyers

It should certainly pay an English or American tobacco company to come to Bulgaria and purchase these brands on the spot. The tobacco exporting companies now in existence in Bulgaria will not have the necessary capital at their disposal to handle this year's large crop. Some of them, in fact, have not yet taken their quota of last year's crop off the hands of the producers, not being able to pay for it owing to the prevailing shortage of money.

It would seem, therefore, that a new concern with foreign capital at its disposal should do well. The services of specialists and experts can easily be obtained, and labor is abundant.

Harvesting the Crop

Tobacco picking was begun during the second half of August, and usually lasts until the end of September. October generally sees the first rough packings by the growers, and the first sales will not be effected before November or December, and maybe not before even January or February of 1924.

It is not, therefore, too late for British and American firms to consider direct participation in this year's Bulgarian tobacco crop.

The WDC Duro-Bit Stands Rigid Test

To prove to the trade and to the pipe smoking public that their claims of superior strength and durability for the Duro-Bit Pipe are well founded, William Demuth & Co. recently conducted a very interesting laboratory test.

A Duro-Bit mouthpiece, arbitrarily taken from stock, was placed on supports at both ends only. A scale was suspended from the center of the bit and weights placed on the scale. The bit, which measured 3 inches in length and 10½ m/m. in diameter, held 85 pounds weight without breaking.

This is a remarkable demonstration of strength and tenacity as the stress placed upon the bit in this experiment is immeasurably greater than any strain to which a pipe bit is subjected in ordinary usage.

William Demuth & Co. maintain that the secret of this enormous tensile strength in the Duro-Bit is the fine quality of rubber used—reinforced by an aluminum tube which is moulded into the rubber throughout its entire length. This metal not only acts as a backbone, but the adhesion of the rubber to the tube which is moulded in, greatly increases the tensile strength so that the Duro-Bit practically cannot be broken.

This very practical performance proves that it is no mere theory which enables the Demuth firm to unconditionally guarantee the Duro-Bit against breakage.

erminal Cigars Booming

est J. Moss, manager of the cigar ment of Frank E. Childs & Bro., ont street, New York, is scheduled ve town this week-end, on a long rn tour, in which he plans to visit lelphia, Pittsburgh, Cleveland, Tole troit, Chicago, and Kansas City. He s to return by the Southern route.

Moss reports an enormous demand e Germinal and Flor De Legarda of Manila cigars, which are rapidly ng in popularity. He is receiving its for samples and prices from re ble distributors from far and wide, ill undoubtedly open many new ac s during his forthcoming trip.

re "Scientific" Lore

ANGEN, Bavaria, Sept. 24.—Ciga smokers who inhale take eight times ich nicotine into their systems as who do not, according to Pro R. Heinz, of Erlangen University, article on the results of extensive ments with tobacco users, in the che Medizinische Wochenschrift.

fessor Heinz holds that the reason moking is often less baneful in its upon the human system than ci ee smoking is that pipe smokers take the smoke into their lungs. quently the nicotine finds its way he blood only in the mouth and throat, while inhalation exposes licate surfaces of the lungs to the and impregnates the blood more y.

cigars are much less poisonous lamp cigars, according to Professor , whose experiments showed that in bacco much more of the nicotine is ned by the fire. Chewing tobacco uff which he tested contained little ne.

ensive tests made upon British ttes disproved charges that they ned opium, but showed that they heavier in nicotine content than an brands. The percentage of nico n Havana cigar tobacco was found less than in cigarette tobacco. ers under investigation in Professor 's laboratory took .004 grams of e into their systems from every 5 of ordinary cigarette tobacco if merely took the smoke into their s, but the amount of nicotine was when they inhaled. This explains, opinion of Professor Heinz, the s consequences of excessive ciga smoking, as he found that habitual of large quantities of cigarettes generally get little satisfaction out uth smoking, but take the smoke eir beings with baneful effect upon art and health.

Albany Cigarette Smokers Make a Lucky Str

Get Famous Little Smokes at Six Cents for 24 Hours, V Coupon—V.-Pres. Hill Gets High and Low Visibili Not a Pipe Peddler Now—Return o' the Golden Scep

NEW YORK STATE CAPITOL DISTRICT
Gratis-Week, 1923.

"Then this here advertisin', y'unnerstan, mebbe wasn't paid for by them there cigaretel smokers, huh?" questioned Sam Ash, looking at the solid page space in the morning paper which proclaimed that every dealer would give a twenty-pack o'Lucky Strike cigarets for six cents, just to cover the Government tax—with the convenient-corner-coupon.

"No, no, Sam," corrected Jim Stubb, sorting out the coupon clips o'the early arrivals at the store o'Stubb & Ash, Inc. "All this big copy, and no one knows exactly how many cigarets, are entirely paid for by the American Tobacco Company. Ask Briggs."

Thirty-Nine Cents the Carton

"Yes, we are trying an experiment in Albany," smiled Big Boss Briggs, topsarge of the A. T. Co.'s sales-force, as he leaned on the unopened cases o'Lucky Strikes. "This is the very first town in the country that we have pushed this proposition.

"For, as you now know, the missionary men have placed the posters, and the newspaper advertising in each Albany edition of Thursday evening and Friday morning, has announced to the consumer that he can get the twenty-pack o'Lucky Strikes today for exactly *six cents*—with the coupon.

"These coupons will be redeemed by the retailer's jobber for merchandise only, in Lucky Strikes. So the retailer really receives the entire six cents from his customer as profit. And we hope to make many new friends by this wholesale sampling of the brand.

"Most dealers, of course, simply redeemed the coupons one or two at a time, as they came in. But the Bruce Macdonald Company, on Maiden Lane, ran a companion ad, with ours, offering to redeem the coupons in batches of ten for thirty-nine cents the carton. I guess they cleaned up on it.

"In town with me today is Vice-President George Hill of the Company, who is here to observe the working of the plan. He seems to be well pleased so far, at least. All of the crew worked hard in the few days preceding the deal, and they deserve great credit for their big effort."

George Will Dig It Deeper

"Now that you mention a big effort, what do you think of George Slyke's job to dig a Deeper H River?" inquired Jim Stubb, puttin Peter Schuyler cigar box in front case, where the Deeper Hudson del could see it first. "Sure, he ain't to do it all alone! Not much!

"But, besides being President of Van Slyke & Horton, you know, G is also President o'the Chamber o' merce. This makes him boss o'the j get Colonel Slattery, of the U. S. neers, in charge of such work, very interested in the problem of He Hudson to make Albany and Troy port towns.

"Anyway, if the Government will the necessary gold marks, the river nel could no doubt be made deep e for the coming to dock of coastal s ers. Then business in the Capitol trict would be almost so good as it soon be in Feura Bush, when the York Central completes its new Bridge and terminal freight yards a excellent tank town."

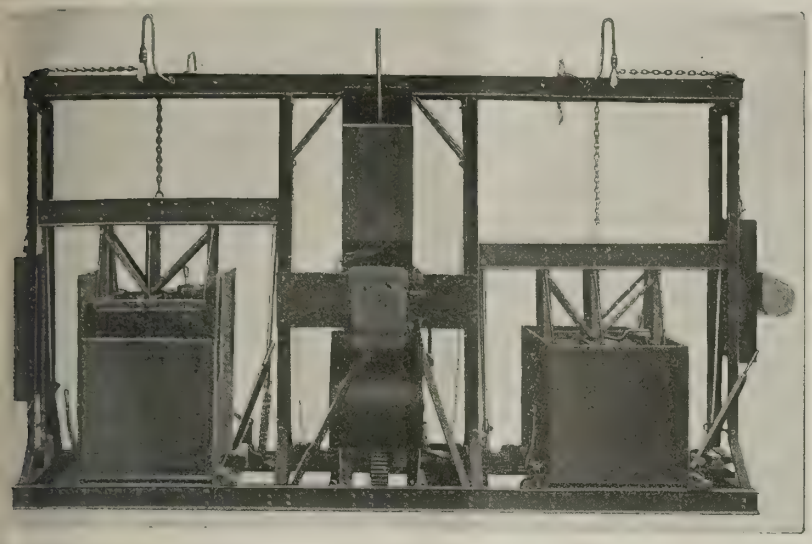
No More Sample Trunks for J

"And no more tank towns for either," remarked Joe Myer, Kauf Brothers & Bondy's pipe purveyor ambassador extraordinary, as he a moment with the Hot Chair "You know I have retired from the but I am making this special trip t bany today to see some old friends.

"Back to New York tomorrow ing. Because, since I was so ve some months since, I have arrang spend more time at the office, and outside. Seems strange, though, n peddle pipes! Guess I came to A for more years than any other salesman, and I know about everyo the trade here."

Gray Gets His Golden Sceptre

"So do I," insisted Tom Gray, o road since cigars were first made b Eskimos. "Also do I know everyone in the business between ton and Bombay. And I just can from Boston. Hadn't been there i years. So I went in to see every anyway.



"By the way, did you know ou firm, the House o'Surbrug, was marketing Golden Sceptre? Yes, now being packed in thirty, sixty, twenty, and two-forty bundles of fo

MINNICH MACHINE WORKS
LANDISVILLE, PA.

And the old smokers want it again, as they surely did thirty or forty ago!"

What Some Clay Pipes Did

"Smokers then liked clay pipes, too," said Andy Van der Wart, now chap-o'the Albany County Penitentiary, formerly an Albany importer of Hol-d Dutch clay pipes. "And it was clay pipes that I became acquainted Theodore Roosevelt.

"r, one day when Roosevelt was nor here in Albany, he was on his o Troy for some ceremony or other, his rig broke down in front of my in North Albany. So, while await-ew accommodations, the Governor ered in to look over my rather odd tions of clays.

"oosevelt didn't smoke, but he was tly interested in anything Holland n. So he bought some importations collection of his own. After that, overnor was a frequent customer ne while he remained in Albany.

"me years later I retired from the business, and became a clergyman e Penitentiary when the Govern-still maintained Federal prisoners One such prisoner was a country-of mine, a Hollander who had been or.

"e had been convicted of murder in a e case of self-defense on shipboard. is term was for life. Several Pres-had been appealed to for a pardon, ut result. So the man had given up pe of release until I told him of quaintanceship with Roosevelt, then dent.

"nd, after considerable effort in ob-ig necessary papers and interviews, ast succeeded in getting into an old in Lafayette Square, Washington, e Roosevelt was running his offices g reconstruction of the White e.

"ell, I waited and waited. And evelt was going away that day, not turn for some months. So I real-I must obtain an interview imme-ty, and I squeezed up to the very in a room crowded with other vis-also awaiting interview.

"Some time later, Roosevelt came from the inner office, ushering out a previous caller. He gave a quick look around the busy room, spotted me, and sang out: 'Hello Albany, how's the clay pipe business?'

"When I told him what I wanted, he said, 'Alright, I'll do what I can to help your man, but you must send me some more of those clay pipes!'

"And, sure enough, after some necessary legal red, white, and blue tape had been cut, Roosevelt pardoned my prisoner! So you may be sure I sent the President the finest outfit of Holland Dutch pipes I could possibly dig up for him, even though at that time I was out of the business!"

In the County Court House Again

"But I'm not out of business now," insisted Ed Patten, Vice-Chairman o'the Hot Chair Club, and proprietor of the cigar stand in the Albany County Court House. "On the contrary, I've just opened up for the Court Sessions, 1923-1924. All smokers invited to the daily opening, R. S. V. P., whatever that is.

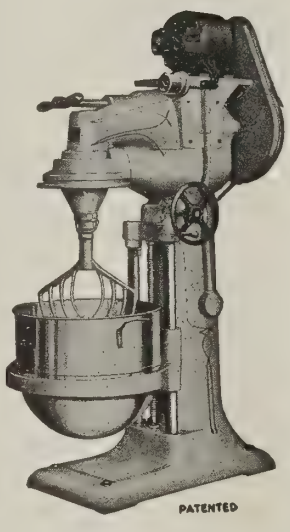
"All popular brands, of course, including White Owls, Bobbie Burns, Peter Schuylers, and so on. Commercial transactions with legal lights mostly, but no money refused from laymen. No, I have no red bananas, but I carry other fruit in season, including cigarets."

Which Way Now, Asks Ingerham?

"Cigarets seem to have the vogue," admitted DeWitt Ingerham, associate member of the Hot Chair Club, even if he is a cigar salesman. "And I can't quite make out why manufacturers insist on raising cigar prices at a time when cigars are not any too popular, as a class, anyway!

"Where are retail prices going if factories ask for more money?"—THE SMOKER.

Back from Successful Trip



D. Dreux, of D. Dreux, Inc., Sumatra and Java importers, of 136 Water street, has returned from a successful tour of New England and the Empire State.

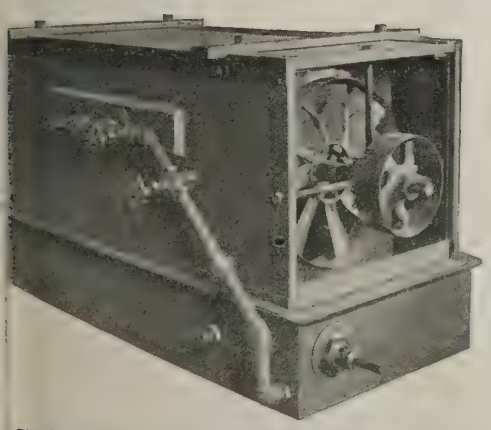
For Thorough Mixing

The

READ THREE SPEED MIXER

IS INCOMPARABLE

Many cigar factories throughout this country are using Read Mixers daily for mixing Gum Trag (cigar makers' paste). This machine gives the paste a thorough mixing, taking from it all lumps and thereby eliminating that costly and tiresome operation of straining.



Used in various plants of Otto Eisenlohr & Bro. Co. and various other large plants.

Havana Leaf Market Keeping Up Its Lively Pa

Large Quantities of Tobacco Arriving from the Country Exporters and Dealers—Goods of Various Grades Being Disposed of Rapidly—Prices Stay Around Peak.

HAVANA, Cuba, Sept. 27.—During the last two weeks our market continued quite lively. Large quantities of tobacco are arriving from the country for the exporters, as well as for the Havana dealers, who are rapidly disposing of their goods, especially as far as upper grades for export and tobaccos for stripping purposes are concerned.

Reject Erstwhile Acceptable Offers

Many holders of upper and low grades have rejected offers, which they would have accepted a few weeks ago. The main reason for this is partly the shrinkage, and partly the lower proportion of upper grades, greater than expected, both of which surprised a good number of packers and speculators. Many of our local dealers, who hardly bought anything in bundles, and who hardly had a chance to make a packing to speak of, had a good opportunity to pick out some good Vegas, especially in the Vuelta Arriba section (Remedios) and most of them, being sensible enough and satisfied with a small profit, turned this tobacco over to exporters and manufacturers right away.

Still Chance for Interested Buyers

For this reason, the few packings and lots left in the country will be sold very soon, and if American importers and dealers are really interested in securing a stock of Havana tobacco, they ought to lose no time. Representatives of foreign houses and exporters have nearly all bought tobacco, and are buying still. Prices for Remedios, and especially Vuelta Abajo, continue not only firm, but Vuelta Abajo have gone up. The buyers are recognizing more and more, that the tobacco of this section, where hardly any intervention of foreign buyers has taken place, compared with Remedios, is much more advantageous, especially with regard to price.

Make Good Showing

Besides this, the Catorcenas, as well as the Puntillas, show not only a good and sound quality for stripping as well a longer storage, and do not stay b Remedios Capaduras as far as leaf and cleanliness is concerned. Many of good Puntillas, which used to be ported to Europe, where people p this tobacco to a certain extent to H edios, went to the local stripping f ries. That the proportion of clean stri fillers must have been a good on proven by the quick sales of this c at prices from $60 to $65 per qq. and s of it for even more.

The stripping plants in the city as as in the country all over are wor with full forces, most of the tobacco ing in good condition to be strippe

Several thousand bales were shippe South America, especially by the firm Sobrinos de Antero Gonzalez, shipped among other lots, one single of about 2,000 bales. This country w without doubt, have bought two or t times more tobacco, if prices had right, and the fact is, South and N America are likely to become ser competitors in the Havana market, and by.

American Buyers in Market

Several large American buyers are pected here during the first part of O ber, and their representatives have ev thing prepared by this time.

L. Greenhall, of Greenhall Bros., N York, left last week, after having m some good purchases. There are eral American buyers, who come d here, go around the market, out to country and buy the goods they need their customers, and one of these, knows Havana as well as the place wh they were born is L. Greenhall, knowr everybody who handles tobacco d here.

Favorable Weather Conditions

So far the weather conditions for new crop are quite favorable, that speaking in general, although in cert sections people complain about too m rain. However, the sections, where se

r being raised, have had very good ther.

is needless to say that the farmers, made more money than they exed, *will* do all they can to raise as h tobacco as possible. And let us e that next year we will have a good large crop, one that will enable dealr to supply the foreign countries with er quantities, of much cheaper to-o, and such as will work with more sfaction.

his year no private packer, dealer orter nor others can be satisfied, as yone of them must recognize, that the of the goods is higher than the value thereof.

he correspondent of TOBACCO will e it his business to keep the Ameria trade well informed, but all that the er of these lines can say further at time is to suggest to any buyer of dles, who is heavily engaged this year, remember the result of last year.— LO.

Key West Key Notes

Visible Prosperity

EY WEST, Fla., Sept. 29.—The res from the factories this week have en very encouraging. At the E. H. o factory, it was stated that 25 extra n were employed Monday. This fac- has been increasing the force steadfor several weeks. Faustino Rendue the manager, stated that the factory approximately 300 cigar makers emyed at this time. Then there are the er workers in other departments which ng the total number of persons emyed in this factory up to approxiely 400. Mr. Rendueles also said that s the intention of this company to emy about 100 more men if this number y be had, to keep up with the orders w coming in for holiday goods. These itional workmen may possibly be en on within the next two weeks. e manager feels that the factory will kept busy up to the close of the year.

Working Full Force

At the Cortez factory, Manager arles R. Curry said that the force was reased by 30 additional cigar makers week. At present there are about cigar makers at this factory. Manr Curry said that the factory is now working practically a full house, and that others will be employed as the weeks roll by toward the Christmas holidays, and as soon as room may be made to seat the additional workers. Extra tables and chairs have already been placed in the factory to accommodate the ever increasing force.

Thompson & Co.'s factory is another busy place these days. Manager Albury said that the force is kept steadily at work, meeting the demands for the brands put out by this house.

Number of Workers Being Increased

At the Havana American factory, from D. Quintans, manager, it was learned that the force has been increased almost weekly. At present there are about 300 at work making cigars at this plant.

Manager E. E. Crusoe of the Consolidated factory announced an increase in force of workers, and it is the expectation of the management to increase the force until double the number of workmen has been reached.

Manifest Optimism

All manufacturers appear optimistic over the present outlook of the cigar trade here. The only discouraging feature to be overcome is the shortage of first class workmen. This has been slightly overcome within the past week, as a number of good workmen have returned from Tampa.

Cayatano de Casado, attache of the Cuban Legation at Washington, passed through Key West Friday en route to Havana. Senor Casado had been in Washington in connection with the recent payment on the loan made by the United States to Cuba. During the stay of this distinguished visitor here, he was entertained by Cuban Consul Domingo I. Milord.

Seek New Federal Building

The Chamber of Commerce, Rotary and Exchange Clubs have agreed to send Charles Ketchum from this city to Washington for the purpose of meeting with the budget committee of the post office department and the Florida delegation in the interest of a federal building for this city. These three organizations are now engaged on plans for the entertainment of the large number of tourists expected here this season.

The golf course will be completed by the time the Hotel Casa Marina will open, and it is planned to have band concerts in the city park twice or thrice

a week during the season. Information bureaus will be established at Miami and Tampa, and also at the Florida East Coast terminal in this city to assist the tourists in coming to Key West, and finding accommodations for them after their arrival. At a joint meeting of the local organizations, W. R. Porter pointed out the necessity of providing adequate accommodations for the tourists who will come here this winter. The officials of the Florida East Coast Railway have promised additional train service during the winter season.

Baltimore Market

BALTIMORE, Md., Sept. 27.—Gieske & Niemann, leaf tobacco merchants, make report as follows:

MARYLAND: While receipts for the week were 812 hogsheads, sales totaled 1616 hogsheads. Prices ruled very firm to slightly higher on nearly all grades, and quotations are revised upward.

OHIO.—Receipts 30 hogsheads, sales 23 hogsheads. Quotations also revised up to present ruling prices. The 1922 crop is nearly all in.

Crop Prospects

MARYLAND: The 1923 crop has now been practically all cut and housed in good condition. We hear some complaint, however, that owing to the warm, murky weather considerable tobacco will be house-burnt.

Voice Sells Woodmere Estate

Jacob A. Voice, of the Pasbach-Voice Lithographing Co., Inc., Grand street and Morgan avenue, Brooklyn, has sold his residence at Central and Prospect avenues, Woodmere, Long Island, to Jo Riesenweber, the restauranteur, owner of the Shelburne Hotel, Brighton Beach. The estate occupies almost an entire block and contains a tennis court and all the other adjuncts of an ideal country home.

The Voice family plans to locate in some other section of Woodmere, but as the son and daughter have both entered college, a large estate is not required at the present. The sale was an entire cash transaction.

Planning Big Germina Campaign

Charles T. Ellis, tobacco broker, w represents the Germinal interests in Bo ton, is in New York this week, confe ring with Ernest J. Moss, manager of t cigar department of Frank E. Childs Bro., Inc., recently appointed exclusi eastern agents for the Germinal Cigar Cigarette Factory Co., Ltd., of Mani P. I.

Tampa Tidings

TAMPA, Fla., Sept. 29.—The Eli Witt Cigar Co., lessee of the three-story Ferri Building, corner of Franklin and Twiggs streets, which it remodeled, and tenants, staged a festive housewarming Thursday night. Prizes were given the tallest, the shortest, the first and last. Customers to enter, etc., etc. Music was furnished by Fraund's orchestra.

The business of the Eli Witt Co. was started some 18 or 19 years ago with one small retail store and has grown to the present proportions mainly through the efforts and business acumen of its proprietor, Eli Witt.

The company now operates no less than 5 wholesale houses throughout the south with its special brand, the Hav-a-Tampa, favorably known wherever cigars are smoked.

A Huge Factory

The factory owned by the company in Tampa and devoted to the manufacture of this popular brand is the largest in point of workmen employed and output, in this city, employing an average of 700 hands and having a capacity of 4,000,000 cigars per year.

In taking over the remodeling the Ferlita building the Eli Witt Co. has reserved for itself the corner store at Franklin and Twiggs streets and has equipped and fitted this to make it one of the finest appointed retail stores in the south, where all the best high grade cigars, tobaccos and cigarettes will be sold with especially featuring the Eli Witt brands.

Manuel Garcia of Perfecto Garcia & Bros., left Thursday to inspect their tobacco stocks in Cuba. He will return next week when manufacturing is to be commenced in their new branch at 2307 19th street, the factory formerly occupied by Salvador Rico & Co., before their consolidation with Arturo Fuentes Co. For several weeks P. G. & Bros. have been overhauling and outfitting this branch, stocking their tables, chairs, etc., preparatory to opening.

Ludwig Lasker, of Perfecto Garcia & Bros., who has been in Europe during the summer in quest of health, has returned and is again making the rounds among his customers.

A Short-Lived Strike

The versatile and ebullescent cigarmaker has staged a one-day theatrical strike, the villain in the comedy being Sanchez & Haya. The wrappers were too long, or perhaps it was that they were too short; or maybe it was nothing worse than the fever of the Mayor-Commissioner political campaign running riot. Anyhow, it's all over, and without casualties; and the factory again resembles a beehive for industry.

Christmas Orders Coming In

Grosvenor Nicholas & Co., Inc., importers and distributors, of 60 Broad street, New York, report a heavy volume of orders for future delivery, in excess of the normal increase in business due to the regular fall buying. Many Christmas orders have already been booked, indicating an unusually heavy holiday season.

Off to the West

William P. Miller, of the American Sumatra Tobacco Co., 131 Water street, is en route for the Middle West, where he is scheduled to spend several weeks in the interests of his organization.

CIGAR MANUFACTURERS ASSOCIATION OF TAMPA

Comprises All of the Leading and Representative Cigar Manufacturers in Tampa, Uniting in the Three-Fold Effort of:—

1st—Benefiting our members.

2nd—Maintaining the high standard of "Tampa" workmanship by seeing that our labor is justly treated.

3rd—Protecting the *dealer* and the *consumer* against unscrupulous methods of others by issuing to our Members the following "Identification" stamp:—

This stamp, on each box, is your guarantee that the goods are manufactured in Tampa—of "Tampa" Quality and Workmanship.

Connecticut Leaf Gets Another "Finishing Damp"

Recent Rains Reinforced by More Moisture Finally Puts Tobacco in Desired Condition—Growers Much Pleased With Product—1922 Broadleaf Ready for Buyers Oct. 15.

HARTFORD, Oct. 1.—During the past week the tobacco had a thorough dampening in the sheds, and the leaf shows much improvement, as the dampness held on long enough to run the colors and to even them up. The tobacco needed more moisture, as the curing had been done under rather dry weather conditions since it was harvested, and the two damp "spells" came in the nick of time to put on a fine finish when it was needed. The previous recent rain was not quite sufficient to do the trick.

A few more of the growers ventured to take advantage of the damp and took some down and stripped it off an bundled it, but the majority just let the damp go by, fearing that they would get into "trouble" from the tobacco warming up in the bundle and developing "canker." The tobacco needs to be thoroughly dampened down once or twice before it is bundled.

Now that the weather has changed and cooler temperature is expected, it is very likely that on another damp many growers will venture to take down and get started with the stripping, although a majority of growers claim that it is early enough to take down about October 15, and many prefer to wait until a much later date.

The entire crop of the Connecticut Valley was secured under favorable conditions, and, while there were some lots that were late all through the season, only a very small percentage of the crop got caught by frost, and that only very slightly, as to date there has not been any killing frosts, and vegetation scarcely shows frost marks yet.

The growers throughout the Valley seem well satisfied that they have got in their 1923 crop of tobacco, the best crop that has been grown for at least 10 years, grown under favorable conditions, with very little, if any, storm damage and fine weather for the curing. The leaf now shows to be of a fine quality, good color and full of snap. The leaf also indicates better weights, and from all appearances at the present time, the percentage of low grades will be the smallest it has been for many years, as the bottom of the plant will yield a lively leaf and will make sound tobacco and not "papery," dead tobacco as has been the case the past few years.

With the full crop it will mean an increase of the total number of cases to be taken care of and the Connecticut Valley Tobacco Association is making preparations to care for the crop as it comes in. Some new warehouses are to be built and work is to be started at the very earliest date possible.

Open Bids on Warehouse

Bids were opened for the new South Windsor Tobacco Warehouse on Saturday, and there were several bidders. The contract was not awarded, and will not be for a few days.

Buck & Sheldon were the architects and the plans call for a building 48 x 150 feet with two stories above a basement under the entire building. The foundation is to be concrete with frame construction for the two upper floors. A large portion of the first floor will be arranged for sweat rooms, while the upper one will be for storage. The building will be equipped with elevators and will be arranged so that at a later date a sprinkler system can be installed. The basement will be well lighted with a north light that can be used for assorting purposes, packing and other work. The cost of the building is to be around $50,000, and the contract calls for the completion of the building ready for occupancy on January 15, 1924. Work is to start 10 days after the contract has been awarded.

The lot for the building has been secured and is located in the south part of South Windsor on the corner of Main and King streets, at trolley station No. 31, which is the first fare limit from this city on the Springfield East Side trolley line.

Glastonbury Warehouse

Glastonbury growers have purchased a lot for a warehouse near a trolley switch leading to the J. B. Williams Soap Co. works, and will be able to make many shipments via the trolley line to the N. Y., N. H. & H. R. R. in straight carload lots.

The East Hartford growers recently purchased the E. Rosenwald & Bro. warehouse with a railroad frontage, and cars can be placed right at the door.

The Broadleaf growers on the East Side of the Connecticut River have now gotten in the works their own warehouses for the storage of their own tobacco.

In Massachusetts several new warehouses are being built and the work is being pushed along, so as to be ready to receive the crop when it will be ready for delivery.

Broadleaf Sampling Delayed

The work of sampling the 1922 Broadleaf will be completed this coming week and then the samples will be arranged into the proper pools at the headquarters of the association and will be ready for inspection of the trade on October 15. It was expected that they would be ready by today, but the work of sampling was necessarily held up, owing to the crowded condition of the various warehouses, which delayed the work a few days, as there was not room enough to hustle the work along.

Notwithstanding what has been said about the 1922 crop, the inspection of it in cases shows that the crop has come through the sweat in very fine shape, and much excellent leaf will be offered to the trade on the 15th inst.

Judging from the inquiries for Broadleaf, it is expected that the association's headquarters will be lively with buyers on the opening date, and that sales will be quick and often. The entire packing is expected to be picked up within a short space of time.

The Danville Market Opens With Large Offering

DANVILLE, Va., Oct. 2.—The Danville tobacco market opened for the 1923-24 season here this morning, the sales being far greater than had been expected, these lasting from nine o'clock until four in the afternoon. The authentic figures are lacking at this time, but more than 300,000 pounds of leaf was marketed for an average of around 17 cents. While it is true that a good deal of disappointment was in evidence among some of the farmers, there was a general realization that the crop was in quality far below expectations and that the growers received a fair price for their product. The initial offerings were noteworthy for their lack of color and the nondescript varieties brought in. The tobacco was medium to poor in quality, much of it muddy in color and coarse in growth. It is the consensus of opinion that the general quality of the crop cannot be gauged from the offerings seen here today, it being the rule for the growers to test out the market with poor curings. At the same time warehousemen did not disguise their disappointment that more good tobacco was not in evidence in order to give the market a good start.

Comparatively few farmers took in their tobacco after seeing the price it brought, this being regarded as evidence that while perhaps not satisfied they realized that the intrinsic value of the tobacco was far below last year's crop, and that they had received as much as they had a right to expect.

The sales were the largest for the opening day for many years. Usually all the initial offerings can be disposed of in one morning, and owing to the lateness of the crop and the realization that the growers have still a good deal of tobacco still to cut that the opening here would be little more than a formality.

Co-ops Watch for Member Tobacco

Inspectors for the Co-operative Marketing Association were active on the warehouse floors looking at the names on the piles and apparently checking up to see if members of the organization were breaking their contract. They were permitted to carry on this work. Under the new warehouse law it is required of warehousemen that tobacco be entered in the true name, and one of the officials of the Co-operative Association charged that this was not being done and that vague names were written on some of the tickets.

Thousands of farmers were here yesterday following the usual custom to watch the opening. Hundreds of them did not bring tobacco, but came to obtain some insight as to the price level.

Buyers are inclined to believe the crop will be a poor one and that it will not have the money-making qualities that last year's did. The crop, if it may be judged from today's offerings, resembles in some points that of 1921, but a poor crop does not necessarily mean a disadvantage to the growers. As was the case in South Carolina, the few piles of really good tobacco did not sell as well as they should, indeed the commoner grades sold at a relatively higher rate. This is said to be due to the demand by some of the European countries which are unable to pay the price asked for the better type and who will, therefore, be on the market this year for larger quantities of the poorer grades.

Martinsville Not Open

The Martinsville market did not open today in order to give the farmers a chance to come to Danville, which is still regarded as the most influential of all the markets in the bright belt and the "price setter." This fact was emphasized by the presence today of some prominent officials of the big companies, notably the Imperial and Export Companies and the American Tobacco Co.

Reidsville, N. C., Market Opens

The Reidsville market opened today with a sale of 46,000 pounds at an average price of $16 per hundred.

The warehouses operated this year are the same as those used last year: Acrees, Hollands, Union, Central, Planters and Banner, all operated by the Danville Warehouse Corporation and Piedmont warehouse operated by an independent company. Next Tuesday will see the institution of quadruple sales in all of these warehouses.

The Cooperative Marketing Association will begin receiving tobacco at Producers and Farmers warehouses next Tuesday.

Opinions conflict as to the size of this year's crop but the predominant belief is that it will weigh out more heavily than last year's.

The color is not as bright as the 1922 crop, and a large proportion of mahogany is anticipated. Today, in this surrounding section about 90 per cent of the crop has been cut, cured and housed, according to estimates made by local warehousemen who usually keep posted as to conditions.

The damage done by the tobacco worm is the worst in ten years, according to authentic sources and, in the opinion of M. O. Nelson, local auctioneer, hundreds of thousands of pounds of leaf has been lost.—TETLEY.

Oxford Average, $17.35

OXFORD, N. C., Sept. 29.—Our market opened on the 25th, with 115,338 pounds on sale, consisting mostly of primings which brought an average of $17.35 per hundred pounds.

Sales for the week ending September 28; 184,298 pounds; average price per 100 pounds, $16.27. Sold to date of 1923 crop, 184,298 pounds; average price per 100 pounds, $16.27. Sold to same time last year, 850,220 pounds; average price per 10 pounds, $25.24.—W. A. ADAMS CO.

To Celebrate Opening of Co-op Warehouses

RALEIGH, N. C., Oct. 1.—The opening f 55 markets of the Tobacco Growers' o-operative Association in the Old Belt f Virginia and North Carolina next uesday, October 9, will be marked by ore than twenty mass meetings of the ·ganized growers to celebrate the sec- ıd season of co-operative marketing in hich the tobacco association has al- ·ady made substantial gains over its ·cord of last year.

The tobacco co-ops of Virginia will ıld celebrations at every co-operative arket for bright tobacco in the state.

John R. Hutcheson, director of the irginia Extension Service; Oliver J. ands, executive manager of the associa- ın; T. C. Watkins, director of its ware- ıuses in three states; Southall Farrar ıd J. H. Quisenberry, district agents of xtension in Virginia, and practically ·ery elected director of the tobacco co- ıerative from the state will be among e speakers who will address the farm- s who will mobilize in 23 association arehouses throughout Virginia next uesday.

More than 2,000 Virginia farmers have ined the marketing association within e past twelve months and the associa- ın now has over 37,000 contracts from le Old Dominion, which represents a embership of 75 per cent of all to- ıcco growers in the state.

A large gain in the majority of to- .cco which Virginia co-ops delivered to eir houses last year is confidently oked for by the members and directors the association.

The 23 association markets scheduled open with mass meetings next Tues- ·y are Danville, South Boston, Rocky ount, Martinsville, Critz, Chatham, retna, Brookneal, Altavista, Clover, arksville, Virgilina, South Hill, Chase ·ty, Drakes Branch, Keysville, Ken- idge, Alberta, Emporia, Petersburg, lackstone, Burkeville and Rice.

Members of the association who attend xt week's rallies at the opening of ieir warehouses are being urged to ing tobacco with them, and a record ·ening day is looked for when the co- ·s will receive their first cash advances, ·ich in South Carolina and eastern orth Carolina have lately been running ·ll over half of the prices paid upon ·e auction floors at many points.—S. D. ISSELL.

Low Grades at Henderson

HENDERSON, N. C., Sept. 29.—Sales ap- oximating 250,000 pounds were made the Henderson tobacco market for the ur days on which the market was ened this week, including the opening y of the season, Tuesday. On the ening day there was a sale of 176,000 unds, at an average price of $17.76 per ndred.

The quality of the weed was very poor, d this accounted for the poor averages ade. Primings made up the bulk of the offerings, and these are usually bid in at a low price. The break the first day was considered a fair opening offering, with a price slightly less than that for the opening date a year ago.

Tobacco men and farmers expect a better price as the season wears on and better grades of leaf are offered for sale. There is a good deal of fine tobacco in this belt, but very little of it has been offered.

The opening sale saw prices as high as $50 per hundred, but piles of this character were few and far between.

Greenville Sales to Date About 9,000,000 Pounds

GREENVILLE, N. C., Oct. 1.—September was a fairly busy month on the Greenville tobacco market. The sales were about 9,000,000 pounds. Exact figures are not available at this writing. The quality has been poor, still justifying the prediction of a poor crop in grades. The total sales have been near ten million pounds and the average under 20 cents. The little good tobacco coming in is commanding better prices, ranging up around 75 cents, and a dollar sale has been a record.

The Co-ops have received about 200,000 lbs. and advances have not been very satisfactory. The Co-ops had been billed for a number of speakings in the county the past week, but little has been heard of them. At one appointment, they were denied the use of a school house and found it well not to tarry too long around there. There was an appointment for here last Friday.—KING.

Rocky Mount Average, $19.70

ROCKY MOUNT, N. C., Sept. 29.—Total sales for the week, 1,042,304 pounds; average price per 100 pounds, $19.70. Sold to date of 1923 crop, 3,529,684 pounds; average price per 100 pounds, $20.00.

New Bern Average, $16.46

NEW BERN, N. C., Sept. 28.—Total sales for the week 62,754 pounds; average price per 100 pounds, $16.46. Sold to date of 1923 crop, 306,300 pounds; average price per 100 pounds, $16.40.— M. E. TYSON.

Hopkinsville Auction Mart To Open Dec. 4

HOPKINSVILLE, Ky., Oct. 1.—Tuesday, December 4, has been officially selected by the Hopkinsville Tobacco Board of Trade as the date for the opening of the independent loose floor sales of tobacco for the season of 1923-24. After opening the sales will be held daily except Saturdays by the five loose floor houses that will operate. These houses are Hancock Warehouse Co., Hopkinsville Loose

Floor, M. H. Tandy & Co., Butler & Perkins, and Thompson's Loose Floor.

Last season these houses handled a little more than 14,000,000 pounds, on which the average price for the season was $14.52. During the coming season they are confident they will at least equal last year's record, and some say they will exceed it. Last season saw a number of producing sections selling here for the first time, many of these being distant and shipping the tobacco here by rail. These were well pleased with the prices and method of selling; and these customers are expected to be back and bring others with them.

The double selling plan will be followed again during the coming season. Two auctioneers will be employed, and two sets of buyers and two sales will be held simultaneously. In this way the sales are usually concluded early enough to clear the floors, make settlements and get everything ready for the next day. Also it enables the growers to attend to other business after they have sold their tobacco.

Settlements will be made with the farmers immediately after the sale price has been accepted by them.—M. E. Bacon.

Japanese Tobacco and Factory Losses

Danville, Va., Oct. 2.—Two and a half million pounds of American grown leaf tobacco and two of the largest cigarette factories in Japan, were destroyed in the disaster which recently visited that country, according to advices received from the Department of Commerce in Washington, which was asked by Danville interests to secure some authentic data on the tobacco loss. For a week the Tokio government did not satisfy an eager curiosity manifested by local leaf dealers in a matter of great moment but a second cable brought a reply which, while not giving specifically the amount of tobacco lost furnished a basis for estimates compiled by statistics in the government department.

It was estimated that ten million pounds of leaf was in storage at Tokio by the government monopoly at the time of the earthquake and fire. The message received from Tokio was that one fourth of the American leaf had been destroyed, and the 2,500,000 pound figure is readily arrived at. The cigarette factories which were levelled are believed here to have been the largest in Japan.

Prior to the year 1913, Japan for several years had been buying about 5 million pounds each year. During the war there was an increased demand of about two million pounds per annum but in 1920 the demand fell back to about five million pounds.

Leaf dealers here are looking for a stimulated demand for cigarette types during the season just opened since the Japanese government may be expecte to recoup its loss. Since Japan consume mostly Virginia Carolina types the bul of this demand is expected to come i the bright belt markets.—Tetley.

Women Demand Mor Refined Surroundings

Tacoma, Wash., Sept. 25. — To bacco stores for women may soon b listed among Tacoma's mercantile es tablishments.

Women are buying tobacco in nearly a forms, from snuff and Union Leader t Russian cigarettes and heavy perfectos i increasing volume, a canvas of Tacom tobacco dispensaries reveals.

On the corner opposite the mahogan fronted place with the sign advertising th well-known cigar, we may expect to see dainty shoppe with gray wood work an blue and gold draperies in the windows, modish entrance with a period door, an inside velvet lined showcases, decorate walls, ribbons, ruffles, gewgaws and dew dads.

In addition to the tobaccos it will prob ably carry side lines of cosmetics, lingeri umbrellas, hairnets and other things to intimately feminine to mention, if existin proclivities in the management of fuma tory emporiums continue.

In such a setting stocks of delicatel scented cigarettes in packages luring t the feminine eye might be expected.

But if prevailing trends are followe out the ladies' tobacconists will displa the he-man cigarettes we read about ever day on signboards, in street cars, an sometimes on the sky.

"We sell more of these cigarettes tha are supposed to be made for women t men than we do to the frails," said an at tendant in one of the familiar corner ciga stores Friday after declaring that tobacc sales to women are constantly increasing

"The women like Camels, Chesterfields Lucky Strikes and Tareytons. They ar buying lots of other kinds of tobacco thes days, too. Lots of women come in an buy their husband's supply of tobacco fo the week. But a lot of 'em get pipe an chewing tobacco for themselves.

"I can nearly always tell when the want it for their personal use. If the come in and buy their stuff without givin a darn who sees 'em, they are most likel getting it for their men. If they sneal into the store with a guilty look on thei face, and wait to go out until they ar sure no one will see them, chances ar they will be using the stuff themselves.

"Women are getting used to comin into cigar stores, the result is that mor and more women are buying their hus band's tobacco when they do their weekl shopping," said the proprietor of anothe tobacco store. "I have many women cus tomers who come in regularly. I used t work in larger cities, and there were mor there than here."

CLOTH BAGS AND POUCHES

for Smoking Tobaccos

The average man prefers his Tobacco in a Bag. It eliminates excess weight and bulk in the pocket.
You can Bag your brand attractively and profitably.

Tape Pouches that are self-reducing to fit contents down to the last pipeful. The Smoker appreciates it. A size and color for every idea and attractively printed.

Ask for Samples and Prices.

MILLHISER BAG COMPANY, Inc., -:- Established 1875 RICHMOND, VIRGINIA

ores started something that is going to evolutionize the merchandising of such stablishments, another cigar salesman aid.

"Women like bargains," he explained. So the manager of a chain of cigar ores, which has hundreds of stores all ver the nation and can buy much cheaper an the one-store operator, had the idea putting in a few lines of merchandise ot connected with smoking necessarily at argain prices.

"The idea took, not only with women, t with the men. Tobacco stores now arry razors, watches, pens, pencils, ndkerchiefs, collars, neckties, raincoats d pretty near anything you can find in e average drug store, except the drugs, d a lot of things few drug stores carry. his is more true of the East than on the acific Coast. It will get out here in me."

However, women can not seem to get tirely used to buying tobaccos in stores hich have for so many years been reats for men exclusively—they still are ightly embarrassed, cigaret venders deare. Hence the forecasted ladies' shops. Forerunners may be found in the tocco departments of department stores, any of which have recently been esblished.

"We put in this department to get more en into the store, but we find that a rge part of our business is being done ith the women," said the manager of e such department.

"Women seemingly would rather buy eir tobaccos from another woman than om a man. On my last trip to New ork I made extensive purchases of omen's cigarets." He indicated little ses containing displays of fancy cigarets. We sell more of those than we do of the aple lines. Possibly this is so because ost of our tobacco trade with women is ith those who have only recently started use it."

N. B.—Unsound or defective in condition, length or color, or mixed package from 1 cent to 3 cents lower.—F. E. BROCAR, Secretary.

Paducah Prospects

PADUCAH, Ky., Sept. 29.—There has been a little trading in hogshead tobacco, both of independent and association stocks, but sales have been rather light. Some common lugs have sold at 5 to 7 cents, and some common leaf at 10 to 15 cents, but sales have been scattering and hard to account for.

There is considerable inquiry for lugs, also for common and medium leaf, but prices are high and buyers are taking only their immediate requirements. No doubt the market for old tobacco will be slow from now on. There is very little good tobacco in the holdings and this is generally held at higher prices than the trade will pay. There is very little unsold stock in the hands of independents of any character. The bulk of the unsold stock is held by the association and is made up largely of low, common and medium grades of leaf priced at 12 to 25 cents.

The weather for the past week has been ideal for cutting and housing the remainder of the crop, and there is very little left in the field. The greater part of the crop was fairly well matured and went into the house in good shape. Farmers will be busy for the next few weeks with curing. Indications are that they are taking more pains with this very important part of making good tobacco, and we are hoping that the colors will be good and the quality better than we had expected.

The greater part of the crop has been cut rather too soon. This has been because of the black fire scare and tobacco maturing during the rainy season, ar the most of it will be lacking in bod However, colors are good, being brow to light brown. We have seen quite good deal of substantial good leaf. Lig cigar tobacco will be plentiful. The cr generally is showy with good leaf ar most of it has fair texture. If curing kept up until the crop is thoroughly m tured, I think we will find that we ha a fair percentage of very substantial t bacco of all grades; but a large part the crop is defective and nondescrip Therefore, we can only say that we ha a badly mixed crop and one that will difficult to handle; but with farmers tal ing pains in classing, we see no reaso why the trade should not be well su plied with fairly good stock. Howeve heavy-bodied dark tobacco will be scarc than any other grade.—W. B. KENNED

Getting New Members and Suing Old Ones

LEXINGTON, Ky., Sept. 20.—Continue gains in membership the past wee brought the total number of tobacc growers now members of the Burle Tobacco Growers' Co-operative Asso ciation up to 91,135, according to th field service report which showed 66 members added the past week.

Charles E. Marvin, of Payne's Depo who was in Virginia the past week, close a speaking campaign at Abingdon Satur day night and a sign-up campaign will b started in Washington county, Virgini of which Abingdon is the principal tow and the tobacco center, during the cur

t week, Kentucky solicitors aiding farmers of the Old Dominion in the n-up drive.

The legal department reported that s were being prepared against all con- t breakers in every state of the dis- t and that injunctions would be asked every case where it was learned that grower of the 1923 crop intended to independently instead of delivering tobacco to the association according contract.

While in Ohio and Indiana the injunc- n feature is not a part of co-operative r keting law, the legal department is ised by its representatives and asso- e counsel in these states that they eve the injunction can be obtained er existing law.

The injunction is to be asked, in all s, where it is known that growers nd to attempt to violate their contract egard to the 1923 crop.

ark Co-op Directors Elect Only Three Officers

HOPKINSVILLE, Ky., Oct. 1.—At their ting here last Tuesday the newly ted board of directors of the Dark acco Growers Co-operative Associa- went only a short way into the mat- of electing officers and attending to other matters incident to the coming with the organization.

Only two members of the new board e absent when called to order, and spent sometime in session.

The only offices filled were those of the sident and vice-presidents, W. F. dshaw, of Paducah, being re-elected sresident; W. C. Broadbent, of Trigg nty, as first vice-president, and R. J. Daniel, of Robertson County, Tenn., second vice-president. These three, ther with T. C. Jones, of Hopkins- e, and Judge Robert W. Bingham, of isville, constitute the executive com- ee.

The sentiment permeating the talks le at the directors' meeting was that olicy of strict economy in the opera- of the association should be adopted followed. This is taken to mean that e will be a sharp reduction in many the salaries and that a number of es will be abolished altogether, while rs will be consolidated, and thus k a saving.

One of the most persistent and wide- ad criticisms of the association up to time has been that too much money being spent in handling its affairs. ection was raised to many of the aries and to the number of people loyed. Some of this was directed nst individuals.

The new board of directors did not nto this except in a general way. In- d, they recommended the matter to executive committee. This committee recommend to the directors at their meeting, which will be October 9, ons to fill the various places; a ry schedule; and outline a program the coming year. This is the subject uch action as the directors see fit to

The executive committee has already t much time in consideration of this big job given them and as yet have taken no definite steps. Or at least they will not give out anything and probably will not until they lay their recommendations before the full board of directors.

President Bradshaw recently returned from a tour of Europe, in which he made a careful study of co-operative marketing methods, especially in Denmark. It is understood that Mr. Bradshaw will recommend some changes here as the result of the information he secured overseas.—M. E. BACON.

Bankers Hear Co-operative Arguments

LEXINGTON, Ky., Sept. 29.—There was evident a feeling among the leading American bankers in attendance at the annual meeting of the American Bankers' Association at Atlantic City, that the farmer's problems are of importance and that co-operative marketing associations, properly conducted and financed should be fostered by the bankers of the country, President James C. Stone, of the Burley Tobacco Growers' Co-operative Association said on his return from the bankers convention.

Mr. Stone, who is a director of the Fayette National Bank of Lexington, was accompanied by Bush W. Allin, of Harrodsburg, who is president of a bank in his home city as well as vice president of the Burley co-operative. Both reported that the bankers heard with a sympathetic ear of the development of co-operative marketing in this country.

The Burley officials talked with bankers from all parts of the country—north, south, east and west—while in attendance on the convention. New York bankers, as well as those from the farming country of the middle west and south, manifested interest in the farmers' problems. Among the financiers of national prominence whom they met was Eugene Meyer, Jr., managing director of the War Finance Corporation, which played a part in the financing of the Burley co-operative the first year of its operation.

"Big business is coming to realize the importance of the farm producer in the nation's economic system," Mr. Stone said, "and that there is no general prosperity unless the farmer prospers. It is coming to be recognized more and more that the farmer should have such financing as will enable him to merchandise his crops, and to prevent his being forced to dump them, whether the market is ready to receive them or not. We found this sentiment prevailing among all the bankers with whom we talked."

Owensboro Outlook

OWENSBORO, Ky., Sept. 29.—A week of favorable warm weather has furnished opportunity for cutting and caring for the late tobacco which is about finished, there being a small percentage remaining uncut. The weather has also been favorable for yellowing and curing, furnishing in a general way for both, one of the best weeks of the season.—J. S. PHELON.

DEALERS! JOBBERS! MANUFACTURERS!

You can now tell exactly by glancing at the Stamp the origin of the Tobacco you purchase as Porto Rican.

Every barrel or bale of Leaf or Scraps and every box of cigars coming from that Island must have affixed a White, Blue or Pink Guarantee Stamp.

WHITE: Means that the Tobacco is all Porto Rican.

BLUE: That it is mixed with other than Porto Rican.

PINK: That it is all Foreign grown—simply shipped from Porto Rico.

Shrewd manufacturers are purchasing Porto Rican Tobacco in larger quantities than ever for they are realizing more and more that the average American smoker prefers a mild cigar but insists on its having fragrance and bouquet.

No other Tobacco in the World combines all of these essentials to such a degree as Porto Rican. Either used exclusively in the filler or blended with other Tobacco it makes the ideal "all-day" smoke.

Write for the Illustrated Booklet, "The Story of a Porto Rican Cigar."

Florida Farmers to Grow More Bright Tobacco

SUWANNEE, Fla., Sept. 29.—At the regular meeting of Rotary recently, W. H. Lyle, who so successfully grew bright tobacco last year, was principal speaker, and he spoke to such good advantage that Rotary endorsed his plan of co-operating with the farmers this coming year and pledged to attend the meeting that is being arranged for October 10. (the tentative date set by the Suwannee Farm Bureau), when Mr. Webb of Hahira, will be here to tell the farmers how to grow tobacco.

Mr. Lyle read statistics, showing what had been done in South Georgia, and also the demand for cigarette tobacco, and proved conclusively that there would be no danger of over stocking the market. He knows we have the soil and the only question was financing the crop on a unit plan of four acres to the farm.

Rotary members constitute a number of the business men of the city and the fact that they have given their word to get behind the movement and help with their money speaks well for a large acreage being planted.

Pennsylvania Tobacco Prices Show Big Decli

Packers and Dealers Manifest no Great Concern Over the Hi Figures Recently Reached—Express Belief That 20 Cer Will Hereafter Be Near the Pivotal Point.

LANCASTER, Pa., Oct. 1.—The high prices paid by the firm of Cressman's Sons in their recent campaign of buying in the field have broken, it seems, under their own weight. From 25 and 26 cents per pound the prices have dropped to the neighborhood of 20, and it was the opinion of several packers this morning, that the same quality of leaf could be purchased at that level as was bought at from 5 to 6 cents higher. Information from one source had it that the Cressman representatives had orders to remain as close to 20 cents as possible and that after the purchase of several more crops the buying by this concern would come to an end.

Not Alarmed at High Prices

While some significance is attached to the early splurge of buying by this manufacturer, local packers to a man refused to view with other than mild interest the high prices offered. Since the aggregate of all the leaf already contracted for will cut very little figure in the total operations in the Lancaster cigar leaf district and in view of the fact that Cressman is not one of the large packers of Pennsylvania, local operators are undoubtedly well grounded in their conviction that the unexplained offers of exceptionally high prices will mean little by the time the books are closed on the 1923 crop. Only a few of the best crops have been bought and it is unlikely that many more will go at prices much over the 20 cent mark.

May Be Stabilizing Factor

The early buying at high prices may have the effect of stabilizing the tobacco market to a great extent. Growers evince reluctance to sell at prices under the mark already set, and will likely hold on to their cigar leaf until stripping is over. Uncertainty has been implanted in the farmer's mind and, dubious as to the wisdom of selling before the market has been definitely established, he will very probably "sit tight" until later in the season. Many growers object to selling their tobacco while it is yet in the field or before it has cured because of the fact of its uncertain quality prior to the curing process. It is impossible to accurately gauge the quality of the product before it has been cured, and much misunderstanding sometimes arises from transactions guaranteeing the condition of the leaf for delivery when it is yet green or uncut.

Doubt Tenability of High Prices

The opinion is general among Lancaster packers that the average on the 1923 crop will not exceed, and may even fall lower than that of the 1922. Independents in this section are emphatic in their declarations that conditions do not warrant the high prices that have already been paid and that the market cannot hold at that level. They reinforce these arguments with the statement that manufacturers are now holding larger quantities of cigar leaf than they have for some years past, and that the cigar business, on the whole, will not carry the added weight of the increased prices.

Old Goods Not in Very Strong Demand

The market on 1921 and 1922 crops is not very brisk at the present writing, with more interest displayed in '21 goods than in last year's crop. There is not much of the latter to be had and old leaf of any kind, in fact, is scarce. Little remains in the dealers' hands although sales of small quantities are constantly being consummated. The firm of Is Miller, Rohrerstown, last week sold quantity of tobacco amounting to ab 70 cases, of his 1921 packing. Inquir arrive almost daily, packers state, though all of the buying at the pres time is a result of the activity of ma facturers in their preparations for Christmas trade.

Crop Matured in Good Shape

The final stages of the tobacco harv are in progress. A warm, moist per which followed the first light frost t weeks ago has increased the quality the seedleaf in this section by at le fifty per cent on the average. Much the crop that would have gone into shed unripened, had the cold spell h is now fully grown out and of first cl quality. The effect of the murky dar ness had quite an opposite effect on tobacco that was already housed, ho ever, and damage from overheating lack of sufficient ventilation, which sult in "pole burn," is likely. Ideal c ing weather—sunshiny with a good c breeze—prevails at the present time acts as a spur to the grower in his c ting activity. The end of the week see the greater part of the crop in curing shed.

Winter Meetings to Start Oct. 8

The first of the series of winter me ings of the Lancaster County Toba Growers' Association will be held Monday afternoon, October 8. L. Nolt, prominent in local packing circ will deliver an address before the gr ers on the packers' side of the toba question, and will suggest ways means whereby both branches of the dustry may benefit through a bet understanding of the problems of bo The meetings will continue to be h monthly throughout the winter mont —KEYSTONE.

Report from Japan

WASHINGTON, D. C., Oct. 1.—The bacco Division of the Department Commerce has received a cablegr from Japan in connection with the tent of the loss in the tobacco indus by the recent disaster in Japan.

The cablegram states that "two of Japan Tobacco Monopoly Factories w destroyed, together with about o quarter of the total stocks of tobacco Japan." The cablegram did not cont information regarding the extent of loss of tobacco by the disaster, but Tobacco Division has asked for furt information along these lines.

Officials of the Department of Co merce are of the opinion that inasm as the largest Japan cigarette facto were located in Tokyo and Yokoha it is probable that the loss of two these factories will affect the output t considerable degree in the immedi future.—LAMM.

Smokers' Specialties Popular

The Cosmopolitan Pipe Co., of 1 St. Marks avenue, Brooklyn, has enga a force of ten salesmen to cover the pr cipal cities of the Eastern States and Middle West, featuring the three five piece fancy cigar and cigarette ho ers. These are made in beautiful desi and are put out to sell at a very g profit to the retailer. H. Moskow sales manager, reports that orders coming in rapidly.

Northern Wisconsin Sales Practically Cease

A Few Shedded Crops That Were In Before the Frost Have Been Bought—Prices Said to Be Around 30 Cents—Frost Damage Has Not Been Overestimated—Pool to Pack Crop.

Edgerton, Wis., Oct. 1.—The buying of the '23 crop has practically ceased in the north. A few shedded crops that were in before the frost have been bought at prices around thirty cents, it is reported. Also several crops with frozen leds, but partly harvested before the big freeze, have gone at 15 and 16 cents straight through. The volume of the movement, however, is practically nothing.

Sales in South About 1,200 Acres

Perhaps twelve hundred acres will cover the total of crops bought to date in the south that will be delivered as binders. Sweeney has bought the most of it. It goes to the Fendrich Co. However, Weil, Soulman, Grundy, Tallard (or Marquisee), Spitzner, and a few others have dabbled in it for various amounts. There is perhaps that many more independent acres of binders to be had in the south.

Stemmers Show Little Interest

As the days roll on, it becomes more and more evident that the frost damage was not overestimated at the time it happened. Many entire crops are to be seen abandoned in the field, and no crop out in escaped destructive results. The leaves have curled back to the stalks, with only three or four inches showing green. There is no doubt that the nation does not yet realize the extent the crop was damaged both north and south. It is perhaps the first time in history of the state that the stemmers have shown such an absolute lack of interest in it as a crop, and that there is so much doubt among members of the trade, and even the farmers themselves, whether it ever shall be taken up or not.

Farmers Unwilling to Harvest at 7 Cents

Of course, this does not apply to the early harvest. It furnished a small amount of beautiful material to put on the market. A few crops out in the freeze of the first night have been selected carefully by buyers of Green's offer at seven cents, but the buy was only for three days' duration, and the farmers were unwilling to harvest it for that amount. Labor is high, and fertilizer is here already spread for the grower, ready to be turned under at the fall plowing. They figure the poundage yield at only three hundred to eight hundred pounds an acre because the frozen parts of the leaf will fall out between now and shipping time, and $30 to $35 an acre will not pay for harvest wage and stripping wage.

To Plow Under Frosted Crops

Of course, the ever-prevalent sharecrop forms a large proportion of the growers, and his share would be only half of that. Many of these will not hesitate to plow under their tobacco, and indeed many fields have already been turned under. Most of the farmers are letting their crop go under the pressing necessity of immediately getting their frozen corn in the silo. Corn to be any good must be cut immediately after the frost, and the arduous task of silo filling was not begun until it was all cut down.

Good Weather Since the Freeze

Since the catastrophe, excellent curing weather has been enjoyed for the crop left in the sheds. The early tobacco is curing out nicely. Several crops in the sheds showed traces of being chilled by the frost along the stems. This, however, was among those crops cut green to avoid the then threatening freeze. The bulk of the sampling will be over in ten days. The trade is pleased with the way the '22 has gone through the sweat. Some packers had slightly more black rot than in a normal year, but must and kindred diseases are entirely absent. And, of course, it is an old adage in the trade, that it takes fancy tobacco to show any black rot.

Poolers May Pack Own Crops

It is reliably rumored that the poolers intend to pack their '23 northern this year. There is no doubt that there has been pressure for that method of procedure since the frost so severely diminished their supply. Indeed, among the loyal pool fraternity, the unsatisfactory results have been laid to the claim that the pool did not bite off a big enough chunk to chew. That they should eventually make their own cigars in co-operation with the other pools already existing in other cigar type sections, or form one where it did not exist. They claim that a great farmer market is already there for them among the members of all the other various kinds of pools, and all the agricultural communities would buy such a cigar.

While it is true that Rome was not built in a day, it is true that many Romes have never materialized.—Badger.

Exhibits at the Coming Tobacco Show

Governor General Leonard Wood of the Philippine Islands is taking a great deal of interest in the coming Tobacco Exposition to be held at the 71st Regiment Armory, New York City, January 28 to February 2 inclusive, 1924,—and in fact, the whole newspaper press of the Philippine Islands have commented favorably upon and given considerable space to the fact that the leading manufacturers of cigars in the Philippines will have representative exhibits.

The largest and oldest cigar factory in the world (The Isabela) situated at Manila, making hand made cigars will be among the leaders. They are the biggest shippers to the United States, and will have a special display through their American representatives, E. F. Pipe of 35 So. William street, New York City. The Isabela Factory is a fifty million dollar concern.

"In addition, the following concerns handling Philippine cigars will also exhibit and before the Show opens in all probability, additional companies will also have made their arrangements: C. G. Wilson, Inc.; Ca. Gral de Tobaccos de Filipinas; Determann & Co., Inc.; E. M. Elam; H. L. Judell & Co.; Henry Ottenberg & Co.; Henry W. Peabody & Co.; Laks Cigar Co.; Manila Commercial Co., Inc.; M. F. D. Scanlan; Marx Bros. Cigar Co.; Philippine Tobacco Co.; Sidney J. Freeman & Sons; Woolley & Co., Inc.; and S. Frieder & Son.

This is only one feature of the cigar exhibits in the show, because the Porto Rican people are also making arrangements to make a very extensive campaign to further popularize Porto Rican cigars with the public.

H. Duys & Co. will have a wonderful exhibit from Sumatra and Java, and while their last year's exhibit was comprehensive, it will be much more interesting and broader in scope at this coming Show.

Applications for space in the Exposition should be addressed to the Executive Committee of the National Exposition Co., 3rd floor, McAlpin Hotel, New York City, Telephone Pennsylvania 5700.

Philadelphia Factories Are Operating Full Tim

Retail Business Not Showing so Much Speed—Looking Fo ward Hopefully to Holiday Season—Cigar Box Factori Going at Full Production Capacity—Trade Talk.

PHILADELPHIA, Oct. 2.—Full time operation is now the order of the day and in a limited sense of the night as well, especially with all the manufacturers having the national field to draw on. It is true that Philadelphia business is inclined to be a bit draggy but the gain upstate in its new activities consequent on the passing of the coal strike has made up the loss and the average for the entire commonwealth is quite good. In states immediately contiguous to Pennsylvania there is also shown a slight backwardness but the loss is not great. However from the mid-west and far west the big southern field and the major portion of New England orders are plentiful. The national aggregate therefore is good.

Increasing present day activities in the big factories located here is, of course, holiday preparation. There is every indication that this season's offerings in 40's, in both regular and special packings, and the holiday line in all sizes, will be more numerous than they have been for several years. This fact also is responsible for the special activity of the cigar box manufacturers, many of these having their sales limited only by their ability to get out production under the obstacles of a shortage of experienced help. A few of them already are sold up on seasonal lines and all advise that orders be placed immediately to avoid disappointment.

In the leaf market business is very quiet without being actually dull, and the stimulus of price concessions is needed to speed up sales.

Federal Report

Under date of October 1, the Federal Reserve Bank for the Third, or Philadelphia district, sums up the September business in the cigar industry in the following report:

"The demand for cigars is stronger than it was a month ago, but some manufacturers state that it is less active than it was in September, 1922. In general, however, the call for cigars is good, and orders for the Christmas trade have been booked in large volume. Special Christmas packings are in heavy request, but on account of the high cost of making such packings, several manufacturers have merely wrapped their standard packages in special holiday paper. The five cent cigar seems to be losing in popular favor, nearly all of the producers of this grade reporting that it is not selling as well as it did earlier in the year. On the other hand, the ten cent cigar is growing in popularity, and many of the large cigar makers report that it is their best seller. Class B and Class D cigars are also in good request. Most of the large manufacturers are operating at close to capacity, and the smaller producers at about 75 per cent. The majority of orders are for immediate delivery, only a few firms reporting any for delivery beyond 60 days. Cigar jobbers state that the current demand is rather poor and that retailers are buying only from hand to mouth. However, they are receiving many Christmas orders for delivery in the latter part of November or early in December.

"Production of large cigars in August was smaller than that of August, 1922.

"Cigar prices are very firm and remain unchanged. Leaf tobacco prices are also firm, and some grades are higher than they have ever been before.

"Stocks of cigars at the factories are moderate and at many plants are larger than they were a year ago. In general, the supplies of raw materials held by manufacturers are also moderate.

"At most factories, the supply of labor is sufficient, although during the month the available supply of skilled cigar workers decreased considerably. Consequently, a few factories report t both skilled and unskilled labor is sor what scarce. Wages are unchang Collections vary from fair to good a show little change since last month."

Jarrett Factory in Good Shape

Installation of the new equipment the box factory of Monroe Jarrett So Randolph and Jefferson streets is co pleted and the firm is now able, throu the modernized plant, to double prod tion on cigar boxes. Ten new machi of boxmaking type and labelling equ ment; two new saws, Hooper printi press, three nailing, three labelling a two glueing machines have been instal and are in full operation. It is the p of the firm to further expand business the addition of the sixth floor in t building, 528 Jefferson street, in t spring. At present the firm occupies f floors in the two buildings 522-526 a 528 and 532 Jefferson street, making c of the largest cigar box factories in t city. It has a capacity of 60,000 bo per week, and as soon as labor conditio ease up, and more hands can be secur this will be increased. The firm is n engaged on holiday productions of f tieths, and has the largest orders listed its books for more than three years.

Home at Last

Adolph Loeb, president of K. Stra & Co., 301 North Third street, who h been sojourning in Europe since Ju returned last week in the *Leviathian* a is again at his desk. Herbert Rhe strom, leaf tobacco salesman for the fi has just come back from a month's t to New York state and will leave t middle of October for that field again.

J. J. Keefe, New England represent tive for Allen R. Cressman's Sons, spe sometime at headquarters during the l week.

Schulte Adds Important Link

One of the most important additio to the Schulte chain of stores took pla during the week when it took possessi of the large premises at the south w corner of Delaware Ave. and Market This is immediately opposite the ferrie the Pennsylvania railroad, and is, pe haps, the most travelled point in all t city.

The United has a store a half blo above on the same side of the street Water, and another on the opposite si of the street, and still another a ha block away at Front street.

A very centrally located retail store Juniper and Sansom Sts., conducted f many years by Howard Little, now the Arcadia cafe cigar stand, has ju been taken over by A. Olster, son Samuel Olster, head of the Ruyera Lop Co. The junior Olster formerly was b hind the counter for M. J. Dalton.

Charles Lloyd, former member of t firm of Leach & Co., and later in bu iness for himself on Eighth street, is no manager of the Peermont store at t Southwest corner of 15th and Mark streets.

Samuel Magen in business for sometin at 13 South 9th street, has added t store at the southwest corner of 10th ar Arch streets, formerly conducted as o of the United chain.

The United Cigar Store at the nort east corner of 4th and Walnut streets being re-constructed by the addition a new front, together with interior im provements.

Visitors to the leaf trade recently were n Mari of the Porto-Cuba Corp., Ray Clark of D. Dreux, Inc. Charles Starr J Delmonte & Co., William B. Shaw Theyskens & Shaw, Inc., all of New rk, and Harold L. Hudson, a Massa-chusetts packer.

York County News

YORK, Pa., Oct. 1.—The annual meet-of the Consumers Cigar Box Co. of d Lion was held last Tuesday in that ough when the following directors were sen to serve for the ensuing year: J. ank Strayer, Lemuel E. Sentz, C. S. Motte, Arthur T. Thompson, David lf, Arthur S. Zeigler, Jacob Streavig, S. Sentz, E. Latimer Sechrist, Charles Roseman and D. A. Horn. The board anized and elected these officers: esident, C. S. LaMotte; vice president, Frank Strayer; secretary and superin-dent, B. S. Sentz; treasurer, Charles Roseman. The company reports its siness one-third greater than last year. th the installation of additional ma-nery, it is expected to turn out a mil-n cigar boxes during the year.

Mrs. Sarah Keener, who resides with son-in-law and daughter, Mr. and s. Matthew Douglas, near Conrad, in southern part of York county, cele-brated her 76th birthday anniversary recently by cutting tobacco in the field. She is very active for her age and on her birthday anniversary worked as hard as any of the younger members of the party.

The General Cigar Co. branch factory in Red Lion, now employs 75 persons.

David A. Horn, of Red Lion, a member of the Tampa Cigar Co., is on a business trip through the New England states.

J. Frank Strayer, Jacob Streavig and Charles F. Laucks, all of Red Lion, motored last week through the tobacco growing district of Lancaster county. They report that a small amount of tobacco has been sold at 25 cents a pound and that when the time comes to buy the crop, four of the largest cigar manufacturing companies in the First Pennsylvania Revenue district will practically absorb all the county's production.

September Revenue Collections

YORK, Pa., Oct. 1.—September was a banner month in the value of business done through the sale of stamps at the York office of U. S. Internal Revenue. A tabulation of figures at the close of business on Saturday, September 29, disclosed aggregate receipts of $270,969.50, which is a big increase over the preceding month and a gain over the collections for the same period a year ago.

As usual the largest single source of income was from the sale of cigar stamps, which netted the Federal Treasury $260,-938.24. This sum is in excess of the total receipts during August, which were $248,265.17. The cigar receipts for the month are also larger than those for the same month of last year, when they totaled $256,159,86. They also exceed September, 1921, when the receipts from that source reached $258,182.26, but fell below September, 1920, the year the industry was at its peak, and cigar stamp sales totaled $308,124.51 for the month.

The amount collected from the sale of tobacco stamps was $7,968.96. The August returns from this source amounted to $10,228.10. The sale of tobacco stamps for the month of September, a year ago, amounted to $9,884.97. Sale of Documentary stamps brought an income of $2,-062.30.

Below is given a table showing the receipts during the past month from cigar, tobacco and documentary stamps as compared with the receipts from the same sources in September, 1922:

1923		1922
$7,968.96	....Tobacco....	$9,884.97
260,938.24	.....Cigars.....	256,159.86
2,062.30	..Documentary..	1,677.52
$270,969.50		$267,722.35

Florida Rotarians

(*Continued from page 7*)

haps less likely to become so malignant on the plats devoted to this tobacco as on the shaded areas. Therefore rotation would not be so necessary. But rotation would, I am sure, be advisable and profitable wherever there are other plats available for the crop.

"Some sales of bright tobacco within the past two years, I have heard, were as high as 80 cents. Quite a number of lots at 60, while sales as low as five cents are not uncommon.

"Opinion among the best informed people in this section is that there is little danger of an overproduction within the next few years, and that prices will remain about at the present comparative level. That is, that there is little likelihood of the price declining materially unless there is a general decline in all commodities; and that this tobacco will rise or fall as the case may be as the prices of other staples fluctuate.

"It is considered a good, safe and sure money crop for the small farmer who will have to hire little help to produce, harvest and cure a few acres. One attractive feature is the system of marketing, and the fact that it is always paid for in cash.

"The tobacco, when harvested, is hung as closely in the barns as it can be packed in and the curing is done by having flues of large stove pipe running through the barns at or near the ground, leading from small bricked-in furnaces on the outside. These furnaces are fired with wood from the outside, day and night, until the tobacco is cured. It requires, I think, about 72 hours to cure a barn full of tobacco. Within a few hours after it is taken out, and the barn is refilled for another curing."

A WEEKLY TRADE REVIEW

ESTABLISHED 1886

Vol. LXXVI. No. 24 NEW YORK, OCTOBER 11, 1923 Per Annum, $3.00 Per Copy, 10c

rogress of Tobacco Companies Since Year 1914

e United Cigar Stores Co. and Six Manufacturing Corporations Have More Than Doubled Working Capital—Sixty-four Per Cent of Increase Has Been from Earnings.

rom 1914 to 1922 one leading tobacco iler and six manufacturing companies re than doubled combined working tal; and of this increase over 64 per has been from earnings alone, says *ron's Financial Weekly*. While divid payments have been liberal, these cerns have retained for surplus 22 s to $1.97 for every $1 paid on com-n.

ombined working capital rose from 5,700,000 December 31, 1914, to $333,-000 at close of last year, a gain of 7,800,000. Capital liabilities were in-ised $63,800,000, excluding stock divi-ds. If all this increase in capital went swell net liquid assets, a broad as-ption, there still remains $114,000,000, 4 per cent, derived from profits alone.

The Liquid Condition

. J. Reynolds Tobacco Co. had far largest growth in net quick assets, a 800,000 increase to $88,200,000. Of , $43,300,000, or 265 per cent of the 300,000 working capital in 1914, came rn earnings alone. Liggett & Myers's wth was $28,400,000 and American acco $28,100,000. But while only 400,000, or 36 per cent of the former's ease can be ascribed to earnings, erican Tobacco enlarged its quick as-entirely from profits, as it reduced talization $34,652 during the period.

merican Snuff Co. and American ar Co. also bettered liquid position en-ly out of earnings, the former with 0,000 capital reduction, the latter with capital change.

nventories totaling $275,200,000 at end 922 were only 0.6 per cent above the vious year and still 6.6 per cent below 1920 figure. United Cigar Stores Co. America was formerly a holding com-y, and so had no inventories to report 1914. The total for manufacturing companies rose from $108,800,000 in 1914 to $264,000,000 in 1922, a gain of $155,-200,000.

The Largest Gains in Inventories

Bulk of this increase was accounted for by American Tobacco, Liggett & Myers and Reynolds, which together had $125,700,000 more inventories in 1922 than in 1914. Domestic cigarette consumption is well over 200 per cent more than before the war, and cigarette leaf prices are 100 per cent higher. Inventory rise, therefore, has been conservative.

It takes three years to season tobacco, and inventories must be averaged over this period. The low price of the 1920 crop averages cost lower than present market.

Earning Power

In earning power Liggett & Myers tops the list with $152 a common share on present capitalization, an average of $19 annually. P. Lorillard Co. follows with $124.75, an average of $15.59 a year.

Earnings of American Tobacco and R. J. Reynolds suffer in comparison, because of large stock dividends declared. American Tobacco paid one 75 per cent stock dividend and converted scrip into "B" common, more than doubling the junior shares. If this be considered, its earnings on the original amount are over $215 a share, about $27 a year.

Reynolds' Record

Reynolds within three years has reduced par of its common from $100 to $25, distributing four new shares for one old, and has declared a 200 per cent and a 33⅓ per cent stock dividend, payable in "B" common so that there are now 16 shares for every original share. Total earnings of $32.35 are equivalent to $517.60 on the old capitalization, averaging $64.70 a year.

Dividends

Dividends have been generous. Of the seven companies, only Reynolds has retained more for surplus than it has paid out in common dividends, keeping back $1.97 for every $1 given stockholders. This policy has probably been a direct cause of the mushroom growth in working capital. Value added in the eight years is $21.48 a share on present stock and $343.68 on original capital, the latter figure averaging $24.96 a year.

Liggett & Myers Leading

Liggett & Myers easily heads the list with $66.80 of added value for each share, an average of $8.35 annually. Lorillard retained $46.32 for surplus, an average of $5.79. American Tobacco is third with $42.82, but on its old capital this would be about $85, equivalent of $10.60 a year.

In 1921 United Cigar Stores had to pay 48 cents a share of its dividends out of surplus. This is the only time any of these companies was forced to dip into surplus to complete distributions to stockholders.

Co-op Warehouse Opens at Danville

(*Special Telegram to* TOBACCO)

DANVILLE, Va., Oct. 9.—The Co-operative Tobacco Marketing Association opened its warehouse here today for the season, with deliveries described by E. L. Walton, local manager, as weighing approximately 100,000 pounds.

The growers receiveed somewhat larger advances on their deliveries than they did last year.

Executive Manager Optimistic

Oliver J. Sands, executive manager of the organization, addressing 1,000 grower members, told them that the future of the Association is assured, now that it has emerged successfully from the experimental stage.—TETLEY.

One-Sucker Markets to Open in December

FRANKLIN, Ky., Oct. 6.—The tobacco warehouse men of the one-sucker district met at Bowling Green Tuesday for the purpose of fixing the date of opening loose leaf sales in the district this season. A permanent organization was effected by electing W. G. Harris, of Franklin, president; and W. S. McClanahan, of Franklin, secretary and treasurer. It was unanimously decided to open the one-sucker markets during the week of December 3, the exact date to be announced later by the president. Every loose leaf warehouse in the district excepting Glasgow was represented.

Elcho Cigar Co. to Buy a Factory Building

BOSTON, Mass., Oct. 6.—Negotiations are pending for the sale to the Elcho Cigar Co. of the building formerly occupied as a factory by the Waitt & Bond Co. on Columbus avenue. When these negotiations are completed it will mean that Boston will again have the largest cigar factory in New England, and virtually will assure the continuance of the handmade cigar industry in Boston by union labor.

Hungarian Tobacco Industry Shows Decline

WASHINGTON, D. C., Oct. 10.—As compared with pre-war years, the tobacco industry of Hungary has suffered a considerable decline during the past three years, according to a report to the Department of Commerce, of Assistant Trade Commissioner Prentiss M. Terry, at Vienna, Austria.

In 1913 there was devoted to tobacco culture, 122,183 acres, yielding 104,630,-000 pounds, for which the growers received $4,400,000, while as a result of adverse economic conditions and a loss

United Cigar Stores was a holding company until 1916 when it absorbed its subsidiaries and became an operating company.

Earnings of Reynolds are based on 100,000 shares of $100 par in 1915, 1916 and 1917; on 200,000 shares of $100 par in 1918 and 1919; on 2,400,000 of $25 par in 1921 and 1920; on 3,200,000 shares of $25 par in 1922, total and value.

(c)—Based on shares outstanding at close of each year.

(d)—Total and added value are based on shares outstanding Dec. 31, 1922. Added value includes surplus adjustments with total yearly retained earnings.

of about 20 per cent of the tobacco plantations the area declined in 1920 to 48,658 acres, in 1921 to 41,172 acres, in 1922 to 38,728 acres; the yields were 32,802,000 pounds, 27,092,000 pounds and 28,755,000 pounds respectively.

Prior to the war, more than half of the crop was exported to Austria; and about 45,000,000 pounds, together with about 13,000,000 pounds of imported tobacco were manufactured by the 20 factories of the Hungarian Monopoly. The products of these factories were distributed through 20 wholesale depots, of which only 11 depots now are within the confines of Hungary.

At present the Monopoly imports tobacco chiefly from Dutch East Indies, Brazil, Turkey and Cuba. In 1914 the Monopoly imported about 160,000 pounds of tobacco from the United States for use in the Hungarian Virginia Cheroot factory at Fiume, but since the loss of Fiume there have been no further imports of tobacco from the United States. The Monopoly intends to erect a factory for the manufacture of Virginia cheroots as soon as it is financially able, and it is expected that Hungary will then import a small amount of American tobacco.—LAMM.

United Secures Long Lease

A. L. Steinfeld, a vice-president of the United Cigar Stores Co. of America, closed a 99-year lease on September 1, 1923, with the Scarborough Estate for the Apollo Building, located at northwest corner 5th and Walnut streets, Cincinnati, Ohio. When present leases expire the United Cigar Stores Co. will erect a new building on this site.

New Havana Cigar Store

A. Gonzalez Camero, Inc., of Havana and New York, will shortly open a high-class store at 37 New street, New York, in the height of the financial district. The corporation will feature Havana cigars exclusively.

Returns to Cincinnati

Alexander Frieder, of S. Frieder & Sons, importers of Manila cigars, of Cincinnati, Ohio, who had been in New York for the last few months on important business, returned to Cincinnati on Tuesday evening.

Socket Pipes in Demand

L. & H. Stern, of 59 Pearl street, Brooklyn, are experiencing a tremendous demand for their socket pipes, including innumerable repeat orders. The factory is working to its full capacity to meet the increasing demand for these popular pipes.

Domestic Exports of Leaf Tobacco, Cigarettes and Smoking Tobacco During August, 1923

WASHINGTON, D. C., Oct. 8.—The following tables show the domestic exports of leaf tobacco, cigarettes and smoking tobacco during August, 1923, from the United States, by countries. The figures are subject to revision. They follow:

Suggestions to the Dark Co-op. Association

HOPKINSVILLE, Ky., Oct. 8.—When the directors of the Dark Tobacco Growers' Co-operative Association met in their initial meeting, following election, retrenchment was the keynote of all the speakers, and among the members there has been more criticism of the salaries than anything else. But it is admitted that conditions during the past year were not normal and that many things were done, and people were employed under the exigencies of the time, that would not have been done in ordinary times. The association was launched when the 1922 tobacco crop was ready to move. They had a big job ahead of them which must be done, but they had little or nothing to do it with, not even an organized working force. So everything had to be provided in an emergency and against time, and often it required two people to get the required results in the required time, where one would have been sufficient in the usual course of events. Also it often took an extra price to equipment immediately or to land capable and trained men and women were necessary to put the big organ tion on its feet.

Now this period has passed, the ganization is well perfected and fu tioning smoothly, and a readjustmen in order and to be expected.

President Bradshaw, who recently turned from a trip to Europe where made a special study of co-operative m keting methods, especially in Denm laid before the board of directors at t initial meeting a written suggestion to future policy. Economy was watchword in this, together with a that the heads of departments be gi more power and held responsible for sults attained. He recommended consolidation of offices wherever poss and that a working fund be establis by the assessment against each gro member's crop of one-quarter of a per pound. Mr. Bradshaw's recomm dations were regarded highly by the rectors. They are as follows:

"At the meeting of the Board of

rectors a resolution was passed directing ne president to make a report to the ewly elected Board of Directors at their rst meeting. Inasmuch as the associa- on has not reached the end of its first scal year, a complete report of opera- ons is impossible at this time but such eport will as provided by law be sub- itted to the board at some meeting after ie end of the fiscal year.

"The experience of the first year has eveloped a number of problems that ould be solved before going into the econd year, some of which are funda- ental and cannot be corrected without tion by the board in the first instance id at the beginning of the new year. his report is intended to call the atten- on of the board to a few of the more nportant questions which it is deemed ould receive prompt consideration of e board:

"First. The proper function of the ard is to exercise a general supervi- on and control over the operation of e whole association and to determine e major problems of policy. Details administrative work conformable to e policy set out by the board is the ty of the officers and employes acting the scope of their respective depart- nts. A very large part of the time d attention of the board during the st year has been taken up in attempt- g itself to solve minor administrative tails and this has had a two-fold in- rious effect; and it has diverted the at- ntion of the board from a larger and pre important problem and has lowered e morale of each department by taking om the shoulders of the heads of the partments the responsibility which ould be theirs and leaving the impres- n throughout the organization that the ard was a sort of a grievance commit- e for the settlement of minor differ- ces over the heads of the responsible partment chiefs.

"This situation is not altogether due t a disposition of the board so to do It is perhaps an inevitable result of the s-up of the organization in the begin- ng. The board not only in the begin- ng elected its president, vice-presidents, ecutive committee and heads of the rious departments, but it elected direct- l all assistants and employes through- ct the organization. The result was t.t there was a feeling throughout the rganization that employes even in posi- ns of minor responsibility, as well as assistants of the various departments felt ir responsibility to the board rather t n to the heads of their departments or the general manager and in turn the ds of the departments felt themselves n in position to exercise the vigorous trol over the personnel of their de- rtments that good business manage- nt requires.

"In my opinion much better results d be had if the board will select a presi- t, vice-presidents, executive commit- a general manager and the heads of warehouse division secretary and asurer and the accounting divisions, ding division, and then make no fur- r selections directly by the board but the personnel of these divisions be d up by appointment by the general nager and heads of the division, sub- t of course, to approval by the board. The general manager should be speci- lly invested with and charged with responsibility for the management of whole organization and every depart- nt head as well as every other em- ye of the organization should be re- nsible to the general manager and ough him to the executive committee the board of directors.

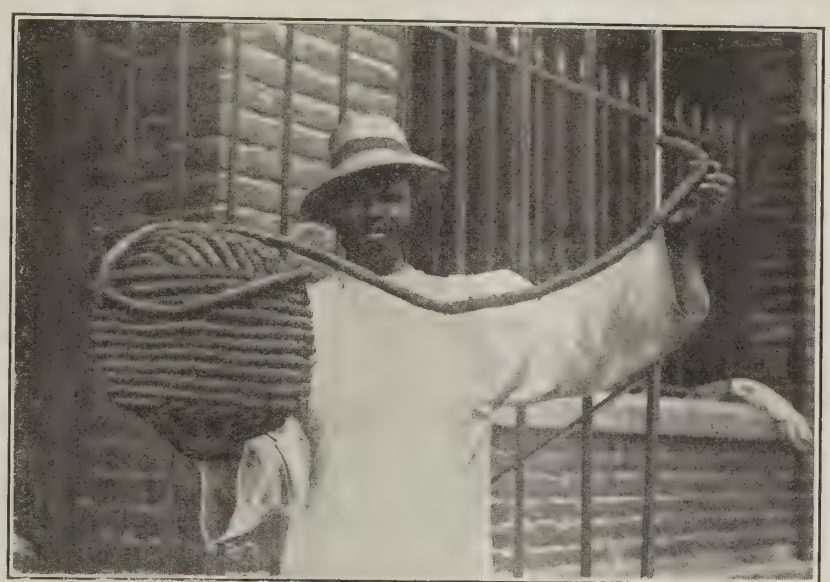
Communications to the board from organization should ordinarily come ough the general manager unless the rd specifically calls for reports or in- rmation from the head of the depart- nts and the policies laid out by the rd should be chargeable to the general nager who should be the responsible nt of the board.

An attempt by the board to reserve f direct authority over the subordi- s and employes of the organization ults in weakening the authority of each artment over its personnel and at the e time relieves that head of the de- ment of the responsibility with which should be invested and for which he laid to exercise.

Second. The limited time within which it was necessary to set up the organization and put it in operation the first year gave little time for deliberate consideration either of proper salary adjustments and of responsibilities. The result was an improper adjustment of salaries in many cases and in many other cases a division of duties which can now be consolidated and reduce the personnel particularly among higher paid officials.

"I would, therefore, recommend that after the election of a president, vice presidents, executive committee and general manager, that the board at the first meeting make no further appointment of employes but authorize the appointment of a committee of which the general manager should be a member, which committee shall as soon as possible make selection of heads of the departments and assistants subject to subsequent approval by the board, together with recommendations for any consolidation of officers, readjustment of salaries and other changes incident to the rearrangement of duties and personnel of the organization.

"Third. One of the fundamental weaknesses of the organization has been the fixing of prices on the various grades of tobacco before sales, giving publicity to the prices and then holding the selling department to a rigid adherence of the price fixed. The sales manager was in effect handcuffed and shackled and then put in a race with the open market. This system makes impossible the exercise of either good judgment or skilled salesmanship for the exercise of which the general manager is retained.



"The market will each year absorb a given but uncertain amount of tobacco. In other words, there is a hole to be filled and it is a question of who gets there first and fills it. Under the system produced during the past year it was inevitable that any surplus stock would be found in the hands of the association. Good salesmanship would dictate a policy that would at least make the tobacco outside the pool participate in the holding of any reserve that the market did not absorb during the current year.

"I, therefore, recommend that prices fixed by the advisory committee or by the board be done specifically for the purpose of serving only in an approximate measure all of the expectations of the board as to prices but give the general manager full latitude to meet the conditions as they develop through the season and hold him only to the exercise of good judgment in holding as nearly as possible to the prices fixed.

"Fourth. Under the theory of the association's organization each year after the entire crop has been sold and expenses paid, the reserve is distributed to members and the association starts into the new year without any cash resources. As tobacco is delivered by members the only way the association can make advances or even meet its current operating expenses is by borrowing money against the tobacco as received. This makes the very existence of the association each year dependent upon its ability to borrow from banks and other institutions. If our season any year should open during a period of restricted bank credit, or of falling commodity value, we might find it impossible to borrow sufficient funds on tobacco alone to make adequate advances and carry on the loan.

"The insurance against such a predicament lies only in the association having an adequate cash working reserve of its own which would serve not only to provide some of the funds necessary, but as a support to our credit in addition to the tobacco offered as collateral to the banks.

"I would, therefore suggest that each year beginning with the crop of 1922, there be reserved from the final settlement with each member one quarter of a cent a pound which sum will be carried to the account of the member as funds undistributed but owing and that the aggregate of this fund be carried as a cash reserve. Twenty-five cents a hundred will not be a material burden to the individual members but to the association as a whole will build up a working reserve of between $450,000.00 and $500,000.00 a year. If this were continued for a period of five years we would have a working reserve of approximately two and one-half million dollars. I, therefore, recommend that in the final settlement for the 1922 crop and for each year thereafter for five years subject to such extension of time as the board may determine the necessity of the organization require a deduction of 25c per hundred pounds be made from the final settlement of each member, which sum shall be carried as a credit to the account of the individual members as a cash working reserve for the association."

Selling tobacco in Jamaica by the yard

Austrian Demand for U. S. Tobacco

WASHINGTON, D. C., Oct. 10.—According to a report from Assistant Trade Commissioner Prentiss M. Terry, at Vienna, the present demand for American leaf tobacco in Austria is greater than in the pre-war year, 1913. In that year the Austrian Monopoly used approximately 75,000,000 pounds of tobacco, of which about 62,000,000 pounds came from Hungary, and about 4,200,000 pounds from the United States. The imports from the United States during 1921, 1922, and 1923, were about 4,400,000 pounds, 2,200,000 pounds and 4,300,000 pounds respectively. The American tobacco consisted principally of Virginia and Kentucky Darks, though small quantities came from Maryland and Ohio.

At the present time the greater portions of the tobacco used for making cigars comes from the Dutch East Indies, Brazil and Cuba; for making cigarettes, from Southeastern Europe; for smoking, from Hungary, America and Dutch East Indies. The Monopoly operates 10 factories, employing about 6,000 persons.

During 1922 there was a marked decline in tobacco consumption, but at the present time there is an increasing tendency in consumption, especially in pipe and cigarette tobacco. Austria prefers Turkish tobacco for cigarettes, not wholly on account of a cultivated taste, but because it can be bought cheaper than American tobacco. Also the price of Java tobacco in the Netherlands, which can be used for the same purpose, is lower than American tobacco. It may be stated in this connection that present prices of American tobacco in Austria are four times greater than pre-war prices, that is, an increase from about 11 cents per pound to about 45 cents per pound.

Poland Wants Virginia Leaf

WASHINGTON, D. C., Oct. 10.—The Department of Commerce is in receipt of a cable from Consul General Leo J. Kenna at Warsaw, Poland, in which he states that the Tobacco monopoly is interested in the purchase of about 100,000 kilos of bright Virginia leaf for use in the government factories of Poland. In submitting offers to the Polish Monopoly for this quantity of tobacco, the quantity and grade offered, price per kilogram in dollars, c. i. f. Danzig, time required to execute the order and terms of payment should be stated. The offer should be submitted to the Monopoly by October 26, and must be in duplicate each with two envelopes with the interior envelope to be marked "Raw Tobacco Offer." A sample, weighing at least one-half of one pound, representing each grade of tobacco offered, should be sent.—LAMM.

The Annual Roll Call

The tobacco trade of New York City is co-operating actively with the Red Cross in its annual roll call, which opens Armistice Day, November 11, and continues until Thanksgiving, for the enlistment of new memberships to maintain the organization's manifold peace-time program of relief and public health work.

Fred Hirschhorn, president of the General Cigar Co., 119 West 40th street, heads as chairman a special *tobacco* group, formed in accordance with the campaign plan of organizing the entire city into various industrial, mercantile and professional groups to facilitate the roll call effort. Charles Dushkind, secretary and managing director of the Tobacco Merchants' Association, 5 Beekman street, is co-operating with Mr. Hirschhorn to secure the maximum response to the roll call throughout the tobacco trade, and plans are already under way to reach every person in the trade directly with the Red Cross appeal through the Tobacco Merchants' Association.

Help for the ex-service man and his family, including legal assistance, loans of money, advice on domestic matters and medical care constitutes a major part of the work in New York for whose maintenance the annual roll call is conducted. The Red Cross activities in the city also include disaster relief and a public health program among whose features are the supplying of surgical dressings to 22 local hospitals, nursing service, first aid, and work in home hygiene and care of the sick.

To Support Jewish Education

Leading members of the cigar industry who were addressed by Israel Unterberg, president of the Jewish Education Association, and Rev. Dr. David de Sola Pool, Tuesday at the Metropolis Club, organized themselves into a committee to aid the association's effort to provide 10,000 additional free scholarships in religious schools for children who are not receiving any Jewish education. Max Schwarz is chairman of the cigar trade committee; Julius Klorfein, vice-chairman; and the other members are Ernest Ellinger, Marks Packer, B. Kopperl, M. Bloom, M. Cane, S. H. Furgatch, Ernie D. Klein, Harry Epstein and William Kasanof.

Howard Cullman Resting

Howard Cullman, of Cullman Bros., Inc., packers of domestic leaf tobacco, and importers of Sumatra, of 161 Front street, New York, is enjoying a hard-earned vacation at Wernersville, Pa.

Magazines—A Profitable Side-Line

How One Merchant Made His Magazines Sell

By MAX MARX

Whether they like it or not, cigar-store men find themselves carrying one or more side-lines in addition to their regular tobacco business. It may be souvenirs, candies, a supply of current magazines, knickknacks, or any of the innumerable combinations. Many times these are carried at a loss, while the merchant does not realize it. On the other hand, they are dragged along in a weak condition, not bringing the returns they should. If a merchant is to carry a side-line, he should make it a profitable venture without injuring his regular business or he should drop it. In fact the side-line should be a wide inviting doorstep to the store.

Some cigar-store merchants sell popular magazines, a side-line, which, if watched carefully, will bring good returns. One merchant carried them along for a long time with but small returns. Finally he became disgusted with them but decided to give them a three months' trial before dropping them. He made a study of the different magazines and their contents. In each publication he found at least one continued story.

"If I could get the people to start the continued stories, I'd have them buying that one magazine until it's finished," the merchant thought. "The crucial point of the business is to get them to buy the first part of the continued story."

Just then his thoughts were interrupted by the entrance of one of the high school boys with a window card, advertising a baseball game. The boy took an old card out of the window and replaced it by one of the new ones. The old one was dropped to the floor and left there.

"That's just the thing," the merchant declared. "I'll use those old cards to advertise the magazines."

By the use of some paint and a brush he painted an advertisement of the new continued story, that was running through a popular weekly at that time. Taking the copy that he usually took home for his wife, he cut out the sheet, that contained the beginning of the story. This page was pasted at the two upper corners in the center of the card. Running across the top of the card, he painted the title of the story. Below this and running clear across the card he painted "Get In On This Story Now." Along the card to the left of the page from the magazine, he had these words, "Get Your Copy Now. Only a Limited Number This Week. Sold here 5c." Then to the right of the sheet were these words, "Look Here. Don't You Want a Copy? Here You Are For 5c."

It did not take long for him to make the advertisement, which was placed in a prominent place in one of the show-windows. Every person, who passed the store and looked in, would see the notice concerning the continued story. All of the magazines were placed in a rack near the front door, where no person could enter without seeing them. The specially advertised journal was placed the farthest from the door, so that a purchaser of it would pass by all of the others before coming to it. It was in plain view, though, so as to be a follow-up reminder of the card in the window.

Nothing more was thought concerning the experience until the clerk asked for the third time whether there were any more copies of the "The Big Seller," to which the merchant replied, "No, and take that card out of the window."

In place of the "Big Seller" card there was prepared a card for another of the magazines. This was carried out faithfully. At the end of the three months, the magazines had brought such good returns that the merchant decided to continue their sale.

Instead of being a drag on his business, as they had been, they are now a flourishing side-line, and he has developed a regular list of customers, who buy magazines from him.

He studies the magazines and anything that might prove to be a good advertising point, is used on the cards to press the sale of the publications. He does not limit it to the continued stories. An article or a short story, that is written by a noted writer or is written upon an interesting topic, is often used to good advantage.

When a popular monthly magazine started the new novel by a noted writer for which they paid thirty thousand dollars, he made good use of the price of the novel in advertising the magazine.

He has found that by carrying out his advertising scheme for the magazines his trade in them has increased, so that he has had to enlarge his order for some of them. His plan for testing it out, is to let the magazine pass for two consecutive times without advertising it in the window. If at both of these times the supply is sold out and there is a demand for more copies, then he adds to his order and makes a special "run" on it for a time, so as not to be left with a large number of extra copies on his hands.

Porto Rico Needs Rain

According to advices received from Porto Rico, the seed beds have been adversely affected, due to the dry weather, and a large percentage of the first sowings has been lost.

The growers are still sowing seed beds, however, but unless rain comes soon, planting will probably be delayed until the middle of November.

Bolano Cigars in Demand

C. G. Wilson, president of C. G. Wilson, Inc., importers of Manila cigars, of 24 Stone street, New York, has returned from a long Western trip, during which he made arrangements with many of the leading distributors to feature the high-grade Bolano brand. C. G. Wilson, Inc., are exclusive agents for the up-to-date La Prueba and La Conchita Factories, Manila, P. I.

Strike Not Serious

WASHINGTON, D. C., Oct. 10.—The Department of Labor has been advised that cigarette factory machinists have recently engaged in a strike in Algiers and Oran. No serious results were reported.—LAMM.

Keystone State Business Good

D. Dreux, of D. Dreux, Inc., Sumatra and Java importers, of 136 Water street, New York, has returned from a successful tour of Pennsylvania, during which he visited the principal cigar manufacturers in that territory.

Buys Fancy Wrappers

John Fouge, Jr., of John Fouge & Son, cigar manufacturers, of Richmond, Va., surveyed the local leaf market this week and made heavy purchases of choice Sumatra and Java wrappers.

Sumatra Orders Coming In

H. J. Curtis, of Arthur Bornholdt & Co., importers of Sumatra and Java leaf, of 139 Front street, New York, is booking many orders in Pennsylvania for the fancy wrappers handled by his organization.

An Open Letter to the Cigar Trade

MR. JOBBER AND MR. RETAILER,
EVERYWHERE.

Gentlemen:

Won't you let us try and convince you of the advisability of devoting a little of your time to studying the Manila Cigar business?

Whilst many of you are well acquainted with the general conditions dealing with the growing and marketing of Manila Tobacco—the most important of which are:

The latitude and longitude of the Philippine Islands and particularly of the Cagayan and Isabela Provinces, where the best Philippine Tobacco is grown;

The construction of the large factories in the City of Manila, many of which are veritable palaces;

The keen Government supervision of the industry;

The manner in which cigars are shipped from the Philippines;

The special holds provided with the latest ventilating apparatus on the palatial steamers plying the Pacific Ocean, and last but most important,

The Guarantee Stamp of Quality of the Government of the Philippines—

Still there are many dealers in this country who insist upon maintaining an indifferent attitude towards this rapidly increasing profitable business.

Won't you write us for samples and our booklet giving you lots of valuable information on the Manila Cigar Industry?

It is *yours* for the asking, and don't you know that "one man tells another," and that there is a rapidly growing duplicating business being done in Manila Cigars?

We are here to serve you and solicit your consideration of the famous products of the GERMINAL CIGAR & CIGARETTE COMPANY, MANILA, PHILIPPINE ISLANDS, FOR WHICH WE ARE AGENTS.

Yours very truly,

Frank E. Childs & Bro., Inc.

per *Ernest J. Moss*

Manager Cigar Department.

Trade-Marks Filed

In U. S. Patent Office

The following trade-marks were published in compliance with Section 6 of the Act of February 20, 1905, as amended March 2, 1907. Notice of opposition must be filed with the U. S. Patent Office, Washington, D. C., within thirty days from date of official publication.

* * *

Ser. No. 140,450. JONKOPING OCH VULCANS TANDSTICKSFABRIKSAKTIEBOLAG, Jonkoping, Sweden. Filed Nov. 30, 1920.

140,450

No claim is made to the words "Safety Match, Made in Sweden" apart from the trade-mark shown on the drawing.

The particular description of goods.—Matches. *Claims use* since about Mar. 1902.

Avoid Disappointment— Molds Are Made To Order

In past years the months of October and November have seen an unusual volume of Rush Mold Orders—all of which have been badly needed by the trade, to take care of the Holiday increase.

We do not carry molds in stock and the heavier the last minute orders, the more time required to manufacture the molds and ship them.

The capacity of our Mold Factory has been increased and we are upon our toes to give you real service if you act immediately.

But—

Don't, please, wait until the very last minute—wire or mail in your orders NOW, and avoid being disappointed because your molds aren't ready when you need them most.

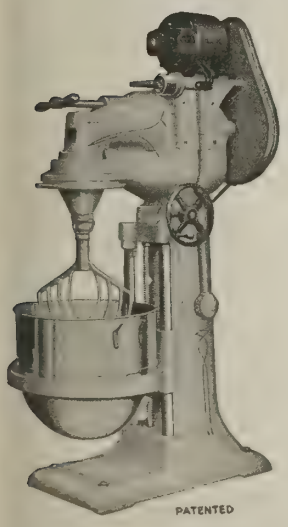
1,469,685

A pipe of the class described comprising a bowl consisting of two separable sections, an internal coupling sleeve coacting with said sections for holding the same in assembled relation, a collar of infusible material snugly fitting within the sleeve and spaced from the bottom of the bowl, and a stem carried by one of the sections of the bowl and having a draft opening in communication with the bowl below the applied collar.

Approve Wisconsin Pool



GREENVILLE, Ohio, Oct. 6.—Charles Teegarden of Woodington, who returned home recently from the Wisconsin State Fair, says that while at the fair he talked with quite a number of members of the Wisconsin Tobacco Pool. He states that all that he talked to were well satisfied with the workings of the pool in Wisconsin and said that they could not afford to be without it.

For Thorough Mixing

The

READ THREE SPEED MIXER

IS INCOMPARABLE

Many cigar factories throughout this country are using Read Mixers daily for mixing Gum Trag (cigar makers' paste). This machine gives the paste a thorough mixing, taking from it all lumps and thereby eliminating that costly and tiresome operation of straining.

Used in various plants of Otto Eisenlohr & Bro. Co. and various other large plants.

St. Louis Trade Topics

Dealers Do Excellent Business

ST. LOUIS, Mo., Oct. 6.—The retail business has this week been big, owing to the many strangers who are in the city to attend the Veiled Prophet festivities and the International Air Meet. Not only have the down-town stores been splendidly patronized, but those in the outlying districts have sold more than their average number of cigars. This retail business has been reflected in the jobbing trade, and the jobbers have been taxed to keep their retail trade supplied with the popular brands. Not only have the moderate priced cigars been big sellers, but the more expensive brands have had a good sale.

Henslee Out of Cigar Trade

C. E. Henslee, formerly connected with Philip Morris & Co., in looking after the trade in this territory, has given up the cigar business and has gone over to the candy business.

Harry Silverstein, who has been on the sales staff of the Wm. A. Stickney Cigar Co., has been placed in charge of the cigar stand conducted by the company at the American Hotel. His former place has been taken by A. G. Clark.

Norman A. Jones, the St. Louis promoter for the Harvester Cigar, now has for his assistant, Robert A. Cook.

Charles A. Specht Passes Away

Charles A. Specht, a cigar manufacturer, 50 years old, and president and owner of the Chas. Specht Noonday Cigar Co., at 1020 Chouteau avenue, died recently of a complication of diseases. He was born in Germany, but came to this country when 16 years old. He located in Quincy, Ill., but after a year's stay in that place came to St. Louis and became a cigar worker. He started business 20 years ago at the place where he died. He was prominent in cigar circles and was at times connected with the local cigar organizations.

Recent Visitors

Many visitors were in the city recently. Among the best known were Ed Wodeska, of Gonzales & Mendez, Inc.; Packy MacFarland, of the Manchester Cigar Co.; Irving J. Hahn, of R. Steinecke Co.; Charles Schavarien, T. C. Gales, of Henry Clay and Bock & Co., Ltd.; W. H. Crumpler, of Adolph Frankau & Co., Inc., and Willis Andrus, of the Congress Cigar Co.

Prominent window displays were made by C. P. Stanley Cigar Co., of Safra; Rauh-Millius, of La Duse; Stickney-Hoelscher, of Garcia Grande; Webster, by Moss & Lowenhaupt; Cuesta-Rey, by Wm. A. Stickney Cigar Co.

Closes Newburgh Branch

NEWBURGH, N. Y., Oct. 6.—The Newburgh branch of the Metropolitan Tobacco Co., which has had its headquarters in the Cook building, Chambers and First streets, for two or three years, has vacated the establishment, everything carried in stock being removed by auto truck to the Yonkers branch, with which the Newburgh branch has been consolidated. The change has taken from the city several of the clerical force, among them Maurice de Ronde, the billing clerk, who has been with the establishment since it opened here, and James Coyle and Sebring Lent, of the clerical force. It is not yet known what will be done with the building itself, but it is the intention of the corporation to continue its delivery in this immediate vicinity with the same force as in the past.

"Old '76" Display

The United Cigar Stores are displaying "Old '76" cigarettes in their stores throughout the country. In New York alone, 125 stores displayed these high-grade cigarettes last week. "Old '76" cigarettes are manufactured by Berberian Bros., of Providence, R. I., and are deservedly meeting with a considerable sale.

Schulte Cigar Stores Make Record Sales

Gross sales of Schulte Retail Stores Corp., for six months ended June 30, 1923, totaling $13,422,046 against $10,759,-938 for first half of 1922, indicate continuation throughout 1923 of the steady gain marked growth of past years. Profits for first half year ended June 30, last, were $969,288 after charges but before taxes against $1,292,422 for 1922 period. Earnings of second half year are expected to show 15 per cent improvement.

Schulte Retail Stores Co. is a holding company and its sole function at present ownership of stock of various Schulte subsidiaries, representing an equity in a chain of about 250 retail tobacco stores, holdings of real estate, and real estate leases. Corporation owns 85 per cent of capital stock of B. G. Davis & Co., Inc., all its subsidiary, Nadler Cigar Co., cigar manufacturers; and markets about 5 per cent of the 20,000,000 cigars produced annually by these companies. With the exception of this manufactured product the subsidiary companies manufacture none of the articles they sell.

Growth of Business

Present corporation is the successor to a business established in 1883 with the opening in New York of a single retail tobacco store. Growth of business during the past seven years is shown in the following table:

Year ended	Stores operated	Gross business	Inc. before res. & tax.	Net after res. & tax.
December 31, 1922	239	$23,765,364	$2,844,096	†$1,951,000
December 21, 1921	222	20,699,159	1,134,117	646,535
December 31, 1920	196	16,299,163	734,876	456,899
January 31, 1920	157	9,679,553	496,446	275,854
January 31, 1919	113	5,449,477	317,421	179,620
January 31, 1918	93	4,195,534	343,300	140,726
January 31, 1917	66	2,737,551	70,882	31,106

*11 months. †Partly estimated.

In the seven years number of stores in operation increased 362 per cent, and net income after reserves and taxes about 1,700 per cent.

Capitalization

Capitalization consists of $3,200,000 8 per cent preferred stock outstanding par $100, and 300,000 common shares without par value. Voting power is vested solely in the common. All dividends on preferred stock have been paid regularly since incorporation. No cash dividends have been paid on common.

Stock dividends have been paid on the common as follows: 50 per cent in common stock, August, 1920; 20 per cent in July, 1921; 15 per cent in December, 1921; $5 a share in preferred stock in December, 1922; $2 in June, 1923, and $2 a share in September, 1923. With the distribution of $2 a share in preferred stock declared payable December 1, 1923, and March 1, 1924, there will be $4,400,-000 preferred outstanding.—*Wall Street Journal.*

Is a Tobacco War Coming?

The people of this rich tobacco producing area will not be able much longer to face blindly the movement which has evidently been instituted looking to the elimination of the narcotic, if not a curtailment of the smoking privilege. The beginning of the assault has been perceived by a number of writers who compare the initiation of the movement to that which resulted in the sweeping away of ardent spirits by the enactment of a constitutional amendment. It is beginning in the so-called educative, or propaganda drive with a small army of statisticians already busy holding up amazing figures showing the evils of tobacco, its growing menace to the present race and, as is usual long string of comparative statements showing, for instance, that the State of Tennessee spends one-fifth annually as much for education as it does for tobacco and that the half-burned match flung by the careless smoker causes a weekly fire loss in this country of $75,000—we pick these statements at random. Scientists are being already enlisted in the fight together with doctors —some of whom, it is noted, are far from agreement as to the damage done to the human frame or to the intellect by smoking.

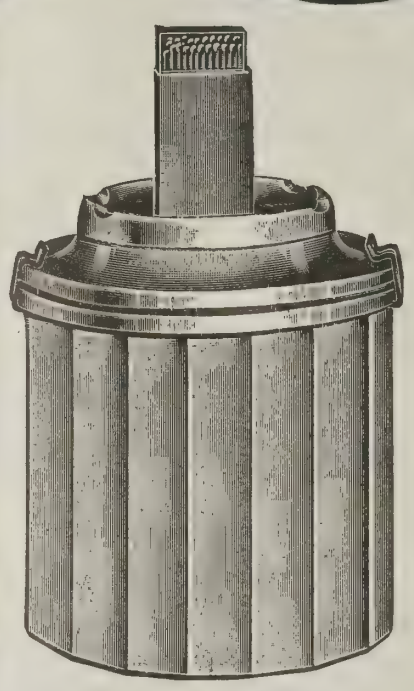
The Gathering Storm

The gathering storm destined to break over tobacco has reached such proportions that the Women's Christian Temperance Union, which is vitally interested in any measure of social reform, has found it timely to deny that it is interested at this time in entering the list against Lady Nicotine. These are straws in the wind which emphasize that the forces of moral reform are giving earnest consideration to this broad subject. Legislative records in various states further indicate that pressure in form if not actually prohibitive are making further infringements. Such laws are written in idealistic mood—that the bulk of people in the country do not know what is good for them and that the time has come for the powerfully organized minority to assume a new form of paternalism by telling them what is while the distant chorus of the "Thou Shalt Nots" is heard.

Demands Attention

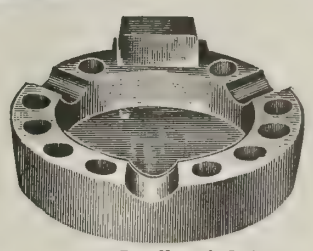
It is timely to give attention to the movement, for it is sufficiently defined to warrant ruminations on what the outcome will be. People scoffed at the idea of prohibition when tireless workers began their campaign much in the same way that the tobacco campaign is being started. But prohibition came through dogged persistence and adroit statesmanship and unless we are wrong the barometer of social reform is headed in the same direction. Such a movement has more than casual significance in the tobacco growing areas. A movement which has as its ultimate objective the elimination of tobacco and consequently the wiping out of a long standing agricultural pursuit presents a vision which this entire section would do well to visualize and to think over.—*Danville (Va.) Bee.*

Cutting Down Expenses



Our Dark Growers' Association which is in the process of reorganization and formulating plans for marketing the present crop of tobacco is considering the matter of cutting down the expenses of operation. The idea is to reduce salaries where they are thought to be too high and to do away with any useless salaried positions. The association has had only one year's experience and naturally the work incident to getting it started must necessarily have been crude in some respects and mistakes must necessarily have been made. The officials can very easily profit by these mistakes and correct them in this year's organization, which is to be done. This shows the proper spirit on the part of the officials and the harder they strive to market the farmers' tobacco crop at the least possible cost the better they will please the members of the association and the surer the foundation they will lay for the association. In fact, its future life and success depend upon it. —*Bowling Green* (Ky.) *News.*

Smokes One Brand of Tobacco for 41 Years



WINSTED, Conn., Oct. 6.—Just what brand of smoking tobacco he uses is what friends of Dennis Ahearn, passenger conductor on the Central New England Railroad, are trying to learn. Conductor Ahearn says he has smoked one brand for 41 years straight and thereby holds a world record. He has used various pipes.

San Francisco Much Interested in Manila Goods

Watching Progress of Philippine Products—Golden Gate Being Main Port of Entry for Insular Cigars, Close Tabs Are Kept on Movements—Trade News and Notes.

San Francisco, Cal., Oct. 2.—The development of the Manila cigar trade in the United States has been going steadily forward since the war; and as the natural port of entry for the west, San Francisco, has become much interested in the development of the trade. Though the use of the Manila cigar seems to have developed faster, and certainly in far greater volume in the east, this is naturally the convenient distribution point. As it happens that the La Insular Cigar & Cigarette Factory, Inc., has located its general office for the United States at the Monadnock Building, San Francisco. The office here is in charge of D. Acuña, who has been for a number of years connected with the factory at Manila. Assisting Mr. Acuña is his father-in-law, C. H. Van Hoven. The La Insular retail trade has been taken on by the United Cigar Stores exclusively in the east, but in the west, Marx Bros. conduct their work of distribution. They also continue to import some two million cigars per month. They are also intending to promote their cigarette sales, as the La Insular factory is the greatest producer of cigarettes in the Philippine Islands.

On the Crescendo Scale

Another Manila brand that is rapidly recovering its old-time popularity is the Alhambra, for which H. L. Judell & Co. are distributors. They present 32 sizes, ranging from bundles of ten for 25 cents to 50 cents each. This would seem enough; but they are expecting the best of all yet for the fine new size of Alhambra Royals, with its new attractive bands, which is just coming out. The last shipment of half a million received on the S. S. *President Pierce* was almost immediately reshipped, and on the next steamer they will have a fine line of holiday numbers. They have added to their distributors the New South Cigar Co., of New Orleans.

The taking of evidence in the cases against the various tobacco companies and associations on the charge of illegal combines is proceeding rather monotonously.

Epco on the Pacific Coast

Michalitschke Bros. & Co. have taken on the distribution for the Pacific Slope, of the Epco, the five-cent Sumatra wrapped line manufactured by the East Prospect Cigar Co., at East Prospect, Pa. This, with the John Noble, recently taken on, a two-for-fifteen cigar, rounds out their lines of Humboldt and Henry Clay very nicely. It also demonstrates that Harry Rinaldo, the factory representative for the Epco, can come back to his home town and do business any time.

George J. Yocum, of Yocum Bros., Reading, Pa., has been doing business in this city in the interest of his Y. B. cigar.

D. V. Snyder, sales manager for Prince de Gales, is on the slate for arrival.

H. H. Manly has been making Eureka and the surrounding territory smoke Chancellors, and has departed for Los Angeles to assist Milton Glass in doing the same thing down there.

Harold Horn has returned from a very successful trip as far north as British Columbia, and things are looking cheerful around the Golden State Leaf House. Mr. Horn found business in most sections apparently brightening up.

C. H. Edmunds, the Corina representative, has returned from the northwest, where he has been working for four months. He found business there quite promising.

Jake Marcuse has been making a trip for Frankel, Gerdts & Co., through the Sacramento Valley and Nevada, and has put over a big placement for the new foil-wrapped Chancellor Invincible, the big two-for-twenty-five value. As a result the distributors, H. L. Judell & Co., have wired to the factory to increase shipments.

Lew Beatley has dropped into the home office after an active canvass of his territory. He is another of the Judell force that is making good.

Not Afraid of Price-Cutting

Anthony Polzer, in charge of the cigar department of Tilman Bendel Co., reports a very satisfactory placement of their five-cent brand, the Tampa-made Jenny Lind. Mr. Polzer criticizes the suggestions that have been made, that price-cutting might be attempted by wholesale grocery houses handling cigar departments, as this might be considered more in the light of a side-line. Owing to the diversity of their goods and their trade, he thinks the overhead in the wholesale grocery business, combined with the fact that they have to carry so many staples at scarcely any profit, if not really at a loss, makes price-cutting in tobacco lines less desirable and more difficult than among the regular exclusive tobacco jobbers.

Has Bright Political Prospects

The political campaign of Adolph Judell for the Board of Supervisors looks like a winner. He has received the indorsement of the United Voters of San Francisco, a non-political organization, and also of the Veterans' League, and his cards are very much in evidence throughout the business section.

Control Measures for Tobacco Flea-Beetle

Washington, D. C., Oct. 6.—Shade-grown cigar-wrapper tobacco is sold for a higher price than any other tobacco in this country. Losses from injury by the tobacco flea-beetle, therefore, are proportionately great, and growers in the southern cigar-wrapper district, in northern Florida and southern Georgia, regard this insect with considerable apprehension.

Under normal weather conditions, with careful use of control measures, the damage caused by the tobacco flea-beetle is usually small. If the right conditions arise, however, with neglect of control measures, the damage may reach alarming proportions. Owing to its small size and activity, the large number of individuals, and its resistance to poison, the tobacco flea-beetle is a difficult pest to control.

Facts as to the insect's habits, together with a number of control measures, have been embodied in a new Farmers' Bulletin, No. 1352, The Tobacco Flea-beetle in the Southern Cigar-wrapper district, by F. S. Chamberlin and J. N. Tenhet, entomologists. All methods of control, both direct and indirect, suggested in this bulletin, should receive serious consideration.

Plant beds should be located at some distance from tobacco fields, and protected from the attacks of beetles by frequent light applications of powdered arsenate of lead. The coarse cheesecloth used over the plant beds of this region also gives a certain amount of protection from flea-beetle attack. Frequent and thorough cultivation of the tobacco crop unquestionably destroys a considerable number of the younger stages of the flea-beetle. Weeds in and around tobacco fields may harbor these insects and should be destroyed. Tobacco stalks should be cut down and plowed under as soon as the crop is harvested. Burning over hibernation places during cold weather destroys many beetles. The interiors of shades should be thoroughly cleaned of all trash which might harbor overwintering beetles. In the spring, attacks of overwintering beetles should be controlled by frequent light applications of Paris green in the dust form.

The bulletin may be obtained from the United States Department of Agriculture while the supply lasts.

NEW YORK, THURSDAY, OCTOBER 11, 1923

IS THE CIGARETTE GUILTY, AS CHARGED?

Fire Prevention Days and Weeks and campaigns must necessarily be repetitions of old truths supported by new instances. The latest is the $10,000,000 conflagration which swept Berkeley, California, the other day destroying 600 homes, rendering 4,000 persons homeless and causing loss of life. The blame for this stupendous destruction is laid to the careless handling of a cigarette.

Ten million dollars is a considerable amount to pay for a warning, yet the country's expense each year for similar warnings is fifty times that amount. The property loss entailed in the Japanese earthquake and ensuing fires corresponds to what America pays each decade for destruction by fire alone.

Doubtless, we shall always have fires, since at times they originate in causes which appear to be beyond the control and precautions of man. But President Coolidge, in proclaiming October 9 Fire Prevention Day, is correct in his assumption that by far the greater part of fire loss is due to human factors, such as carelessness and moral hazards.

This country holds every record for avoidable conflagrations. As long as hundreds of millions of dollars' worth of property are consumed each year in fires growing out of everyday carelessness, the forces laboring for reduction of that loss are pursuing a work which is not only justifiable but highly necessary. The utter seriousness of this labor and the drastic necessity for paying heed to the incredible destruction it seeks to curtail can hardly be lost on the informed and thoughtful citizen.—*Kansas City (Mo.) Post.*

"WE HAVE SOMETHING LEFT"

An area of destruction, a scene of disaster, shrouded in smoke, a region where horror reigned, crackling noises, blackened ruins, hot ashes, glowing embers, flying sparks, advancing flames that refused to be extinguished, fire hardly halted by dynamite, hundreds of houses incinerated, thousands of people leaving their property and fleeing to save their lives, frantic men, terrified women, screaming children, homes and gardens destroyed, buildings tumbling, streets obliterated, acres ablaze, chaos, a beautiful residence district transformed into a sample of hell for the time being, that was Berkeley, Cal., on September 18, 1923. If the wind had not shifted when it did, the demolition of the entire city seemed inevitable.

At the corner of Ridge Road and Euclid Avenue stood the house of Benjamin Ide Wheeler, president emeritus of the University of California. Swiftly the surging sea of fire swept toward the vine-covered residence of the venerable educator.

In his house, Dr. Wheeler had a large and valuable library. Accumulated assiduously during three quarters of a lifetime this collection of rare books and manuscripts represented more than the expenditure of money. Many of the volumes were presentation copies, each having on a flyleaf the autograph of the author. And there were other books, more precious than costly, old and honored friends frequently consulted. Of a number of the ancient books, it is practically impossible to obtain duplicates. His noted library was very dear to Dr. Wheeler. Naturally, an eminent scholar would be greatly attached to his books.

As the fire threatened and doomed his home, desire to save his beloved books caused Dr. Wheeler to request assistance. In appealing for help, however, he was not forgetful.

"There's a new box of cigars on the library table," he said, "bring out the cigars and get what books you can."

Not waiting to be urged, university students and other volunteers dashed into the house. Very quickly they came out again, heavily laden. The first to emerge was a tall youth whose scorched garments, blackened face and blistered hands bore evidence of a close encounter with flames. He carried an armful of books topped with a box of cigars.

Others brought out rugs, paintings, statuary and more books. As the last rescuer staggered through the door with a load of books, a gust of wind caused the interior of the house to become filled with flames. The disintegrating building was hotter than a furnace. No man could go in there and live for two seconds.

Burnt, panting and nearly exhausted, the students deposited the saved books beyond the reach of the fire. Dr. Wheeler thanked them. Properly, he was appreciative of heroic service rendered. He smiled, although a great part of his treasured library was destroyed. "We have something left," he announced gratefully, as he picked up the box of cigars.

"Where there is much fire, there must be some smoke," he joked, as he passed around the cigars.

Smoking, the singed and tired fire fighters continued to work and they were less mindful of weariness and pain.

To the occurrence at Berkeley, disciples of Dr. Pease are unlikely to refer. The action and example of Dr. Benjamin Ide Wheeler will not help the propaganda of anti-tobacco agitators.

It is not surprising, but rather according to expectation, that cigars should be found on the library table of one of the world's great educators.

Scholarship and tobacco long have been associated. For centuries, most of the eminent thinkers have been smokers. While smoking, a man may read and ponder more satisfactorily. A fine cigar and a good book can be enjoyed simultaneously.

A pipe or a cigar will stave off fatigue. Tobacco promotes tranquility of mind. Smoking facilitates clear thinking, makes mental processes less laborious, assists concentration, relieves strain, gives aid in brain work, assuages pain, increases fortitude, adds zest to peaceful enjoyment and subtracts some of the irritation and tedium from toil.

Cigars on a library table are appropriately placed. The best of modern literature is somewhat indebted to tobacco. Nearly all of the great books produced during the past two hundred years came from the pens of men who smoked while they wrote.

In the seclusion of his private library, whether intently reading, diligently engaged in research or strenuously endeavoring to develop a new idea, the student is induc smoke much if he ever smokes at all.

Among the scholars of America who exerted a strong and far reaching influenc Benjamin Ide Wheeler is prominent. A educator he is greater than most of his co poraries. To him, more than to any other l man, is due credit because of the presen mensity and usefulness of the Universit California.

Though the prestige of an institution of l ing isn't always in proportion to the numb students attending, the University of Calif the largest of American universities, has portance according to its size. Advantage located at Berkeley, magnificently equi noted for the excellence and thoroughness c courses, having in its faculty some of the teachers in the world, represented splendidl its graduates, the University of Calif proudly may claim to be second to none. scholarship and athletics it is unsurpassed.

What then, in the way of deprecation or sure can the anti-tobacco agitator say of th tion of the president emeritus? When Benj Ide Wheeler passes cigars around to stu who saved some of his books, is there occ for outcry?

Perennially employed in denouncing tob apparently, a few pee wee orators think so. the man on the street, their feeble, futile scol seems to be merely a waste of breath.

NEW LIFE FOR NICOTINE INDUST

Not all of the tobacco grown in the fiel destined to the delectation of the friends of weed; and if in some far off time a —th Am ment to the Constitution of the United State America sends Lady Nicotine to keep comp with John Barleycorn, a somewhat red number of planters can still grow tobacco w out coming under the imputation of b tobacco bootleggers.

It is conceded by representative grower market produce that the issuance of Farm Bulletin No. 1282 last year marked an epoc the truck farmer's continual battle against in pests. In that Bulletin the Government exp showed how all manner of predacious bugs strive to cheat the American dinner table o luscious melons, cantaloupes, cucumbers, fr and garden "sass" in general, could be defe by a proper application of nicotine. It has deed been known for a long time that tob extracts such as "Black Leaf 40," are g insecticides, but until the Government's bug perts took hold of the matter in dead earn the methods of fighting the bugs with nico and above all, the proper appliances there were not developed to the point of greatly citing the interest of the average man in truck patch or orchard. Farmers' Bulletin 1 has changed this; the agricultural experim stations of different States have also begun experiment with the new methods and appara and to find their use attended with valua results. The farm papers and market grow journals print enthusiastic reports from th readers and correspondents which establish new tobacco dust and nicotine insecticides commercial success destined to enjoy a grow demand.

The insecticidal constituent of tobacco nicotine, which is extracted from the stems a waste by means of hot water. It comes on market as a liquid solution containing 40 p cent of Nicotine Sulphate, which when dilu with water so as to contain one part of nicot in 500 or 1,000 parts of soapy water is st death to moths, midges and similar pests wh infest fruit trees. The greatest of the rec successes in the way of killing bugs with ni tine, however, has been with nicotine dus obtained by making nicotine sulphate in the o form and mixing it with dry kaolin. Su mixtures, applied by means of newly invent dusting appliances, whereby large fields can

nomically treated, are being used in large mages in cucumber and melon fields and chards all over the country.

The demand for nicotine as an insecticide bids r to rise much beyond the point where it can met from the normal supply of waste tobacco, d the raising of tobacco solely for its nicotine tent will therefore gain in importance. For s purpose, use will be made of varieties of bacco, such as Nicotiana Robusta, which are tinguished for a high nicotine content—6 to 8 r cent of the entire plant. The cultivation of s variety is being especially pushed in coun- es such as South Africa, which are remote m the ordinary sources of manufactured ecticides.

Professor Otto Olson has been conducting ne very successful experiments with this par- ular type of tobacco at the Government Ex- riment Station at Ephrata, Pa.

THE KINDLY CIGARETTE

The cigarette, object of more vituperation by lerly ladies than anything else in the world, s begun to assert its rights.

A hunter, shot by mistake, was saved from ath the other day when the bullet lodged in s packet of cigarette papers.

We hope this incident gets into the statistics. the past nearly all the credit for such preser- tion has gone to grandfather's hunting-case atch. But anybody can see that cigarette pers worn for protection are quite as safe and initely less expensive. And the reputation of e cigarette needs all the boosting it can get.

It seems to us that the field of literature, out- le of advertising, awaits proper development. pling did enough for the cigar in one notable e, "A woman is only a woman, but a good gar is a smoke."

But the cigarette has never been properly cele- lated. Allusions to it have been airy, or else mmercial. Its true characteristics of conveni- ce, simplicity, unobtrusiveness, and inspiration surely the prime qualities of a friend—have mained unsung. Now when protectiveness is ded, surely the poets must come to the front. they don't smoke them, at least they must ear them.—*Chicago Herald-Examiner.*

THE TOBACCO GROWER

Beset always on many sides with dangers growing tobacco crops, Lancaster county rmers are surmounting another difficulty—ar of frost. With characteristic industry, the lers of the soil are working overtime to rvest this year's crop before a killing frost rives to nip the matured plants. Wander here you will within the confines of this emier agricultural county and you will see sy farmers working, not the prescribed ght hours, but long after dusk, so that their ops may not be damaged.

Ask any tobacco grower about the cares at surround the growing of a successful op. From the seed-bed until the harvest, it work, work, work. But even this has its mpensation and just reward. It is predicted at high prices will again prevail. Some les have been reported even before the ed is harvested. The grower deserves every nt he is paid for his product. It is by his fort that this county, with its yearly output between 20,000 and 30,000 acres, is kept in e forefront of agricultural achievements. rift and industry! What better attributes uld any county or community desire?—*ancaster (Pa.) New Era.*

UNBREAKABLE CIGARS

Boon of boons, the unbreakable cigar, has ar- ved. Two Lehigh professors of chemistry ave utilized the tobacco stems, formerly dis- rded as useless. Using chemistry and physics, d more resourcefulness than we usually asso- ate with laboratory experts dabbling in mun- dane things, they have so manipulated the stems that they make a perfect subcutaneous container of the filler, and that, as everybody knows, is the soul of the cigar. Heretofore, it has not been safe or provident to carry unprotected cigars in the pocket. The wrapper, breaking, destroyed the draught and produced the general effect familiar to everybody who has seen General Grant puffing away furiously all through that remarkable play of John Drinkwater's.

Our brilliant writers of tobacco and cigarette advertisements are too wise to hitch their products to mortal man. They choose names which will endure as living things for all time. Instead of taking their cue from men who have become eminent, these resourceful chaps go abroad, that they may get names with a far-off glamor. Or they dip into the things of ordinary life for a popular catchword. They even make artificial words which stick in the memory. The writers of pipe tobacco advertisements do just about as well. Between them, the cigarette and tobacco expounders have almost submerged the cigar fellows.

It is true, of course, that the cigarette is to the cigar what the short story is to the long novel, the vaudeville stunt to the four-act play, and the movie to the drama, and that it suits our present mode of life better than the formidable cigar. Is it possible that the Lehigh professors will restore the cigar to some of its pristine prestige?—*Boston Herald.*

WHITE BURLEY TO THE RESCUE!

From a leaflet recently issued by the Ceylon Department of Agriculture, we get an interesting story of the troubles of a tobacco-growing district and how they were surmounted.

The tobacco industry of Ceylon centers in the district of Jaffna and the product is suitable chieffy for making plug tobacco. That part of the crop not chewed by the Ceylonese has heretofore been exported almost exclusively to the Indian State of Travancore, which also imports tobacco of the same grade from Coimbatore. For some reason, the fiscal department of Travancore prefers Coimbatore to Jaffna and has at various times in past years imposed upon Jaffna tobacco a differential tariff twice as large as that put upon Coimbatore tobacco, with the result that the Jaffna industry was threatened with serious and apparently irremediable loss from the hostile tariff policy of its principal customer.

The Ceylon Government decided to go to the rescue, and in 1910 imported from Kentucky, U. S. A., a Blue Grass tobacco expert by the name of B. F. Sherfius, and put at his disposal a 10-acre plot. Mr. Sherfius brought with him some 40 varieties of the best American tobacco but out of the 40 only one stood the test of adaptation to the new soil. The successful variety was White Burley, which proved so far superior to the local varieties that it has at length qualified for export to the European markets. The Jaffna fields have recently been visited by representatives (names not given) of British and American tobacco manufacturing interests, and assurances have been given that any quantity of the White Burley offered in London would be taken. This is the malevolence of Travancore frustrated by help from America.

The new Jaffna tobacco is used chiefly as a pipe and cigarette tobacco; as a pipe tobacco it is highly valued, as it has a very great absorptive quality and is easy to flavor.

THE GOLDEN RULE IN BUSINESS

The great success of the chain stores generally in this country is largely due to the high standard of their business dealings. One very successful chain store system operates on what is known as the "Golden Rule" plan. It has never canceled a contract. Adherence to this standard caused this company a loss of over $4,000,000 during a business depression, as they accepted merchandise on all their contracts for goods at much higher prices than the retail prices then prevailing. However, in the long run it proves a tremendous business asset, as manufacturers knowing their product will be accepted when finished, can quote the company very attractive prices.—*Wall Street Journal.*

DE-INSECTING BALED TOBACCO WITH AMMONIA GAS

As every tobacco warehouseman knows, the human biped is not the only living animal that chews tobacco; many and various insects also have the habit. The problem of disinfecting, or rather de-insecting, tobacco before shipment, especially from tropical countries, is a serious one, and is now being solved by the use of gaseous ammonia.

The two chemicals mostly used heretofore for this purpose are hydrocyanic acid gas (prussic acid) and carbon disulphide. A few other substances, as ethyl cyanate, chlorocarbonic ester and formaldehyde, are used as well as various preparations advertised, and sold under trade names; but none are quite so effective as the first two. Hydrocyanic acid is the most effective of all and is used extensively in all countries for disinfecting houses and de-ratting ships, often with calamitous results even to persons supposedly skillful in handling it. Carbon disulphide is less dangerous to man, but is an extremely inflammable substance, requiring much more careful handling even than gasoline. It is slow acting, 36 hours being required for disinfecting tobacco bales in a room having a space of 5400 cubic feet, whereas with ammonia gas this can be cut down to 18 hours.

A method developed by Moens and Ringeling which they call the "insectam" process is as follows: The tobacco is stored in a room capable of being tightly sealed, and built extra strong to sustain a partial vacuum. The air pressure inside the room is reduced by means of a vacuum pump to a vacuum corresponding to about 20 inches. Ammonia gas from a cylinder of compressed ammonia is then allowed to evaporate into the room, first allowing the gas to pass through a box filled with dry quick-lime to make sure that it is dry. After two or three hours, air is blown into the room to displace the ammonia, the air also being passed through the lime box to dry it. The process of removing the ammonia can be hurried up by alternately blowing and evacuating with the air pump. Tobacco beetles and moths are easily killed in this manner without injury to the quality or flavor of the goods.

The installation of an apparatus of this kind is somewhat expensive, but is entirely practicable at large factories and at shipping points, especially at maritime ports, where large quantities are accumulated for export.

The "insectam" process is applied not only to tobacco but to other products, especially to copra, which is even more subject to infestation by insects than tobacco. It has also been applied to wool and furs and to wooden furniture. Compressed ammonia is cheap, can be obtained almost anywhere, and is not nearly so dangerous to human life as other substances commonly used, an important point to consider where only a low grade of labor is obtainable.

BELIEVE IT OR NOT

From Winsted comes a dispatch describing a mule that chews and a frog that smokes. More entertaining publicity for Connecticut tobacco.—*Boston Globe.*

SOME SURPLUS

Kentucky has raised enough tobacco this year to furnish five pounds to every man, woman and child in the United States and then have enough left to make a package of cigarettes for every adult.—*Elizabethtown (Ky.) News.*

United Cigar Stores

In connection with recent reports that negotiations were pending for the sale of control of United Cigar Stores Co. of America, now held by the Tobacco Products Corporation, to one of the leading tobacco manufacturers of the world, President C. A. Whelan stated to a representative of Dow, Jones & Co. that these were without foundation. Mr. Whelan added that present interests in control of United Cigar Stores Co. would not consider any offer involving passing of its control.—*Wall Street Journal.*

Schuster Bros. Co., Inc.

MILWAUKEE, Wis., Oct. 6.—Schuster Bros. Co., tobacco, etc., has been incorporated. Capital stock, $100,000. Incorporators, John E. Schuster, R. F. Jenkerson and F. Horing.

Otto Ziegler Co., Inc.

LANSING, Mich., Sept. 29.—Otto Ziegler Co., cigars and tobacco, has been incorporated. Capital stock, $50,000.

Securities on Bargain

"It is to be deplored," says Jules S. Bache, "that the American working public has lost its incentive for thrift. While 85,000 people spent, with alacrity, $1,250,000 to see a prize fight; while movie theatres are crowded to capacity; while it is estimated that 2,100 golf clubs are running with full membership, and 1,000 are in course of construction or expl tion, and are being deluged with app tions for membership; while departi stores are doing the business of careers; limited railroad trains at fares crowded to capacity, and runnin numerous sections; drawing room greater demand than single berths; automobile companies selling to cap —there seems to be no money for vestment, and investment securities on the bargain counter at enormous, almost unparalleled returns on the m invested.

"It is true that the savings bank the country have increased their dep by $500,000,000 during the past year, much of which has been contribute wage-earners of foreign birth. But not consider this an evidence of any velopment of thrift on the part of American people.

"This accounts very largely for situation which we find in Wall Str and, added to this, far-seeing student conditions note with dismay and une ness for the future the constant dem and granting of increases in wages; settlement of every strike in the inte of the strikers; the cold shoulder sh to capital by designing politicians; the gradual withdrawal of large amo of that capital from active participa in the development of the country.

"In spite of all these deterrent fact securities are very cheap, and m whose returns are assured even ur less active business conditions, are sel on the bargain counter.

"In view of the likelihood of a con erable improvement in conditions abr even though the return to sanity conservatism in that part of the wo may be slow, we have grounds for h for general business.

"These waves of pessimism are of quent occurrence, and while this seems to be longer-lived than usual will come to its end, as did all sim movements.

"Under these circumstances, I am a eat believer in conservative purchases, r real money, of many of our better ass of securities, particularly those of mpanies conservatively managed, whose ture can be measured."

Down in the Dark Patch

While the tobacco growers who have ined the Burley Co-operative Associaon stand upon the hill, proud of their hievement and glorying in their sucss, far down the hillside their brothers om the dark patch are still laboring upard. The fight is still on down there. he voice of the Paducah *Evening Sun* heard, urging them on to victory:

"The Dark Tobacco Association, oranized and pressing for economic operaon, enters the second test of its career the selling season nears. Every memer desiring its success must now give his est in co-operation. This is the time hen the enemies of co-operative marketig get in their most effective blows by urmuring to the discontented, and dissatisfaction should be vigilantly guarded gainst.

"There has been dissatisfaction in some uarters with the operation of the pool the first year, that cannot be denied, ut such dissatisfaction arises mainly om observing isolated specimens of oprating costs which seem high. The first ear was a year of preparation and manuvering for position in a reorganized phere of marketing. It was inevitable nat many things must then be done at he dictation of expediency and such nings invariably call for greater outlay nan would be necessary if all the time the world were at the disposal of those oing them.

"The pool was forced to market its oldings at the very time it was constructng its marketing organization, a difficult ask, none can deny. This year there is rmer ground under the association's feet. Needed adjustments can be made without ear of throwing the machinery out of ear, normal processes can be adopted as he call for speed is less urgent, but as n the first year, and as it will be in all ears, this one calls for the united effort, ot of officers and directors alone, but f the whole membership of the associaion, pushing toward a common goal."—*Lexington (Ky.) Herald.*

Booming Manila Cigars

Foreign Exchange Rates

In the subjoined table the quotation on sterling represents dollars and decimals of a dollar; all others represent cents and decimals of a cent. Quotations preceded by the decimal mark indicate a price measured in fractions of a cent.

Parity of exchange is given as reported by the United States Mint, except in countries with a silver standard, where parity fluctuates with the price of silver.

Tobacco

The United States Department of Agriculture has found the growth of the tobacco business sufficiently important to warrant issuing a special bulletin about four times the length of those usually sent to newspapers. Its significant statement is that production and consumption of tobacco show an increase.

Larger production from each acre of land devoted to this plant is being secured through the studies of the department's agents. Various diseases which affect the growth have been investigated and in some instances, methods of controlling these have been developed. By new findings in the science of plant breeding, the quality of leaf and the yield have been improved. Methods of curing have also been changed for the better.

When an investors' service in its weekly notice to clients predicts that the crop will exceed last year's by 200,000,000 pounds, it ought to be fairly plain that the traffic runs into money. As a matter of fact it does, for the government reports 60,000,000,000 of cigarettes produced annually in the United States, more than 10 times the number made in 1905. This demand has had an influence on the kind of tobacco raised for the cigarette market and is an important factor in the trade. That the whole question is receiving attention from others than the government and commercial interests is shown in a scientific study of the effects of tobacco in the current issue of the *New Republic*, purporting to show that cigarette smoking is the least harmful method of using it. All of which may be expected to elicit rejoinders from those who oppose the traffic and would particularly like to see the cigarette eliminated.—*Utica (N. Y.) Press.*

New Orleans News

To Boost Houston

NEW ORLEANS, La., Oct. 6.—The Advertising Association of Houston, Tex., has appropriated $50,000 with which to defray the expenses of advertising Houston. The funds are to be divided into three parts, one part of which is to be spent in class journals, such as feature cotton, furniture, tobacco and manufacturing jobbers.

The Acme Construction Co., of Chicago, has been awarded the contract for the extensive alteration work to be done on the new United Cigar Store to be established at St. Charles and Canal streets. Contract calls for expenditure of $17,250.

The N. B. Tuero Cigar Factory, in Carroll street, will move to a more central locality in the downtown district in the very near future. It has had a new design made for the Paul H. Maloney cigar it is now featuring. The design is quite an attractive one.

The City Cigar & Tobacco Co. recently established here and making satisfactory headway has moved from its old stand, 519 Baronne street, to 748 Baronne street, where it has more room for expansion and transaction of business.

Keep Moving, the new five-cent seller of the Trelles factory, has been given over to the Southern Cigar Co., in Camp street, for distribution in this territory. With energy and application the new jobbers should be as successful in making it a "go," as Max Block has been able to do with it in Houston.

Speaking of Houston reminds me that when I was there last week I noticed that Frank E. Foster, the well-known cigarist, had bought out the Hill & Hill cigar stand in the Stewart Building. He has restocked the establishment anew, taking on a line of confectionery, magazines and illustrated papers. The store is now known as the Stewart Building Confectionery and News Stand. Foster reports good business.

E. Suarez, an experienced cigar man, formerly identified with the Dolores Cigar Mfg. Co., in North Peters street, as manager of the plant, has decided to go into cigar manufacturing on his own account, and has opened a factory at Natchez Alley and Camp street.

Mrs. Baugnon, proprietress of Cigar Factory No. 46 at 1206 North Rampart street, is doing very well with La Favorite, the latest product of her plant. It is meeting with a ready sale locally and shows a healthy repeat.

H. T. Cottam & Co., cigar and tobacco distributors of this city, have contracted for the construction of a branch house at Thibodaux, La., estimated to cost $10,000.

Louis Hartman, representing Bowring & Co., of New York, Manila cigar department, was a caller on Valloft & Dreux during the week.

Pipes Going Well

Charles H. Schlichter, representing Wm. Demuth & Co., New York, manufacturers of pipes and smokers' articles, was a visitor here during the week and was numbered among the callers at Max Guiraud's establishment, where a varied stock of the firm's high class products are carried and ever on display. Mr. Schlichter reports a very satisfactory trip through the territory traversed by him and a healthy repetition of orders as well as an active demand for the Demuth output.

W. H. H. Miller, of the Book Exchange & Art Shop, at 416 Fannin street, has received a large consignment of meerchaum and briar wood pipes in anticipation of a large fall and holiday busine A unique feature about this cigar sta is that one can mix smoking with rea ing, at his leasure, for besides an am stock of literature and art, Mr. Mille big display of pipes and "smokes" mak his establishment an attractive place which to "bide a wee."

C. L. Zapp, of the Brazos Hotel Lob cigar stand, has taken on the cigar sta in the Tennison Hotel, both of whi establishments are reported by him doing well. The Brazos and Tennis Hotel stands are located just across fro the Grand Central railroad station.

Representative Wall, of the Orris Cigar Co., of Bethesda, Ohio, was town during the week with a line of t company's cigars, Blue Jay, Orcico, e Mr. Wall was in search of a jobber i the factory's products in that territory.

Abe Caro, representing A. Santaella Co., Tampa, was doing Houston duri the week in the interests of the Optir and Hoo-Hoo, of which J. Lowenste & Son are the local distributors.

Representative Breeder, of Arguell Lopez & Bro., Tampa, was number among the callers on Max L. Bloc Houston jobber for the Tadema cigar.

Valuable Aid Given t Tobacco Growers

Florence W. Rich, of Suffield, Con writes to the Springfield (Mass.) *Uni* on a subject that is not new, but inte esting, as follows:

"A few facts relative to the assistar the United States Department of Ag culture has rendered in the tobacco dustry might be of interest to those your readers who are tobacco grow here in the Connecticut Valley.

"The department has worked on sorts of tobacco problems from the pla ing of the seed to the placing of the f ished product in the hands of the mar facturers, and has even gone so far as investigate some of the manufacture problems. Many interesting results a conclusions have been reached. For stance, it was once thought that the f mentation of tobacco in the curing pr ess was caused by bacteria, but it w found that bacteria had nothing to with it. It was found that the leaves tobacco contain certain chemical co pounds known as enzymes, which, unc certain conditions of moisture and te perature, produce fermentation. T discovery has led to great improveme in the curing of the leaf. And now it possible by use of the thermometer control the curing and greatly to incre the percentage of high-grade tobacco.

"More exact curing methods are n used in all the principal growing distric In northern districts, where it w thought necessary to cure in cases, it w found that bulk curing could be carr on just as well as in the southern d tricts. The adoption of this method l saved millions of dollars.

"There has been a wonderful develo ment of the shade-grown tobacco ind try in the Connecticut Valley, built ma ly upon the foundation of governm investigation. Formerly this district p duced a domestic wrapper tobacco, best of which sold around 20 cents pound. Wrapper tobacco from Suma at the same time sold for $3 per pou or more. By making tests of the t method of growing tobacco it was fou that conditions could be produced v favorable to the growing of Suma tobacco in Connecticut. What this me to the cigarmaking industry may be re ized from a description of the Suma leaf. It is large, very thin and elastic, a beautiful satiny texture and a pound

Tampa Tidings

Tampa, Fla., Oct. 6.—Mr. Moyer, of l revenue office, reports that the stamp s for the month of September were nething less than that of August, lugh showing an increase in class "D," l near an equal average per working l with August, allowing for the time through the 48-hour "celebration" of ne of the cigar-makers. The report lws the following data:

Css	Stamp Value	No. Cigars
.....	$44,514.81	11,128,920
.....	14,234.46	2,372,610
.....	195,135.75	21,681,750
.....	63,874.53	5,322,870
.....	3,969.75	204,650
Total	$321,729.30	40,770,800

Keeping up with Demands

he factories are keeping well up with r demands, owing to the co-operation their customers in placing a good per age of Christmas orders early in the on, thereby enabling the manufactur- to keep their working forces intact ing the usually off Summer months. re is, of course, as usual, a shortage high class cigar-makers which will be more and more as the season draws close and orders for fancy goods ac- nulate. To offset this some of the nufacturers will probably be forced to rate on Sundays, but not to any great ent.

Harmony Prevails

ever have the factories been operated less internal friction or with better ults than during this season. The kers themselves seem imbued with desire to make this a blue ribbon year, success seems assured. The manufac- rs of clear Havanas, and in "Bond" e come into their own again, and are ing the joys of pre-war days when r output headed the lists. The persist- and systematic efforts of the manu- urers association, as well as of the vidual manufacturers to co-ordinate he several factors connected with the stry at home and abroad have proved satisfactory and effective, and a ter harmony exists in the trade than before.

ovement of manufacturers to and n the leaf markets of Cuba continue e as regular as formerly. Those re- ing from Havana this week are cho Arango of Don Sebastian fame; Cosio of the Consolidated, and Val ano of the C. H. S. A. C. Westlake ne Tampa Cigar Co., accompanied by wife and daughter, is visiting Key t.

. S. Foley, formerly Treasurer of ozano, Son & Co., and manager of Tampa factory, has withdrawn from company. His future plans are un- vn. His many friends wish for him kinds of prosperity in the future.

Returning from Sunny South

hn Fielding, of Cullman Bros., Inc., Front street, New York, who has touring Florida and the South for e time, returns to headquarters to- ls the end of the week.

To Survey the South

a Strouse, of Strouse & Holzman, rs and packers of leaf tobacco, of Water street, New York, plans to rt for the South next Saturday. ng an extensive trip, Mr. Strouse cts to visit New Orleans, Tampa, West, and other important points.

New Atlantic Cigar Factory

Atlanta, Ga., Oct. 6.—Another evidence of Atlanta's growing importance as a distributing center is seen in the removal from Brunswick of the cigar manufacturing plant of Alonzo Brothers, makers of Y. M. C. and B. V. D. brands, opened for business at 390½ Edgewood avenue.

R. V. Alonzo will be in charge of the Atlanta plant. Speaking of the opening of this new industry in Atlanta, Mr. Alonzo declared that within the next sixty or ninety days the Atlanta plant will be going full blast, with a force of 75 experienced cigar makers, and will be turning out from 14,000 to 20,000 cigars a day, all of which will be hand made.

Mr. Alonzo stated that for the present a small branch of his factory would be kept at Brunswick, but that Atlanta would be the chief manufacturing and distributing point of their products.

Some Georgia Figures

Atlanta, Ga., Oct. 6.—Every year $63,860,400 worth of tobacco smoke is sent curling toward the skies from the mouths and noses of Georgia cigar and cigarette smokers. A 10 per cent tax assessed on tobacco consumers in this state nets about $6,380,040 a year.

These figures were compiled by Major C. E. McGregor, commissioner of pensions in this state, who is fighting the repeal of the cigar and cigarette tax imposed at the last regular session of the Georgia Legislature.

Major McGregor has figured it all out and declares there are 364,000 cigar smokers and 548,000 cigarette smokers in the state. Basing his estimate on an average of three cigars consumed by each smoker, he declares 1,092,000 cigars are smoked daily in this state. Allowing each cigarette smoker 12 cigarettes per day, he estimates that 6,576,000 cigarettes are consumed daily.

Totaling this up would mean that Georgia weed-puffers consume 2,400,-240,000 cigarettes and 398,580,000 cigars per annum. Georgia's production each year amounts to 8 500,000 pounds, and is valued at $2,125,000.

Wisconsin Notes

Edgerton, Wis., Oct. 5.—The shedding of the frosted portion of the crop is now practically finished. A goodly portion is still in the fields and will remain there. While the much larger portion of the damaged has been cut, it is estimated that from 20 to 25 per cent of the frosted will not be harvested.

The weather of the past week has been quite favorable for the curing, but shed damage is prevalent to a greater or less extent. Even the early harvested is not free from some shed burn and pole rot. That which was harvested just previous to the freeze, which had not got far along in the cure, was subjected to a spell of very unfavorable weather following, and it could hardly be expected that some shed damage would not result. That portion of the early shedded which was well along in the cure promises to furnish splendid binder goods.

Buying of the new crop has been very quiet for a week or more, few dealers being in the field. Those growers with tobacco that promises to be good naturally expect a stiffening of prices.

Packers expecting a quickening of the market for old goods, as would seem very natural, are as yet disappointed, as deals are few and the market quiet.

Sampling of the 1922 packings is well under way, most firms being well along with this work. A sprinkling of black rot shows up in most packings, not serious, but more than the packers want to see. The crop is said to be a serviceable one and with the scarcity now existing should find ready sale.—*Reporter.*

CAUTION

THE LA ROSA DE PARIS CIGARS are not genuine unless our name (Starlight Bros.) is printed on the labels attached to the inside of the box. Every box bears our name in order to protect smokers against unscrupulous sellers who are trying to supplant the well-known LA ROSA DE PARIS CIGARS by inferior goods.

Indiana News Items

Business More Stabilized

INDIANAPOLIS, Oct. 6.—As the weeks go on and Fall gradually gets closer to Winter, the trade here is convinced that both business and industry is fairly well stabilized. Everything points to this. If the agricultural situation would improve somewhat the general economic scheme would improve. Signs now in Indiana point to some improvement with the farmers. Times are not right, but the farmer's corn crop is coming along in fine shape, and the proprotionate prices of wheat and corn favor corn, and the farmer will be back in the market when his crop is sold.

Wholesale conditions here are good. Distributers declare there are more orders than they were expecting, and as the holiday season approaches they are expecting some real business. Generally speaking, this year has been better than last for the jobbers. Credits are good with a tendency toward improvement. More retailers are discounting their bills now than a year ago. Salesmen coming in from road trips say dealers are contemplating handling somewhat larger stocks for the late Fall and early Winter trade than they did a year ago. One reason for this, they say, is the outlook for general employment until the first of the year at least. There is no such thing as an employment question now.

Business in the coal regions is picking up quickly with the approach of cold weather, and an increase in days per week of mine operation. Industrial cities report increased production on the part of factories to offset the lack of construction which is usual in the late Fall.

Florist Buys Cigar Business

The cigar business of Hull & Calnon, 112 South Michigan street, South Bend, Ind., with the lease on the first floor of the building which it occupies, has been purchased by John H. Pulschen, of the South Bend Floral Co., 122 North Michigan street, according to an annou ment made by Mr. Pulschen. The business will be operated by Mr. Puls during the remainder of the year perhaps longer, according to his Whether or not the South Bend F Co.'s business will be removed to South Michigan street location later not made definite by Mr. Pulschen i statement. He believes it probable the business will be moved to that tion later, though at what time he not say. George F. Hull and M. H. non, former proprietors of the establishment, will not re-enter the ness in South Bend, according to Pulschen.

Burley Member Not Allo to Sell to Fellow Membe

MADISON, Ind., Oct. 4.—The Bu Tobacco Growers' Co-operative Ass tion was today awarded an injunctio restraining orders were issued ag Cleve Heath and Barney Holsclaw, m bers of the Association, forbidding selling of Heath's tobacco to any pe firm or corporation other than the p tiff. The restraining orders were en by Judge Edward S. Roberts.

The petition alleges that Heath, a m ber of the Association, had contracte sell his tobacco to Holsclaw, also a m ber, in violation of Heath's contract the Association. The restraining issued by Judge Roberts forbids this and leaves Heath in the position whe can dispose of his tobacco to no one cept the Association. This is the restraining order ever issued in Ind on one of the pool contracts, and is garded as significant, as indicating determination of the Association to court injunction in protecting its members.

'ells W. C. T. U. Next Fight Is On Tobacco

CHICAGO, Oct. 6.—The 22nd annual onvention of the Women's Christian 'emperance Union of Cook County osed here a few days ago with an ad- ress by the Rev. M. P. Boyton, on "The ext Job for Women." He said the new ob for women, now that the question of rohibition is settled, is the fight against bacco. "Nicotine poisoning," he said, s killing thousands and ought to be pposed as vigorously, intelligently, scien- fically and courageously as alcohol has een opposed in the past. A heart con- ining nicotine cannot resist pneumonia : ptomaine poisoning."

Morgan Gunst, of San Francisco, assed through here a few days ago on s way home from Europe.

Visiting Windy City Office

Wm. Best and Frank Harwood, of the eneral Cigar Co., Inc., spent several ys here recently.

New Hotel in Prospect

A new $1,500,000 hotel is to be put up the neartheast corner of Randolph and a Salle streets. It is reported that the ew hotel will be known as The Lincoln. is to be 26 stories high and will have 000 rooms. E. L. Wenzel, head of the otel Planters and the Washington otel, is back of this new project.

Harry Pethick, who has been repre- nting the Ruhstrat-Christian Co., has signed and is now covering the south de for the Wm. J. Seidenberg Corp. ck Wismer, well known to the trade re and in the middle west, has also ined the Wm. J. Seidenberg Corp. sales rce.

Ludwig Lasker, who recently returned om his trip abroad, was a visitor to the hicago office of Perfecto Garcia & Bro.

Quite Visible

Personality Triangular size at two for cents is now seen in many cases. This and is selling well for Ryan & Raphael igar Co.

El Dallo displays are seen in all the indows on the far south side. P. J. ubey Co. distributes this brand.

Chicago's new $4,000,000 Midland Club is to contain all the best features of all clubs. The new club is to be erected at 170 W. Adams street. Of course the best cigars are to be "on tap."

Popper's Eight-Center is selling very well here. Nathan Fox & Co. are the Chicago distributors and they have placed this two-for-15-cent seller everywhere.

A Denby Slogan

"Yessah—Dey sho is a might good cigar," says the introductory newspaper campaign on Charles Denby cigars. The colored bell-hop, holding a box of these well-known two-for-15-cent sellers, is featured in the ads.

A Big Duplicator

Manager Walter Woolfson, of the Ryan & Raphael Cigar Co., states that Personality cigars have been placed in over 1,000 stores here and that they have had many duplicate orders in the few weeks they have handled this brand.

Gato's Gotham Office Closed

E. P. Oakes, on his return from a road tour, announces that the Gato Cigar Co. has closed their New York office and that hereafter all transactions are to be taken up direct with their Key West factory.

Sam Zuckerman, of H. L. Rodger & Co., came in from the west. Sam is headed east for the New York office of the firm. He reports heavy holiday orders for his products.

Jacob Rosenberg stopped in to say his recent road tour was highly successful. He also reports heavy mail orders for the brands turned out in Tampa by his firm, Eduardo Gonzalez & Co.

Wm. A. Vorhauer & Co. have two big leaders in Lord Baltimore and Marshall Field cigars.

A Stand-By

Attractive Chancellor displays greet the eye. J. & B. Moos are the distributors of this brand here. It has been one of the "stand-bys" for several years.

George Grant, who covers the Greek trade for the Wm. J. Seidenberg Corp., finds no trouble to place Virginia Lee cigars in all the cases. This mild Havana has taken on very well locally.

At J. & B. Moos', the repeat orders for the Antonio & Cleopatra cigar come in thick and fast. At present they are short of several popular selling sizes.

George W. Stocking is at his Chicago office, 110 So. Dearborn street, but leaves

Connecticut Tobacco Greets More Good Weather

Dry, Cool Winds Dissipate Slight Mold That Appeared During "Damp Spell"—Marketing Association Through with Sampling 1922 Broadleaf—Better Than Expected.

HARTFORD, Conn., Oct. 8.—Following the damp weather of the week previous, this week was much cooler. With dry winds, the tobacco is now thoroughly dried out and the moldy tips that appeared during the damp spell have disappeared. Yesterday morning saw the first real frost of the season. This cold air into the sheds and chilled the tobacco so that now it is in fine condition. It will be ready to take down the next damp spell, especially the early harvested, and the majority of the growers are ready to start taking down the famous 1923 crop of tobacco at the first appearance of moisture.

Those who have been through their sheds report that there be no "pole-sweat" to injure the bottom leaves, unless there might be a slight touch on some of the late harvested.

The Connecticut Valley Tobacco Association finished up the work of sampling the 1922 Broadleaf last week. The managers are pooling the samples and are now ready to "do business with all-comers."

The 1922 Broadleaf came through the sheds much better than was expected, and the early purchasers will get a better grade of tobacco than was expected earlier in the season.

Notwithstanding the earlier predictions, the 1922 crop of the tobacco in the cases now that the crop is much better than anticipated, and that it has developed into a fine, thin leaf.

The dark grades, usually heavy, are very thin, and will make the finest of wrappers and should be sold out quickly.

The Association has adopted the government standard grading for both the broadleaf and Havana seed tobaccos. The standards as set up are in five different groups, in both the Broadleaf and Havana seed. Group "A" is for wrappers; Group "B" is for seconds or binders; Group "C" is for tops or fillers; Group "X" for the brokes and nondescript, and the "Y" group is for stemmings.

The quality of the tobacco in the grade is placed second in order, and is shown in each grade, and numbers are used to indicate the quality.

The color in the grading is placed third in order. The letter "L" is for light; "C" for chestnut, or medium; "D" for dark; "V" for mixed colors, used to indicate the color of the leaf.

When length is of sufficient importance it is placed fourth in order and numbers are only used to indicate the length when the length is stated. These numbers will be applied to the Havana seed which is long, and not to Broadleaf.

Under this system of naming grades, a choice quality of Havana seed light wrapper from twenty-six to twenty-eight inches long would be called "A1L27," while a choice quality Broadleaf light wrapper would simply be "A1L." The grades adopted were recommended by C. B. Wilkinson, of the United States Department of Agriculture, Bureau of Grading. It is expected that the new terms of the grading will easily be learned and become as familiar as the old ones heretofore in use.

The work of excavating the new cellar for the warehouse in South Windsor has been started and the work of building will be pushed right along until completed.

The work on the warehouse in Glastonbury will be started very soon, and this, too, is to be pushed along and made ready for packing of the 1923 Broadleaf as well as the one at South Windsor.

Work is progressing at the shade warehouses. Plenty of help for work, but the forces will be increased as the season advances. Considerable help is retained on the farms to make the final fall clean up and get the places in "ship shape" for winter.

Last week, the town of Manchester, Conn., celebrated its 100th anniversary; and among the exhibits of the industries of the town was an exhibit of tobacco, which was a very fine one; a miniature shed with actual green stalks strung on lath was shown, and many samples of sweated tobacco were also included in the exhibit.

Connecticut's "Best Crop in Years"

The 1923 crop of tobacco will pass into tobacco history as one of the best if not the best crop ever harvested. The tobacco is now under cover and the worries of the grower in regard to storms and frost are over. The only thing now is good "tobacco damp" weather for the curing process.

The weather during the harvesting season has been unusually favorable. No excessively warm muggy days have been experienced and the "coming down" of the crop this year a very satisfactory matter.

A few warm rains now, followed by clear weather, will help to bring out the color of the leaves and give the tobacco the quality which means much to both seller and buyer. The primed tobacco has made unusually rapid progress in curing, due to a run of favorable weather and much of the first and second primings are already in the bundles and in the sweating process.

The warehouses opened September 24 for the sorting of tobacco and these will give employment to hundreds who worked in the fields during the summer. Most of the independent tobacco has already been bought by the leaf dealers and prices ranging from 60 to 75 cents has been paid for Broadleaf and Havana Seed, assorted. In the bundle prices were 55c to 70c. These purchases are of course conditional—the tobacco has to be delivered in good condition.

The buying of tobacco in the field is attended with more or less uncertainty, and where the crop has been improperly cured, or has been damaged in the sweating, there may be cause for disputes be-

Sales Show Slackening at Greenville

GREENVILLE, N. C., Oct. 8.—Sales last week were not so heavy as the week before, though more than a million pounds were sold. Good weather for other work than grading, and much cotton picking, slackened sales. Prices somewhat better, showing improved quality. The lower grades not so plentiful as earlier in the season but still plentiful. Prices on these were a little better, ranging as high as 20 cents. Better grades being marketed by many growers, but not in great quantities. Prices better, perhaps $5 per hundred pounds, and real good grades even more. Less than forty per cent of crop has been marketed, and estimates for season sales run from 30,000,000 to 35,000,000 pounds. Co-ops receiving small amount and much dissatisfaction.

Co-op Gets Another Setback

Another important decision against the Co-ops was handed down by Judge W. M. Bond at Washington, Beaufort County, last week. It was a ruling on the question of where a landlord member of the Tobacco Growers' Co-operative Association gives a crop mortgage and the mortgagee takes possession of the crop, either under the order of the court, or under power of sale, that the landlord cannot be penalized, Judge Bond dissolving the restraining order obtained by the Association against L. H. Wetherington. The Pamoico Chemical Co. was allowed to interplead. It was established that in February of this year, Wetherington executed to the company a mortgage for fertilizers. The company asked that Wetherington's share of the crop of 13,000 pounds of tobacco be turned over to it (the company) and that the tobacco be sold on the open market. Judge Bond signed the decree holding that the fertilizer company was entitled to possession of the tobacco, and that it could not be delivered to the Association. The Association waived that part of the original bill of complaint in which the Association attempted to hold the landlord liable for the five cents per pound forfeit for tobacco sold by non-member tenants member landlords. This is the questi first passed upon by Judge J. Loyd Ho ton, here in Pitt County Superior Cou some time ago. Since Judge Horto decision on this point, two other Super Court judges have rendered similar cisions. And this brings to mind that is said that in organizing the Toba Growers' Co-operative, this question brought up and its legality question One lawyer contended that such penal ing was illegal and could not be enforc But one of the swivel chair princes sta that that made no difference, let it st in the "contract," they could bluff farmers into paying it. But it see those bluffing days are gone forever, a if that reported move for a receivers materializes, the days of some of th same high-salaried swivel chair prin are to share a like fate.—KING.

Mount Airy Market

MOUNT AIRY, N. C., Oct. 6.—T tobacco market opened here Wednes with large breaks at both the auct warehouses.

The farmers seem to feel that prices are even lower than the gr justifies, though it is hoped that prices will improve as the first primi are sold off and the best of the sea begins to come in.

The co-operative market opens h next Tuesday. The association posted the advances that will be m on the different grades.

Rocky Mount Average, $

ROCKY MOUNT, N. C., Oct. 6.—To sales for the week, 748,626 pounds; av age price per 100 pounds, $19. Sold date of 1923 crop, 4,278,310 pounds; av age price per 100 pounds, $20.

The offerings, tobacco men state, continuing to represent unusually co mon grades and very little good toba has yet been seen upon the sales. W the fair over sales are expected to p up materially during the next week.

The New Norfolk Tobacco Terminal

NORFOLK, Va., Oct. 6.—The new $600,- terminal of the Imperial Tobacco Co. e will be finished sufficiently to ac- modate steamers at loading berths by middle of November, it was an- nced today.

his company, one of the largest to- o exporting concerns in America, has centrated its foreign shipping depart- t here and its additional facilities are g constructed adjacent to its prop- at Berkeley waterfront.

obacco shipments have already begun ing from Norfolk in volume, and in- tions point to a better business this er and next spring than ever before ne port's history. W. J. Garris, man- of the Norfolk office of Fred P. kill & Co., which concern books about er cent of the nation's exported un- ufactured tobacco, declared that more cco would move this year than last, n Norfolk exported 48 per cent of nation's tobacco exports.

Co-ops Win Watts Case

UMBERTON, N. C., Oct. 6.—The first of strength was made in Robeson ty this week by the tobacco co-ops he case against W. G. Watts and , which began Wednesday afternoon concluded this morning.

he association won on all three issues hitted to the jury. It has been one he hardest fought cases tried in the courts of Robeson county in several s. The association was represented he law firm of Johnson and Johnson, umberton, and E. L. Hays, of Ra- leigh, a young lawyer who formerly lived in California. The defendants were represented by the law firms of McLean, Varser and McLean, and Stacy, Britt and Britt, and McNeill and Hackett.

The defendant denied that he executed the contract and pleaded that if he did sign he was so drunk that he was not mentally responsible for his acts. He further contended that the crops did not belong to him and that the land was his wife's, having been bought with her money, although the deed was made to both Watts and his wife.

The association is very much elated over the victory as it feels that it may be taken as an indication of public sentiment in this county toward the association.

Kinston Sales

KINSTON, N. C., Oct. 6.—The tobacco sales on the Kinston market during August and September were as follows:

1923	Pounds	Value
August	847,633	$163,969.37
September	8,136,834	1,526,982.78
Total	8,984,467	$1,690,952.15

—E. Y. SPEED, Secretary, Kinston, Tobacco Board of Trade.

Oxford Average, $15.29

OXFORD, N. C., Oct. 6.—Tobacco sales for the week, 157,826 pounds; average price per 100 pounds, $15.29. Sold to date of 1923 crop, 342,124 pounds; average price per 100 pounds, $15.81. Sold to same date last year, 1,400,960 pounds; average price per 100 pounds, $25.88.—W. A. ADAMS Co.

Slight Upward Tendency at Henderson

HENDERSON, N. C., Oct. 6—Tobacco averages on the Henderson market the past week made their initial spurt upward, and for the first time this season went beyond the 20-cent level in yesterday's sale of 27,397 pounds. Aside from the initial break when the season opened on September 25, there have been no really big breaks on the local market. Growers have been too busy picking cotton to look after tobacco, when that will keep, while their cotton is deteriorating in the field when not picked out.

Coming of cold weather, which arrived with the week-end, is expected to see a marked increase in the volume of offerings next week, and from that time on. Sales for the week ended yesterday on the local market, beginning with Monday, follow:

Pounds	Price	Average
39,210	$7,276.25	$18.55
29,210	4,962.22	16.98
28,732	5,630.64	19.59
36,228	7,078.10	19.53
27,372	5,588.29	20.41

Some local tobacconists claim that Henderson at the present time is one of the highest, if not the highest, tobacco markets in the state, certainly in the old belt, so far as averages go. Sales here to date are nothing to compare with what there have been in other markets, but the price is declared to have equalled any other market.

It is the opinion of some tobacco men that tobacco of a quality that commands a price of 30 cents and under, is bringing what is considered a fairly good price, but that above that level the price is as good as last year. In other words, common grades, as compared to the better types of the leaf, are bringing a better price. Most of the weed that has been marketed here has been of a very poor quality, and some say that there has been not a little tobacco sold on the local market that in other years has hardly been considered worth the time and trouble to bring to the warehouse floors. It has brought a very low price, but at that it has brought something, and for that reason is being offered for sale.

It is admitted that price levels are rather disappointing, taken as a whole. Varying demands for different types of the weed is regarded as responsible to some degree, and then the increased production this season is considered is responsible for a good deal of the depression in price.

Warehousemen seem agreed that Henderson has a set of buyers above the average, and who are looking out for the interests of their own companies, but at the same time trying to give the farmer all their tobacco will justify. There is an atmosphere of optimism as to the prospects for the season as a whole, although opinion is divided as to whether the season's sales this year will reach the average of last year, when the year's average was approximately 24 cents.

Prospects for Larger Sales at Danville

DANVILLE, Va., Oct. 10.—Sales on the Danville auction market promise already to be considerably heavier than last week. This is fair week, which usually brings a number of farmers to the city, but

'll tobacco and to meet their friends e agricultural event. The first offi- tatement of sales issued by the Dan- l Tobacco Association was published hursday, this being the day that the 's sales are given out. The statis- sover only Tuesday, Wednesday and sday, these showing that 458,368 is of leaf was sold for $81,362.80, or verage of $17.75. Since then the have increased in size and have in better quality with a correspond- ncrease in the average which is ex- d to be reflected in this week's tment.

Early Offerings Not Typical

Notwithstanding the disappointment ested by warehousemen as to the y of the crop, the early offerings ot considered typical of the crop. ne other hand, it is believed that the r types have been expressly chosen arly delivery in the belief that they l sell better at the opening of the n than later on.

e Co-operative Marketing Associa- pened in the Bright Belt with good ets. Twenty-three delivery houses cattered throughout the Virginia area, with a large number in North na. As the tobacco was brought in s graded and according to Tucker ins, director of warehouses, the rs received a higher advance on irst deliveries than last year. Forty- arehouse managers from the Bright met here Saturday to discuss the t season with Mr. Watkins and to e instructions. Mr. Watkins stated the organization was numerically er than it was this time last year. ILEY.

State Co-op Opens More Receiving Stations

DERSON, N. C., Oct. 9.—Along with odd markets in other tobacco cities owns, the Tobacco Growers' Co- ve Association started deliveries at rehouse here today. It is announced series of forty meetings are sched- r the week at different points, es- ing a new record for the associa- The markets in which deliveries egun today by the co-ops are most- he old belt, while many in Virginia their season's deliveries simultan- with those in this state. Placards giving the e for each grade were posted on rehouse floors in all markets.

remendous gain in membership is d by the association headquarters ast year's opening of its markets, re than 10,000 farmers are said to igned the marketing contract in months, making 92,000 members, ng to the latest count announced Raleigh headquarters.

inia members of the association declared to be preparing to cele- he opening of their 23 markets with meetings at every association ware- John R. Hutcheson, director of on for Virginia; Oliver J. Sands, executive manager of the association; and T. C. Watkins, Jr., manager of warehouses, as well as practically every director in the state were declared to be participating in the celebrations with the growers.

New Bern Average, $16.11

NEW BERN, N. C., Oct. 6.—Total sales for the week, 36,394 pounds; average price per 100 pounds, $16.11. Sold to date of 1923 crop, 342,694 pounds; average price per 100 pounds, $16.40. Sales light but prices remain steady.—M. E. TYSON.

Tractor Routes for Tobacco Bed Steaming

LEXINGTON, Ky., Oct. 6.—That Kentucky tractor owners establish routes for the steaming of tobacco beds in much the same way that threshing rings have been formed is being advocated by D. W. Valleau, plant pathologist at the Kentucky agricultural experiment station, as one step toward stopping leaf diseases at their source and cutting down the heavy annual losses that growers of the state suffer because of them. Steaming of plant beds to kill weed seeds and sterilize the soil can best be started now and continued throughout practically the whole winter, he says.

Steam Replacing Burning

Steaming is fast taking the place of burning for plant bed sterilization both in the burley and dark tobacco sections of the state, due to the scarcity of wood, and in the dark section the practice of using steam has advanced to the point where steaming routes already are in operation. Steaming not only kills weed seeds and sterilizes the soil more thoroughly than burning, but also makes its possible for the grower to have a permanent seed bed site without any danger from the disease root rot. When steam is used the soil is sterilized deep enough so that even if root rot has been present in the bed normal plants can be raised.

Equipment needed for steaming includes a boiler, a shallow wooden or sheet-iron pan, and steam hose or iron pipe with connection to get the steam from the boiler to the pan. The average steam tractor of 20 to 30 horse power, used in custom threshing will furnish enough steam for a pan with a surface area of from 80 to 100 square feet, but the size of the pan and boiler should be such that at least 80 pounds of pressure can be maintained.

Construction of Wooden Pans

Wooden pans are much cheaper than metal ones and can be built by making a frame of 2 by 4 material and covering it with a good grade of 7/8 inch flooring.

In steaming the pan is inverted on the prepared bed and earth banked around the edges after which the boiler is connected and steam admitted gradually. Thirty minutes steaming at a pressure of from 80 to 125 pounds is enough. After the box is moved to a new spot in the bed the area that has just been steamed should be covered with tarpaulins or old sacks to keep the heat in the soil as long as possible.

On all markets. We air dry and steam dry on most of the loose markets, and have the latest improved Philadelphia Textile Steam Dryer in our Louisville Factory for handling Leaf and Strips. Orders and correspondence respectfully solicited.

Paducah Prospects

ADUCAH, Ky., Oct. 6.—The hogshead ket has been quiet, and if any sales been made of either Association or pendent stock they have not been re-d. At any rate, there has been very activity in the market.

he past week has been ideal for cut-housing and curing tobacco. Farm-have been very busy with this work, the greater part of the crop is in the e and being fired. Weather condi-have been favorable and the color-f the crop is good, running from a n to a light brown. We have seen od deal of the crop in the barn, and apparent that we have a good per-ge of very good tobacco running he cigar style. However, a large of the crop will be mixed and can make low and common grades. little tobacco is in condition to be ly examined as most barns have fire em, and the tobacco is generally dry. couple of weeks it will be thorough-ired and in condition to handle, and is no reason why the market should pen and become active early in the m.

he weather has turned cool and indi-ns are that we will soon have frost no doubt the remaining patches of co over the country will go into the e immediately, and the crop be saved out any damage from this source.

he Dark Tobacco Grower's Co-oper-Association managers are busy with arations for handling the crop, put-up buildings over the district to take of the delivery and sale of their ings, and will be ready when buyers ready. No doubt their plans and lies will be laid out soon after the ion of officers, and there is no doubt hat they will be able to function to r advantage than last year, and put peration some improvements, that will have learned from experience.

he loose floor and wagon markets be in operation this season the same st, and the market will open about mber 1, possibly a little earlier.—B. KENNEDY.

Owensboro Outlook

OWENSBORO, Ky., Oct. 6.—While the has been in a general way favorable prevention of house-burn in the late co, it has at the same time been r too cool for yellowing and curing y. However, there is only a small ntage of the crop that can be read-ily affected by weather conditions at this time, as the greater part is fairly well cured.—J. S. PHELON.

Second Payment Checks

HOPKINSVILLE, Ky., Oct. 6.—Second payment checks for the Green River members of the Dark Tobacco Growers Co-operative Association were placed in the mail by Reams D. Farmer, treasurer, immediately after he had received notice from the War Finance Corporation that a $1,500,000 loan had been placed to the credit of the Pool.—PRESS SERVICE BUREAU.

Demurrer of Burley Members Overruled

LEXINGTON, Ky., Oct. 7.—In passing on the demurrer to the answer of the defendants in the case of the Burley Tobacco Growers Co-operative Association against several tobacco grower members in Madison County yesterday, Judge James C. Dedman, of Cynthiana, sustained the association at every point, ruling that the Kentucky anti-trust law had been repealed, that the contract signed by the growers was valid and legal and not in conflict with the bill of rights of the Kentucky constitution or the 14th amendment to the federal constitution, as claimed by attorneys for the defendants.

Judge Dedman, who was acting as a special judge in these cases because Judge W. Rodes Shackelford, of the Madison district, is a member of the association, also held that the Bingham co-operative marketing act is constitutional.

Tax Case Injunction Refused

Judge Sidney Gaines, at Walton yesterday, refused the injunction sought by the Burley co-operative in its suits against the city of Carrollton to restrain the levying and collection of taxes on tobacco in the hands of the association at Carrollton. The case will be taken to the Court of Appeals by the association.

J. Sherman Porter, editor of the *Burley Tobacco Grower,* returned from a trip into West Virginia today. He spoke to large crowds of tobacco growers in two counties and said the West Virginia members were as loyal and enthusiastic as any in the Burley district. Many new contracts are being signed in that state, he said, and the crop is reported to be about normal.

Considerable damage was done to West Virginia tobacco by the frost, as many growers had not cut their crops when the first cold snap caught them.

e Change of Grading in Dark District

PKINSVILLE, Ky., Oct. 6.—An imrnt change was made in the grading bacco in the dark fired district by ld board of directors as one of its acts. Heretofore the tobacco in all ns of the dark fired district has been d together, but separate grades now been established for the grades of the Tennessee River, in what is n as the Clarksville, Hopkinsville Springfield district, from those in est of the district, or what is known e western district. The tobacco east e Tennessee River classes much r and sells more readily than that of the river, and on the 1922 crop rowers of Montgomery, Robertson, tian and other counties kicked be- they said their tobacco was sold er and for better prices, yet they o wait for a distribution just the as the western district.

w the tobaccos will be graded on merits according to grades worked y a committee appointed for that se, and a distribution in one dis- will not be held back or influenced y way by the early or delayed sale e other district. This will remove er complaint that has been made.

ures given out by President Brad- place the cost of selling the tobacco August 31 at $1.04 per hundred, t in the Green River district, where st was higher and where the figures iven at $1.53. These are based on ates to some extent, and may vary ly. Some say they will not be quite gh.

en the delegates of the Seventh dis- which is composed of the counties llard, Carlisle and McCracken, met ickliffe to elect a director for that t, they not only performed that but they also adopted the following tions which they instructed their or to lay before the board:

rst—We believe that too many high ed officials are employed.

cond—We recommend that no em- be paid by the association more he could earn in similar lines of yment.

ird—We recommend that the sal- of the officials and employees be shed in the *Tobacco Planter*.

urth—We commend the policy of ssociation to employ farmer mem- of the pool whenever possible. In istance should the association em- a man not in sympathy with its pur- and aims.

"Fifth—We recommend that buyers not be permitted where tobacco is being received and graded.

"Sixth—That there be no picking of grades by buyers.

"Seventh—We recommend that in case a buyer refuses to accept the warehouse grades that the matter be settled only by the chief grader of the association.

"Eighth—We recommend that there be no receiving stations established except in localities where there is an absolute and fixed need for one.

"Ninth—We recommend that all employees of the association be required to show every courtesy and consideration to member growers on the penalty of dismissal."

All of these recommendations and the oft-expressed sentiment for a readjustment of salaries and eliminating unnecessary offices and adopting a policy of economy in general in the handling of the association's affairs, have been very convincing and have seemingly satisfied the growers to a large extent. This attitude is evident from nearly every section and the complaints so freely voiced recently have now ceased to a very large extent, and the association members seemingly are looking to the new board, and the new officers to put into effect the policies which they are advocating.—M. E. BACON.

Burley Directors Elect Officers

LEXINGTON, Ky., Oct. 6.—Officers of the Burley Tobacco Growers' Co-operative Association were re-elected by the new board of directors of the association Wednesday and H. Kirby Bourne, farmer and lawyer, of New Castle was chosen to take the place made vacant by the retirement of John B. Winn, of Woodford county, from the executive committee. Judge Robert W. Bingham was re-elected director-at-large for Kentucky. George McCormick, of Stout, Ohio, director-at-large for that state, and Jerry N. Gordon, of Metamora, director-at-large from Indiana.

The officers of the association for the ensuing year are: President and general manager, James C. Stone, of Lexington; director of warehouses, Ralph M. Barker, of Carrollton; vice-presidents, James N. Kehoe, of Maysville, and Bush W. Allin, of Harrodsburg; secretary and treasurer, H. Lee Earley, of Louisville; chief of field service, William Collins, of Paris; general counsel, Aaron Sapiro, of San Francisco. Executive Committee—James

THE IDEAL TOBACCO IS PORTO RICAN

Porto Rican Tobacco is rapidly being accorded the recognition it richly deserves both by the cigar manufacturer and the smoker. No longer is it necessary for the maker of a good, mild cigar to deceive the public by advertising it as a "mild Havana."

Publicity campaigns are being run by manufacturers informing the smoker that an all Porto Rican cigar, or one in which the tobacco from that Island is skilfully blended, makes the ideal "all day" smoke—mild yet fragrant; free-burning and rich in body, but not heavy.

THE PORTO RICAN GOVERNMENT

Through the medium of its Tobacco Guarantee Agency, established in this country, is also carrying on an intensive educational campaign to both the manufacturer and the consumer. The public is being informed that most good, mild cigars contain Porto Rican Tobacco whether the manufacturer states it in his advertising or not. Cigar manufacturers are shown how they can tell at a glance the origin of the leaf or scraps they buy from the jobber or dealer.

Every barrel or bale of Tobacco coming from Porto Rico must have affixed a Stamp. The White one guarantees it to be pure Porto Rican; the Blue, that it is part Porto Rican mixed with other tobacco; and the Pink, that it is all Foreign grown and simply has been shipped from that Island.

Send for the illustrated booklet, "The Story of a Porto Rican Cigar."

"Tobacco Trade Notes"

J. F. Vásquez, agent for the Porto Rican Government, in the United States, makes the following announcement:

"In order to bring the growers, manufacturers and exporters of tobacco in Porto Rico in closer contact with leaf dealers, manufacturers and wholesalers in the United States, the Government of Porto Rico Tobacco Guarantee Agency, 136 Water street, New York, of which J. F. Vásquez is manager, will publish a four-page paper entitled *Tobacco Trade Notes*.

"The paper is to be edited by Joseph B. Milgram, former editor of the *Retail Tobacconist*. One issue will be in Spanish and will reach the members of the industry in Porto Rico. This will be published about the first of the month. It will contain a current market report on Porto Rican tobacco in the United States and such other matter as will keep the Porto Rican tobacco men informed regarding trade developments in this country.

"The other will be an English edition, about the middle of each month, which will be sent to manufacturers, leaf dealers and other interested members of the trade in the United States, and will contain matter regarding the tobacco industry in Porto Rico.

"It is hoped that *Tobacco Trade Notes* will have the effect of making grower, manufacturers and distributors of Porto Rican cigars and tobaccos better acquainted with each other.

"Announcement of the coming *Tobacco Trade Notes* in Porto Rico, which was published in newspapers there, has already brought to the Guarantee Agency here offers of co-operation and suggestions regarding its contents."

Covering New England

Not a Matter of Price, but of Popularity

THE FACT that millions of Counsellors, at *2 for 15c*, are being smoked by men who can afford to pay more, is pretty convincing proof of their exceptional goodness.

Nothing that we can say could possibly be more flattering than the comments of seasoned smokers who buy Counsellors day in and day out. For Counsellor is *the* cigar

Wisconsin Tobacco Sustains Additional Injur

Poundage of Good Leaf Further Diminished by Shed Damage—Suffers Shed-Burn or Pole Rot—Lack of Shed Roo Largely to Blame—Fancy Figures for Independent Crop

EDGERTON, Wis., Oct. 8.—The poundage of the 1923 crop, already cruelly depleted by the weather man during the rains and frosts of September, was further diminished by shed damage. This is in the form of shed-burn, or of pole rot. The packing fraternity has just been waking up to the fact that the rains and dismal days of September have wrecked a far larger poundage of the hanging 1923 than was thought.

This damage was thought to be confined largely to that tobacco harvested before its time, previous to, and on account of fear of the big freeze of September 12 and 13. Now it is being sadly realized that much of the ripe, sound tobacco has suffered a great deal more than was thought during the never to be forgotten month of September, 1923.

Not Sufficient Shed Room

Few growers had adequate shed room for the big, leafy, and beautiful tobacco, and, consequently, the space between the laths was not what it should be. The rains for ten days previous to the freeze, and for about a week after caused many smelly sheds, but at the time it was laid largely to the unripe, or the mongrel seed tobacco. Extensive riding in the meantime, however, has proved that the pitifully small amount of '23 harvested sound has suffered extensive damage.

While the damage is considerable in the north, because the weather was practically the same there, the damage in the south has been more extensive as the grain of the southern tobacco is more responsive to poor curing weather.

Reduction Greater Than Previously Estimated

The weather man gave the Wisconsin growers thumbs down for fair this year. It is very probable that the small yield of binder tobaccos from this state will be further reduced ten thousand cases, than the small estimate previously arrived at.

Those growers who watched their sheds jealously during the dangerous weather, and did not yield to the temptation to crowd the lath when they filled their sheds, will be rewarded by a fine crop when the market will really need it.

Those who have bought extensively of the '23 will have rather a delicate task on their hands in the season's receiving. Any buyer of Wisconsin this year will do well, also, to inspect a bigger proportion of bundles than has been his wont heretofore, when buying or receiving from the farmers.

Buying Independent Crops

Harper, Bekkedal and others keep biting away at the independent portion of the crop, and several crops around Rio have gone at very fancy figures the past week. With severe picking, and cautious receiving, there are going to be several operators in this state who are going to succeed in garnering as fancy a packing as ever put up in this state. It is not a year for a rash buyer, but there never was a better one for the discriminating one.

Pool Seeks Production Control

The pool board is concerned greatly over means to regulate the growing supply from year to year. They frankly realize the necessity of devising some method to create discipline within the ranks of their members to avoid an over supply. The potential supply of a month ago has scared them green, and so far they have wracked their brains in vain in an effort to be able to cut down the acreage after a year of good prices. Their inadequate credit rating, their warehouse facilities, and their co-operative spirit, they now realize would have bent like reed before the cyclonic greed of hi prices and the ever resultant increas acreage.

No Panacea Yet Discovered

Up to date no method has been creat nor is it likely there will be. The sout ern pools have fought it without succe It is as much of a thorn in their side the independent end of the acreage and the monotonous regularity w which the independent acreage is clean up each year, and the carryover, if a is practically all saddled on to the pool.

Among other crops bought by Bekke & Son is that of Governor Blain who a co-partner in a large farm, which pr duces a fine crop of tobacco every ye —BADGER.

Buys Gay Cigar Co.

HASTING, Neb., Oct. 6.—Ben L. Wils has bought the Gay Cigar Co.

Statement of the ownership, manageme circulation, etc., required by the Act of C gress of August 24, 1912, of TOBACCO, publis weekly at New York, N. Y., for Oct. 1, 1923 State of New York, County of New York, s

Before me, a notary public in and for the St and county aforesaid, personally appeared Geo S. ennsylvania Packers and Growers to Harmonize

mers Enthusiastically Receive Address on Co-relationship in the Industry—Harmony a Great Desideratum—Old Stocks Moving Slowly—New Board of Trade Members.

NCASTER, Pa., Oct. 8.—A new era o-operation between grower and r has been ushered in in the Lan- cigar leaf section. The body of ers who assembled for the first of eason's meetings of the Lancaster y Tobacco Growers' Association, siastically received the address by . Nolt, one of the largest of the ndent packers operating in the coun- ho spoke on the co-relationship of r and grower in the cigar leaf pro- g industry.

members of the Association were mous in accepting the invitation held y Mr. Nolt at the conclusion of his , that one of the winter meetings body be held in his warehouse or quarters of some other packer who be handling tobacco at the time. A majority of the growers have no ption of what happens to their leaf d the entrance to the warehouse and it is this condition which has worked against the good of the tobacco industry. Lack of proper ion to necessary details in the care crop may quite easily make it im- le for the packer to turn out aged weated leaf which has the right qual- This in turn may lower the good ution of Pennsylvania cigar leaf and, long run, cause it to lose some of isting popularity.

ous to Meet on Mutual Grounds

preciating fully the need for harmony mutual understanding between the groups, growers and packers alike riving to gain full working knowl- of both phases in the preparation cigar leaf for the market so as to Pennsylvania tobacco at its present level in the opinion of the trade. ers at today's meeting showed the t eagerness and willingness to study obacco problem from the packer's oint, and will go into the sweating he handling of the leaf thoroughly g the coming winter season.

Favorable Crop Reports

eport on crop conditions given by entative growers from various sec- of the county disclosed the fact that ield and quality of 1923 Pennsyl- cigar leaf will be up to, if not above ul. Ideal growing weather which near the close of the growing sea- rought out nearly all of the back- crops and made the leaf of much quality. The harvest of the crop een completed and much of the to- is already well on the way toward ripping season.

ll has occurred in the buying of the rop and no sales have been reported g the past week. Price prospects changed very little and opinion in all rs is united in upholding the pre- n that the 1923 crop will average no than did the 1922.

ld Goods Move Less Rapidly

vement of old tobacco still in the lrs' hands is not very brisk at the st time. There is a good demand llers of the 1922 crop, but the sup- good fillers is about exhausted, and rs are having a hard time finding ent goods of this grade to meet the of their customers. There is still tobacco of the 1921 and 1922 crops hands of the packers, although not h, it seems, to satisfy the demand.

aring for N. C. L. A. Convention

parations are already under way by ancaster Leaf Tobacco Board of for the convention of the National Cigar Leaf Association to be held here in June, 1924. President Milton Ranck was authorized at the quarterly meeting of the organization on last Saturday, to proceed with the naming of the various committees who will make arrangements for the convention. These committees will be appointed by President Ranck in the near future, and will start at once to get everything and everybody in the Red Rose city properly "set" to receive the tobacco men next summer.

Join Board of Trade

Three new members were admitted to the Lancaster Leaf Tobacco Board of Trade at last Saturday's meeting. The new members are: A. Hoober & Co., of New Holland; Walter S. Bare & Co., and Albert Koshland, both of Lancaster. This trio of packing establishments have been operating in this section for some time and are known among the trade as three of the most progressive and reputable houses in Lancaster county. The roster of the Board of Trade now holds 59 names, making the Lancaster body the second largest in the country.

Off to Florida

H. B. Weaver, of the I. H. Weaver Co., left for Florida this morning where he will spend several days in the interests of the Planters' Sumatra Corporation, of which he is a director. Joseph Stiles of York, Pa., accompanied Mr. Weaver on his trip.

Open Branch Factory

The Consolidated Cigar Corp. today began operations in its new branch factory at Marietta, Lancaster county. Arthur T. Baker is superintendent of the new factory. The sweating facilities of the Consolidated in Lancaster are also being enlarged at the present time.

Figures on cigar production in Lancaster county for September, as given out by the local revenue office, show a decrease of more than four million cigars since September of last year. The cut has been made chiefly in the cheaper Grade A cigars, which class alone shows more than a three million decrease.—KEYSTONE.

York County News

Sterner Sells Out

YORK, Pa., Oct. 8.—C. A. Sterner, of the Sterner Cigar Co., has sold the goodwill and fixtures of the factory located on York street, Hanover, to Jacob C. Kling, of Hanover. The stocks of cigars and tobacco were sold to Philadelphia brokers. The new owner took possession of the factory today. Mr. Sterner conducted this factory for a period of 20 years, succeeding Charles Bowman & Sons, the senior Bowman being one of Hanover's pioneer cigar manufacturers. Mr. Sterner will devote his entire attention to the automobile business, being a member of the firm of Sterner & Goodfellow, which operates the Durant and Star sales and service station in Hanover.

Philadelphia Operating on a Much Better Ba

Large Cigar Factories Working Under More Favorable C ditions—Despite Slight Decrease in Aggregate Out Some Are Up to Capacity—Quality on Higher Plane

PHILADELPHIA, Oct. 9.—Better conditions in the cigar manufacturing industry than have been experienced for months—yes, even for a year or two—are now being enjoyed by the big producers, but their number is not large. There has been considerable falling off recently in the aggregate of output of all the Philadelphia producers, including a slight one in the ranks of the leaders. However, a group of those at the very top are none the less much better off than they have been in that, while production is continuing at capacity, there is freedom from the embarrassment of an oversold condition. Moreover, the quality of output is on a higher plane than it has been for a long time. These conditions, only anamolous superficially, are due to the very greatly changed attitude of labor. It is no longer either domineering or dominant. Opportunities for securing work on the highest paying lines are no longer so plentiful that hands can throw up positions on slight or no pretext at all to be received with open arms by competitors. Medium wage workers also have reason to retain present positions even though that means production up to the high standard set by the foreman or superintendents rather than by themselves. Competent employees are steadily at work and at highly profitable rates, because the leaders are constantly increasing production and opening new factories.

Jobbing conditions were reported during the week to be much improved as regards out of town trade, and particularly that arising throughout the anthracite coal regions, but not so much in Philadelphia. Jobbers are complaining of the restriction of orders by the retailers, and then of slowness in collections. In only one section of the city are real forward steps being taken, and that is in the textile district, due to the reopening of the mills.

A few of the centrally located retailers report more active box sales than since summer dullness set in, and virtually all note considerable improvement in transient and counter sales, ascribable not only to fine weather but as well to general industrial and commercial advancement.

All the cigar box manufacturers are rushed with orders, not only for regular stock but particularly for special holiday packings, which will be offered this year in larger number and variety than for several seasons past.

A new concern opens its doors this week at 39 N. 6th street. It is called the Liberty Cigar and Novelty Co. It is to conduct a wholesale and retail cigar and tobacco business principally, with novelties of all kinds as side lines. The proprietor is F. Zungolo, now engaged in a similar business, under his name at 146 N. 8th street. He has leased the entire building, but will occupy only the 6th street end, subleasing a store on the Filbert street side, and the upper floors.

Repeating Well

Although the new pocket packet of Philadelphia Hand Made, only within a short time has been placed on the market by Bayuk Cigars, Inc., a surprisingly large number of repeat orders have been received. The corporation anticipated a big market, and therefore, is in position to promptly fill all requisitions.

Congress Cigar Co. Activities

Charles Bock, of the Bock-Stauffer Co., Pittsburgh, Pa., distributors for La Palina, paid the Congress Cigar Co. headquarters here a visit during the week. Samuel Paley, head of the firm, is confined to his home, suffering with la grippe, but is recovering. Sales Manager Willis A. Andruss is closing up an extensive western trip, and his early return is anticipated. Jacob Paley spent the better portion of last week over in the New York headquarters.

Triangulares in New Packin

Louis Rosenfelt, proprietor of Campo Garcia factory, 513 Dick street, has been very successful wit Triangulares shape, receiving mucl tronage from clubs, whose member preciate the qualities of material an shape, which prevents rolling off card table. They are not being mar in regular boxes, but in packets, wr in an imported, transparent ma known as Cellephane. It is transp and can be twisted at the ends in pac and has the appearance of gelati clear celluloid, making a package bo tractive, protective and safe from or drying out.

Out of Drydock

Jacob Baum, of the Jersey City bacco Co., recently subject of an o tion for a nasal obstruction, called o trade during the week, entirely recov

After a service of 26 years with Eisenlohr & Bro., Charles William resigned to accept a position with Victory Cigar Co., now making a bi favor with a 5 cent proposition.

Looking Forward Hopefully

The G. H. P. Cigar Co. is hopef being in possession of its centrally lo and mid city annex by the end of month, but is certain that it will be to utilize the very much needed fac of the entirely new two-story additi its 3rd and Brown streets headquarte the close of the year. Each of the is 100 by 200 feet, and they will be exclusively for the storage of leaf u perfect conditions of preservation. pacity production is being conduct all the 23 factories in the G. H. P. c

Trying to Meet Big Demand

An additional branch factory of Consolidated Cigar Corporation has opened in Lancaster, Pa., at the corn Prince and Ross streets. It is a story building, and will be used pa larly for the manufacture of F George in Londres size and at the of 150,000 per day. The corporatio ports being oversold on Henry Geor at least 1,500,000, the biggest sho being for the western territory. Ma C. M. Taylor, of the local branch at and Wharton streets, is keeping o tions at absolute capacity, and then in the effort to accommodate pat The 44 Cigar Sales Corporation als ports being heavily oversold on 44 the new Invincible shape, followin intensive sales campaign prosecuted u the personal direction of Sales Ma Louis I. Levinson, in the city, with a large centrally located stores feat the brand in conjunction with elab displays in both store and window.

In Attractive Holiday Dres

An especially attractive holiday ing in 40's will be made by P. C. weiler & Bros. Co., 927 Sansom stre its Lew Wallace, Ivanhoe and La M leaders. Edward M. Laing, of the organization is traveling through n ern Pennsylvania and New York stat

Preparing for Vast Campaign

A national campaign of unusual is being planned by Otto Eisenlol Bros., 932 Market street, on Cinco Henriettas.

Pending the meeting of the credito the financially embarrassed cigar m facturing firm of the Hyperion C New Haven, Conn., the John P. feather local branch here is being ducted as usual. The Kilfeather C located at New Haven, Conn., and a over a year and a half ago opened a factory on the third floor of the buil 37 North Second street, and later over the lower floor vacated on the solution of the Halpern Cigar Co employs fifty hands and manufacture

...ings to Produce Good Tobacco

...ce there has been little scientific in...gational work done with tobacco ... the line of producing color, only ...w things are known as to why one ...er gets a good crop whereas an... gets poor quality from an equally ... piece of ground. We do not know ... a scientific standpoint the things ...produce color. We turn our atten...very few years to some new variety ...is supposed to cure better than any ..., only to be equally disappointed by ... Something, then, other than the va... must be responsible.

... order to teach the practical produc... of tobacco to our class in Agricul... in Fleming county, without these ...tific facts to guide us, we determined ...d from the producers of good to... themselves their own practices and ... to find if they agreed in any meas...upon the things that were responsible ...quality in a crop. Going to the de...y houses we secured the names of ...men who had sold crops averaging a ... advance payment. The twelve men ... were thus surveyed received an aver... of 14.4 cents per pound as an advance ... had sold 75,100 pounds. Here is what they practice in growing their crops:

Eight of these men preferred Kelley seed, while all the remainder gave it as their second choice. Two preferred Judy's Pride, one Golden Seed Leaf, and one Standard Burley. All preferred heavy sod land upon which to grow their crops and took clover sod as second. Not one liked timothy sod. Fall or winter plowing was popular over spring, and all desired to begin cultivation of the ground about corn-planting time, so that the moisture would be conserved. Six of the farmers used fertilizer, three using complete goods and three using acid phosphate only.

Ten men said that the plants of the first two pullings from the bed were far superior to those that were pulled later. Mr. Collins, whose tobacco drew an advance of $17.05, believes that good, early plants are half of the job in producing a good crop.

The majority liked the setter in preference to setting by hand, and gave it as their opinion that the wire worms are not worse following it. These farmers set their tobacco at distances of 16 to 20 inches in rows three and one-half feet apart. Clean, shallow cultivation is practiced by all and little hoeing was used.

The number differed as to the number of times that tobacco should be topped, some completing the job at two operations, while others topped frequently. This, then, seems to be a point of minor importance, as they all had good crops. All, however, topped at a medium height and did not allow the plants to bloom long before topping.

All agreed that long suckers pulled only once was a very bad practice. This point is one that has been frequently disagreed upon, and we are glad to notice that all of these good crops were handled in the same way. One farmer expresses this point well in saying that you cannot pull your crop off and throw it down between the rows and yet expect to haul it to the barn. Eight of these men pulled the suckers short (2 to 4 inches), while the other four pulled them at a medium length (4 to 8 inches).

All preferred medium early cutting after two sets of suckers had been pulled. Eight allowed the crop to stand two or three days after the last suckering, while four cut immediately.

The majority of these men liked the standard width barn without extra sheds for curing. Sixteen sticksp per rail is all that most of these men hang. Some leave out sticks opposite the doors and ventilators for the free passage of the air. All agreed that barns should be provided with top ventilators.

The majority preferred to strip as soon as the tobacco was cured sufficient and to bulk as rapidly as stripped to prevent loss of color.

Summing up, these twelve producers of good tobacco receive a good price for their crops because they follow certain methods. They get good prices because they do not trust to luck. They believe in good ground, good, early plants and setting, reasonable cultivation, topping when the bud is still small, keeping the suckers pulled off, and plenty of barn room. To these they add cars in stripping and grading.—L. A. BRADFORD.

Women Prisoners Are Not Allowed to Smoke

DENVER, Colo., Oct. 5.—Female prisoners in the Colorado state penitentiary are no longer permitted the solace of smoking within the walls of the institution, according to Warden Thomas Tynan. The male prisoners are to be allowed to continue the use of the weed, however.

In answer to protests against his action, Warden Tynan said: "It doesn't look well to see women smoke. If they want to smoke, let 'em keep out of the penitentiary."

Look ahead

Today's sales are important—but what about tomorrow's?

Build for tomorrow too. Sell cigars that repeat—tomorrow, the next day and the next.

That's the way Girards sell. Smokers try them on reputation and buy them on quality.

Sell Girards and build a bigger, better trade.

York County News

(*Continued from page* 45)

would cover 193 miles. This firm during the month shipped to different parts of the United States a total of 2,450,000 cigars.

David A. Horn, of the Tampa Cigar Co., Red Lion, who was accompanied by his son, Charles W. Horn, returned October 3 from Florida, where he went to purchase tobacco.

Practically all the cigar factories in the city and county worked only part time last week, in order to give the employees an opportunity to attend the county fair held in York. During the week, daily flights over the fair grounds were made by Lieutenant Karl S. Ort, aviator for the Manchester Cigar Co., who dropped literature advertising the company's popular five-cent cigar, samples of which were also distributed by tiny parachutes. Miss Alice Snyder, a stenographer in the employ of the Manchester Cigar Co., accompanied Lieutenant Ort on one of the flights. It is needless to say that the novel advertising stunt of the Manchester Cigar Co. made a hit and resulted in much publicity for the Havana Cadet. J. F. Reichard, of this city, proprietor of the Manchester Cigar Co., is delighted with the results.

Chicago

(*Continued from page* 31)

in a few days for a road trip to book more holiday orders for Don Sebastian cigars.

The annual International Live Stock Exposition will be held here Dec. 1-8. Special rates have been decided on by the railroads. Hotels have already been booked to capacity by the visitors who are to attend. Cigar dealers anticipate a brisk business.

The Demand Grows

La Palina steps along fast. The call for the 15-cent Magnolia and two-for-25-cent Senator size is bigger than ever.

Wm. J. Seidenberg, of New York, and Harry L. Harris, general manager of the Wm. J. Seidenberg Corp's Chicago branch, returned today from Milwaukee, where they covered the Cream City trade. They visited practically all of the Pancho Arango cigar dealers.—H. L. H.

Aid to Growers

(*Continued from page* 28)

it will cover 1,000 cigars. Although it costs from 10 to 20 times as much as the domestic wrapper, it is largely used by the trade.

"Another discovery of importance is that of steam serilization of tobacco beds. Before this innovation, the grower sometimes had great difficulty in growing plants for transplanting. They would become diseased, and weeds caused much trouble. Now both of these difficulties are eliminated by use of the steam sterilizer, which kills the weeds and destroys the disease organisms.

"One of the most destructive diseases is known as mosaic, but the investigators of the department have succeeded in coping with this, also the disease known as 'sand drown.' The department has found that it was not too much sand, as supposed, but the lack of magnesia that affected the plants, and so this supposed disease has now been fully overcome.

"Some of the greatest advances have been made in the field of plant breeding. A number of varieties have been developed. During the progress of certain experiments it was found that the length of the day influenced the growth, flowering and fruiting of plants. This discovery attracted the attention of scientists throughout the world, and promises to produce great scientific and practical results.

"In districts where tobacco is cured without artificial heat there is occasionally a great loss because of bad curing. Experiments carried on by the department have shown that a certain amount of heat used at the critical time will make it possible to cure the tobacco just as it would be cured if the right weather conditions existed from start to finish.

"The department's entomologists, too, have been working out results along the line of fighting insect pests. Arsenate of lead has been developed as a substitute for paris green, and it is estimated that this has effected a large saving. The tobacco beetle, destructive to stored and manufactured tobacco, is now controlled by fumigation, a process worked out by the department.

"Yet, there still remain many problems confronting the growers, handlers and manufacturers, but the scientists of the department are at work upon them, and needless to say, we may anticipate further worth-while resculls from their efforts."

Burley Election

(*Continued from page* 41)

C. Stone, James N. Kehoe, Bush W. Allin, Judge Robert W. Bingham and H. Kirby Bourne.

The nine new members of the board were sworn in, as were McCormick and Gordon, the new directors-at-large. Judge Bingham was unable to be present.

Besides re-electing him director-at-large by unanimous standing vote, the board also adopted a resolution expressing "thanks, grateful appreciation to and confidence in Judge Robert W. Bingham for the signal service rendered by him to the tobacco growers of the entire burley district."

Judge I. H. Thurman, of Springfield, R. P. Taylor, of Winchester, and Perry B. Gaines, of Carollton, appointed by the president members of the credentials committee, reported the credentials of the directors-elect in proper form and the oath was administered to them by Notary Public B. P. Anderson. Judge Thurman administered the oath to the two directors-at-large.

Miss Carmel Hallmeyer, of the legal department, which has been actively after contract-breakers in all parts of the district recently, reported on its work to the directors, as did the social service department and the field service. Actions against contract-breakers have been brought in Ohio, Kentucky and Indiana, and in the latter state, despite the fact that there is no co-operative marketing act, an important injunction suit was won temporarily at least, in the circuit court at Madison.

The social service department, of which Miss Verna Elsinger is the head, has organized community locals in a number of counties and is proceeding to organize in others as requested by the local members of the association. This department was declared by the president to have a high educational value and to be doing a valuable work among the growers, their wives and children. Miss Elsinger made a detailed report of the work of her department.

Chief William Collins, of the field service reported 91,706 members to date, with progress being made in Tennessee, Missouri and Virginia, in new territory, as well as contracts coming from all parts of the territory already organized, more than 21,000 members having been added in the past year.

Delegations of growers were present from Indiana, Ohio and Kentucky counties and remained interested spectators of the session.

The afternoon session, which did not close until 6 o'clock, was devoted to discussion of the problems of the association.

The new directors sworn in were: George McCormick, of Stout, Ohio, director-at-large for Ohio; Jerry N. Gordon, of Metamora, Ind., director-at-large for Indiana; George Roth, of Manchester, Ohio; John E. Brown, of Shelbyville, Ky.; Ed. Burke, of Paris, Ky.; W. O. Protsman, Vevay, Ind.; Bedford Macklin, Frankfort, Ky.; Chambers Perry, Mt. Olivet, Ky.; Clark B. Patterson, Mt. Sterling, Ky.; J. H. Woods, Stanford, Ky.; Peyton R. McMakin, Bloomfield, Ky.

Connecticut's "Best Crop"

(*Continued from page* 33)

tween buyer and seller, so that neither is in a contented frame of mind until the crop has been bundled, sweated and assorted.

Members of the Connecticut Valley Tobacco Association are not in the worrying class. They have adopted a method of handling and selling their tobacco which prevents disputes between buyer and seller. Since the advent of this organization a great change has taken place in the tobacco market. Practically 90 per cent of the out-of-doors crop of tobacco is now controlled by the association, so that this crop is not at the mercy of speculators as in years gone by.

The Havana Seed pools have been made up and sampling has been going on for some weeks. The result is that ne ly all of the Havana Seed leaf has b sold. About the first of October Broad Leaf sampling was completed millions of pounds of this tobacco will put on the market. When the sampl is finished the various "pools" or gra will be cased and any grower will able to find his dark leaf or medium l in one of the higher priced pools and other grades in a lower priced pool. E case of tobacco is consigned to a p according to its merits and the final s tlement with each grower will be on merits of his tobacco. The swea broadleaf shows that the majority of has come through that process in v fine shape, there being very little m or damage of any kind. It is expec that the average price received by grower will be far in excess of that used to realize under the old method lack of method of marketing his cr Under the association's plan he wa until all assorting is finished before gets his final payments but the amount so much larger that it compensates h for the slower method of marketing.

Preliminary arrangements are be made by President Alsop of the Assoc tion for the financing of the 1923 cr so that first payments on this crop m be made much earlier than was possi last year. Each succeeding year of t association's existence will make for more prompt marketing of the crop a payment for the same.—*East Hartfo Gazette.*

TOBACCO

A WEEKLY TRADE REVIEW

ESTABLISHED 1886

Vol. LXXVI. No. 25 NEW YORK, OCTOBER 18, 1923 Per Annum, $3.00 Per Copy, 10c

ilwaukee's Wholesale Cigar Trade Improving

stribution Last Week Was Greater Than Previous Week—Greatly Exceeded Volume for Same Period in 1922—Home Factories Working Full Force—Holiday Orders.

ILWAUKEE, WIS., Oct. 12.—The olesale distribution of cigars was ater this week than the previous week, greatly exceeded the volume for the ne period of last year. All the local ories are working full force and are y sending out early holiday orders. ollections are not equal to the same iod of last year, and jobbers are itening up on credits.

uckingham cut plug is placed with the dealers. It "sure" does sell at cents.

eter Goebel is placed all over the . This brand is distributed by the alla Tobacco Co. It comes in sizes t retail at from 5 cents to 3 for 50 ts.

Feature Marshall Field

Marshall Field from the Coraza Cigar , is on sale. Several dealers feature cigar.

Small Packings at Regular Price

he trade has been advised that there to be no extra charge this year for es of 25. Some of the factories are ring boxes of 10 at no increased cost. he Mi Lola Cigar Co. is booking ers for Mi Lola, 10 in a box, that are ed at $75.00.

n the bill-boards we see Mozart cigar . The Mozarts are well placed and e a steady call.

arge Tuxedo signs are shown on the -boards around the city.

ean Trimberger, manager of the Mil-ukee Club, gave Wm. J. Seidenberg, en he was here a few days ago, a ristmas order for Milwaukee Club ection de Luxe in Boite nature pack-s. It was a life size order, and was 6 sizes of this Tampa made cigar.

On the Counters

a Palina, 2 for 25 cent size, in glass s are on the tops of all the counters. neat metal stand to hold the glass is given the dealer.

rank Suavely, who has been cigar barment manager at the Hotel Pfister, no longer with the hotel. Some weeks he left on a vacation and has not n seen since.

he United Stores offer 10 certificates h each one dollar purchase. This ans a saving to the smoker of 10%.

Webster, La Palina and Mi Lola ars occupy many window spaces. ese three leaders are seen all over city.

Pipe Favorites

n pipes such makes as Dunhill, Well-ton, Kaywoodie and Redmanol, are all rage.

A Leader

n the bill-boards is shown La Palina ars. This Java wrapped cigar from Congress Cigar Co., is the leading ler in all the stores.

Maintain Popularity

Brands of National reputation that d forth in the windows are Muriel, Producto, Mozart, El Roi Tan and bsters,

The Lewis-Leidersdorf stores show several sizes of Cuesta-Rey. At present their stores are featuring Portage, a 5 cent cigar that they guarantee is 40% Havana.

In the stores of Leo Abraham Co., Webster, Corina and Farragut cigars get all the window displays. These are the featured brands with the house of Abraham.

Several very lage bill-board signs of Corina cigars from Escalante & Co. of Tampa, have been placed here.

Maurice Rothschild, who covers this territory for the Congress Cigar Co., has returned from Chicago where he was called on account of the illness of his mother.

Jake Paley of the Congress Cigar Co., is booked for a visit here in the very near future.

Fred Weil, the well known down-town retailer, features Pancho Arango, Mi Subrino, Cuesta-Rey, Francisco G. Bances, Charles the Great and Gonzalez.

Java Wrapped

In Milwaukee more Java wrapped cigars are smoked than all other kinds. As a clear Havana city it is a very poor one, for outside of the big dealers, hotels and clubs, very few clear Havana cigars are on sale.

Dick Peyton was a recent visitor here for F. Garcia & Bros.

The Pfister Hotel shows a larger line of cigars than many dealers here. Besides all the popular brands they feature Salve and Hotel Pfister, two private brands that have a fine sale.

F. W. H. Clarke, well known to the trade here, has succeeded J. P. Brill in this territory as representative of the Wm. J. Seidenberg Corp. He will feature Virginia Lee and Pancho Arango.

Pleased With Business

A trade visitor was Wm. J. Seidenberg of New York, who covered the trade with his general manager Harry L. Harris. The Pfister and Plankinton Hotels, Milwaukee Club, Fred Crombie, Fred Weil Cigar Co., Cavalla Tobacco Co., and the Wisconsin Club, all sell his Pancho Arango, made in bond cigars. He left here for Chicago, feeling very happy and with a fat bunch of rush orders.

Classy Displays

Several classy Chancellor cigar displays are seen in the windows. Harvester is also displayed.

D. Kurman & Co. are kept busy rushing out Webster and Corina cigars to their customers.

Has Busy Store

Fred Crombie features Pancho Arango, Francisco Bances, La Palina and Garcia y Vega. He has a busy store in the Chamber of Commerce Building.

Poppers Ace, a big 10 cent Corona size, in tins, is on all the counters. This cigar is placed here by the Badger Tobacco Co.

The Cavalla Tobacco Co. uses as leaders Flor de Melba, John Ruskin and Peter Goebel cigars. They sell with all the trade and the Milwaukee distribution is 100 per cent.—H.

Survey Near Completion

WASHINGTON, D. C., Oct. 17.—It is understood that the survey of the tobacco business which is being made by the Tobacco Section of the Department of Commerce for Congress is nearing completion.

During the closing hours of the last session of Congress an appropriation of $400,000 was made to make a survey of so-called foreign monopolies. Part of this sum is being expended by the Department of Commerce to look into the tobacco situation.

A survey of the tobacco industry in both the United States and abroad is being made, and it is hoped and expected that this report will be ready for Congress when it convenes in December.

It is said that the field work on the tobacco survey, insofar as the United States is concerned, is about completed, and the report is being prepared in written form. All of the European reports are not yet on hand but those in charge are of the opinion that the report will be ready for Congress when it convenes. —LAMM.

Funeral of Jos. Holzman

The body of Joseph Holzman, prominent leaf tobacco importer and packer, who died at Baden-by-Wien, a suburb of Vienna, September 21, arrived in New York last Wednesday on the White Star liner *Majestic*, accompanied by his widow, Lena Holzman, and their son, Harold, with whom he had been touring Europe, when taken ill. Funeral services were held the following day, Thursday, and were attended by many of the tobacco industry.

Mr. Holzman, who was widely respected and admired in the trade, had been in business at 185 Water street, New York, for more than 30 years. His three sons, Samuel, Abraham and Harold, are members of the Holzman organization.

Salesmen Nominate

At a meeting of the Tobacco Salesmen's Association of New York, held in the Hotel Pennsylvania last Friday, Jesse G. Powell introduced a resolution to the effect that the organization should be represented on the Board of Directors of the Tobacco Merchants Association, and that a copy of the resolution should be sent to the T. M. A.

The annual election of the Association is to take place on Friday, November 9, and the following members have been nominated for office:

President, Sidney J. Freeman;
First Vice-President, Jack Eckstein;
Second Vice-President, Sam Fordin;
Treasurer, Max Berliner;
Financial Secretary, Leo Reiders;
Recording Secretary, Harry Block;
Sergeant-at-Arms, Clarence Bendheim and Charles Karnow;

Board of Directors, 3 year term, Bert Berl, Herman Goldwater and Sidney S. Powell; 2 year term, Irving Lipsig, Jos. Freeman, A. J. Silett, Chas. Kohlberg, Louis Freis and Sam Scharfstein; 1 year term, Melvin Yanous, Morris Baylis, Jack Shapiro and Jack Littman;

Delegates to T. M. A., Albert Freeman, Jesse G. Powell; Alternates, Edward Johnson, Gordon H. Newman and Jack Cohen.

Delegates to National Council of Traveling Salesmen's Associations, Albert Freeman, Jack Cohen, A. J. Silett, Leo M. Lehman and Morris Baylis; Alternates, Melvin Yanous, D. Scharfstein, Louis Spivak and Sam Scharfstein.

Last Fall Inscription

At the Fall Sumatra inscription, which was held in Amsterdam last Friday, 300 bales were purchased for American consumption. The principal buyers included the General Cigar Co., H. Duys & Co., and A. Bornholdt & Co.

Patterson Bros. Tobacco Corporation

With regard to the recent report to the effect that F. A. de Pilis is no longer connected with Patterson Bros. Tobacco Corporation, Mr. de Pilis, in a statement sent out under yesterday's date, says:

"We wish to inform you that the information given out by one of the trade papers in New York in connection with Patterson Bros. is not correct, as Mr. de Pilis is still chairman of the Board, Director of the Company, and one of the three voting trustees; in fact, representing 15,000 B. shares in control of the company. There are no real or serious financial difficulties in said corporation but the dispute about the influence and management."

Hear Final Argument in Price Fixing Cases

WASHINGTON, D. C., Oct. 15.—The Federal Trade Commission last week heard final argument in three tobacco cases, including docket No. 886, which is the Commission's case against the Wholesale Tobacco and Cigar Dealers' Association of Philadelphia, the American Tobacco Co. and P. Lorillard Co.; docket No. 908 against the Tobacco Products Corp., and docket 909 against the P. Lorillard Co.

Edward L. Smith, attorney for the Commission, made the final argument in all of these cases for the Commission. In the first named case, John Walsh, former chief counsel of the Commission, represented the Philadelphia Association; Joseph Taulane represented the Philadelphia jobbers, and Charles Caldwell the Lorillard Co. Junius Parker, chief counsel of the American Tobacco Co., was also present but did not participate in the argument. In the last named cases, the Lorillard Co. was also represented by Mr. Caldwell, while Alfred Allen and Charles S. Moore represented the Cincinnati jobbers; Clarence Dorger the Jaszen Grocery Co., and H. H. Shelton the Tobacco Products Corp.

Mr. Smith in his argument before the Commission in connection with its case against the Wholesale Tobacco and Cigar Dealers' Association of Philadelphia,

briefly explained the case, in which the Commission charges that the Association set retail prices for Philadelphia and that the two tobacco companies aided the Association. He told the Commission that in order to check up the members of the Association that the Association itself hired a spy or investigator whose sole duty was to purchase tobacco products to see that the prices were being maintained. Where it was found that the Association member was not maintaining the price and would not line up the two companies refused to sell to him.

The price agreement, Mr. Smith pointed out in his argument, was not between the manufacturer and the retailer, but the manufacturer and his distributer. The principal, however, he said, is the same and for this reason he likened the case to the Beech-Nut decision of the United States Supreme Court.

The conspiracy, Mr. Smith pointed out to the Commission, was between the members of the Philadelphia Association and the manufacturer. He told the Commission, also, that the Philadelphia Association had an agreement with a similar association in Baltimore in connection with the sale of tobacco products in Delaware.

The question of what are known as sub-jobbers was also taken up by Mr. Smith in his argument. These merchants always get their supply from the wholesaler, he said, but when the Philadelphia Association was formed the sub-jobbers were required to pay as much for their stocks as the retailer and they were therefore forced out of business.

Mr. Smith attempted to show the co-operation between the Association, the American Tobacco Co. and the P. Lorillard Co.

He said that the records showed that an agreement was entered into between the American Tobacco Co. and the Association whereby a wholesaler cutting his price was cut off by the company from its jobbers list.

In his argument before the Commission in connection with the other cases, Mr. Smith gave a detailed picture of the tobacco jobbing situation in Cincinnati and Covington across the river. He said that in June, 1921, an association of jobbers was formed in Cincinnati at the suggestion of the Lorillard Co., and that an agreement was entered into between the jobbers and the company similar to the Philadelphia agreement, by which any member who did not maintain the retail price would be stricken from the jobbers list of the Lorillard Co.

Mr. Smith stated specifically in his argument that at least one jobber was stricken from the Lorillard list but he was later reinstated when he agreed to maintain the uniform price set by the association. He said that the report in this case sustained the original complaint of the Commission. By cutting jobbers off of their list, Mr. Smith said, the Lorillard Co. protected the Association.

The Association only functioned a short time because it ceased to operate as soon as the Commission's investigation was begun. The record Mr. Smith contended in his argument showed that at least one of the jobbers admitted in his answer to the Commission that an agreement had been entered into by the jobbers for fixing prices. The Association, he stated, was merely an instrument of the tobacco manufacturers.

Companies Make Flat Denials

Attorneys for the tobacco manufacturers, the jobbers, and the associations in these cases, in answering Mr. Smith's arguments denied emphatically that there was any price maintenance agreement and they took exception to many points brought out by Mr. Smith. They also denied that there was any connection whatsoever between these cases and the Beech-Nut decision of the United States Supreme Court. The cases have not gone to the Commission for final action. —Lamm.

S. C. Warehouse Burned

Manning, S. C., Oct. 13.—Fire of an unascertained origin completely destroyed the Clarks tobacco warehouse conducted by R. Terrel, and over $15,000 worth of tobacco. It is probable that the insurance will cover the loss.

San Francisco Has a "Lull" But Still Is Hopeful

Several Things Contribute to Unexpected Quiet Period—Dealers Believe Fall and Holiday Season Will Be Good—Some Notable Improvements and Progress Being Made.

San Francisco, Cal., Oct. 9—A lull in the local cigar trade of the bay region, especially in the retail business, seems to be rather general. In fact the month of September saw a period of quiet in many lines beyond what was reasonably anticipated. A number of causes may have contributed. Extra exertions and donations, due to the Japanese disaster; a feeling of suspense over the nearby Berkeley disaster; diminution of building operations; late season in many farm crops, and unusual building activity in many of the smaller interior places, all tending to hold workers and take workers from the city—these and many other minor causes have operated together. Yet the belief in a good fall and holiday season ahead is undiminished.

No Time for Pessimism

One firm that is pushing right ahead in spite of any pessimistic predictions others may have, is the Joseph Rinaldo Cigar Co. They have built up a handsome city distribution, and are looking about for new worlds to conquer. The present capacity of their sales force has about been reached, so they are contemplating reinforcements. The San Felice campaign still continues to bring satisfactory results. The Imporico, their Porto Rico brand, is beginning to bring in repeats. They are already beginning to get in special stock for the Holiday trade in tens, and twenty-fives in most of their brands. These include the Say So, the Champagne, the Van Camp, Charles the Great, and Imporico.

Improving Landscape

The San Felice promoter has been busy on the east side of the bay also. Along the long window spaces of the jobbing house of H. & S. C. Bercovitch, he has stretched San Felice posters to take the place of window curtains, and the San Felice is becoming a more familiar part of the landscape in the local retail stands.

No Long Shots for Long Run

Milligan & Penn, the new people who have taken over the stand of A. C. Hirschfeld & Co., at 72 Ellis St., are quite pleased with the prospects as indicated by the way that business is coming in. They are both old-timers, so that they have numerous friends. They are cleaning out all the old stock, and preparing to give their customers the best to be had. Homer Penn, in charge of the cigar department of the business, says there will be no "long-shot" goods, for the sake of profits. Good values with smaller profits and satisfied customers, he considers to be the best foundation for a steady and long-lived business. He speaks well of the calls he has for Vicente Nieto, Pancho Arango and Garcia y Vega.

Five Cent Winners

Alhambra, Coral Key, Gato Key Westers, Idilita, and La Minerva are prize winners in the Five-cent display of Julian Solmonson in the Spreckles building.

Rehabilitating Berkeley

One of the best stands on the East side of the bay is that of Lou Goldstone at the corner of University and Shattuck streets, in Berkeley. That part of Berkeley is seeing quite a boost. Several six story buildings are in course of construction and larger ones being planned. So the trade that swings round the cigar corner is multiplying. A noticeable feature of the trade is the growing call for Manila cigars.

Notable Window Display

Detroit Hand Made cigars constitute an attractive window at the Ash Stand at the corner of Fourteenth and Franklin streets, opposite the Southern Pacific Depot, in Oakland. A splendid Gato display is making the other window show off.

The two Samuels stores on the corners of Twelfth and Broadway in Oakland are enjoying an unusually good pipe trade. They keep a large and well-assorted and attractive stock, in which appear most of the familiar pipe names. Don Domo cigars, their specialty, continue popular.

Making Their Own

Oakland has quite a number of small cigar makers, who for the most part run local stands, and make a few cigars that have acquired more or less local patronage. There is A. A. Kaiser, who is doing well with his Oakland and M. & S. cigars, not ambitious to rival the big fellows, but holding a loyal personal trade. Then there is the Famous cigar, put out by H. J. Hoettels, with good local fame. And the 110 put out by Coney, who has moved over by the car barns and captured most of his old comrades working the lever. The Coronado, the La Corderito, Cash and El Carmel of the L. D. M. Co., at 2407 Broadway, also enjoy a good location. J. Gleichman, who recently purchased the stand at Tenth and Washington streets, also indulges in a few of his own for customers who insist there is nothing else to smoke.

Pleased With Business

Michalitschke Bros. & Co., distributors, have been having good success with Henry the Fourth. Their first shipment of Epcos is very pleasing to them, and they are predicting a well-satisfied bunch of customers.

A. Dobbins, 399 Geary street, San Francisco, who has been on the ailing list for some time, has sold his cigar business to Reg. Levy, formerly a Vallejo dealer.

Charles E. Kirkwood has opened a Pacific Coast agency for Eline of Milwaukee in the new Matson Building.

H. F. Hastings has sold his cigar stand at 733 Broadway, Oakland, to Jos. Stringer.

Loyd T. Newton of Stockton has purchased the interest of his partner Andrew G. Wolff, and will continue the cigar business at 432 E. Main street.

Austria Now Takes More American Tobacco

Washington, D. C., Oct. 13.—The present demand for American tobacco in Austria is greater than in 1913, though present prices of American tobacco in Austria are four times higher than in that year, says Assistant Trade Commissioner P. M. Terry in a report to the Department of Commerce.

In 1913 the Austrian monopoly used approximately 75,000,000 pounds of tobacco, of which about 62,000,000 pounds came from Hungary and about 4,200,000 pounds from the United States. The imports from the United States during the fiscal years 1921, 1922 and 1923 were about 4,400,000 pounds, 2,200,000 pounds, and 4,300,000 pounds, respectively. The American tobacco consisted principally of Virginia and Kentucky darks, though small quantities came from Maryland and Ohio.

At present the greater portions of the tobacco used for making cigars comes from the Dutch East Indies, Brazil and Cuba; that for making cigarettes from southeastern Europe, and that for smoking from Hungary, America and Dutch East Indies. The monopoly operates 10 factories, employing about 6,000 persons.

Austria prefers Turkish tobacco for cigarettes, not wholly on account of a cultivated taste, but because it can be bought more cheaply than American tobacco. Also, the price in the Netherlands on Java tobacco, which can be used for the same purpose, is lower than American tobacco.

Austria imports tobacco through ports of Bremen, Amsterdam, Rotterd and Trieste. The usual custom of p ment is 80 per cent of the purchase p when goods are aboard steamer and balance on arrival of tobacco at the tory, although the monopoly has cash to very reliable firms on shipn of tobacco.

A Campaign Against Pric Fixing

If one can judge by its recent activi the Federal Trade Commission planned a forceful campaign against practice of manufacturers of tr marked articles of controlling the re price to the consumer. Within the few days three prosecutions have b brought for this alleged violation of law against unfair competition, against a collar manufacturer, the sec against a hosiery manufacturer and third against a shirt manufacturer. three are accused of operating plans forcing retailers to resell their prod at fixed prices, which the Commiss contends is unfair competition in tha deprives the consumers of the pr lowering effect of real competi among dealers. Absolute control of resale price is undoubtedly unfair c petition, and if the Commission prove that what these concerns amounted to more than threatening to dealers off or cutting them off if t cut the price, then they will be fo guilty and forced to abandon their p The law has been well settled by United States Supreme Court in Victor talking machine case and ot cases, that the seller of a patented unpatented artices who does not hav monopoly and who is selling his go outright, cannot legally fix the re price, or at least cannot *enforce* resale price, because that would be suming a dictatorship over goods wh are no longer his. Nevertheless, all c have freely conceded the seller's ri if he has no monopoly, to refuse to goods to a cutter, even for the sole son that he cut prices. The diffic which the manufacturer therefore who wants to fix resale prices, is to m his scheme stop with what amounts substance to no more than letting trade know what he thinks the re price ought to be with the implied th to cut off anybody who doesn't obse it. That far he can go legally, but he goes further and actually controls resale price, he is undoubtedly guilty unfair competition.

The price control plant which the F eral Trade Commission charges was in the three cases referred to, is subst tially as follows. There are slight v iances in the three cases, but the sche are essentially the same:—

"(a) It issues price lists to the re trade in which its various establis resale prices for its said products are forth.

"(b) It requests and insists that tail dealers handling its said prod shall observe said resale prices.

"(c) It makes it generally known the trade by letters, circulars, salesm interviews and by other means that requires all distributors handling its products to maintain and enforce resale prices, and that it will refuse ther sales to all dealers failing to obse and maintain the same.

"(d) It procures from retail deal handling its said products reports instances of non-maintenance of said sale prices by other distributors handl said products.

"(e) It requires its traveling sa men and other agents to report, and t do report the names of retail deal who are selling, or have sold responde said products at prices other than s established resale prices.

"(f) It uses the information recei through reports mentioned in (d) (e) above to induce and compel the servance of said resale prices by all its said distributors so reported to it

"(1) Exacting promises and ass ances from such distributors that th will thereafter maintain respondent's sale prices; and

"(2) Threatening that if such pri

r not maintained no further shipments j be made to such distributors by re- ident or others.

.g) It keeps a blacklist or other rd in which are entered the names of ers handling its products who have d to observe and maintain its said le prices.

h) It refuses to supply such dealers further goods until they have given factory assurance for the main- nce of such prices in the future.

i) It adds new retail dealers to its of distributors upon receiving assur- s or promises of said distributors they will observe and maintain said le prices.

j) It seeks and secures the co- ation of its distributors, customers agents generally in preventing others have failed to maintain said resale s from obtaining respondent's said ucts.

.k) It utilizes a system of numbers ped on containers of its products to le it to trace the source of supply of rs failing to maintain said resale s in order to prevent such dealers ming further goods.

l) It has used, and now uses other valent co-operative means and meth- for the enforcement of its said sys- of resale prices; all with the result its said prices have been and are rally observed and maintained ughout the United States by distrib- s handling said products."

his goes pretty far—I don't see how nufacturer could do more to uphold rices—but it doesn't necessarily fol- that the manufacturer who does this exceeded his legal rights. If I were nding this case I should take the nd that fundamentally I had the to refuse to sell cutters, and there- all I did was to keep track of the in order to learn whom to refuse ell. Spotting dealers who cut your and cutting them off is not in my ment unfair competition, and will r in my opinion be held to be by any t. You don't have to sell *anybody*— can cut off this dealer, and that one, out reason or system, until you are g but one concern. That would inly reduce—it would even destroy mpetition, but nobody would ques- your right to do it. It may be that of the things these manufacturers went beyond the line, but there is a g chance that the Supreme Court refuse to declare the fundamentals of scheme illegal.—*Copyright,* 1923, *by n J. Buckley.*

Manila Cigar Market

gar shipments from Manila to east- ports the past week were not heavy. lers handling Manila lines in the rn territory are anxiously awaiting ery of merchandise to meet trade nds. Inasmuch as October, Novem- and December are the best months e year for the cigar trade, the short- of Manilas at this particular time strengthened the market for this type gar.

porters report a further increase in lemand for the better sizes in Class nd there is also a call for more s retailing at two for 15 cents to for a quarter. The so-called bundled ilas of standard grade, clean and free damage, have also found favor in in localities. The tendency, how- is to increase the better shaped s retailing at 5 cents. This, no t, is the result of consumer demands better 5-cent cigar than many job- and dealers were willing to handle he past six months.

turally the bundled Manila cigar, res type, has returned a better profit cigars banded and packed 50 to the Under the competition and owing e distribution of millions of the bet- rade cigars that go to the consumer nickel, these jobbers and dealers eing forced by the smoker to handle etter grades.—*N. Y. Commercial.*

Ordered Shipment Made

ke Mazer, of the Mazer Cigar Mfg. Detroit, made a brief survey of the leaf market last week, and arranged hipments of tobacco to the Mazer ries.

Cleveland Conducts Successful Business Show

Big Palace of Progress Exhibition Holds Interest of Community—All Phases of Industry Fully Featured—Best Cigar Brands Well Displayed—Comings and Goings.

CLEVELAND, Ohio, Oct. 13.—The biggest topic of conversation among Cleveland business men these days is the big Palace of Progress exhibition at Public Auditorium. Exhibits of all phases of industry by firms and men who are leaders in their respective fields feature the show. This grand and glorious business of ours of selling the people something to smoke is very capably represented at the exhibition by displays by many of the best dealers and manufacturers. The Marshall Drug Co., in particular, impressed the throngs that continue to view the proceedings, with admirable displays and arrangements of all the best brands that they carry and they carry none but the best. Out of town people help swell the number of visitors at the show and also help to swell the old receipt in the cash drawer for the retail merchant.

Ed Lieb a Visitor

Edward J. Lieb, who makes the good La Ginna and Rutalis cigars, surprised us with a visit this last week. Mr. Lieb made the rounds of the tradespeople here and succeeded, as he always does, in placing plenty of good orders for his brands.

Pipe Boosting

Ed Murray, representing A. Frankau & Co., made his way through this territory the other day, showing the dealers a good value in his 3B pipe. With this pipe to attract and hold trade Mr. Murray finds it no great difficulty to land many orders through this way.

Cuesta-Rey

Sig Mayer, Cuesta-Rey wizard, saw to it this week that every dealer he approached had a good supply of Cuesta-Rey cigars in all sizes on hand to carry him for a good time. Mr. Mayer finds his stays in the Fifth City very profitable, in fine returns and orders.

Familiar K of G Comes In

Tom Gray, well-known knight of the grip, selling Tadema cigars, made his way through Cleveland town this week. Mr. Gray has the art of selling down to a science and with a fine brand of cigars to handle, sees to it that every Cleveland dealer has plenty of Tademas on hand all the time.

Ben Block with Louis Klein

It was learned this week that Ben Block, for a great many years with Park & Tilford, as their representative in this territory, had resigned from this concern to accept a position with the Louis Klein Cigar Co., whose headquarters are in the Cleveland Athletic Club Building. Mr. Block will have charge of Cleveland sales of cigars for which Louis Klein has the distribution privileges. A big number is the Bering cigar and with a man like Ben Block at the helm this cigar will have easy sailing in local business waters. It was further reported that Sam Gottleib, formerly with Antonio Roig & Langsdorf, was to go with Park & Tilford to cover Mr. Block's old territory and keep things moving for Tilfords, Mi Favoritas, Tilcrests and Telegrafos.

Pushing Popper's Ace

All the local dealers are giving Popper's Ace cigar some real whole hearted attention. The reason? First it is a real smoke and deserves it. It offers proven value to the careful smoker. Another reason? Sam Adler, the real Popper "Ace," was in town and after leaving every dealer found himself, a live, healthy Popper booster.

Van Winters Gets Back

Van Winters got back today from a week's trip to New York. Mr. Winters tells us that things are going through in big shape in Gotham Town for La Palinas but they are going no better than they are through this region. It takes a good man to keep the sale of a good cigar going. La Palina is the good cigar and well, Van is the man, all right.

Holiday Ordering

It's not a bit too early to order holiday cigars and supplies. So say those who ought to know. An unprecedented holiday rush is looked for and expected. Orders are coming in regularly for local dealers and the factories will have plenty of time to take care of the many and varied wants of the local merchants.—HERB.

Interesting Events in Near Future

The second International Tobacco Industries Exposition to be held January 28 to February 2, at the 71st Regiment Armory, New York, and with various conferences, banquets and other events of; by and for, various branches of the industry at the Armory and the Hotel McAlpin, promises to be vastly larger, more complete and comprehensive and consequently of greater value to the entire industry in both trade channels and to the general public or tobacco consumer, according to Harry A. Cochrane, President of the National Exposition Company, managers of the Tobacco Show.

Porto Rican Government Tobacco Agency, C. A. Bond and David F. Morris, Philippine Tobacco Agents, representing the United States Bureau of Insular Affairs and the Connecticut Valley Tobacco Association, will have interesting exhibits, the latter promising a miniature tobacco shed or curing barn and the largest cigar ever made.

Leaf tobacco will also be shown by Durlach Brothers, H. Duys & Company, Max Gans Sons, Inc., Hamburger Brothers and Company, Selgas and Company, Charles J. Waxelbaum, Isidore Cohen, Cullman Brothers and others.

Cigar exhibits have already been arranged for by Bobrow Brothers, Inc., Josephson Brothers, Frau and Pena, U. S. Bureau of Insular Affairs, Manila cigars; Porto Rico Government, C. H. Wilson Inc., Ca Gral De Tobaccos De Filipinas, Determan and Company, H. L. Judell and Company, E. M. Elam, Henry Ottenberg and Company, Henry W. Peabody and Company, Laks Cigar Company, Manila Cigar Company, M. F. D. Scanlan, Marx Bros. Cigar Company, Philippine Tobacco Co., Sidney J. Freeman and Sons, Wooley and Company, S. Frieder and Son and others.

Among the machinery exhibits will be the Universal Tobacco Machine Company showing Model L Universal Short Filler Bunch Machine, 1922 Planetary Gear Driven Stripping and Booking Machine, Model M Universal Non Booking Stripping Machine, Model F Universal Stem Crushing and Booking Machine, Model F Universal Stem Crushing Non Booking Machine, Model E-1 Wrapper Register, Model D 2 Wrapper Register, Model C 3 and Model J Leaf Counting Device. Other machinery exhibits will be made by Himoff Tobacco Machine Company, Miller Du Brul & Peters Mfg. Co., Read Machinery Co., Cardwell Machine Co. and others.

Prominent in the list of additional exhibitors already signed for space are Adolph Frankau Co. Inc. Lithographic goods; Heywood, Strasser and Voigt, labels, bands and advertising matter; Alfred Orlik, pipes and smokers articles; F. E. Richardson and Company, gum, paste and licorice; Rochester Folding Box Company, Peter J. Schweitzer Inc., cigarette papers; Tobacco Trade Journal Co., World Match Co., Tobacco World Corporation, *U. S. Tobacco Journal,* Master Tobacco Pouch Co., Griffin Chokr Co., and the National Board, Tobacco Salesmen's Associations of the United States.

Additions to the list of exhibitors are being made almost daily, according to announcement from the headquarters of the Show management in the McAlpin Hotel.

The Tobacco Trades Exposition passed the experimental stage with the first exposition held last year. It proved its value to every branch of the industry even in its first year and consequently the second show will be of greater proportions and value in every way with new features based on our experiences and lessons of the first year, said Mr. Cochrane this week.

Burley Co-op Wins Rowland "Dumping" Suit

LEXINGTON, Ky., Oct. 18.—The Burley Tobacco Growers' Co-operative Association won its case against P. A. Rowland, of Grant county, who resisted its suit for damages for "dumping" his crop, on the ground that the association did not actually have 75 per cent of the tobacco signed up when the pool was declared on and the further alleged fact that contracts were fraudulently obtained. Judge Sidney Gaines, of Burlington, directed the jury to return a verdict for the association and the jury gave it damages of $500 and an additional $50 for attorneys' fees.

The decision is important aside from the fact of victory for the association in that it sets a precedent for similar claims that the association did not have 75 per cent of the crop signed up. It was said, at the time of the suit against Garrett Watts, of Fayette county, that a similar claim would be made by him in resisting the association's suit for $7,500 damages and fees. Under the decision of the court in the Rowland case there can be no question of the sign-up and this has been uniformly the decision of courts in previous cases in other states in which that claim was advanced by the contract breaker.

In the Bath county cases continuances were granted in most of them at the request of the defendants. Two of the suits of the association were dismissed by Judge Henry R. Prewitt when it was found that in both cases the defendants were minors. The continued cases will come up at the next term of court.

The field service received a telegram from Colonel Charles B. Rogan, at Bristol, Tenn., with the news that former Governor John I. Cox has signed a contract. Governor Cox is one of the most influential farmers in his section of Tennessee.

Pipe Tariff Hearing Again Postponed

(*Special Telegram to* TOBACCO)

WASHINGTON, D. C., Oct. 16.—The hearing on the tariff rates on pipes, which was to have been held tomorrow, has been postponed until October 31, by the Tariff Commission.—LAMM.

At the Canadian Border

Persons who have had occasion to cross the border into Canada, report that the Dominion customs officials are mighty strict about the enforcement of regulations regarding the importation of tobaccos. Up to a short time ago some thought nothing of taking three or four hundred cigars and a carton or two of their favorite cigarettes when going to Canada. Those days are gone forever. It was explained to me by a Canadian customs man that residents of Canada returning from the United States have no rights at all in importing tobacco, while non-residents are allowed 40 cigars, 100 cigarettes or one pound of tobacco only, and then for personal use alone.—*Boston Post.*

Owensboro Outlook

OWENSBORO, Ky., Oct. 13.—Continued fair cool weather for the week has practically eliminated all further danger of house-burn in the tobacco crop, and tobacco seems to be curing fairly well, although weather alternating somewhat between humid and dry seems better for curing than specially dry weather.—J. S. PHELON.

An Open Letter to the Cigar Trade

MR. JOBBER AND MR. RETAILER,
EVERYWHERE.

Gentlemen:

Won't you let us try and convince you of the advisability of devoting a little of your time to studying the Manila Cigar business?

Whilst many of you are well acquainted with the general conditions dealing with the growing and marketing of Manila Tobacco—the most important of which are:

The latitude and longitude of the Philippine Islands and particularly of the Cagayan and Isabela Provinces, where the best Philippine Tobacco is grown;

The construction of the large factories in the City of Manila, many of which are veritable palaces;

The keen Government supervision of the industry;

The manner in which cigars are shipped from the Philippines;

The special holds provided with the latest ventilating apparatus on the palatial steamers plying the Pacific Ocean, and last but most important,

The Guarantee Stamp of Quality of the Government of the Philippines—

Still there are many dealers in this country who insist upon maintaining an indifferent attitude towards this rapidly increasing profitable business.

Won't you write us for samples and our booklet giving you lots of valuable information on the Manila Cigar Industry?

It is *yours* for the asking, and don't you know that "one man tells another," and that there is a rapidly growing duplicating business being done in Manila Cigars?

We are here to serve you and solicit your consideration of the famous products of the GERMINAL CIGAR & CIGARETTE COMPANY, MANILA, PHILIPPINE ISLANDS, FOR WHICH WE ARE AGENTS.

Yours very truly,

Frank E. Childs & Bro., Inc.

per *Ernest J. Moss*

Manager Cigar Department.

Politics and Football Distance Trade Up-State

'alling Leaves Look Like Orders, But Ain't—Money Tight, Too, In Country—Bill Faust Has New Pet—Oleaginous, Says Dillon—S. 28 Sounds Like a Submarine, But Ain't —From Mizzouri—A Movie Fable—Postal from Ralph.

New York State Capitol District Conversation-Week, 1923.

"Glad that's over, Sam!" sighed Jim ubb, just returning from the Giant-warf Serious to the equally well-known tablishment of Stubb & Ash, Inc. ever so tired in all my life! Seems to I haven't been to bed this week!"

"Nor have yuh been on the road git-' anney orders, either," mentioned Sam sh, throwing all the extra sporting itions in the Camel case wastebox. ere we should be now bookin' busi-ss, y'unnerstan, for the holidays even, yuh take it a week off to see them re nine-pins knock the balls around, y! An' we ain't got it so much fed-al reserve flowin' in the gate as them nbo's in N'Yawk, neither!"

rom the Nile Comes a Crocodile

"No, collections are slow, all over," reed Bill Faust, late commissioner-neral for the Scotten-Dillon Company, troit, but now approaching with a w story. "From what jobbers tell me country trade is quiet, and money is ry tight.

'But this is probably only local. And, ismuch as I'm quitting the tobacco me here for the cigarette business, I ould worry. Fact is, I've just signed with the new Melachrino house in w York to handle their Crocodile garette in New York and Pennsylvania.

'This new Melachrino plant has noth-g whatsoever to do with the old firm. Melachrino, the originator of the old e, is behind this new factory. He in-ds to manufacture and distribute his ods in the entire country, but will us first right here in the home ter-ory."

on-Stop, Non-Skid, On Castor Oil

'Back I am, too, in the home territo-" laughed Eddie Dillon, former ilip Morris ambassador, but also en-ing the Hot Chair Club with another ry. "Went out to Cleveland to take r the State of Ohio for Lorillard.

'Department of little cigars was my w line. And I had all the old stand-s, including my ancient friend, Old rginias. Got a quarter-million in-ase on the goods out there, then quit. me back from Cleveland to Albany ctically non-stop, riding day and ht, in my lil' fliv. Did it all castor-lubrication, best for any car, an avia-n expert told me out there in Ohio, ere airships were born, not made!

'Have an appointment here to meet a resentative of another factory. Will you later just how we come out. ppose I'll have to stick to the cigar-e business, simply can't quit entirely, know. Been at it too long."

ling Up Form S. 28 With Murads

'So have I," admitted Tom Slattery, ispering to the buyer that he still ac-ted orders for the P. Lorillard Com-ny or S. Anargyros, a-corporation. ot so I can write Murad orders on here form S. 28 without looking at pencil.

Gratis deal now on Mogul of 10 per-t in Murad merchandise. Going over Also the usual drop shipment gratis 10 per cent additional on all our nds sold to retailers in quantity. kes our prices very favorable now—eave it to you!"

From Mizzouri, All The Way

And I'll leave this to you, also," ke up S. H. Miller, right off the -choo cars from Boonville, which is Missouri home of the Corn Cob e—and, more particularly, the Phoe-American Pipe Works. "This idea giving me an order for some of the which have made Yankee Doodle ous all over the world!

For corn cob pipes are selling! More now than in many previous years. withstanding the apparent prosperi-of the country, the corn cob pipe smoker is more numerous than ever! And he wants the famous old original Missouri cob, you bet you!

Proof Per Photo, You Poor Fish

"That's what we go fishin' with," remarked Bizzy-Izzy Mayer, the greatest fisherman in the cigar business—of the Congress Cigar Co. "See here. Look at that picture! What do you see? Hey? Fish? Sure it's fish—three of 'em!

"Caught them at my summer home on Lake George. Yep! All bass, too! Weighed—lemme see—oh, something like nearly so much as a thousand La Palina senators—without the lead seals! Caught em, too, without hardly anything but a bent pin on a clothes line!

"Big time stuff, this fishin'. I like it! Just like takin' orders for La Palinas! A cinch! Yessir! Schufelt here can tell you about that! Merely take out your order-sheet, and you say, 'How many'—that's all!

"People want this Java wrapped cigar! Yessir! They never hardly heard of La Palinas up this way two years ago. Now look at 'em! Even the small dealers now buy 'em in thousand lots! Big sizes, great value, I tell you! Smokers appreciate it! Ask Sam Paley! Ask—why, ask anybody!"

Jim Gets a Post Card from Ralph

"Ask anybody if they've seen Ralph Gans," requested Jim Stubb, opening up his accumulation of mail to find—nary a check! "Got a card from Ralph the other day saying he'd be in town this week. Haven't seen him. Maybe I missed him while down to the games. Anyway, Ralph says he organized a new firm, called the Gans Cigar Company, Inc., and I wish him lots of luck!"—The Smoker.

Tri-State Co-ops Rejoice and Make Merry

Raleigh, N. C., Oct. 13.—More than a million pounds of tobacco reached the warehouses of the Tobacco Growers Co-operative Association last Tuesday when the co-ops of the Old Belt of Virginia and North Carolina began their second year of marketing with rejoicing and mass meetings that have never been equaled in the history of the association. Every market which opened this week in Virginia staged a mass meeting in the association warehouses on October 9, when John R. Hutcheson, Director of the Virginia Extention Service, Oliver J. Sands, Executive Manager of the tobacco association, T. C. Watkins, Jr., its Director of Warehouses, Southall Farrar and J. H. Quisenberry, Virginia District Agents of Extension and practically every elected director of the marketing association took part in the celebration of the second year of orderly marketing.

Old Belt members of the co-operative association are greatly rejoiced over the high cash advances which they were paid on their first deliveries this week. In view of the fact that the Danville market averaged less than eighteen cents on the opening day and prices everywhere upon the auction floors have proved disappointing to the Virginia and Western Carolina farmers, the higher payments by the marketing association this year have greatly encouraged its members.

The association has increased its first cash payments to the members on every grade which was brought in this week. Their cash advancement on wrappers runs from $25 to $32.50. On the best grades of cutters the association is paying over twenty dollars in first advances while an even greater proportionate increase was noted in the first payments for lugs and primings.

The flood of tobacco which reached the association on its opening day following its receipts in the South Carolina belt which have been almost half as large again as those of last year makes it evident that the co-ops will receive a larger proportion of the crop this year than last in both the Carolinas and Virginia.

The adoption of the co-operative marketing plan by President Coolidge, as the solution of the difficulties of the wheat farmers in the Northwest and the liberal credits being planned to meet their needs, and those of other co-operative associations, both through the War Finance Corporation and the intermediate credit banks, adds another national endorsement to the practical benefit of the co-operative organization which 250,000 American tobacco farmers have successfully adopted in a dozen states.—S. D. Frissell.

Estimate of 1923 Yield

Washington, Oct 3.—While the federal Department of Agriculture was issuing a statement estimating this year's average yield of tobacco in the United States at 830 pounds to the acre compared with 767 pounds last year, the reclamation bureau of the interior department was issuing a statement that 2,000 pounds to the acre was the yield on the Huntley reclamation project in Montana this year. Some of the leaves measured 17 inches in width and 40 inches in length, it was stated, the tobacco being white burley and selling at 50 cents a pound.

With Kentucky's crop for this year estimated by the Department of Agriculture at 507,125,000 pounds, it probably will be a long time before Montana will be a competitor in tobacco production. The estimate for this year in Kentucky is compared with a yield in 1922 of 446,-250,000 pounds and an average for the five years from 1917 to 1921 of 445,022,000 pounds.

The total tobacco crop of the United States is estimated for this year at 1,461,-711,000 pounds, compared with 1,324,-840,000 pounds in 1922 and an average for the five preceding years of 1,361,149,-000 pounds.

The estimates for this year's crop show a heavy decrease from the estimates of September 1. Heavy losses from frost in Wisconsin and Ohio, and wet, unfavorable weather in Kentucky and Tennessee are given as the cause. Half the crop in Wisconsin was reported injured by frost.

Kentucky's corn crop for this year is estimated at 92,715,000 bushels, compared with 88,080,000 bushels last year and an average of 94,542,000 bushels for the five preceding years. The value is estimated to be greater than that of last year by more than $18,000,000.

The value on the farm for this year's crop is estimated to be 98 cents compared with 82 cents at the same time last year. At 98 cents, the estimated corn crop of Kentucky ought to be worth considerable more than $90,000,000.

Burley Co-op Activities

Lexington, Ky., Oct. 15.—The addition of 517 members to the Burley Tobacco Growers' Co-operative Association the past week increased the membership to 92,077, according to the tabulation of field reports in the office of Chief William Collins, of the field service division, today.

Reports from Tennessee are to the effect that 90 per cent of the farmers of Sullivan county, one of the new sections in which the burley co-operative is seeking members in east Tennessee, have signed the contract and that all are expected to do so before the new crop is marketed. These growers will deliver their crops at Kingsport this fall.

Tobacco growers of Nelson county, Ky., and their women folk will organize community locals next week, starting with a general meeting at Bloomfield Saturday, at which Miss Verna Elsinger, director of social service, and Director J. D. Craddock, of Munfordville, will speak. Both men and women will be members of these locals as in other counties in which they have been established.

Growers of Bedford county, Tennessee, will meet at Shelbyville next Saturday. J. Sherman Porter, editor of the *Burley Tobacco Grower,* will be the speaker for the burley co-operative. The Farm Bureau and the Tennessee Agricultural Department also will be represented.

Director of Warehouses Ralph M. Barker will go to Barnesville and Woodsfield, Ohio, this week in connection with the establishment of receiving plants in new territory and preparations for their opening in time to receive the 1923 tobacco.—P.

Reported Scarcity of Spanish Cedar Denied

Articles have appeared recently, both in the daily newspapers and in the relevant trade publications, that there is a scarcity of supplies of Spanish cedar.

These articles have evidently been inspired by the reported efforts of the U. S. Department of Agriculture to produce artificial means of imparting to other and cheaper woods the characteristic properties of genuine Spanish cedar.

Spanish cedar seems to be naturally and exclusively adaptable for making boxes to contain fine cigars, and as all attempts have failed thus far to produce any satisfactory substitute, it must be gratifying for the cigar manufacturer to have it on good authority that the supply of the genuine wood is ample for all requirements.

Shipments of Spanish cedar are continuous, and ample for all normal as well as the growing demands from cigar box manufacturers, and the various importers are in a position to supply this wood in almost any quantities from stocks constantly on hand in the United States.

Spanish cedar grows in Cuba, Mexico and Central and South America, and the operations of selecting and cutting the standing trees, and the bringing out, loading and shipment of the logs, require expert and careful judgment. The texture of this wood, like its other qualities, is delicate; and except under most favorable conditions the logs are liable to early deterioration. Therefore, it is important that the supply of sound and fresh-cut wood never be greatly in excess of immediate requirements. The reports of cedar scarcity referred to may be due to this seeming closeness between supplies and consumption; but it is actually and otherwise entirely unfounded.

The representative importing firms state, that though no complete survey has been made of Spanish cedar trees known to be growing over extensive areas in the Tropics, that from certain data at hand the supply in sight will be sufficient for generations to come, even if every cigar box used were to be made exclusively of Spanish cedar.

Keeping in Touch With the Tobacco Situation

Washington, D. C., Oct. 16.—Charles Dushkind of the Tobacco Merchants Association of the United States was in Washington last week visiting government officials who have to do with the tobacco industry. Mr. Dushkind stated that he was visiting Washington for no special purpose, but merely to keep in touch with government officials.—Lamm.

Oxford Offerings

Oxford, N. C., Oct. 13.—Total sales for the week, 226,610 pounds; average price per 100 pounds, $17.28. Sold to date 1923 crop, 568,734 pounds; average price per 100 pounds, $16.40. Sold to same time last year, 2,058,543 pounds; average price per 100 pounds, $26.62.—W. A. Adams Co.

Returning to Gotham

W. P. Miller, of the American Sumatra Tobacco Co., 131 Water street, is due to return to Gotham next Monday, after a long and successful tour of the Middle West.

To Return from Europe

Benno Rosenwald, of E. Rosenwald & Bro., 145 Water street, who has been enjoying a long European vacation, is scheduled to return from Cherbourg, October 24, on the White Star liner *Majestic.*

Rost, John Keller, Quay Minnich. —ROUNDER

Wasserman Trade Expanding

The B. Wasserman Co., Inc., importers of Havana cigars and jobbers of domestic cigars, of 77 Chambers street, are enjoying a tremendous Fall trade, and also anticipate a record Christmas demand for their high-class brands. Additional help has been engaged for the floor and the office, in order to cope with the rush of orders.

To Confer With Associates

Emil K. Manus, Amsterdam associate of Manus, Muller & Co., Inc., importers of Sumatra and Java tobaccos, of 152 Water Street, is due to arrive in New York next Saturday, to confer with the local members of this powerful organization. He will be accompanied by his wife.

Studying Virginia Market

L. F. Theyskens, of Theyskens & Shaw, Inc., importers and exporters of leaf tobacco, of 136 Front Street, is surveying the Virginia market for his corporation and studying the prevailing conditions in that section of the country.

Western Business Good

Harry Lloyd, of D. Dreux, Inc., leaf dealers, of 136 Water Street, is having a busy time in the West, where his Sumatra wrappers are in great demand.

To Study Local Conditions

Mariano Alvarez, of A. Santaella & Co., Tampa cigar manufacturers, is in New York, and intends to make a close study of conditions in the metropolitan area.

Get the Trade News from Tobacco

All successful men use the toasted process in their business!

THEY call it Efficiency. But it amounts to the same thing.

Because, stripped of its purely technical significance, the Toasted Process is efficiency by another name. It represents the last ounce of effort which, in all the productions of men, distinguishes the isolated examples of quality. Toasting the tobaccos in LUCKY STRIKE CIGARETTES adds 45 minutes to the cost of production, but it seals in the flavor.

And we would rather save the flavor than the time.

CHANGE TO THE BRAND THAT NEVER CHANGES

k Co-op Salary List Abbreviated

SVILLE, Ky., Oct. 15.—As had been ited, the board of directors of the Tobacco Growers' Co-operative As- on, at its meeting here last week, drastic reductions in the salary list chief officials located at the head- rs here and in the five grade divi- into which the dark district has ivided.

ound figures $65,000 was looped off lary list. Some of this was in re- ns of the annual stipend of the men ed. In other cases it was brought by combining two offices. And nother way for getting results was ing out the office altogether.

this time the members nor any- lse can say that facts and figures cept under cover. Last year there uch criticism because the salary as not officially announced. This he critics have no such complaint, t only were the figures announced ry instance but the salaries for the ear were also given so that every might see just exactly what s were made as well as just how each man is to get during the en- twelve months.

directors were to have taken on Tuesday of last week, at which he executive committee was to lay them recommendations as to the s to be paid and men to fill the . The executive committee delayed dings somewhat by not being ready their report promptly Tuesday ng, but after the directors got to- they spent much time in consider- ne situation before proceeding to action. Therefore, it was Wednes- fternoon before the list was finally eted and the directors adjourned.

paring of salaries began at the of the list with the office of general ger, to which R. E. Cooper, of Hop- lle, formerly director of ware- s, was elected. John J. Hanratty, Clarksville, Tenn., the former general ger was not an applicant for the again. The salary was reduced $25,000 to $18,000 per year.

new position, that of assistant manager exclusively for all air grades, was created with a salary 000, and J. C. Engelhard, of Owens- was named to fill the place. Mr. hard is one of the best known and highly regarded tobacco men of this ory, and it will be his especial job courage the sale of the air cured cos (of which there are several ent grades produced in this district) lew avenues of sale for them, etc.

e $10,000 position as associate di- of warehouses, together with that sistant director of warehouses with ary of $7,200, and five warehouse visors whose salaries aggregated 0, were abolished outright, this cut reducing expenses $37,900.

e offices of secretary and treasurer, h had formerly paid salaries of) and $9,000 respectively, were com- and the salary fixed at $6,000, and is D. Farmer, of Adams, Tenn., was d to the place.

B. Cornette, of Hopkinsville, was d to the important position of di- r of warehouses which was left va- when R. E. Cooper was made gen- manager. The salary was reduced $15,000 to $10,000.

K. Smith, of Clarksville, Tenn., was ected as chief grader, and the salary reduced from $12,000 to $10,000.

nes West, of Hopkinsville, was re- ed as assistant grader for the dark district. The salary was reduced $10,000 to $8,000.

nes Newman, of Logan County, was assistant grader for the One er district, the salary being $5,000 ast $6,000 last year. Mr. Newman is w man in the position, but is capable has had years of experience.

chard O'Flynn, of Owensboro, was assistant grader for the Green r district, salary $5,000 against $6,000 year.

r the Stemming district W. E. Roy- of Henderson, was named as assist- rader, and his salary was fixed at 0 against $6,000 last year.

her places filled and the salaries are llows:

Leith V. Watkins, manager of accounting department, $7,200, the same as last year.

Lock Humphries, assistant manager for western division of Dark Fired district, $750 a month to October 1, 1924, against $9,000 per annum last year.

W. D. Cooper, assistant manager for eastern division of Dark Fired District, $7,200.

C. D. Brown, assistant manager for Green River district, $7,200, against $10,000 last year.

B. R. Miller, assistant manager for Stemming district, $7,200, against $8,000 last year.

E. P. Harris, assistant manager for One-Sucker district, $7,200, the same as last year.

Members of the Executive Committee, $2,400 each, the same as last year.

George Covington, Mayfield, supervisor of warehouse property maintenance, $5,000, against $7,200 last year.

B. D. Hill, revenue statistician, $3,600, unchanged.

John M. Farra, head of purchasing department, $4,800, unchanged.

L. C. Nisbett, head of traffic bureau, $4,000, unchanged.

Clifton Rhodes, Chief of Field Service Division, $6,000, unchanged.

Harold A. Ruby, chief of publicity department and editor of *Tobacco Planter*, $3,600, unchanged.

One new position, that of assistant sales manager for all air-cured types of tobacco, with a salary of $8,000, was created, and J. C. Engelhard, Owensboro, was named to fill it.

W. F. Bradshaw, Paducah, previously had been elected president, and W. C. Broadbent, Cadiz, and R. J. McDaniel, Springfield, Tenn., vice-presidents. These three, with Judge Bingham and T. C. Jones, Hopkinsville, constitute the executive committee.

But these reductions are expected to be only a beginning for what is yet to come. These affect only the head officials, and chiefly in the headquarters here. But it is said to be the policy to follow out the same plan all down the line and make changes wherever they are thought to be permissible. Wherever the salaries now being paid are regarded as equitable and just, no changes will be made. But if they are considered too high they will be trimmed to meet the conditions. Also it is expected that a number of the minor jobs can be eliminated entirely, and wherever this is found to be the case it will be done.

In fact, directors have adopted a policy of retrenchment and economical management, and they do not propose to stop with merely giving attention to salaries. An indication of this was in the instruction given to Mr. Engelhard, to make a survey of the organization and operation of the association in its several depart-

Chicago Factories Charge Same for Fortieths

Various Firms Announce That No Advance Will Be Made on the Smaller Packings—Booking Orders at Regular Prices —Receiving Heavy Shipments from Tampa.

CHICAGO, Oct. 13.—Some of the factories are out with the announcement that there will not be any increase in the price of the 1/40 packings this year. Julius Fernbach & Co., makers of Cyrilla and General Forbes; Perfecto Garcia & Bros., who make some Perfecto Garcia; Wengler & Mandell, makers of the well known Tom Palmer, and Celestino Vega & Co., producers of La Venga, are all booking orders at no advance.

Fred L. Wells is receiving heavy shipments these days from Santaella & Co. of Tampa. His leading sellers are Optimo and Ravisloe Club, both made by Santaella & Co.

Gonzales' Tales of Smoke, a long, slender mild Havana smoker is now on sale in all the better stores. This Cuban smoker is made by Eduardo Gonzales & Co., of Tampa, and retails at 10 cents.

With A. M. Seckbach & Bro. Redencion and D. A. Garcia have the call. Other well known brands featured at their two stores are Medalist, Cuesta-Ray, Lucius, Lozano, La Palina and Cressidas.

Secures Larger Quarters

The Wm. J. Seidenberg Corp., having out-grown the quarters occupied for the past year, has taken over the second floor in the building at 241 West Van Buren street. The Pancho-Arango and Virginia-Lee brands are repeating wherever placed and new accounts are being taken on daily all over the middle west.

Louis Cohen, head of the El Predomino Cigar Co., of Philadelphia, has been here on a visit to the Chicago office. Della Casa, the firm's leading brand, is in all the better stores here.

F. W. H. Clarke, until recently representing the McKee-Marks Co. of Iowa, has resigned and is now with the Wm. J. Seidenberg Corp. He will cover the middle west states.

A. Arias, who represents Fernandez, La Rosa & Co. of Tampa, is adding new customers each day to his list. I met him in Sol. M. Bernstein & Co's. store writing up an order for several sizes of La Camporita, clear Havana cigars.

Collision Not Serious

Bumped into Henry Hamann, who for several years was Chicago manager for Schulte. Henry still makes his headquarters at Schulte's Chicago Depot, and for the time being is attending to some special detail work for the firm. He will latter enter the brokerage game.

Now Selling a Real Garcia

Our old friend, Richard ("Dick") Peyton, who has represented several well known Pennsylvania factories, has become a clear Havana salesman. He has taken over this territory for F. Garcia & Bros., of Tampa and New York, and is opening many new accounts for this well known bonded cigar.

Pancho-Arango is the leader these days with Max Kaplan, the progressive dealer in the Medinah building. Ten high priced sizes are displayed in his show case.

H. Straus, who operates the cigar department in the drug store at Jackson and Wells streets, will feature S. P. V., Havana Resagos, the 5 cent Havana wrapped cigar from the Wm. J. Seidenberg Corp. of Tampa.

Among the Leaders

Spellman Mixtures is still a leader in the high grade smoking line. Louis Newman & Co., 180 West Madison street, are the sole distributors of this brand.

In Central Position

All the United stores have been devoting the center of their window displays to Herbert Tareyton cigarettes. Window signs also were shown on all the store windows. The United surely gave Herbert Tareyton a big boost up the ladder. The General Cigar Co. retail stores also featured Herbert Tareyton in full window displays.

In the Vanguard

El Producto shows great progress, and Clarence Hirschhorn & Co. are very busy rushing out orders to the trade. Puritano at 2 for 25 cents; Bouquet at 10 cents, and Corona at 15 cents, are the sizes that sell most.

Holiday Orders

Christmas packings are already coming in and from all reports the dealers will be in good shape to handle the rush.

Pharmacy Now Open

Brill's Sheridan Beach Pharmacy has been opened by J. P. Brill in the Sheridan Beach Hotel. Pancho-Arango, Virginia Lee and Pan Aran cigars are featured in this finest drug store on the north side.

Prominently Featured

All the Schermerhorn stores feature large window displays of Portina, Sanchez and Haya and Personality cigars.

Giving Bands an Extra Value

"Save the Bands for a fountain pen," say the John Ruskin newspaper ads. "At 2 for 15 cents, they could be smaller but not better," quotes I. Lewis Cigar Mfg. Co., in the ad.

A handsome quarter page ad. of Milo Violet cigarettes was recently shown in Chicago. This dainty gold tip cigarette sells for 25 cents.

Geo. Hutt, reports a steady call for Pancho Arango and Garcia y Vega, both bonded cigars. Mr. Hutt caters exclusively to the private box trade.

After several weeks at his Chicago branch, Wm. J. Seidenberg has left for his New York headquarters. He is greatly pleased at the sale of his brands in the Middle West. While here he added three men to the local sales force. Several new packings of Virginia Lee and Pancho Arango cigars will shortly be introduced.

Keeping Up the Pace

Tennyson, a Mazer cigar, continues to sell big with the Sanders & Watson Cigar Co., at 10 cents and "worth more." They are seen on all the cases.

Alex Gurow, of the Recado Cigar Co., has no fault to find with business. Recado and Franz Lizst are placed in hundreds of Chicago stores. Many-Blanc's winner, a 2 for 15 cent cigar, made by the Recado Cigar Co., is also a big seller here.

Carries Good Line

The Black-Hawk Restaurant features La Venga, Webster, Cyrilla, Van Dyck, Lozano, La Palina, Tom Palmer, Robert Burns, La Corona, Bock, Romeo and Juliet, and Partigas cigars.—H. L. H.

Fred D. Marsh to Remain As New York Representative

Marcelino Perez & Co., makers of the Tuval and other famous brands of cigars, in making their final getaway from little old Gotham, issued the following announcement:

"In the interests of our customers and in order the better to cope with our greatly increased business we have decided to remove our New York headquarters and distributing office to our factory at Tampa, Fla.

"This consolidation at the point of production will result in more prompt and efficient service in the factory as well as greater co-ordination of our entire organization, particularly as regards production and sales.

"Fred D. Marsh will continue to represent us in the local New York City Market. He may be reached at Room No. 705, 97 Water St. Telephone Bowling Green 0757."

York County News

YORK, Pa., Oct. 15.—On the assumption that the government must pay its debts, and that the money would have to be secured from another source, the York County Cigar Manufacturers Association at its meeting last Monday night defeated a proposal to use its influence to have the tax on telegrams taken off. A request that the cigar men act for the repeal of the tax had been received from the Chicago Manufacturers Association.

An application for membership in the association from a Lancaster county tobacco broker had to be declined, as the constitution and by-laws provided for no members from outside York County. The members engaged in round table talks and later adjourned to a restaurant, where a luncheon was served.

Error Made in Tax Claim

Discovery of a $10,000 error in addition in the bureau of income tax at Washington, D. C., stayed proceedings against W. C. Frutinger & Co., cigar manufacturers, of Red Lion, for excess income tax and saved the concern $1,161. The returns were for 1920 and were made in 1921. W. C. Frutinger having been advised recently that proceedings were about to be instituted for the recovery of the money visited the bureau office in Washington and told the officials if the original papers were produced he was in a position to convince the chief that an error had been made. Some objection was made at first on the grounds that it would require six hours to locate the papers. Mr. Frutinger consented to wait and the error was discovered in the $10,000 column. A telegram was then sent calling off the proposed suit.

H. C. Neff, traveling representative of the Havana Cigar Co., Dover and Red Lion, is on a two weeks' business trip to Pittsburgh, Cleveland, Chicago and other mid-west cities.

Aerial Advertising

Advertising from the air has proved a paying investment for the Manchester Cigar Co., this city, according to the statement of R. N. Paris, sales manager. The Manchester Co. has four factories in the city and county of York and since Karl S. Ort, the aviator has been employed to make air flights and drop literature advertising the company's product, the Havana Cadet, the output of these factories has been trebled and the number of employes on the payroll has been increased from 500 to 600 in the past few months. Aviator Ort, following flights at the York fair, left on October 9 for Richmond and Norfolk, Va., where he will conduct an advertising campaign for the Manchester Co. The greater part of the month will be spent in the southern states, where he will visit the fairs. After finishing his work in the south, he expects to leave for San Francisco to attend the national convention of the American Legion and advertise the Havana Cadet. Lieutenant Ort has had over six years experience as an aviator, part of which was gained in the U. S. army during the World War.

Buys Raab Factory

The cigar factory in the Detweiler building, Wrightsville, which had been operated for the past 10 years by W. H. Raab & Son, Dallastown, was sold October 12, to Clarence Gable, cigar manufacturer of York. Mr. Gable will retain William M. Carr, who was foreman of the factory since it was started 10 years ago, as well as the entire working force. The factory started during the past week under the new management and is working full time. The factory under the old firm had been operating only three and four days per week for some time.

Son of His Father

Henry L. Haines, better known to baseball fans as "Hinkey" Haines, who broke into the World Series Championship baseball games on October 12, when he replaced "Babe" Ruth in right field for the Yankees, when Ruth was called to first base to replace Pipp, who turned his injured ankle, is a son of Henry L. Haines, of Red Lion, head of the Porto Rico Cigar Co., which has factories in Red Lion and Spry. The elder Haines was in New York, where he witnessed a number of games of the World Series.

Defends Manila Factories

MANILA, Oct. 8 (Associated Press).—Mauro Prieto, President of the Manila Tobacco Association, commenting on the resolution introduced at the convention of the American Federation of Labor at Portland, Ore., last week by President Gompers and other members of the International Cigarmakers' Union, asking for an investigation of labor conditions in the cigar industry in the Philippines, said today that Mr. Gompers and his associates must have received their information from persons unfamiliar with conditions. He declared that sanitary conditions in Manila's cigar factories are excellent.

THE SPORT-BRIAR

The Newest in Pipes!

ACTUAL SIZE

The SPORT-BRIAR has created a sensation among pipe-smokers everywhere it has been introduced, because it overcomes all the common objections to the ordinary pipe.

Be the first distributor of the SPORT-BRIAR in your city. It sells on sight at a margin of profit that makes it worth while for you to feature as one of your leading articles.

RETAILS FOR THREE DOLLARS

Here Are the Reasons Why the SPORT-BRIAR Should Be on the Counter and Display Case of Every up-to-date Cigar Merchant

1. Smokes as well in rain or high winds as indoors.
2. Absolutely prevents the scatter of ashes or sparks.
3. While holding as much tobacco as the ordinary pipe, it occupies no more room than a cigar, lights at the tip like a cigar and smokes any kind of tobacco.
4. Can be safely pocketed fully lighted, and will not bulge the clothes.
5. Made of the purest, selected real French briar by the most skillful workmen in France. Mechanically, it is a joy to see.
6. Its patented nicotine absorber (removable for cleansing) gives SPORT-BRIAR smokers the purest and coolest smoke in the world.

NEW YORK, THURSDAY, OCTOBER 18, 1923

TRIUMPH OF AMERICAN TOBACCO INDUSTRIES

American tobacco industries continue to enjoy phenomenal prosperity. The economic disorganization of the world does not appear to have in any manner affected the steady onward march of our tobacco industries to increased wealth and higher perfection. The recently issued statistics of the Bureau of the Census on the stocks of leaf tobacco afford most agreeable data for American tobacco men. They clearly show that every branch of the tobacco trade is sounder, more progressive and more active and profitable than ever before in this history of the country. Progress and success can be noted on every page of the tabulated figures.

The present area under tobacco cultivation in the United States is 1,725,000 acres, as compared with 1,427,000 acres in 1921, and 1,223,500 acres in 1914. The extraordinary demands for tobacco which set in after the beginning of the European war resulted in a pronounced increase in the areas of land devoted to tobacco crops, and this increased acreage gives every indication of being, not only kept up, but of increasing within the next few years. The acreage under tobacco is now more than double what it was in 1890.

All the states, practically, produce some tobacco. Certain of the eastern states are preeminent in tobacco growing. Kentucky, with an acreage of 525,000 is the champion producing state with North Carolina, with an acreage of 515,000 closely pressing for the honors. Virginia, (the banner state before the Civil War) was the principal growing state and now cultivates less than half the land under tobacco crops that Kentucky and North Carolina do. Kentucky surpassed Virginia in acreage in 1869 and has been increasing its acreage ever since. The acreage in Virginia has been almost stationary since 1914, whereas that of Tennessee has almost doubled in that time. Maryland, with an area of 35,000 acres and Georgia, with an area of 12,000 acres are showing active progressive increases in tobacco crops. The acreage under tobacco in the smaller producing states amounts to 30,000 acres. These are the least progressive of all the states, owing to the centralization of the manufacturing centers and the leading markets in the eastern states. The steadiness of the production in the central and western states plainly shows that, whenever market conditions require them to produce large crops, they are ready to meet any such demands as may be made.

The average yield of leaf tobacco per acre is an important matter. The census figures show that it is now equal to 768 pounds, as compared with 750 pounds in 1921, and 775 pounds in 1915. The greatest production per acre was made in 1911, when the average amounted to 894 pounds of leaf to the acre. The yields of the various states differ considerably. Pennsylvania, with a yield of 1,320 pounds per acre produces the largest crops. Georgia, with a yield of 540 pounds per acre, produces the lightest crops. The average production of the smaller states is 1,028 pounds per acre. This is nearly twice the production of Georgia. The production in Connecticut averages 1,250 pounds of leaf per acre. This is more than double the returns given in Georgia. Indiana has an average yield of 900 pounds per acre; Ohio gives the same return, while Wisconsin closely follows Connecticut with an average return of 1,140 pounds per acre. The comparative production figures show that in 1879, the average yield of leaf per acre in all the states was 740 pounds. The returns in the individual states in that year were generally a little below the present annual yields. Here, we see the care that tobacco planters are giving to their crops. It must not be imagined that the production of tobacco farms can be kept up year after year for nearly half a century without the exercise of great agricultural skill and pluck. The tobacco plant rapidly exhausts the soil which has to be constantly refertilized. The plant also degenerates and bears smaller and lighter leaves when inbred too much. The tobacco grower, therefore, in order to maintain his production from a given area must constantly improve the strain of his seedlings and properly fertilize his soil. That this is done in all the tobacco growing states is well shown by the latest governmental statistics. Tobacco farming is keeping well abreast with the demands of manufacturers for increased production of improved leaf. Here again we see a plain indication of the sound state of the American tobacco industries. Any defects in the superstructure would have, in some manner, been reflected in the industries forming the basis. But these are shown to be in a surprisingly sound and vigorous condition.

The tobacco crops in 1922 were raised in 42 states on 450,000 farms. In 1909 there were 326,919 farms, in 45 states, contributing to the tobacco yield. This shows that there are more farms, more agriculturalists, more capital used in tobacco growing, and more interest among farmers in the tobacco industries than was ever before shown. Tobacco has always shown itself to be a profitable crop when well husbanded and no product of the farm has a more stable market. There need be little wonder at tobacco culture attracting the attention of the most enlightened of the farmers.

The leading producing county is Lancaster, Pa., which has long been celebrated for its cigar leaf tobacco. Its last production amounted to 49,335,407 pounds, which is almost tenfold greater than the general average of the leading producing counties. Hartford county, Conn., another great producer of cigar leaf, was the next in order of production, with a yield of 35,479,206 pounds. Only selected land is employed in raising the best grades of tobacco. Therefore, we find that among the 91 counties in the United States foremost in tobacco production, and which have an annual production of more than 5,000,000 pounds of leaf, 39 are in Kentucky, 23 are in North Carolina, 7 each in Tennessee and South Carolina, 5 in Ohio, 4 in Virginia and 3 in Wisconsin. Lancaster county, in Pennsylvania is the principal seat of the tobacco growing industry in that state, and Hartford county holds a position of similar eminence in Connecticut. Hampden county is the chief source of the cigar leaf produced in Massachusetts.

There are two main classifications of American tobacco: cigar type and smoking, chewing and export type. Only one-sixth of the American tobacco production is of the cigar type and this is principally produced in Pennsylvania, Connecticut, Ohio, Wisconsin and Florida. These cigar type crops are very profitable and large capital investments are made in them. Comparative statistics indicate that they are increasingly profitable crops and that both th acreage and production of cigar leaf crops a increasing. The total production of cigar le last year was 1,126,802,000 pounds from a area of 1,551,000 acres.

Bright yellow and burley are the premi smoking, chewing and export tobacco types. Th southern states are the principal producers o these. Last year, the burley crop amounted t 271,710,000 pounds as compared with 277,650 000 pounds in 1919 and 312,000,000 pounds 1918. The yield of bright yellow leaf in 192 was 757,000,000 pounds compared with 807 000,000 pounds in 1918. Production of thes two fine types of cigarette and smoking tobacc has been fairly steady since 1914.

The United States is the greatest produce and manufacturer of tobacco, our imports o leaf and tobacco products are also very larg One half of the imports of unmanufactured to bacco come from Turkey and Greece. Our grea cigarette manufacturing industries are respon sible for these imports. Cuba supplies us wit 24,000,000 pounds of leaf, chiefly employed i the cigar trades, while the Dutch East Indie send yearly over 6,000,000 pounds of choice lea suitable for cigar wrappers. Almost every Eu ropean country figures in the customs lists o exporters of unmanufactured tobacco to th United States. The Philippines, of course, an Porto Rico, are also large exporters to Amer ica. China and Korea are regular exporters Last year, our imports of leaf tobacco fron China amounted to 105,000 pounds, as compare with 5,785,737 pounds in 1910, and 60,10 pounds came from Korea. The large import from China in 1918 were due to unusual mar ket conditions caused by the war. Hawaii is small exporter. Its contribution to our import last year amounted to 751 pounds.

Manila exported to the United States in 1922 cigars and cheroots valued at $3,856,791 as com pared with $5,548,720 in 1918. Our imports o cigars from the Philippines show a decided ten dency to increase and cigar salesmen within th United States report that there are many sign indicating a growing taste among cigar smoker for Manila cigars.

Our imports of cigars and cheroots fron Porto Rico were valued at $6,600,304 in 192 as compared with $10,113,000 in 1918. Th reputation of Porto Rico's tobacco is well estab lished.

Our exports of tobacco and tobacco product constitute an important source of Nationa wealth. The aggregate value of tobacco and to bacco products exported in 1922 was $173,299, 078. In 1918, they were valued at $152,965, 286. The leaf tobacco exported in 1922 wa valued at $145,984,982. Great Britain's impor tant tobacco manufacturing industries are chiefl based on our leaf tobacco and, naturally, ou chief purchasers of crude tobacco are in th United Kingdom. France, Italy, China and Germany, in the order named, are the othe principal consumers of American leaf tobacco.

The cigarette continues to loom up largely i the export statistics. Last year we exported 11,470,179,000 cigarettes valued at $23,837,681. China purchased over 8,000,000,000 cigarettes valued at $16,996,301 last year. The Straits Settlements took over a billion of our cigarettes last year. Here we see that more than ninety per cent of the cigarettes exported from the United States are smoked by the Chinese. This is not a new trade movement. The census returns disclose the fact that China, the Straits Settlements and British India are large and steady consumers of our cigarettes and constitute our principal foreign markets for this type of tobacco product.

The exports of plug tobacco last year amounted to 3,797,038 pounds, valued at $1,932,759, as compared with 5,563,614 pounds, valued at $2,067,969 in 1918. Smoking mixtures aggregating 1,298,958 pounds, valued at $773,851, were exported in 1922, in addition to 689,000 cigars, valued at $21,188. The cus-

returns show that cigar exports do not ex- the vigor possessed by our cigarette and and smoking tobaccos. The failure of our exports to expand is due to the great in- e in the local demand for domestic cigars ng manufacturers to neglect the foreign ets while meeting needs of the home trade. e domestic consumption figures are impos- There were 667,401,932 pounds of leaf co consumed in our cigar, cigarette and co factories in 1922. Of this amount, 160,- 06 pounds were used in the manufacture gars, 196,592,128 pounds in the manufac- of cigarettes and 310,408,098 pounds in nanufacture of smoking and chewing to- and snuff. The consumption of tobacco United States today is double what it was 97. The census returns show that the in- e in the annual consumption in the United s progressed regularly in the last thirty . The increase in the consumption of leaf co in the cigarette industries in this period been phenomenal. In 1898, our factories 40,000 pounds of tobacco in making cigar- . Last year their consumption exceeded 38,000 pounds of leaf. These figures dis- the fact that the cigarette branch of our co manufacturing industries is the most e and progressive of all.

Cigar manufacturers are also showing increased activities and are building up a strong, progressive, and profitable domestic business. The tobacco consumed in the manufacture of cigars in 1897 amounted to 79,000,000 pounds. Last year the consumption was over 160,400,000 pounds. These figures show the stupendous strides made by American cigar manufacturers in developing their branch of the tobacco industry in the last quarter of a century. It was the efficiency of the cigarette making machines that gave the great impetus to the American manufacture of cigarettes. The cigar manufacturer is now furnished with similarly effective machinery for the automatic manufacture of cigars. There is no reason why the application of machinery to cigar manufacturing should not be followed by similar results obtained in the cigarette industries. During the next few years, when our cigar factories are more fully equipped with cigar making machinery, we may expect to see much greater activity in cigar manufacturing and further extensive increases in the production of domestic cigars.

The census statistics covering the tobacco industries of the United States afford pleasant reading for all engaged in this valuable domain of our national activities. They show sound progress and business vigor. No branch of the industries is showing weakness. Progress is everywhere the rule. In this respect the tobacco industries are unique. No other national industry with so many intricate ramifications is comparable with those of tobacco. And the outlook for the future is brighter than ever before.

TUT TUT

An anti-tobacco crusader declares that Lord Carnarvon would have been alive today if he had been a non-smoker. Passing up the obvious retort that the crusader knows no more about that than the rest of us, we rise to remark that if the alternative could have been presented to his lordship maybe he would have pointed out that Tut didn't smoke; and where is Tut-ankh-amen now?—*Greensboro (N. C.) News.*

COST OF COURTESY

Any foreigners who are still obsessed with the foolish idea that Americans lack courtesy might be interested to know that a clerk in a small suburban telegraph office figured that in his office alone $492 were spent in one year to say "Please" and "Thank you." Managers of telegraph offices in the business district say huge sums are spent annually on courteous expressions in cables and wires.—*Wall Street Journal.*

ven Years of Successful Experience With Tobacco in Georgia

The State's 1923 Crop Amounted to About 9,000,000 Pounds—Growers Received More Than $2,250,000 for Product—Most Prosperous Year, Thus Far — Some Good Reasons for High Quality—Various Difficulties Encountered and Overcome.

By E. C. WESTBROOK

EORGIA produced in the southern section this year approximately 9,000,000 pounds of tobacco, which sold for a little more than 25 cents per pound. The farmers were paid more than two and a quarter million rs for their crop. This year's tobacco crop the best that Georgia has produced since she her first commercial crop in 1917.

Many Planning to Get in Game

ere are some mighty good reasons for this quality crop. In view of the fact that so y farmers who have never grown tobacco planning to get into the game another year, elieve it worth while to review the growth ne tobacco industry in Georgia for the last n years. By relating some of the difficulties ountered and how they were overcome should the prospective growers to attain greatest ess.

Have Learned Much

hile Georgia sold her first crop of bright cco of commercial importance in 1917, yet until 1919 was there any very thorough or matic study made of southern Georgia soils lated to their adaptability to tobacco. Very was known about fertilizer requirements of cco on Georgia soil. We knew little about t the effect of planting tobacco after peanuts, et beans and other south Georgia crops ld be. No one could say what was the best to sow the tobacco bed. The best time to the tobacco in the field was another mooted tion. It has been necessary to solve these blems and many others through actual ex- ence. The experience of the Carolina to- o growers has been a good guide. While r conditions are not the same as those in hern Georgia, yet many of them are similar. U. S. Office of Tobacco Investigations gave y helpful suggestions.

Fertilizer Experiments

t first, quite a variety of grades of fertilizers e used. A study of the fertilizers used in the Carolinas showed that an 8-3-3 fertilizer was giving satisfactory results. In the absence of data for Georgia, it was decided to recommend this mixture for the Georgia tobacco grower. This mixture was almost universally used during the 1919, 1920 and 1921 seasons. Good results were obtained with favorable seasons, but when there was excessive rain during the harvest season or just before the tobacco started to ripen, the crop would often go to pieces badly. Tobacco in many fields became seriously diseased, and the leaf rotted and was lacking in body. The leaf often, instead of showing life and body, and having a soft velvety feeling, was dead and lifeless.

Secure More Satisfactory Results

After three years of careful observation of tobacco in southern Georgia, under varied conditions and the study of experiments, it was concluded that more potash was needed in the fertilizer. So an 8-3-5 fertilizer was recommended. For the last two years, this mixture has been used almost universally with very gratifying results. The farmers of south Georgia produced their best tobacco crop this year, despite the fact that they had a very rainy season. There is no doubt that the extra potash was largely responsible for holding the tobacco together and preventing it from going to pieces under unfavorable weather conditions. Southern Georgia nearly always has a rainy season in July. The tobacco farmers in this section have learned that a high percentage of potash in their fertilizer is one of the best means of combating the effect of the excessively rainy season. The tobacco experiments conducted at the Coastal Plains Experiment Station at Tifton, confirm this statement.

Stable Manure Highly Effective

In the first few years it was thought by most of the growers that to use stable manure under bright tobacco meant certain ruin of the crop or the production of very low quality tobacco. In 1920, the Georgia State College of Agriculture made a survey of 174 farms to determine the cost of producing tobacco. In classifying the farms according to yield and returns per acre, it was found that the farmers who used a light application (about two tons per acre), of finely pulverized stable manure, made the largest yields per acre and received the highest price per pound. When manure was used properly the tobacco ripened nicely and cured better than where it was not used. Well rotted manure gave better results than fresh manure.

"Weed" Has Followed Practically Every Crop

Tobacco has been planted after practically every south Georgia crop. Experience has shown that best results are obtained when the tobacco is planted after crops like cotton, oats, sweet potatoes and corn, where little or no velvet beans are turned under.

Land containing a heavy stubble of velvet beans or cow peas has a tendency to prevent the tobacco from ripening properly and to cause it to cure a dark color. With some soils, tobacco after a heavy crop of peanuts is inclined to be rough and lacking in quality.

The Best Transplanting Period

The best time to transplant tobacco into the field is one of the most important lessons that has been learned. It has been demonstrated that tobacco set in the field the last of March and the first week in April makes better and heavier tobacco than that planted later. The earlier tobacco also stands the rainy season much better than the later plantings.

Sowing Seed Beds

The last week in December and the first two weeks in January have proven the best time to sow the tobacco bed in southern Georgia.

These are some of the things that Georgia farmers have found out about growing tobacco, through hard years of experience that have cost sweat and money. Why not take advantage of them?

Union Tobacco Co. to Be Incorporated

WILMINGTON, Del., Oct. 16—The name Union Tobacco Co. has been reserved for a company to be formed under the laws of Delaware. Capitalization of the proposed company was not made public but it is expected that formal application for a charter will be made within a week or ten days.

Though complete details are not available, there is sufficient information to make it plain that this is the first move in connection with some important corporate developments affecting at least two of the major tobacco manufacturing companies of the United States. It has been known that some of the leading tobacco interests have for the last year had under discussion plans designed to develop earning power through some general changes in corporate structure.

If present plans materialize and the contemplated Union Tobacco Co. is formed, at least two and possibly three of the foremost American cigarette producers will be interested in it either through acquiring part of its capital stock or through their absorption by the new company in a merger.

General Cigar Co. Dividend

A quarterly dividend of one dollar and fifty cents ($1.50) per share will be paid on the Common Stock of the General Cigar Co. on November 1, 1923, to stockholders of record on October 23, 1923, at 3.00 p. m.

United Retail Shares

United Retail Stores sold Tuesday, at 4, ex-dividend, the special distribution in United Cigar Stores common stock, first in connection with contemplated dissolution of United Retail. This distribution amounts to 38.85 shares of United Cigar Stores common for each 100 shares of United Retail. Last previous sale of United Cigar Stores was at 185. On this basis, Retail shares sold "ex" 71⅞. Last recorded sale of Retail was that it was "ex" more than its last tion. Selling at 4, it showed a vance of 4⅜. Subsequent to the 4, there was a transaction at 7½ brought net advance to 7⅞.

"Enshrined Fly in Amb

It is a small world after all.

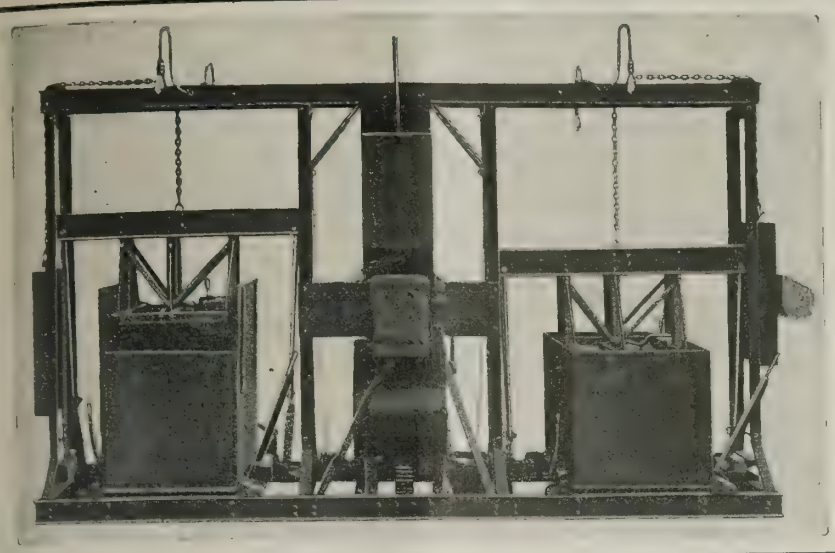
Thirteen years ago, when George was Chancellor of the Exc of Great Britain, in one of his speeches he referred to the old-ag sion scheme in the Unionist progr as "a fly enshrined in amber."

In the city of Polangen, Russian land, now Latvia, on the shores Baltic, Jacob Mark, an amber read the Chancellor's attack in a paper. So that the little Wel might carry his point further, Mar a piece of amber in which a fl "enshrined."

Lloyd George, impressed by th wrote to the amber manufacturer thanks for the gift. He expres desire to meet Mark, and said t was having the "enshrined fly in a made into a watch charm. He pr always to wear it, and he has.

Two years ago Mark left Europ came to New York City and estab himself as a steamship agent at N East Broadway.

When the former British Premie in this city recently, Mark estab communication with him. Lloyd G instantly recalled the incident, an pressed a keen desire to meet Mark he returns to New York City aft Canadian tour.



Mr. Mark is now anxiously aw Lloyd George's return to this city *Y. American.*

Home Service Appeal

BOSTON, Oct. 13.—The Tobacco Trades are this year getting behind the Salvation Army Home Service Appeal for Greater Boston, and are satisfied so far as their industrial section is concerned, that they will top the amount set for them.

Colonel W. A. McIntyre, head of the Salvation Army in New England, is asking for $170,000 for the support of his work, during 1923-24, which includes the maintenance of the Evangeline Booth Rescue Home and Maternity Hospital ($60,000), the Day Nursery for Children ($7,500), the Roxbury Dental and Medical Clinic, Dispensary and Hospital ($55,000), and a host of other activities and benevolences.

There are no pipe-dreams about the work of the Salvation Army. Any concern that can take care of 10,616 children in a year as they do in their Day Nursery and at their Fresh Air Camp, must be up to the minute in efficiency.

Seen Through Tobacco Smoke

Through the smoke of a good cigar or behind a comfortable pipe, a man can always see the needs of kiddies and the fellows in the Trade will dig down deep to help this deserving cause.

Gabblers have often much to say about the Army, but it keeps out of all political propaganda, which is more than can be said of many other organizations.

Its attitude toward the tobacco question is well known and its chief concern is in regard to the use of the weed by immature youths, upon whom, it admittedly has a deleterious effect, at least, until they become "hard-boiled." This is an attitude shared by the Tobacco Trade, itself. For the rest, and apart from its own officials, the tobacco question is left, as it should be, to the individual conscience.

Joseph P. Manning, of the Joseph P. Manning Co., Boston, Mass., is chairman of the Tobacco Products group, and Louis A. Henault, general manager of C. B. Perkins Co., Boston, Mass., so well known in the trade, is assistant captain of the team. They are both working very energetically in enlisting their brother tobacconists in the "drive."

Helping the Farmer

The loan of $2,500,000 by the Federal Farm Loan Board to the Dark Tobacco Growers' Co-operative Association shows the farmers can be helped when they organize to help themselves. The dark tobacco in the warehouses can be held so that the selling price will be protected. The banks which have advanced money on the crop will be repaid. The money will be distributed in farming communities. The farmer is helped and so are those with whom he does business.

What the tobacco grower has done, the wheat grower can do. Warehousing and credits will solve the grain producers' problem. These things under good organization will put an end to the dumping which has been ruinous to farmers and enriching to speculators.—*Louisville (Ky.) Times.*

A Selling Organization

It is the opinion of the editor of this paper that a large majority of the members of the Burley Association who read our journal are in favor of selling the present crop in an open competitive market, unless it appears that the manufacturers of tobacco are going to buy the larger part of the whole crop in green order, that is, not redried.

There is a widespread opinion among these growers that the increase of the crop by non-members, as well as in new territory and on account of a heavy yield per acre over the whole territory, there will be enough tobacco on the outside of the association to supply all immediate demands, and that by holding the crop off the market belonging to the association it will only increase the price of the crop grown by the non-member and lay the burden upon the association members with the crop of tobacco of 1923 on his hands.

Havana Tobacco Market Showing Great Activity

Thousands of Bales Recently Sold—Both City and Country Share in Movement—Representatives of American Concerns Much in Evidence—Good Vegas Eagerly Bought.

HAVANA, CUBA, Oct. 11.—The tobacco market has been very active, and many thousands of bales have recently been sold in Havana as well as in the country. Loaded tobacco trucks can be seen at any hour of the day in the streets of Havana. The tobacco is in good condition, either to be shipped or to be stripped, and for this reason many of the old buyers from the North arrived here in order to register the tobacco bought beforehand, or to purchase new lots. Representatives of Stern-Mendelsohn Co. of New York, started right away to examine the tobaccos selected by Sidney Rothschild and a few days later Don José Suarez returned from Spain via New York in company with his old and good customer, Mr. Regensburgh. Both these buyers were very active and Don José Suarez has bought and received during this short time, upper grades of Remedios of at least 6 to 7 large packings, not counting his purchases in the country and purchases of Vuelta Abajo upper grades.

Some Notable Buyers

Of the local export and commission houses the firms of Mark A. Pollack, Leslie Pantin & Son, and Walter Sutter Co., can be mentioned as some of the largest buyers, not leaving out the other corporations which have bought and received tobacco in very large quantities right along. Also Manuel A. Suarez continued buying first class lots for export and stripping purposes.

A few days ago another veteran buyer of the United States arrived here, Mr. Satorius from New York, who, in company with his well known broker, Don Ramon Nava, can be seen from early until late in the tobacco warehouses.

Good Vegas Eagerly Sought and Bought

Before and a little after arrival of these foreign buyers, there was quite some activity in the country and by this time almost every good Vega in the country has been sold. The packers, who had their Escogidas under option or partly sold, subject to registration, made new purchases in the country at very favorable prices.

An Active Buyer

One of the most active buyers of tobaccos of the best section of Vuelta Arriba, was Don Angel Prieto, of Estrella Street No. 35, who observed during the entire campaign a good and marked judgment, in buying only the best tobacco from the best sections, being at the same time very fair as far as prices are concerned.

Other active buyers in the country were Herrera, Calmet & Co., Foyo & Rodriguez of Reina 22; Abeladro Cuervo, owner of some first class lots, and others.

Chance to Recoup

These late and large sales of Remedios and Vuelta Abajo tobaccos, gave our almacenistas a good chance to make up partly their loss caused by the rush in the country at the beginning of the crop by some foreign houses, which did not pack in former years.

The prices for Remedios as well as Vuelta Abajo continue *firm*, and as prophesised already, weeks ago, Vuelta Abajo is rather higher in price today. Several local and foreign houses will not be able to buy the quantity they need.

Also in Partido quite some lots of wrapper-material were sold to Tampa and the north, not mentioning the local factories.

Weather Had Influence

A few days ago the weather changed almost entirely and after several daily rain-showers the cold season started—another reason for making the holders of tobacco more inclined to sell, as the shrinkage this year is quite an item.

In the country the farmers are quite satisfied with regard to raising seedbeds and especially in Vuelta Abajo there will be an abundance of seedlings. In both sections Vuelta Abajo as well as Remedios there will be quite some enthusiasm as far as planting is concerned and if the weather conditions

Broadcasted Glad Tidings

W. J. Dougherty has returned from the convention of National Exchange clubs held. September 24-26, at Springfield, Mass. At the luncheon of the Exchange club this week, Mr. Dougherty told of the work done at the convention, and that the cigars sent by the local club arrived the last night of the convention during the time of the banquet, and these cigars were passed to the members present who numbered more than 500. The Exchangites were so pleased to get the genuine Key West cigars that the fact was broadcasted that night by radio.

Visiting Washington

Chas. H. Ketchum of the cigar firm of Ketchum & Bervaldi left Thursday night for Washington, where he will attend the ceremonies of the laying of the corner stone of the George Washington National Memorial. While in Washington, Mr. Ketchum will meet with the budget committee of the post office department toward securing a new federal building for Key West. At the luncheon of the Exchange club Tuesday, Mr. Ketchum, who was a guest of the club told of letters he had received from the chairman of the budget committee in which it was set forth that there is a strong probability that no appropriation will be made by the budget committee for the erection of federal buildings in cities where no site has been purchased for that purpose. As Key West has a site which was bought ten yetars ago by the government at a cost of $50,000, it appears likely that Key West will get a new building. The present one being totally inadequate to the needs of the various departments housed in it.

Cigar Production Increases

There were 320,000 more cigars made here during September than in August, according to the report of Stamp deputy collector of internal revenue, J. F. Uhrback. In his report Mr. Uhrback shows that 4,344,610 cigars were made here during the month. Of these, class A numbered, 700,475; class B, 410,700; class C, 2,966,184; class D, 254,130 and class E, 13,121. The amount of revenue collected for stamps sold amounted to $25,944.35.

capacity houses. With the receipt of heavy orders daily, the shortage of cigar makers is all that mars the prospect of the largest output of local factories in many months.

September Tobacco Imports

The report of the customs department shows that 432 bales of tobacco were imported for local use during September and that these bales totaled in value $40,553.

Campaign for $700,000 for Jewish Federation

The largest amount of money ever subscribed in advance of a campaign for charity was recorded at the dinner of the Business Men's Council of the Federation for the Support of Jewish Philanthropic Societies at the Hotel Pennsylvania Monday night when Arthur Lehman, president, announced to the 250 men assembled that $325,000 of the $700,000 deficit in this year's budget had been collected although the campaign for funds was launched officially only that night.

"If the representative bankers, professional and business men here tonight continue their remarkable work," said Mr. Lehman, "Federation need not fear to carry out its obligations to the 91 institutions it maintains for the orphaned, the sick, the poor, the aged and handicapped Jews of New York. But we must not, on the other hand, be too optimistic. There is still a deficit of $375,000 to be raised before we can fill our budgetory needs of $3,500,000.

Other speakers included Judge Irving Lehman, Samuel Untermyer, Stephen Wise, Adolph Ochs, Felix M. Warburg and Percy S. Straus.

More than two hundred and fifty of the most important Jewish men of affairs in this city pledged themselves at the dinner to raise this fund. The guests were all members of the Business Men's Council which has formed money raising groups in more than 125 trades in the metropolitan district. Allied trades are grouped together under a division head, who is in most instances the outstanding figure of that industry in New York. Each part of the trade has its own chairman whose duty it is to round up every Jewish manufacturer and merchant in his line.

Quotas to be raised by each trade were allotted after a careful study of each industry and its strength by Mr. Lehman in collaboration with Percy S. Straus and Felix M. Warburg, co-chairman of the Business Men's Council. Reports read at Monday night's dinner showed that the business men of the city, in their zeal for the welfare of their fellow Jews did not wait for a formal opening of a drive for funds but upon being informed of their quotas proceeded to conduct their own intra-trade cam

The largest amount reported wa 000 by the bankers and brokers di real estate raised $26,500; ciga cigarettes, $16,100; leaf tobacco, furs, $11,500; retired merchants, $ judges and lawyers, $11,000; $10,300; cloaks, suits and skirts, $ clothing, $6,900; department stor 700; metals, mining, iron and ste 800; dry goods, $4,700; silk goo allied trades, $3,900; theatricals, dry goods and trimmings, $5,750; and novelties, $2,150; insurance, men's woolens, $2,150; newspap and publishers, $1,250; educators, underwear, $2,100; paints and o 130; chemicals, $1,600; knit goo 300; jewelry manufacturers, $1,30 goods, $1,200; beverages, $1,100 stores, $1,800; hosiery and und $1,000.

The Women's Division of Fe of which Mrs. Sidney C. Borg i man raised $16,000.

After the reports of these con which have been conducting co-o drives were heard, Mr. Straus ur men to put all their efforts in Federation over the top, so that needy Jews in the community m properly taken care of by Fe as in former years. He explai organization of the trade grou urged them to form their workin immediately if they had not alrea so.

A complete motion picture "We've Got To Have Money" by Percy S. Straus and Felix M zurg, was shot early in the ever shown on the screen soon after ports were heard. The actors in were the guests present. The explained Federation's need fo and the methods it employs in money.

Music and vaudeville gave note to the serious trend of th ing. An exhibition of cartoons activities of the various trade was on view in the ante-room of quet hall.

Among the guests at the din Arthur Lehman, Felix M. W Percy S. Straus, Samuel Un Judge Irving Lehman, Judge Sa Levy, Judge Otto A. Rosalsky, Ochs, Henry F. Samstag, Willia man, Henry A. Dix, Samuel J. ingdale, Dudley D. Sicher, Dani Manny Strauss, Stephen Wise, Goldstein, Bernard K. Marcus, Lowenstein, I. Edwin Goldwass M. Stein, Herman W. Block, Z. stein, Col. H. A. Tampa Tidings

TAMPA, FLA., Oct. 13.—Few outside of those directly interested, realize the volume and value of the cigar industry of Tampa. It ranks third in value among the industries of the State of Florida. Citrus fruits and lumber alone exceed it. The cigar industry is so great that lesser industries are almost lost sight of.

There are in Tampa numerous cigarette factories, notably that of José E. A. Reyes, where three brands of Cuban cigarettes are manufactured. La Floridana, Gloria Selectas and Flor de José E. Reyes. The most modern machinery is in use at the factory, which has a capacity of 615 cigarettes a minute, and the choicest Havana tobacco is put into the products.

Back from Extended European Trip

A. L. Cuesta, Sr., president and general manager of Cuesta, Rey & Co., has returned to Tampa after a stay of several months in Spain, where he renewed old acquaintances and opened his newly purchased home in the Pyrenees mountains, near the place of his birth. Mr. Cuesta renewed his acquaintance with King Alfonso at a private interview held during the summer. He also formed a Rotary Club in Santander, which makes the third Rotary Club now existing in Spain. Mr. Cuesta had a hand in organizing the other two which are located in Madrid and Barcelona. Mr. Cuesta left Tampa on May 12, for Washington to attend the annual convention of the Tobacco Merchants' Association. He then went to New York, where he joined Isaac Maas, of Tampa, and both sailed for France, spending a few days in Paris together. The rest of the time, until his departure for Havana on September 19, he spent in Santander and at his Pyrenees mountain home. He arrived in Havana on October 3, and sailed for Tampa three days later.

Havana Fairly Normal

Manuel Garcia, of Perfecto Garcia & Bros., has returned from Cuba, after spending 10 days on the island purchasing tobacco. Mr. Garcia says that he found conditions in Cuba fairly normal.

Praise Connecticut Tobacco

H. M. Lott, local tobacco dealer, has returned from a trip to Connecticut and Wisconsin, where he inspected the new tobacco crops. Mr. Lott was accompanied by D. H. Woodbury, secretary and treasurer of the Eli Witt Cigar Co., and both report that the sun and shade grown crops in Connecticut are probably the best that have even been grown in that state. The Connecticut shade grown tobacco is especially good, being very light this year. As for the Wisconsin crop, Mr. Lott states that the 1922 crop is now being sampled and appears to be very good. The new crop, as is well known, has been damaged by frost, but much of that which escaped injury, is of very high grade.

J. C. Riley, representative of the American Tobacco Co., is in the city calling on the wholesale tobacco jobbers. Mr. Riley, whose headquarters are in New York City, specializes in Bull Durham cigarette tobacco.

R. T. Byrd, Florida representative of the Tobacco Products Corp., manufacturers of Strollers cigarettes, is in the city calling on the wholesale tobacco dealers.

A. T. Watkins, Southern representative

Connecticut Notes

HARTFORD, Oct. 15.—With the cooler and frosty mornings of last week, the mold that appeared on the tips of the hanging tobacco has disappeared, and now the growers are anxiously awaiting a good damp so as to get started taking down their crop, and getting it in the bundle preparatory to assorting and packing the banner crop of 1923. A year ago at this date much of the crop was down and in the bundles and this year only a very little is in the bundle, as during the damp weather a couple of weeks ago, only a few ventured to take down believing that the leaf needed a through dampening and a dry out to run the colors. With the sharp frosts, growers think that the leaf is now in the pink of condition to take down, and as soon as a damp comes much will be taken down. From present indications, while on the poles, it is expected that the percentage of "brokes" and fillers will be very much lower than it has been for the past several years.

The percentage of pole sweep will be very small and cannot be worth considering, unless in some of the very late cut crops it may be possible that some will be found, which was in the right stage of curing to sweat in bad weather, and to eliminate sweat several growers started "firing" their sheds.

The present indications are that there will be several thousand more cases of fine, high grades of Broadleaf and Havana seed than there has been for the past several years, as the 1923 crop grew under favorable conditions from start to finish; rain coming at needed times, and the plants when started kept coming every day without any dry weather checks, and through the whole Connecticut Valley as well as the Housatonic Valley, there was not any storm or hail damage to the crop while in the fields.

During the cutting season favorable weather prevailed, as well as the curing period, and the Connecticut growers have finally succeeded in getting a crop that they can "holler" about after several successions of inferior crops.

One of the well known handlers of Connecticut tobacco said recently that the 1923 crop was "beautiful" and that sums it up in a word.

The Connecticut Valley Tobacco Association realizes that it has got a bigger proposition in this crop to handle than last year's, and is already making plans to be in a position to handle it as soon as it is ready to pack, by joining with the growers in securing additional warehouse room. Several new warehouses are being built in the Valley. The new one in South Windsor is already well started along; the one in Glastonbury will be started at once, and the East Hartford growers have secured the Rosenwald & Bro. warehouse. Other sections are making similar preparations.

The East Hartford growers planning to secure a large supply of farm implements with which to supply their members at the lowest practical price.

The work of handling 1923 shade is now well started and the leaf is showing up to be fine and very satisfactory.

Help seems to be available, but all are looking for high wages.

Keystone Business Brisk

Ray C. Clark, of D. Dreux, Inc., of 136 Water Street, importers of Sumatra and Java leaf, is covering the Pennsylvania territory with marked success. He predicts a bright future for the cigar industry in that section.

Market Review

A fairly active Market was maintained in September, the business being mainly distributed between the medium grades of Brights and Western Tobaccos.

The new crop of Nyasaland, especially the dark fired Tobaccos, is meeting with ready acceptance.

To Observe 125th Birthday of the Cigar

The 125th birthday of the cigar, which first saw light in the Connecticut Valley, will be celebrated at the convention and exposition to be held in the Seventy-first Regiment Armory for the week starting January 28. At the same time the national board of the Tobacco Salesmen's Association will hold its annual meeting at the Hotel McAlpin, with Jonas J. Ollendorff, chairman of the board of governors, presiding.

While the Indians knew the pipe for centuries and Columbus found them smoking, while Sir Walter Raleigh actually started the commercial exportation of raw tobacco, it was not until the close of the eighteenth century that the cigar came in vogue. It became popular immediately and today is the mainstay of the tobacco industry. Estimates show 7,000,000,000 large cigars and more than 850,000,000 small cigars are produced each year in the United States alone, without reckoning the "first cousin," the cigarette, consumed in billions.

Besides Mr. Ollendorff the committee on arrangements includes Emanuel M. Freeman and Jack A. Martin, of Newark; Joseph Ogush, of Jersey City; Edward J. Mulligan, Harry I. Whipple and John Frischberg, of Boston, and Max Berliner, Sidney J. Freeman and Albert Freeman, of New York. A banquet on February 2 will close the convention.

Manager Sands Addresses the Co-op Members

DANVILLE, VA., Oct. 13.—Oliver J. Sands, executive manager of the Tobacco Growers Co-operative Association, made an address at the opening of the "co-op" season here in which he dealt freely with the delayed third payment. He spoke for an hour and was given a good reception although it was noted that three farmers broke into his address and betrayed dissatisfaction as to the monetary settlement for the last crop. Mr. Sands said that the Association today holds 14,000,000 pounds of tobacco left over from the last crop which the officials are holding for a price. He asked the farmers if they wanted the Association to dump this tobacco "at the other fellow's price" and when cries of "hold it" came from the audience, Mr. Sands told them if that was the case they might as well stop talking about that third payment. Mr. Sands said that the Association, which aims at orderly marketing, is an unqualified success and that its future has been assured.

Complains of Opposition

He stated also that hostile interests had tried to destroy the association last year by raising prices on the open market floors in the hope that they would discourage farmers from joining the "pool" and bring about withdrawals. This, he stated had not succeeded and he asserted that this year the same hostile interests are forcing down the price of leaf on the open market in the hope of "killing" the organization's credit. He further asserted that 99 per cent of the members are quite satisfied with the workings of the organization. He made an appeal for signers to come forward and sign the five year contract. Nobody answered his invitation, but before the day was out Tucker Watkins reported that seven new members had been signed up.

Mr. Sands called the attention of his thousand hearers in the warehouse that they should see that the contract is enforced, suggesting that whenever they find a broken contract to report it to the commonwealth's attorney. He also defined the meaning of the new law which compels anyone selling tobacco to enter it in the proper name and not a fictitious name.—TETLEY.

To Remove Bagley Plant to Richmond

RICHMOND, Va., Oct. 13.—Removal of the plant and equipment of the J. J. Bagley Tobacco Co. from Detroit, Mich., to Richmond, between now and January, was rumored yesterday. It was stated that the Bagley plant would be added to the plant of the Falk Tobacco Co., increasing its output by at least 40 per cent. Officials of the Falk Tobacco Co. would neither affirm nor deny the reported removal plans.

It is estimated that 65 freight cars will be needed for the transportation of the Bagley equipment. Several officials of the Bagley company are to come to Richmond and make this their home.

Danville Average, $18.96

DANVILLE, VA., Oct. 15.—An improvement in the quality of leaf tobacco sold here during the past week is responsible for a substantial increase in the average over that of the opening week. The report of the Danville Tobacco Association issued by John Bustard, secretary for the past week, shows that 615,221 pounds was marketed for $116,672.22 at an average price of $18.96. This brings the sales of the season to slightly over a million pounds, or 1,073,589 pounds sold for $197,035.03, the season's average being $18.35.

Increased Receipts Expected

Warehousemen are looking for heavily increased receipts as soon as mois weather set in. There has not been a natural "season" since the market opened and for this reason the local warehouses have not been taxed. Better tobacco is looked for as the season wears on.—TETLEY.

Open Dark Tobacco Sales October 30

LYNCHBURG, Va., Oct. 13.—The dark tobacco auction sales will open here October 30, according to announcement of the warehouses. The co-operatives' association has not fixed the time for the opening of its warehouse here. Dark tobacco is almost exclusively marketed here there being little bright stocks, excepting railroad tobacco.

Petersburg Prices Please the Farmers

PETERSBURG, Va., Oct. 12.—Petersburg tobacco warehouses opened again this morning, after observing yesterday as a general holiday on account of the fact that it was "Petersburg Day" at the fair.

The sales this morning were unusually good and the farmers were apparently satisfied with the prices received.

The merchants and banks of the city are reporting a good business, one reason given being that of the tobacco sales helping to bring money into the city.

The sales averaged $10 to the hundred pounds with the common tobacco making a good showing. Some of the good grades went above 35 cents.

Co-op House Also Reopens

The Tobacco Growers' Association house has also reopened, after observing yesterday as a holiday, and reports that the number of pounds have greatly increased during the past few days.

nderson Auction Market Averages $19.39

NDERSON, N. C., Oct. 13.—The Hen- n auction tobacco market, in which warehouses are operating this year, during the past week a total of 4 pounds of tobacco for $43,777.96, average of $19.39, a fraction under 0-cent level.

the season to this date the market old a total of 631,076 pounds for 36.99, at an average price per hun- pounds of $18.49.

se figures are far below the sea- average of approximately 24 cents e 1922 crop, but this is explained e poor quality of deliveries, which for the most part been of the lower s.

s by days for the past week on cal market, follow:

	Pounds	Money	Aver.
ay	49,528	$10,065.61	$20.32
ay	62 986	12,148.49	19.28
esday	37,976	6,939.49	18.27
day	33,714	6,460.75	19.16
r	41,460	8,163.62	19.69

week's average of a fraction under 0-cent level has brought encourage- to the warehousemen and the farm- nd many see in it an indication of t dily rising market. The fact that erage price has ranged around that for nearly every day has been the s of comment here, where there are who say the local market is among aders in the old belt, or in this sec- f the state.

market has not yet caught its in sales. On no day have sales d the 100,000 figure, except the g, when the figure was around 0 pounds. In fact there has been ne day since the opening when de- s have gone over the 50,000 mark. ger auction markets in nearby cities xpected to work against the total e of business here in 1923-24, since burg is operating on the auction this year with two warehouses, as they had no market at all last for the independents. An extra ouse is running in Warrenton this also, as is true of Oxford, these towns being county seats of the surrounding counties. Henderson large sales last year from Franklin , and is drawing a good deal this but will not get as much as she the 1922 crop.

acco men are expecting the better to be offered in larger quantities next few weeks than has been the ince the market opened.

er Prices at Greenville

ENVILLE, N. C., Oct. 15.—There decided upward trend in prices of last week. All receipts were better, both in prices and quality. grades advanced from $3 to $5 per d. The advance on lower grades ot quite so great. General satis- with conditions and prices seemed t among both buyers and farmers. On the lower grades the advance ranged from $2 to $4 per hundred. Taken all together, the past week was the most satisfactory thus far this season in sofar as prices are concerned.

The sales for the week were light but enough to bring sales to date up to 13,100,000 pounds. The average for the week was about $22.50 per hundred.

It is estimated that 40 per cent of the crop has been marketed.

The writer was much amused some days ago when talking to a farmer. I asked the farmer if he was selling that day. He replied, "No. I bought a little for another fellow." On Saturday before he was talking about co-op conditions, saying that his last year's crop had not been settled for, and that he needed the money. Great promises had been made to get him to sign up and none had been fulfilled, putting him in bad shape. His case illustrates the usual plight of Co-ops.—KING.

Co-ops Make Some Glowing Reports

HENDERSON, N. C., Oct. 13.—According to word that comes from headquarters of the Tobacco Growers' Co-operative Association in Raleigh, the association has made a fast start in marketing the new 1923 tobacco crop in western North Carolina and Virginia, in what is known as the old belt. The information is from the reports of J. E. Bowling and Edward Walton, district members for western North Carolina and Virginia, respectively, who report receipts of 3750,000 pounds of tobacco as the first week's deliveries by the organized farmers. The markets in this belt opened only last Tuesday, October 9.

In spite of the late Virginia crop, Danville leads the co-operative receiving points with 300,000 pounds. Durham, Roxboro, Henderson and Fuquay Springs are among the co-operative markets of North Carolina to register from 150,000 to over 200,000 pounds in the initial week, the reports indicate.

It is asserted that exceptionally good tobacco has reached the floors of the co-operative warehouses, along with lugs and primings, and the growers at nearly every market are reported to have expressed their enthusiasm for the grading system and this year's scale of advance, which is said to have brought average first payments of over $20 a hundred for many thousands of pounds of tobacco. Some growers are said to have averaged over $20 per hundred for their entire loads as first advance, while the great bulk of deliveries have been made up of the lower grades.

It was reported on the local market that quite a number of new members were received during the first week. Warehouse managers here say they have yet to find any formidable complaints or marks of dissatisfaction with the marketing system, or with the advances made to them, in spite of the fact that the final payment for a large part of last year's crop has not yet been made by the co-operative association.

Old Belt Co-ops Make Big Deliveries

RALEIGH, N. C., Oct. 15.—Organized tobacco farmers of the old belt made a flying start in marketing their crop last week when approximately 3,750,000 pounds reached the 55 co-operative floors which opened last Tuesday.

The very high quality of tobacco brought to the association floor shows the satisfaction of the old belt co-ops in the cash advances which ran over $20 a hundred on many thousands of pounds.

Western North Carolina ran far ahead of her last year's deliveries to the association in the opening week and Virginia farmers in spite of the late crop surprised the association warehousemen with heavy deliveries which reached 300,000 pounds last week in Danville.

Hundreds of farmers who are dissatisfied with the low averages of the auction markets in western North Carolina and Virginia where opening prices were around 14 cents at Winston-Salem and 17 cents at Danville, have recently signed the co-operative marketing contract. They are bringing their tobacco to the association floors where the advances on all grades are higher than those of last year. The slump of the open markets in eastern North Carolina is evidenced by the report of the North Carolina Department of Agriculture, which compares the average price of $18.95 received by tobacco farmers last month with their average of $25.15 for September, 1922.

The tobacco association has already received more than 45,000,000 pounds of tobacco in its warehouses in three states this season with the large bulk of the Virginia-North Carolina crop still to reach the markets.

In eastern North Carolina three Superior Court judges upheld the contract of the association last week and continued injunctions restraining members from delivering tobacco outside of the association. Judge Frank Daniels at Goldsboro continued an injunction until future hearing in court, against a landlord who though not a member of the association had seized the tobacco of a member tenant under claim of landlord's lien and claim and delivery.—S. D. FRISSELL.

Eastern Carolina Tobacco

The Kinston correspondent of the *Daily News* grows eloquent in description of eastern North Carolina tobacco commerce. Lenoir county's crop alone may be five and a half million pounds; the season's marketing in Lenoir may run to something like 30 million pounds. And Kinston is but one of the eastern markets.

East Carolina tobacco goes mainly, he reports, to Europe, Asia, Australia; some to Canada and South America. "Helmeted Britishers in Hong-Kong and Calcutta, Australian sheep ranchers, Chinese merchants, German officials army officers, men around town in L don, discriminating smokers everywh are demanding the eastern Carc product," and many million pounds crop that will bring the buyers at Kin six to nine million dollars are begin to reach the ports for shipment abroa

And how much of it, we wonder, be shipped from North Carolina port

The state's tobacco and its cotton increasing volume of raw materials manufactured product, all its comm destined for foreign markets ought t into cargoes sailing direct from shore of North Carolina, if that is p ble. And the *Daily News* is glad to lieve most firmly that it is possible, that North Carolinians have the wil establish a port of their own. To a s with a will to accomplish, all things possible.—*Greensboro (N. C.) News.*

Better Grades "Pick U at Wilson

WILSON, N. C., Oct. 13.—"Day by in every way, we are getting better better," said the disciples of the fan Dr. Coue. So say the farmers who ronize Wilson's giant auction mart, each day for the past week has sh a slight advance in prices, so that for week just ended the general averag $22.01 against the average of the prev week of $19.82. Common tobacco tinues to show up, coming from e section—almost without end. On t grades the market remains the same, the advance has taken place in medium grades, and especially in the ter grades. Every day something 50,000 to 100,000 pounds of real good bacco shows up, and when it does, prices remind us of the year 1919.

Owing to cotton picking not yet b over, the sales have only averaged 6 640 pounds per day for the past w Sales for the season to last night ag gate 22,416,570 pounds, which sold $4,594,387.25, an average of $20.50, reads the report issued by the Superv of Sales.

It is estimated that around forty cent of the crop has been sold.

Alex M. Spiers of England, prior ently connected with the British-A erican, who has been a pleasant vis for several weeks, left for Java via Francisco this week. Mr. Spiers m not only many friends among tobe people, but with the farmers, for h a "regular fellow" and a good mixe McFARLAND.

New Bern Average, $18.3

NEW BERN, N. C., Oct. 13.—T sales for the week, 27,482 pounds; a age price per 100 pounds, $18.32. Sol date of 1923 crop, 370,176 pounds; a age price per 100 pounds, $16.05.—M TYSON.

Paducah Prospects

PADUCAH, Ky., Oct. 13.—The hogshead market has been quiet during the past week, and if any sales have been made they have not been made public.

The weather has been fair and pleasant and the curing of tobacco in the barn has progressed nicely. We think the crop has been cured better this year than usual. However, there is lots of sap in the plant, and where the firing has not been kept up no doubt there will be some house-burn and damaged stems. Tobacco is dry in the barns and a warm rainy spell is badly needed, which will help the coloring of the crop materially. We have seen a good deal of tobacco in the barns and colors seem fairly good, running from light brown to brown. Owing to the dry condition it is impossible to make a good inspection, but we are sure that the colors will take care of themselves with favorable weather.

The Dark Tobacco Growers' Co-operative Association directors have been in session at their headquarters in Hopkinsville, and have elected their general manager and other important officials. R. E. Cooper, of Hopkinsville, was elected general manager, succeeding John J. Hanratty, who was not a candidate for re-election. C. K. Smith, of Clarksville, Tenn., was re-elected chief grader, with James West, of Hopkinsville, as assistant. Most of the other officers were re-elected, and they are now formulating plans for disposing of this year's crop. It is understood that they have greatly curtailed managing expenses, and no doubt will be able to handle this year's business at a big reduction from last year's cost. The Association is making extensive preparation for storage over the district, building very large houses at Clarksville and Hopkinsville.

No new tobacco has appeared in the market yet. We don't look for the market to open until towards the end of November, but no doubt some loads will be drifting in when we have a good handling season. What prices will be we can not say, neither can we tell what the demands will be, but the market will open as usual when buyers are ready to buy and sellers ready to sell.—W. B. KENNEDY.

Burley President Addresses Two Meetings

INDEPENDENCE, Ky., Oct. 12.—James C. Stone, president and genneral manager of the Burley Tobacco Growers' Co-operative Association, who came to Independence yesterday to address the Kenton County Farm Bureau on the co-operative marketing of Burley tobacco, had to deliver two speeches, instead of one, as the crowd was so large it not only filled the circuit court room on the second floor of the courthouse, but the County Court room on the ground floor. While Mr. Stone was speaking in the Circuit Court room upstairs, McHenry Rhoads, professor of secondary education in the University of Kentucky, and J. Sherman Porter, editor of the *Burley Tobacco Grower,* addressed the crowd downstairs, Mr. Rhoads speaking on education and Mr. Porter on the progress of the Burley co-operative and the outlook for the future.

Following Mr. Stone's addresses the Farm Bureau of Kenton County, which was in charge of the meeting, adopted unanimously resolutions commending the co-operative marketing of tobacco, as well as all other farm products, and thanking the leaders of the Burley co-operative and of the Milk Producers' Association, which has a strong organization in northern Kentucky, for their efficient service and leadership.

Dawson Chambers, of Kenton County, director of the Burley co-operative, introduced Mr. Stone at both meetings and the Rev. J. F. Hawkins, pastor of the Hickory Grove Baptist Church, presided over the overflow meeting down stairs.

Other speakers were C. U. Jett, extension specialist in farm management, and Miss Lulie Logan, specialist in home economics, both from the university, and C. W. Threlkeld, of Visalia, president of the Farm Bureau of Kenton County, who

presided. The resolutions were reported by a committee composed of Howard Stephens, H. S. Moffett, C. O. Morgan and Mr. Threlkeld and were as follows:

"Whereas, Ralph G. Myers, Harley Ditmor, Harve Newcomer and F. S. Shuff, of Arcanum, Ohio, representing the Miami Valley tobacco growers, have asked the farm bureau of Kenton County whether, in the opinion of its officers and members, the co-operative marketing of Burley tobacco has been of any benefit to the farmers of Kenton County; and

"Whereas, the farmers in Kenton County, as well as in every other county in the Burley district, have profited tremendously in dollars and cents, as well as in the stabilizing of prices of tobacco and farm lands, from such co-operative marketing,

"Be it Resolved, that the Kenton County Farm Bureau, in annual convention assembled, hereby goes on record as declaring that the co-operative marketing of Burley tobacco has been an unqualified success in the Burley district and that it has been the means of putting into the pockets of the growers of Burley tobacco, in the past two years, between $45,000,000 and $50,000,000 more than they would have received under the old system of selling;

"Resolved further, that we most heartily endorse the co-operative marketing of Burley tobacco and of all other products of the farm, and that we express our gratitude to the leaders of the Burley Tobacco Growers' Co-operative Association for faithful and unselfish service rendered in the marketing of our tobacco crops the past two years;

"Resolved, that we extend to Harry Hartke, and to his associate leaders of the Pure Milk Association and heartily thank them for efficient service in the organization and operation of the Pure Milk Association, which has increased the price paid the producer for milk from an average of $2.40 to $3.25 a hundred pounds for 3.5 milk since its organization last January;

"Resolved that we declare ourselves unalterably opposed to the old ruinous dumping system of marketing farm products and that we commend the Kentucky Farm Bureau Federation and the American Farm Bureau Federation for their leadership in the movement for a sane and sensible business method of merchandising farm products;

"Resolved, that we express our appreciation to J. C. Stone and other speakers, the leaders and the workers who have helped to make this meeting a success."

Growers Are Unnecessarily Alarmed

There is no doubt that a good many Burley tobacco growers are more or less uneasy about the proper functioning of the Burley Society this year. This feeling is the outgrowth of the fact that there are about 36,000,000 pounds of unsold tobacco of the 1922 crop, and that the 1923 crop is much larger than has been grown for a number of years. These conditions should give reasons for more alarm without the Burley Society than within it. It is absolutely certain that without the Burley Society tobacco would not average ten cents on the open market.

It is to meet just such conditions as this that the Burley Society was organized. With a short crop reasonably good prices could be secured on an open market, but with a large crop and the open market glutted prices would certainly tumble below the price of production.

The Burley Society will not be able to secure as good prices for the 1923 crop as it secured for the 1922 crop, and it will not undertake to do this. It can, however, protect the grower at this time by the pool, where he would be absolutely powerless to protect himself.

It is fortunate that this overproduction has come the third year in the operation of the Burley Society and not in the first year, as it is now better fortified to meet these conditions. It has also increased its membership to 90,000 growers, which represents fully 90 per cent of the crop. —*Elizabethtown (Ky.) News.*

Also especially equipped and efficient in handling export orders whether large or small.

Porto Rican Tobacco

The day of prosperity for the Porto Rican Tobacco Industry has arrived

The phenomenal success of many of the advertised brands of "mild Havana cigars" is largely due to the use of Porto Rican Tobacco either exclusively or blended with other tobacco as a filler.

In the past it was not always possible to tell whether the tobacco sold as Porto Rican was all grown on that Island or mixed with a Foreign Tobacco, but now

The Government Guarantees

the source of all tobacco—either in the leaf, scraps, or in cigars — shipped from Porto Rico.

This is done by means of stamps affixed to every barrel or bale of tobacco and on all boxes of cigars or "little cigars."

The White Guarantee Stamp

on shipments of tobacco guarantees that it is of pure Porto Rican growth; on boxes of cigars that the contents were manufactured from tobacco grown on that Island.

A Tobacco Experiment

Toledo smokers, who have been told by well-meaning friends that burning tobacco throws off deadly carbon monoxide, may sleep soundly tonight. For there's nothing to it.

Uncle Sam himself, at the Pittsburgh Experiment Station of the Bureau of Mines, recently conducted tests to find out all about it.

Three men were confined in a closed chamber containing only 1,000 cubic feet of space. For 90 minutes they smoked all kinds of cigarettes, one after the other, as fast as they could make them burn. Next they tackled cigars and stogies from the worst to the best. Finally they pulled on every known kind of pipe from clay to meerschaum.

At the end of the smoke-fest the air of the chamber was so smoky that it was impossible to see across it. The smoke was so irritating to the eyes of the men that they had to wear goggles. But it wasn't dangerous.

Samples of the air and of the smokers' blood were analyzed. It was found that the carbon monoxide content of the air was less than one one-hundredth of one per cent. The maximum blood saturation was 5 per cent. Some of the men inhaled the smoke, but the inhalation did not pass beyond the bronchial tubes. It did not penetrate the lungs.

So, although the men probably did not get much pleasure from their marathon with Lady Nicotine, it is certain, says Uncle Sam, that it did them no harm. Say, have you got a stogie? We have a match.—*Toledo (O.) News-Bee.*

Pennsylvania Buying Season Slow About Opening

"Let George Do It," Seems to Be Sentiment Among Packers —Early Transactions Not Regarded As Indications of What May Follow—Much Caution Being Exercised.

LANCASTER, Pa., Oct. 15.—"Let George do it!" seems to be the universal sentiment among Lancaster packers in regard to the formal opening of the 1923 buying season. The pyrotechnic transactions in the early part of the season cannot really be said to have opened the business on the new crop, since they are so far from what subsequent sales must be that they give no indication of the condition of the market nor forecast what trend prices will follow.

Not Making Price Predictions

The packing fraternity is very reticent about declarations as to the level at which the market will finally establish itself when buying begins in earnest. They emphatically decry, however, all predictions that prices will stay anywhere near the mark of 26 cents which was set by Cressman's Sons on the sales that have thus far been reported. Rumors, indefinitely set afloat, but not certainly substantiated, have it that several of the country packers have been buying during the past week at prices in the neighborhood of 18 cents for the wrapper grades. However that may be, all indications point to current prices throughout the 1923-24 season being at about that figure, and certainly conditions do not warrant the independents welcoming a much higher one.

Hesitate to Rush In

Packers are reluctant to rush into the market and indulge in a buying spree, before the crop has been definitely appraised and its value fixed in some other figures than those set early in the season. None of the independents and few, if any, of the country packers have as yet entertained any really serious thought of buying; the prices asked, they declare, being prohibitive.

The 1922 Crop Not Broadly Profitable

One very powerful reason that is influencing many tobacco men to go easy on their operations this year is the fact that but a small minority can show a profit on their 1922 goods. By far the large majority actually lost money and not a few barely broke even. Even where packers bought their tobacco at prices which should have insured them a safe margin of profit, damage and losses through black rot and mush rot cut the margin of safety to shreds and left many an operator "in the soup."

Exercising Caution

Extreme caution and a reluctance to open the buying season is, therefore, a prerogative of the packer this year and he is exercising it to the limit. Whether the season will finally begin at the volition of the packing fraternity or whether the large manufacturers will send their buyers out, and thus, to some extent at least, set the season's price, is yet to be determined. The General Cigar Co. and Bayuk Cigars, Inc., are the two largest users of Pennsylvania and have, up to this point, shown a lethargy which matches the packer's own.

Old Stocks Are Inactive

Movement of old goods is still on the wane. But one sale was transacted last week, as far as could be ascertained. This was to K. Straus & Co., of Philadelphia, who purchased three small packings in different sections of the county. One lot was bought from Jacob Brenneman, of Millersville; a second from E. Z. Shaeffer, of Ephrata, and the third from a farmer who had packed about 150 cases. No scarcity exists in old leaf, although the demand for high class fillers has not as yet been completely met.

Stripping Havana Type

Havana growers are hard at work in the stripping cellars, getting the crop in readiness for shipment. All of this leaf has been sold and at prices which were generally very favorable. The growers received in the vicinity of 30 cents per pound for the bulk of the crop, which was of good quality this season and heavy in yield. Although the only hail damage in the county this season occurred in the Havana section, nothing but Pennsylvania was harmed as the Havana crop was already harvested. Escaping this one menace and with growing conditions in their favor, Havana growers are well satisfied with the year's results.

Excess Moisture Causes Anxiety

Damage to the hanging crop of seedleaf as a result of the present spell of damp weather is threatening, although growers are inclined to be optimistic in view of the fact that cool, windy nights are dissipating much of the accumulated moisture. A large portion of the leaf went into the sheds while it contained much of the succulency resulting from its late development and will require, therefore, plenty of ventilation to effect a good cure. Pole burn, bugbear of the grower and packer alike, follows poor ventilation and too much moisture, and growers are putting forth every effort to prevent excessive damage from this source.

Bulk Sweating

Improperly cured leaf is generally reflected as one of the packer's worst troubles. One packer in Lancaster this year informed the writer that he suffered a 20 per cent loss on his entire 1922 holdings through damage which came as a direct result of improper handling by the grower. The bulk sweat is in most cases a panacea for these troubles, but this method involves considerable expense. It has been estimated that to bulk sweat the leaf adds an expense of about $4 per case to the handling of the crop in the warehouse. When it is remembered that more than 75,000 cases of tobacco are annually packed in Lancaster county some idea of this great loss may be gotten. Even when bulk sweated, the aged tobacco may yield a small percentage of rotted leaf. This condition is all the more to be lamented since it could be prevented, in large measure, by a little care in the preliminary handling of the leaf.—KEYSTONE.

"40 a Day Keeps—"

There has been a great amount of talking about smokes and smoking since James B. Duke's casual assertion not a great while ago that he regarded it a normal day when he smoked 40 cigars. Probably the saddest inspiration of the tobacco man's statement seized an office boy in a certain office, who accepted a wager that it couldn't be done. He was resolute that it could, and by him.

He began at nine o'clock one morning and weakly displayed 14 cigar stubs at noon. He had until four o'clock. At 3.30, those who made the bet sought him out in a vacant room, where he was struggling to smoke and breathe in a cloud of heavy smoke. There he sat, head in hands, elbows on knees, cigars 28 and 29 smouldering beside him. Realizing the futility of burning one cigar at a time up to the fortieth, he had lighted two, and the fumes had all but put him to sleep.—*Wall Street Journal.*

Wisconsin Market Shows Signs of Renewed Life

armarks Indicate More Animation—Operators Browsing Around Interesting Places—Mail Inquiries Increase—Acute Binder Situation Now Generally Recognized.

EDGERTON, Wis., Oct. 14.—Things have own earmarks of becoming more lively this state the last week. Several out town operators have been browsing ound places of interest. Inquiries, ainly preliminary in character, have arted to form a part of the mails. Buy- g has not grown much in volume, but is taken a startling upward trend in ices.

General Trade Awakening

General indications are that the gen- al trade is rapidly awakening up to the ute situation in the Wisconsin binder arket. It has been a platitude during e past few weeks around this territory, at the manufacturers have not yet ally awakened to the actualities con- rning the 1923 production yield of this ate.

Active Autumn Apparent

Now everything points to an active utumn in this state. At least three well own eastern houses have had trusted presentatives in the field hereabouts, d about thirty crops in the south have ne into second hands at thirty cents a und. This is all the more striking in ne, in that several vents in the sheds using crops sold the past week have nelled very noticeably of damage. bout a dozen crops around Cottage rove, housed before the frost, were ld last week at those record breaking ices for peace times. If any appreci- le volume of southern is going to bring cents this year, the early northern yers at prices ranging from 22 cents, thirty-three cents will be envied ones nong the rest of the trade, at least for e time being.

Some Thirty-Cent Northern Sales

Some buying in the thirties has gone in the north also, and there would ve been a far greater number of crops oved had they been there to be found. ekkedal, Jefferson, Mabbett, Harper, and others have picked several lots in Trempealeau, Buffalo, and Grant counties.

Not Much Frozen Leaf Harvested

Also it would be appropriate to state at this time, that not more than ten per cent of the northern, which was frozen in the field, is being harvested. This is not a wild guess, but the mature and general estimate prevalently held by the operators of the state who are in a position to know.

Southern Frozen Crops Receiving Attention

The market for the frozen tobacco in the south showed its first signs of life through reports from Cottage Grove to the effect that about a dozen of the least damaged crops, then in the field, were bought by one of the big stemming concerns at ten cents straight. A guess made on the spur of the moment about the probable significance of this report would be that perhaps thirty-five to fifty per cent of the southern frozen tobacco will eventually find its way to some kind of a market before the next crop is planted.

The general estimate among the trade has it that the southern supply of '23 binders will be cut about twenty-five per cent through shed damage.

As yet no decision has been given out concerning the Supreme Court's rehearing of the Pool-Bekkedal trial.

Shipment of cases out of this market has been quite heavy the past two weeks. —BADGER.

Wisconsin Pool

According to the dailies, October 31 has been set by the Pool as the last day on which expenses for the 1922 crop may be computed. After that date expenses will be charged to the 1923 crop. Final payments on grades of tobacco will be made as soon after Oct. 31 as possible. —*Edgerton (Wis.) Reporter.*

Professor Shepherd Agrees with Mr. de Pilis

Replying to letter written by F. A. Pilis to Prof William R. Shepherd, pert in American History of Columbia niversity, regarding the Matoaka- ocahontas controversy, Professor Shep- rd recently wrote:

"The delay in answering your com- unication of June 7th is due to my pro- nged absence in Europe, from which I ve just returned.

"The subject that you bring up in ur letter is one obviously of interest every student of American History, d of especial interest to a Southerner e myself. The halo that once en- rcled the brow of of the late Captain hn Smith has been replaced by a nim- s inscribed with the names of Mande- lle and Munchausen, to say nothing of ok of North Pole fame! What is not nerally known, I fancy, is the probable urce of the redoubtable Captain's yarn. "You will remember that Smith first blished his account of the deliverance m death in his History of Virginia, me eighteen years after the event. In o previous works brought out, if I all aright, in 1608 and 1612, he says ught about one of the fairy tales of our ildhood. In 1613 not many years be- re Matoaka appeared in England, chard Hakluyt translated into English der the title of 'Virginia richly valued, .,' an account written by a Portu- ese Knight, commonly known as the ntleman of Elvas', descriptive of the pedition of Hernando de Soto. There- in he relates the story of one Juan Ortiz, a member of the equally ill-fated venture of Panfilo de Narvaez, who spins a yarn identical in substance with that which Smith seems to have appropriated and certainly incorporated in his History of Virginia. Since in those swashbuckling days there was no common prejudice against plagiarism, and the use of the deadly parallel did not exist, it is not surprising that the Captain may have seized the opportunity to cover himself with glory by association with the name of an Indian princess.

"If I can be of any service in furthering the project that you have suggested, I have no objection to having my name placed upon the list of members of the Committee formed for the purpose."

Confers with Chiefs

Ellis A. Russell, Philadelphia representative of the Industrial Leaf Tobacco Co., of 151 Water street, visited headquarters last week for a conference.

Touring the West

Leo Hirsch, leaf tobacco dealer and packer, of 173 Water street, is hitting the trail in the West, and during a four weeks' tour, plans to visit the principal cigar manufacturers in that territory.

Thompson Sells Out

WATERLOO, Iowa, Oct. 13.—Charles Thompson has sold his cigar store, etc., to Frank and Rex Bryant.

Philadelphia Pleased With Present Conditions

Future Outlook Also Presents Gratifying Prospects—Satisfactory Reports Brought from Big Jobbing Centers—Retail Trade Shows Steady Progress—News Notes.

PHILADELPHIA, Oct. 16.—Direct personal confirmation of the optimistic descriptions of present day conditions and of tomorrow's prospects in the tobacco industry, made in these columns recently, was given during the week by two men well qualified to express authoritative opinion, and from widely different points of view.

Activity Among Big Distributors

Returning from a four weeks' trip extending from Boston to Omaha and covering the chief centers of distribution between, Sales Manager Willis A. Andruss, of the Congress Cigar Co., said that without a single exception he found evidences of splendid prosperity in every center he visited, and with trade confidence in the fall, particularly for the holiday season, running higher than it ever had been so early in the year in quite a long experience. All the big distributors he described as being eager to secure adequate supplies for exceptionally large demand and he also noted the fact that retailers already were placing their commitments for the holiday season in order to be in a position to have the goods when the time to dispose of them arrived.

A Retailer's View

From the point of a centrally located retail dealer, Frank K. Sterner, of the Sterner Store, on 12th street, characterized business at the present time as being all that could be expected and as bearing indications that the holiday season will be one of unusual satisfaction. Probably for the whole line of tobacco, cigarettes, and of smokers' requirements, but particularly for the broad line of medium priced goods. Meanwhile, with typical fair October weather, centrally located retailers are enjoying steadily an increase of business.

Start Work on Noble Eisenlohr Monuments

The corner stone of the first of two institutions with broad philanthropic purposes, made possible by the benefaction of the late Commodore Louis H. Eisenlohr, head of the nationally known company, Otto Eisenlohr & Bros., was laid during the week with impressive ceremony. It was that of the Louis H. Eisenlohr Home for Girls, one of two additions being erected at the Masonic Home at Elizabethtown, Pa. The corner stones were laid with the ceremonies of the Masonic ritual. Presiding Judge Norris S. Barratt spoke in eulogy of Mr. Eisenlohr, his intimate friend for many years. Erection of the home was made possible by a bequest of $300,000 for charitable purposes made in the Eisenlohr will and to be divided between the Masonic Home and the erection of a Nurses' Home at the Methodist Episcopal Hospital in this city. Attending the ceremonies at Elizabethtown were the executors of the Eisenlohr estate, his brother, Charles J. Eisenlohr, and Daniel Housman, accompanied by many personal friends of the late benefactor and of University Lodge No. 610, F. and A. M., of which he was a member. In the cornerstone was placed Mr. Eisenlohr's Masonic jewel, or insignia, which, according to custom among Masons, ordinarily descends to the son of the deceased. Since Mr. Eisenlohr was unmarried the cornerstone was deemed the best place for the preservation of the jewel.

Has Sympathy of Trade

A voluntary petition in bankruptcy was filed during the week by Albert Seigle, retail cigar dealer at 8 South Fourth street, who placed his liabilities at $1,026 and his assets at $305. Walter C. Douglas, Jr., was appointed referee. Creditors of Seigle regard the step as having been an unfortunate one. Some time ago when his financial embarrassment was discovered and the cause of it was traced to influences beyond his control, there was an agreement among them to aid him in getting on his feet again, investigation having shown that he was worthy. He had a good war record. It appeared that upon the exertion of pressure by one of the smaller creditors for payment Seigle made the application for bankruptcy. It is still hoped that his affairs can be untangled without litigation.

La Palina Variety Package

So large has been the demand for the recently introduced variety package of the Congress Cigar Co. and its La Palina leader, five sizes being packed in subdivisions of five each, and retailing for $5, that the firm has been compelled to make an apportionment, demand exceeding the readily available supply. Samuel Paley, head of the firm, has recovered from recent illness and is back at his desk.

To Increase Distribution

G. B. Saunders of the Sperling Tobacco Co., Wilkes-Barre, Pa., has been added to the distributing force of Allen R. Cressman's Sons.

Clarence Levans has been added to the sales organization of Bayuk Cigars, Inc., and is doing missionary work with the Smith-Keffer Co. T. H. Asbury, similarly is doing missionary work on Bayuk products with the Scranton Tobacco Co.

Seriously Injured by Bandits

After throwing Nathan Osafsky, proprietor of a cigar store, at 482 North Sixth street, through a plate glass window and robbing the cash registers of $60, three masked bandits engaged in a pistol battle with police shortly after midnight. As the robbers escaped in their motor car one of the policemen's shots passed through the rear window of the machine and is believed to have wounded one of the fugitives. The police believe the bandits are the same who have held up and robbed a number of cigar stores within the past few weeks. Osafsky, cut and bleeding, was stuck fast in the smashed window as the robbers went about their job. He is in the hospital recovering from wounds.

Visitors to the leaf trade included D. Dreux and Ray S. Clark on personal visits to patrons of the house of D. Dreux, Inc., of New York; Representative Kleeblatt of Isadore Cohen, New York, and Henry Rindskops of Lancaster, Pa.

Samuel Yudelson of S. Yudelson & Co., 255 North Third street, Philadelphia, made the rounds of up-State factories and found that business was picking up for the smaller manufacturers, although buying of leaf was cautious and from "hand-to-mouth" variety.

Edward M. Laing, who covers New York State and Pennsylvania for P. C. Fulweiler & Bro. Co., of 927 Sansom street, started out this week to visit the distributors of Lew Wallace, Ivanhoe and La Madrid.

Announcement of a hearing on the application of Howard W. Little, formerly a cigar dealer at Juniper and Sansom streets, for a discharge from bankruptcy as of November 15, 1923, was made during the week. It will be held in the United States District Court here in Philadelphia with I. Smith Raspin, 133 S. 12th street, as attorney for the petition.

Dissolve Partnership

Announcement of the dissolution of the ɪrtnership existing between William Vaschler and Max Sacks, trading as Vaschler Cigar Store, at 827 Chestnut reet, was made during the week when Iax Sacks withdrew as a partner from ıe business. It will be continued by Vaschler under his own name.

The Philadelphia trade was notified ɪring the week of the intention of the lark & Scott Co., of Scranton, Pa., anufacturers of smoking and chewing ·bacco, to increase manufacturing facili- ɛs and to take over an additional 7,500 ɛt of floor space to provide for the ex- ınsion.

In Bankruptcy Proceedings

The Progressive Cigar Corp. became volved in an involuntary bankruptcy ·oceeding when creditors last Friday ed a petition in the United States Dis- ict Court in Philadelphia against the ·m, which occupies the second floor in ıe building at the northwest corner of welfth and Race streets. The creditors ho petitioned the court in the involun- ry proceedings were Scheck Advertising gency, $6,985; Wolf Brothers & Co., ,030, and the Strait Advertising Serv- e, $750. The Progressive Co. was or- ınized about five years ago by Maurice ravise and Max Lipshutz, formerly as- ɔciated with his father in the cigar anufacturing business. It has been en- ɪged in the production of Madam But- rfly, which for a time had a large hiladelphia patronage. Of recent onths it was learned that the firm, hich was also the manufacturer of a ve cent proposition known as Lipshutz pecial, with a fairly good patronage in tlantic City, had turned over the manu- .cture of this brand to the Wolf rothers Cigar Manufacturing Co., of ork County, but maintained the dis- ibution from the local headquarters.

China and Cigarettes

A generation ago it was a saying in ew England that if any Chinaman ıould add an inch to the length of his ıirt all their cotton mills would work ɛrtime. The cigarette manufacturers ɛclare that if every Chinaman who ıokes would consume one more cigarette day, the tobacco market in this country ould boom. Twelve billion American garettes, an average of 1,000,000,000 a onth, passed out of the ports of the ıited States in the fiscal year just ıded. Curiously, too, says the *Trade ecord* of the National City Bank of New ork, nearly all of them went to the rient which produces half of the tobacco the world and has ample supplies of bor with which to turn it into form for ıe. While the whole world made the ɛquaintance of the American cigarette ıring the war period, it was in the rient that its use ripened into a "habit" hile the European habit of the war ɛars proved only temporary. Of the 2,000,000,000 cigarettes passing out of ır ports in the fiscal year 1923 nearly 9,000,000,000 went to China alone, approximately 1,000,000,000 to the Straits Settlements and Dutch Indies, and another 1,000,000,000 to Siam, Hong Kong, Japan and the Philippine Islands, while Europe, which took 8,000,000,000 in the year following the war, took less than 250,000,000 in 1923.

Curiously, adds the *Trade Record*, this American cigarette habit has developed in a section of the world which is itself a very large producer of tobacco, since out of a world production of 4,000,000,000 pounds a year India produces 1,000,000,000, China 500,000,000 and the other Oriental countries another 500,000,000, indicating that half of the world's tobacco crop is grown in the Orient, which has despite that fact so enormously increased its takings of our cigarettes, until nine-tenths of our cigarette exports now go to the Orient.

This big increase in our exports of cigarettes to the Orient as a whole occurs chiefly in the shipments to China which totaled in number 641,000,000 in 1913, 6,792,000,000 in 1918, 8,507,000,000 in 1920, and 8,789,000,000 in the fiscal year 1923.—*Watertown (N. Y.) Standard.*

Baltimore Market

BALTIMORE, Md., Oct. 11.—Gieske & Niemann, leaf tobacco merchants, make report as follows:

MARYLAND: While receipts the past week were only 812 hogsheads, sales totaled 1,905 hogsheads. The previous active demand continued for all grades.

OHIO: No receipts; sales, 19 hogsheads.

Association Data

Market Comment

During the early part of September there was not much demand for tobacco, but more animation has lately been displayed, with the consequence that the sales for September will be about an average, among which a fair line of medium to good bright leaf was the chief contribution.

There has been little of the last crop of bright leaf imported so far, the offerings in the Carolinas not showing much of the class of cigarette tobacco suitable for our manufacturers.

The weather has been against the Western crop, too much rain and cold weather causing it to be attacked by "wild fire" in some sections, and a deal has been cut prematurely, though the yield, owing to the large size of the leaves, will be fully up to the average.

The Nyassas arriving are almost all of the dark type somewhat lacking in body. Those in good condition have sold freely.

A Selling Organization

(*Continued from page* 21)

the directors, and those in the association employed to look after its affairs who have facts before them. But, the officials of the association ought not to be deceived about these facts, nor delay too long in coming to a conclusion. It will be too late to sell the 1923 pool crop after the manufacturers have supplied their wants from the non-pooler.

We find some who do not understand the purpose of this corporation. It was designed and organized to sell the producers' tobacco in a co-operative manner. It is not a holding organization, nor one formed for the purpose of pooling crops to boost prices. The idea upon which it is founded is that better prices could be obtained by the growers in selling their products in a co-operative way rather than singly.

It is true that by this co-operation new markets may be found and a correct survey of the quantity and quality of the crop produced may be had, together with former crops still in the hands of speculators or manufacturers. We can also understand that some of the manufacturers of tobacco may prefer to deal with co-operative marketers rather than buying from individuals.

But, after all, the salvation of the tobacco grower in our judgment is co-operative marketing, and in order to save it at this time it may be best for the association to adopt a plan to sell in the open market, in its warehouses at public auction and in competition with the regular loose leaf houses, at least a sufficient quantity of this tobacco of 1923 to test the market.

If tobacco sells high, or at a satisfactory price, sell the whole crop and pay the grower. If it sells low the association can quit selling at its pleasure and if the price is low it will convince the non-pooler that his place is by the side of his fellow grower, trying to protect the tobacco business.

There may be other and better plans and there may be, and we see no harm in discussing this phase of the business for "a best plan" may be the outcome of the discussion. However, and beyond it all, to ultimately bring each and every grower into the association is what we want.

We see little chance to increase our membership and have the outsider come in unless something is done. But few more outsiders will be convinced that they ought to sign the contract so long as they get a satisfactory price for their tobacco and get the money upon delivery, while the pooler holds his crop, boosts the price for the outsider and gets a smaller price himself.

We regret to announce that, to us, it is more of a contest between the non-members and members of the association as to the future prices of tobacco than it is between the growers as a whole and the manufacturers, whom tobacco growers know as the "Big Four." In other words, it is "a survival of the fittest."

The non-pooler must be brought into the association within the next two years, or when the present contract expires there will be little resigning. We would have the growers in the association, as well as the directors and officials, to have a fixed purpose to so conduct the business as to bring the outsider in.—*Lancaster (Ky.) Record.*

The Need of Tobacco Men

Unrest on the farm is not a new experience in America. It is, indeed, one of the oldest of which we have any knowledge. Always there has been a reason, but not always has that reason been recognized for what it is.

Right now it is customary to blame the war, and the desperation of the farmer is currently included in the aftermath. But, at the bottom, not the war, nor yet the sudden coming of peace, nor deflation is responsible. They are contributory factors, that is all. They helped the climax forward, no more. Some of us can remember when the Populist movement swept through the middle west and the conviction grew and dominated out on the farm that everything would be about all right if it were not for the wicked money power of the East. Bryan fed them his nostrum and they swallowed it; the free and unlimited coinage of silver was to cure their ills and dismay the gold barons. That was a beautiful dream while it lasted, which was not very long, and it was succeeded by political, rather than economic, prescriptions warranted to break up the corporations, none of which was effective and not many honestly intended to be. Disillusion regularly followed upon hope and the farmer never got very far in spite of the best advice and the most admired of doctors.

Today the remedy is organization and the question is asked why, in a world which worshiped efficiency, and deferred to such shibboleths as overhead and costs plus, the farmer alone was without organization and alone knew little or nothing about the first question of all, and that is what a given crop costs. If we are reminded that there had been the Grange, and Societies of Equity, and we know not what all besides, our answer must be that these were in the main associations for a political or a social end, that mostly they had at heart some particular enactment and thereafter were not interested, but that marketing and all that is related to marketing, were remote from their purpose. True, they wanted more money, but their idea seems to have been that many asking for it in a threatening voice, a threatening political voice most of all, might be listened to.

As a rule the complaint came from two sources; the producer wanted more. The consumer wanted to pay less. And both were agreed that, out of the spread between them, there was enough to satisfy their needs. But how was this happy condition to be brought about? There were complications. The farmer must have cash. And cash was commonly least available around harvest time. To get cash, then, he was called upon to make concessions, to shade his price and be not only content, but grateful. There was no use being disgusted with the price, no use perceiving that in a brief month or so values were likely to go up substantially; if cash was what he must have he must consent to the exactions of those with the ready. And he did. Everybody being constrained to sell at the same time, the result was as per program—the buyer, in other words, set the price. It was true of wheat. Was it not also true of tobacco, and did not the farmer still further suffer on account of "condition"? Was not a more or less fanciful "dock" exacted from him?

In the meantime he had to buy in dearer markets and borrow on security that looked none too good. As a further complication the tobacco raiser was practically without information as to stocks; they talked with him about supply and demand and he listened, but very rarely could he verify the talk. And so, in a dark hour, he thought he would take measures to control supply at all events, and thus we had the Night Riders, a sad chapter, but not a chapter untelligible.

At length, and very slowly, organization, pooling, was resorted to. Experts were brought in who had to post themselves on local conditions overnight, but who nevertheless achieved the impossible. Having done so much, they proceeded to take up the next article. From raisins to tobacco was but a step; from tobacco to wheat is just another.

That by the way. The immediate problem is to preserve the work that has been accomplished. The immediate need is to secure the direction of honest men uncontaminated by outside alliances, however remote, reasonably free from personal bias and acknowledged by all, in the organization or on the outside, as the best men available. Greed must be banished, if greed there be, and a strict accountability installed. There has got to be faced the possibility of a market less strong and consequent grumbling in the ranks. Directors who direct, a dollar doing a dollar's worth, no compulsion and the frankest publicity, these are inescapable requirements.

Will they be met?—*Louisville (Ky.) Herald.*

Dissolve Partnership

FORT ATKINSON, Wis., Oct. 13.—Paulos & Ricci, owners of a cigar store, pool business, etc., have dissolved partnership. Mr. Ricci continues the business.

Dark Co-op Salary List

(*Continued from page* 11)

ments and throughout the entire district, with a view to recommending changes that would tend to reduce expenses if possible and also to increase efficiency.

Another important action of the directors was the order that no more new warehouse buildings, or additions to present buildings, should be started until the new members of the board, of which there are twelve, have time to familiarize themselves with the conditions and can act more knowingly. It was pointed out that in some few cases such a blanket order would produce trouble, so the order was modified to the extent that work which the general manager considered absolutely essential might be undertaken or continued.

It was also ordered that the membership campaign now under way in the western division of the dark fired district end officially on October 27.—M. E. BACON.

WISCONSIN OHIO

Tobacco Culture in Wisconsin and Its Economic Value to Growers

Locality and Time When First Introduced as Regular Crop Are Unknown — The "Weed" Is a Monument Unto Itself—Its Wealth Producing Power Proclaims Own Importance—Deserves Greater Consideration — Facts Revealed by U. S. Census

By DAVID D. LONG

Soil Specialist, Soil Improvement Committee, Southern Fertilizer Association, Atlanta, Ga.

WISCONSIN has no monument erected to commemorate the exact locality at which tobacco was first introduced as a cultivated crop in that state. Nor is there an exact date when this crop was first introduced. But sometime back in the early 40's as the tide of civilization was pushing westward, it was reasonable to believe that tobacco would be first cultivated, for wherever the sturdy frontiersman went, there tobacco could be expected to be found. The germ of the economic value of tobacco was deeply embedded in the American. Prior to the settlement of the state, the native Indian first grew the crop.

Needs No Monument

Tobacco as a crop in Wisconsin needs no monument. It is a monument unto itself. Its wealth producing and earning power proclaims its value, but unfortunately there are too few citizens of Wisconsin who pause long enough to hear its claims. The accomplishments of tobacco in Wisconsin deserve at least a brief attention of the citizenry of the state. Without detracting or decrying other vital and essential crops of the state, which are so necessary, tobacco can on the authority of the Census of 1920, say that:

Corn had 27.8 times the acreage and produced only 5.6 times the value of tobacco;

Oats had 54.3 times the acreage and produced only 5.2 times the value of tobacco;

Wheat had 12.8 times the acreage and returned to the state just 1.4 times the value of the tobacco crop;

Barley had 12 time the acreage and produced 1.4 times the value of tobacco;

Rye had 12.8 times the acreage and yet failed to produce a value equal to that of tobacco;

Timothy and clover had 48.5 times the acreage and brought in only 6.3 times the value of tobacco;

Potatoes had 7.1 times the acreage and returned 5.3 times the value of the tobacco crop.

Authentic Claims

These claims, authentic as they are, are in themselves monuments for the tobacco production. They are also claims for the commemoration of the man, or men, who established the industry in the state.

While the exact year and place where the introduction of tobacco was made is a disputed point, it is known that the early beginnings of the tobacco industry did not travel along easy paths. Impetus to tobacco growing was first inspired in 1853 when two men carried to Wisconsin from Ohio that touch of experience which was necessary to produce the quality which creates the demand for tobacco. These men no doubt inherited, from the early primeval days of settlement on the American continent, the knowledge that in the production of a crop of quality, tobacco was of a great wealth producing power. They at least carried the idea from Ohio and from Ohio it is not a great distance to Kentucky and from Kentucky back to Virginia, where tobacco was money. While tobacco is a monument unto itself, it is also a monument to these men who made it successful to Wisconsin. These men were Ralph and Orin Pomeroy.

Getting an early start in the tobacco industry in Wisconsin

Wisconsin Tobacco Acreage

Wisconsin had, according to the Census of 1920, 9,581,980 acres of land in cultivated crops, exclusive of other crops which are reported without acreage by the census, also fruits and nuts. From this acreage there was produced for that census year crops having a total value of $409,969,215. The part tobacco played in the production of this value is interesting and will be presented in as graphic a form as possible.

Average Yield Per Acre

Tobacco as reported by the Census of 1920 was planted on 41,465 acres and produced 52,454,246 pounds, having a value of $11,539,932. The average acre of tobacco produced 1,265 pounds and a value of $279. There were 9,787 farms, or 5.2 per cent of the farms in the state reporting the production of this crop.

Productive Power of Tobacco

While tobacco occupied only 0.4 of 1 per cent of the crop acreage, yet this 0.4 of 1 per cent of acreage produced 2.8 per cent of the gross crop value, exclusive of other crops reported without acreage, fruits and nuts. This means that for every per cent of acreage which tobacco occupies in the agricultural system, the crop returns 7 per cent of value. No other of the general farm crops of the state has a power to produce such a large percentage of value for the acreage employed. The potato crop, in fact, comes next to tobacco but this crop returns but 4.77 per cent for each per cent of acreage. Table No. 1

presents the cropping system of Wisconsin, showing the division of acreage and the division of value from this acreage. Plate I presents this data in a graphic form.

Table No. 1—Tobacco Per Cent of Acreage and Per Cent of Crop Value Compared With Other Crips in Wisconsin*

Crop	*Per Cent of Acreage*	*Per Cent of Value*	*Per Cent of Value for 1% of Acreage*
Tobacco	.4	2.8	7.00
Corn	12.0	15.7	1.31
Oats	23.5	14.2	.60
Wheat	5.5	4.1	.74
Barley	5.2	4.0	.77
Rye	5.5	2.6	.47
Hay and Forage	41.5	38.2	.92
Potatoes	3.1	14.8	4.77
Other crops	3.3	3.6	....
	100.0	100.0	....

* From U. S. Census, 1920.

High Acreage Value

The high value per acre of tobacco in the state of Wisconsin is responsible for its great economic value as a crop. It can, therefore, on a small acreage return a relatively high value. As mentioned above, tobacco had, according to the Census of 1920, a value of $279 an acre. According to the same source of information corn for the same year had a value of but $56.10. It therefore requires 4.97 acres of corn to produce the value of one acre of tobacco. For corn to produce the value which tobacco produced on 41,465 acres there would be required of corn 203,700 acres, or 17.6 per cent of the corn acreage of the state. This is no small accomplishment for any one crop and tobacco through its high acreage earning power is the one crop which is able to accomplish the same. A similar comparison to other crops would be of interest and value in appreciating the merits of the tobacco crop.

Compared With Oats and Wheat

Oats, for instance, had an average value of only $25.80 an acre, and it would require 10.7 acres of oats to equal $279 value of one acre of tobacco. For oats to produce a value equal to that which tobacco produced on 41,465 acres there would be required 446,500 acres or 19.9 per cent of the oat acreage of the state.

The wheat crop, according to the 1920 Census, had an acreage value of $31.10. Practically 9 acres of this crop would be required to equal the value of one acre of tobacco. There would also be required 371,000 acres, or 70 per cent of the wheat acreage of Wisconsin to produce the value which tobacco produced on 41,466 acres.

The acreage value of barley was $33. To equal the value of one acre of tobacco 8.45 acres of barley are required. For barley to produce

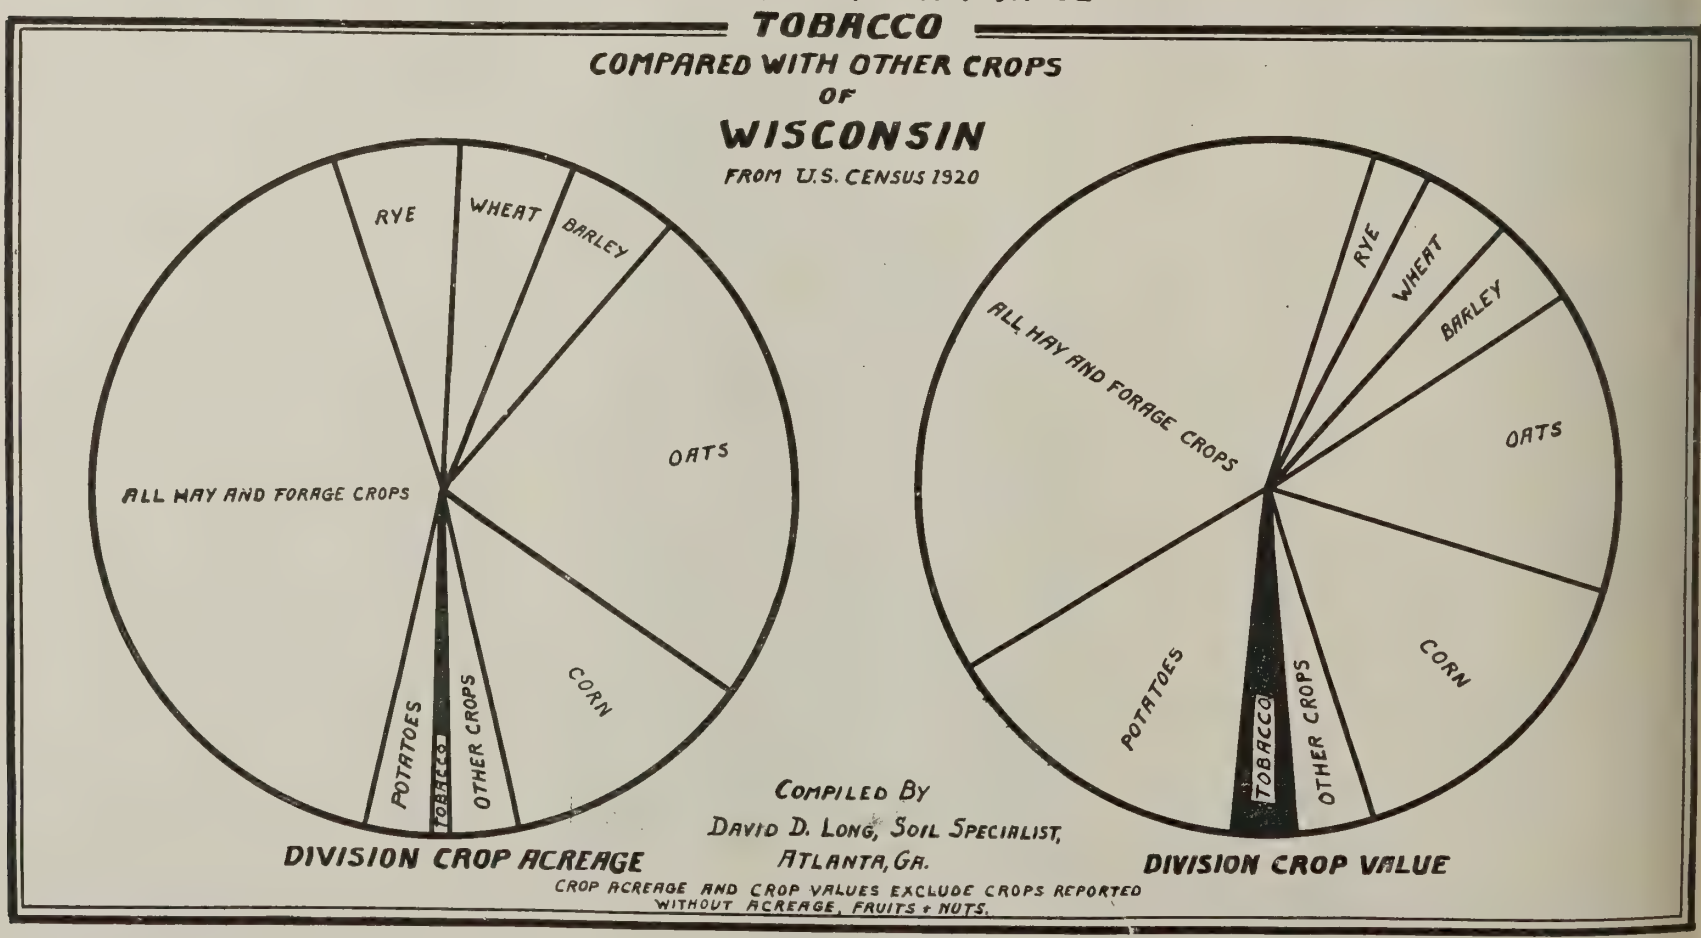

Plate 1

ıe value equal to that of tobacco, 350,000 or 70 er cent of the barley acreage would be neces- ıry.

High Value of Tobacco Crop

Rye has a very low acreage value, having but 20.15 per acre. It would require 13.85 acres f rye to equal the value of one acre of tobacco. 'or the rye crop to produce a value equivalent) that which tobacco produced there would be equired 573,500 acres or 44,437 acres more than ıe acreage of rye given by the 1920 Census.

Various Crops Tabulated

Similarly it would require 320,200 acres of mothy and clover and 56,000 acres of potatoes) produce the value which tobacco produced on 1,465 acres. Table No. 2 presents the value of

Table No. 2—Tobacco Value Per Acre Compared With Other Crops in Wisconsin*

Crop	*Value Per Acre*	*Acres to Equal Value of 1% of Tobacco*
Tobacco	$279.00	....
Corn	56.10	4.97
Oats	25.80	10.70
Wheat	31.10	9.00
Barley	33.00	8.45
Rye	20.15	13.85
Timothy	33.10	8.40
Timothy and Clover	36.00	7.75
Alfalfa	63.40	4.40
Potatoes	206.00	1.35

* From U. S. Census, 1920.

Dane County leads in area, with a total of 14,327 acres, which is 34.6 per cent of the entire tobacoc acreage of the state. Dane County naturally leads also in production with a total, according to the Census of 1920, of 19,899,112 pounds. This production is 38 per cent of the state as a whole.

Second in Point of Tillage

Vernon County is second in point of tillage and production, having an area of 8,858 acres and a production of 10,707,138 pounds.

Plate III shows how the acreage of the state is divided for counties having 200 or more acres.

Only five of the 15 counties having 200 or more acres of tobacco have an average yield exceeding the average yield of the state, which is 1,265 pounds per acre. Of these five counties,

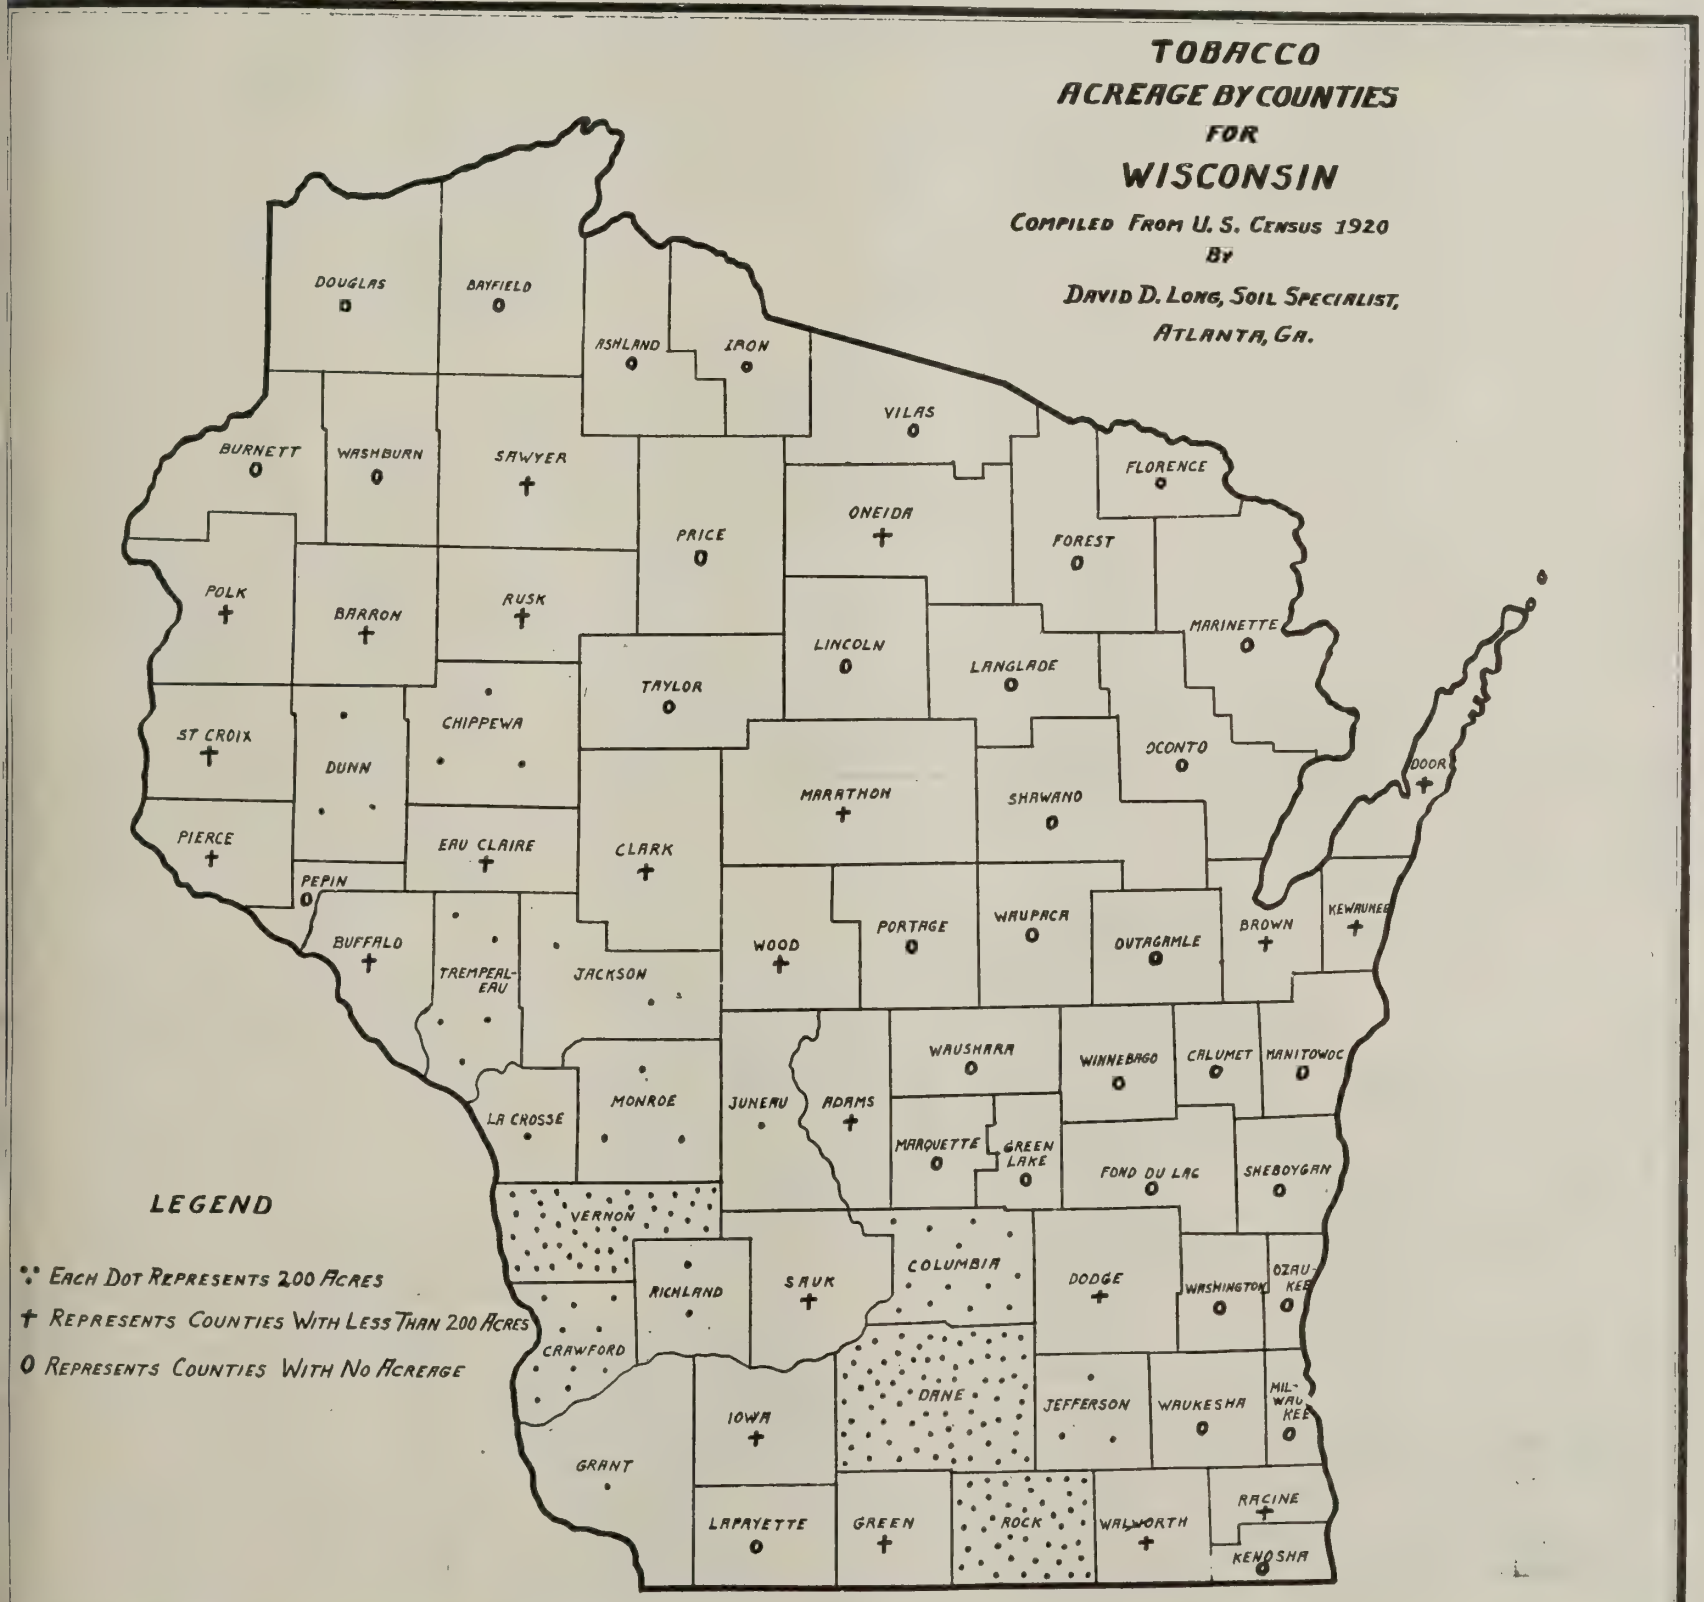

Plate III

ıe chief crops of Wisconsin per acre and also ıe number of acres required to equal the value f one acre of tobacco. Plate II graphically il- ıstrates the wealth producing power of the ıief crops of the state.

Not to Be Considered as General Crop

Tobacco in Wisconsin cannot be considered as a general crop for the entire state. Fifteen counties are reported by the census to have 200 or more acres in this crop.

Jackson County is first with a yield of 1,395 pounds per acre. Jefferson County follows closely with a yield of 1,392 pounds, while Dane County is third with an average yield per acre of 1,388 pounds.

Plate IV shows the comparative yield per acre of those counties having 200 or more acres of tobacco.

It will be seen that the biggest crops have been produced by Jefferson, Jackson and Dane counties, which show an average yield of from 1,300 to 1,400 pounds per acre. Not far behind in importance comes Dunn, Trempealeau, Monroe, Vernon and Rock counties, with an average yield of from 1,200 to 1,300 pounds; La Cross, Juneau, Richland, Crawford and Columbia counties, with from 1,100 to 1,200 pounds, and Chippewa and Grant counties with 1,000 to 1,100 pounds.

Possibility of Higher Net Profit

The wealth producing power of the crop is by no means the whole story, but at the same time it is reasonable to expect that a crop which brings in, as tobacco does, a large return per acre also carries the possibility of a higher net profit than does a crop which brings in a small return per acre. Tobacco would not be an economic crop of importance if it did not produce a handsome net profit. This is the general rule evidenced wherever statistics are available to show the relative profit of tobacco in comparison to other crops. The profit per acre is the real essence in the value of tobacco as a crop. It is the crop which has the power to produce high net profits.

Source of Information

The figure as to the relative profit from tobacco in comparison to other crops for Wisconsin were made available from the U. S. Department of Agriculture through the courtesy of O. A. Juve, who has made a considerable study of this subject in Wisconsin.

Crop Averages

The average figures for crops of Wisconsin farms for the period of 1911 to 1918 show that the average profit of tobacco per acre for this period was $60.50 in comparison to $6.80 for corn; $8.30 for silage corn; $11.50 for potatoes; $5.78 for sugar beets; $4.05 for oats; $2.55 for barley; $3.64 for rye; $5.95 for wheat; $3.28 for peas; $8.58 for clover hay; $7.15 for timothy hay; $16.44 for alfalfa, and $8.65 for mixed hay.

It is found that from the above figures that a net profit of one acre of tobacco exceeds the combined profits of 1 acre each of the following crops:

Corn, sugar beets, oats, barley, rye, wheat, peas, clover hay, timothy hay, and mixed hay.

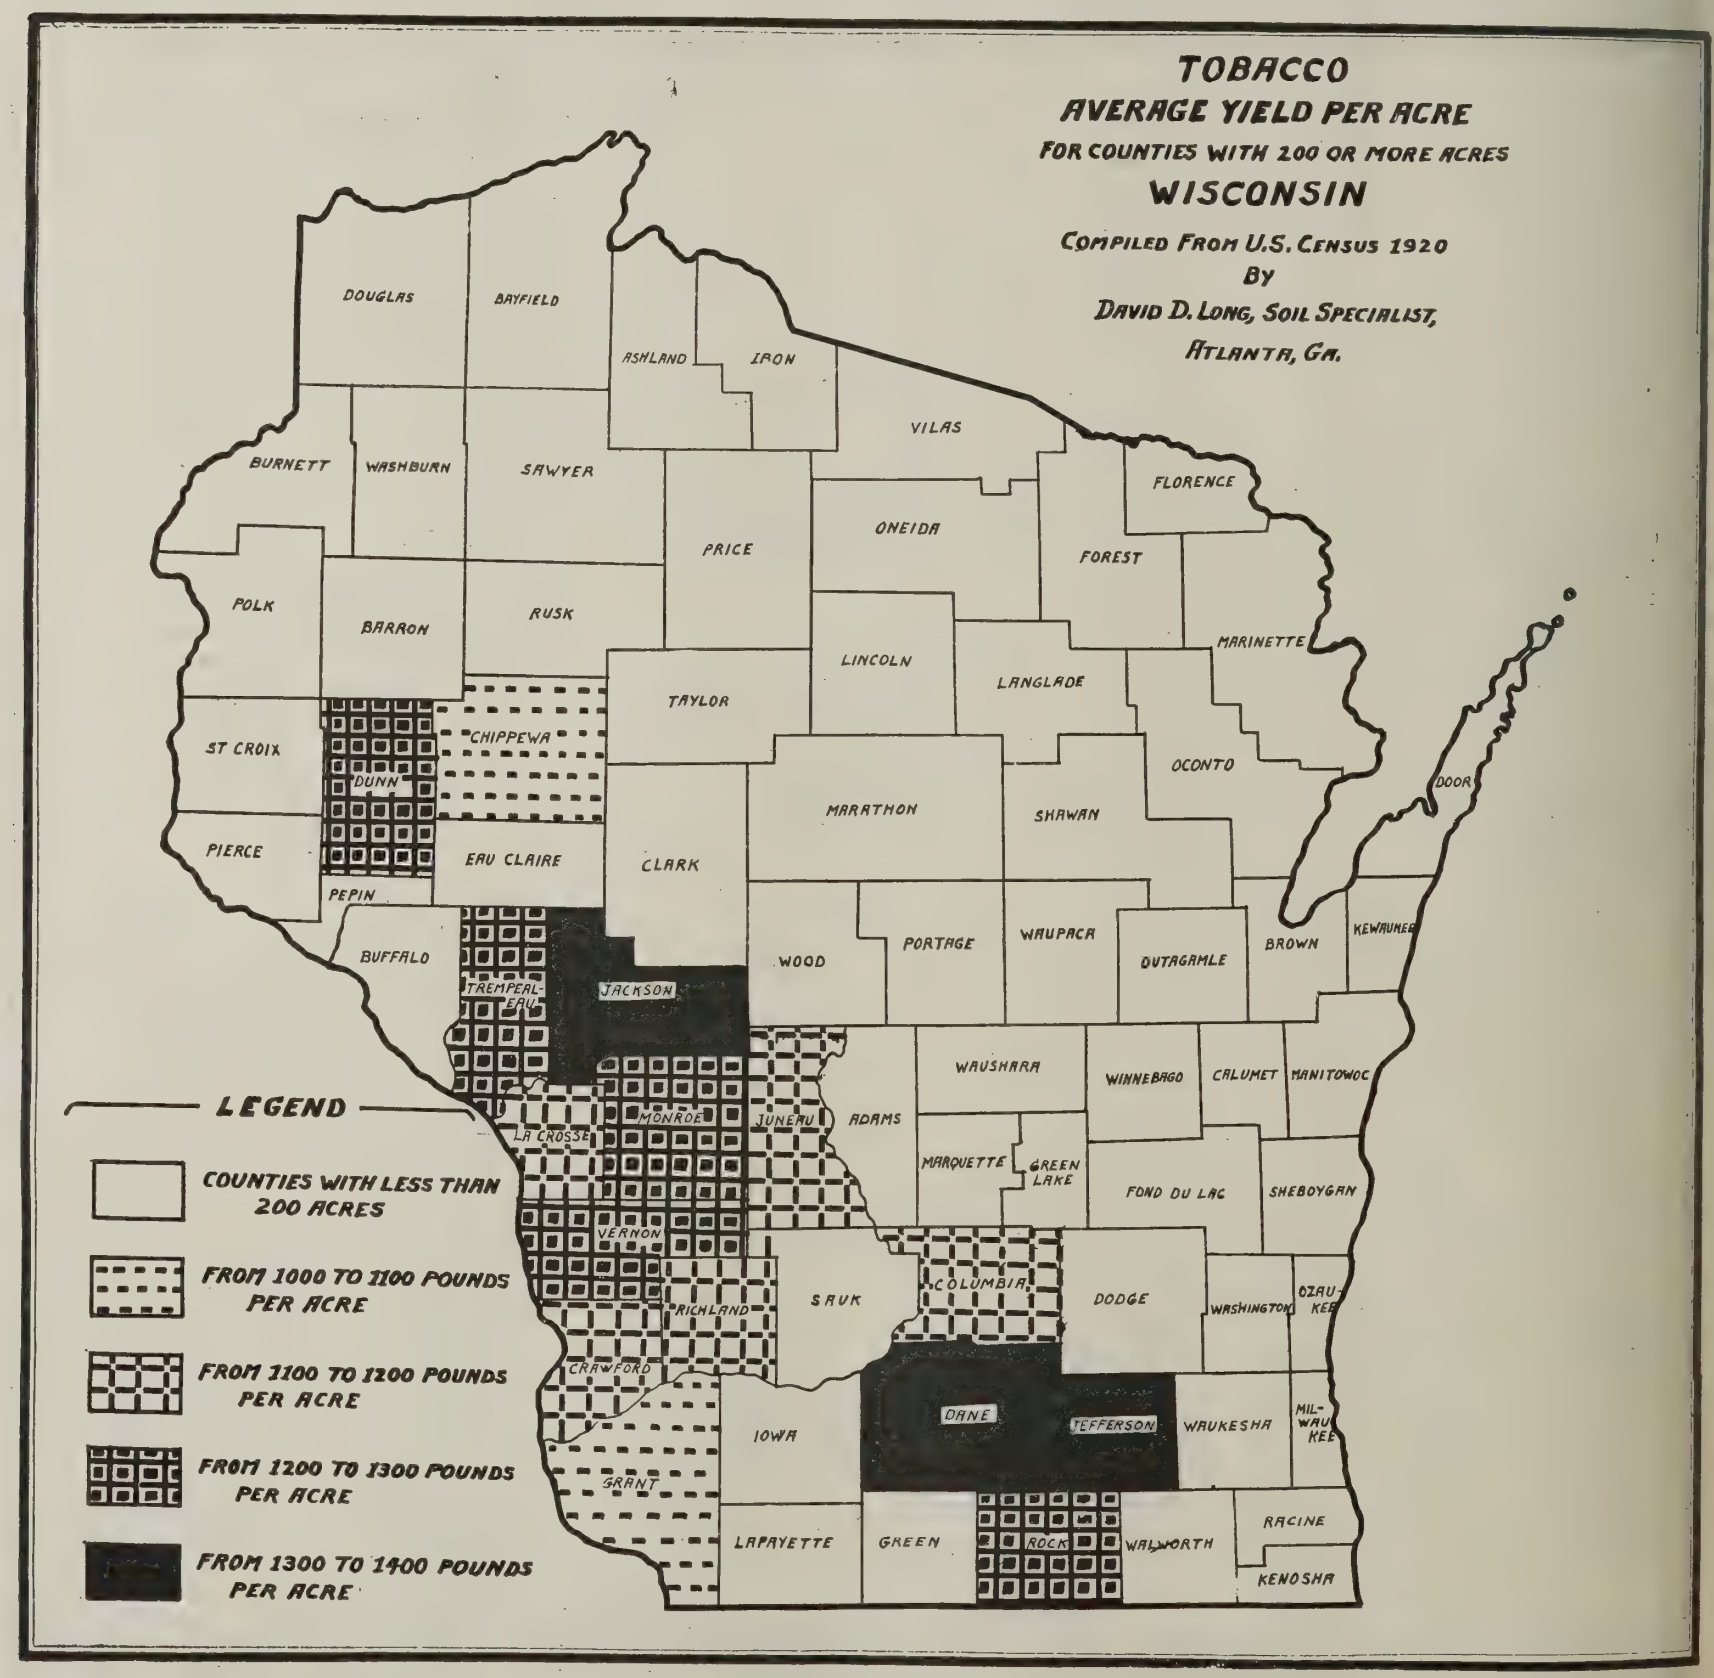

Plate IV

No Middleman Wanted

A farmer rode into a Middle Western town and inquired of the first man he met where he could find an undertaker.

"An undertaker?" the man asked. "Is there some one dead at your house?"

"No, there is no one dead," replied the farmer, "but my wife is pretty sick."

"Well, then," the man advised, "you want a doctor, not an undertaker."

"No," said the farmer. "What I want is an undertaker. You know, I have joined the Co-ops, and we have cut out the middlemen."—*Judge.*

Tobacco's Interesting Struggle to Secure Foothold in Wisconsin

From Pioneer Days of Its Raising in the State Its Progress Has Been Fraught with Many Difficulties—How Ralph Pomeroy Raised Two Acres of Broadleaf in 1852, Hauled It Forty Miles and Sold It on Credit for Four and One-Half Cents a Pound.

By ROBERT B. McINTOSH

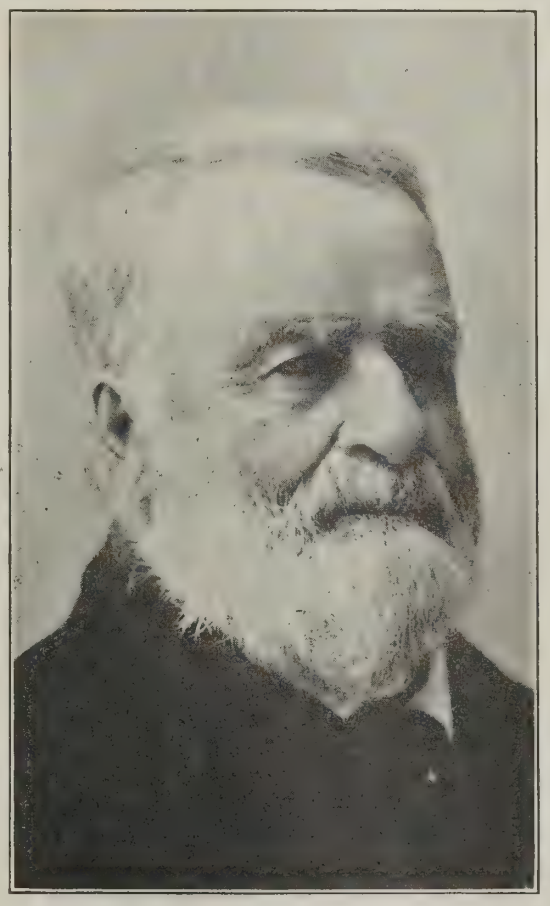
IT IS A FAR CRY from adventuring with William the Conqueror, to raising binders in Wisconsin, the state that produces the world's best. But it is a fact that adventuring with Wild Bill and Wisconsin's reputation as a binder state are very closely connected.

One day Bad Bill sat thinking hard. As he meditated with pensive eyes wandering o'er the peaceful landscape of Normandy, he picked errant cooties from the bushes that adorned his chin. Between huge quaffs from his shining horn, he came to a conclusion that was to have a profound result on our earth. His deductions ran something like this: That living in those peaceful valleys, doing nothing but punishing lots of good French wine, was not a life for his band of he-men. It was very softening for men accustomed to galloping over icebergs, or plundering wild shores all their lives. He longed to point his nose into icy, salt spray once more, and to burn a few towns.

Of his lieutenants, none was bolder, nor hairier, than one Sir Ralph Pomeroy, whose social climbing wife had, one day before the morning after, written a "de" on the family crest of arms before her husband's surname. When William, his chief, made up his mind to raid the chalk cliff country, the brave Sir Ralph de Pomeroy made preparations for traveling. He filled up his scow with his formidable armament, and *beaucoup vin rouge,* and steered his wild crew to the tight little island of Blighty.

There he helped his dashing leader whip the bally English to a frazzle at the historical battle of Hastings. There he had local fights and wild sallies aplenty until the isle was completely in the hands of his general. Having accustomed his palate by that time to the porter and stout of his new habitat, and losing some of the fire of his youth, he settled down to a mellow old age of fox-hunting, and of eating meat-pie, a delicacy than which there was none other more top-hole, in those days.

The Pioneer Spirit of Eldad Pomeroy



Of his illustrious line of descendants there was one Eldad Pomeroy. The pioneer spirit was still strong in Eldad. In 1630, this scion of the noble Pomeroy strain braved the heaving Atlantic, and founded—and was one of the proprietors of—Dorchester, Mass. Although Sir Ralph's gift of washing down huge draughts of Stout, or Burgundy, with as much precision and eclat as he spitted a Brittish warrior with his trusty sword, had given way to more industrious traits in his descendant, the Pomeroy stock had lost none of its fighting qualities. The exploits of Captain Nathaniel Pomeroy, and of General Seth Pomeroy, in the War of the Revolution are ample proof of that.

Ralph Pomeroy, the pioneer tobacco raiser of Wisconsin, and perhaps Ohio, was the eighth in descent from Eldad. He was born on his father's farm in 1814 in Suffield, Conn. He was accustomed to raising tobacco there since he was twelve years old. The pioneer urge in him, so traditional in his family strain, was too much for him, however. So at the age of twenty-four he joined the westward tide of emigration, and settled in Montgomery county, Ohio, in the now famous Miami valley. In 1838, his fields of tobacco were the first seen in that region.

In 1852, he went back to Massachusetts to marry Mary Wood, of Long Meadow, Mass. In the spring of 1853 he settled in Syene Prairie, about six miles south of Madison, Wis. That year he raised two acres of broadleaf. He had to haul the lumber for his shed over forty miles, and it was tough, disheartening work. In other words, it was work that a Pomeroy delighted to fight out, and overcome. Shortly after he filled his shed with his crop, it was blown down. He courageously went over the debris, however, and soon had it in shape again.

Wisconsin's First Commercial Crop

Mr. Pomeroy sold the crop to a small cigarmaker in Janesville, Wis. The price was 4½c per pound, tied in hands, but delivered in bales. He had another forty mile haul to deliver it. The buyer did not have the money to pay for it, and as there was not another customer in sight, he took the crop on credit. Shortly after, the cigarmaker went broke, and Mr. Pomeroy had to settle for 50c on the dollar. Thus Wisconsin's first commercial crop went its way to market. It was not the last unsatisfactory delivery to be made by a grower of the state.

Ralph Pomeroy, a pioneer tobacco grower in Wisconsin

In 1854 Mr. Pomeroy bought his famous farm a mile south of Edgerton. Today it consists of two adjoining farms, that still raise fine tobacco. Last year the two proprietors got 23 and 25 cents for their 1922 crop, for instance. Here he raised four acres of Broadleaf which was sold to that firm so famous later, Strohn and Richzenstein, for 17c. Strohn and Richzenstein were at that time cigar manufacturers of Milwaukee. A year or so later they set up in New York as dealers in leaf tobacco. W. T. Pomeroy, brother of Ralph, later had a joint account with them. W. T. was the first tobacco dealer in the state proper.

In 1855, Ralph Pomeroy gave seeds to his neighbors, and coached them in the art of raising it. The seed beds were sown in the open. The field proper was prepared, and about the time the plants were big enough, the field was hilled and they waited for rain to set the plants. Watering the plants at setting time was not then known and, of course, it was set by hand.

From this modest beginning, the industry steadily grew. In 1859, there were 87,340 pounds raised in the state, one hundred per cent of which was raised within a radius of a few miles of Ralph Pomeroy's farm. By 1870 approximately a million pounds were produced in the state.

Used Depot Passenger Room for Warehouse

Up until 1870 W. T. Pomeroy, the sole local dealer, used the passenger waiting room for his warehouse. He built his warehouse in 1869 in Edgerton, the first warehouse to be built in the state.

W. T. Pomeroy was responsible for a revolutionary step in the production of Wisconsin tobacco almost as important as the work of his brother Ralph. The story of his introduction of the Comstock Spanish seed is taken from the *Wisconsin Tobacco Reporter.* Its introduction wiped out the raising of Broadleaf in the state, and the seed is the parent of Wisconsin's famous binder stock.

A Massachusetts dealer, C. C. Mengel, wrote Mr. Pomeroy after a Wisconsin trip, that he had bought a small crop of 1871 tobacco in Massachusetts, that appeared to him so much better than the average crop, he paid 50 cents a pound for it. At W. T. Pomeroy's suggestion, Mengel secured some of the seed, and sent it out to Wisconsin. In 1872, Mr. Pomeroy planted a small patch of this Havana seed, but the plants grew very tall, the leaves were very far apart, with the result that he had little confidence in the "new-fangled" tobacco. It was so different from the broadleaf type, but Mr. Pomeroy was pleasantly surprised by being offered 75 cents a pound for it. It became known as Comstock-Spanish type.

Probably three quarters of the tobacco grown in the state is descended from that brand of seed. Many yields of it, however, have become polluted by cross-pollenization with other varieties. One or two dealers in seed, however, kept the strain by painstaking efforts so that any grower could purchase the pure seed. One of these dealers, the present W. T. Pomeroy, son of Ralph, and nephew of the first W. T. Pomeroy, has done as much or more than any man in the state to fight the introduction of impure seed.

Making a Reputation as a Binder State

From 1870 until 1880 covered the period wherein Wisconsin established her reputation as a binder state par excellence. Many eastern buyers were regular visitors to the local markets, and greedily snapped up everything in sight. By 1879 the state production had jumped to over ten million pounds per annum. That same year started a remarkable boom in tobacco from the Comstock seed. Heretofore, it was amusing to observe the furtiveness of the eastern buyers, and their vehement requests for absolute secrecy about their being in the state. A shower of samples had to vow he would not even tell his wife the name of the buyer, or where he was from. Of course, their reasons were that manufacturers had not heard of Wisconsin tobacco. Thus the precedent was established that is not yet entirely wiped out,

i. e., the selling of Wisconsin tobacco as tobacco from a different state, or even country.

By 1890, the production of binder and wrapper tobacco jumped to twenty million pounds per annum. About 1892 hybrid seed was introduced extensively into the state. This was especially true in the southern growing districts. By that time the northern regions were established. This led to many griefs for Wisconsin tobacco. Big and leafy, the hybrid type appealed to the farmers on account of its weight per acre. The packers found out to their sorrow that it was prone to damage far more extensively in the ferment, and also had a burdock taste to it. It did not come out of the sweat as fancily, and thickened up a good deal.

The southern growing areas suffered a loss through damage to its prestige that was peculiarly difficult to overcome. In fact it will take two or three years more to entirely rid the south of using hybrid types while trying to raise binders. The farmers clung to it tenaciously because of its great poundage yield, and the attempt to get the farmers to abandon the use of it was rendered almost impossible for a time because of a profound change in the commercial mechanism of the trade at that time.

New Era in Packing Circles

This was due largely to the rise of a new era in the packing circles. In the early nineties, cigar manufacturers, and eastern houses began to establish field branches within the state, instead of filling their needs through the purchase of a number of small packings. This caused corporation organization of a rather large scale. Large staffs of commission buyers with pounds instead of quality as a chief aim took the place of packers who had to discriminate in their buying, or sit on it disconsolately.

Personal equation is a big factor in any organization. A man feels he is a number, and his advancement chances are small. The big house buyers were urged to get the pounds. It was different to be one of many buyers on a commission for a large house, with a mere receiving clerk for a receiver, than to be buying perhaps alone with a small packer who received himself, and examined each crop purchased. As a natural result, it can easily be seen that soon these buyers would buy up entire sections and would give each farmer top prices with their commission checks the big idea, instead of quality.

This had a vicious result, in that the grower of big seed tobacco was the man who got the big check, on account of its weight per acre. Many of the factory branches had lots of damage in their packings, naturally. In the large scale operations the handling of the growers did not improve any either. Soon there were very few fields of the old seed to be seen. The natural result was dissatisfaction all around. The big seed was so profitable to the grower, that he put more land into tobacco than he could fertilize properly, with resultant more severe damage, and deterioration of quality. This was kept up a few years more by the urge for size among those who cut their binders with machines. But it had its inevitable result in that southern tobacco was soon a drug on the market. Then the gradual shift back to the pure Havana seed began to take place.

The Passing of Ralph Pomeroy in 1894

During the stress of these times, Ralph Pomeroy died in 1894. A man with the true pioneering spirit, his keen mind realized the empire promises of the western wildernesses. He once said, "Of course ultimate profit was of primary importance to me in beginning a potential huge industry. I was doubtful of producing tobacco of such merit in Wisconsin. Failure I feared. But I feared an unwarranted failure more—one that would needlessly condemn an important crop."

Such was the spirit and the lofty ideal of the founder of the industry. It is refreshing to think of such high minded examples as Pomeroy's in these materialistic times. The whole tobacco industry mourned his loss.

In 1900 or thereabouts, the stemmers started to become a big factor in the state's industry. The rise of the stemmers in this state furnished an unfailing market for goods the cigar market would not assimilate. As the packers sought northern more and more as the hybrid seed persisted in existing, the stemmers took more and more of the southern. It buoyed up the whole industry with more life and vigor. The southern growers who were not content to take their prices went back to good seed. In this they were enabled and aided as much by Ralph's son, W. T. Pomeroy, as any one man in the state. After years of effort, the best growing areas of the south may again be said to be using a pure Havana strain suitable to fine binders.

The big scrap concerns have become very important factors the past fifteen years in the state, and have continually used half or more of the state's crop ever since. In years of depression, they have repeatedly saved the cigar part of the trade acute over-supplies of tobacco that threatened to disrupt the business. This was particularly so in the 1920 depression when the unsold 1919, 1920 and 1921 crops were taken off a glutted market.

What the Co-operative Bug Has Done

The co-operative bug has bitten the Wisconsin grower very severely, of late years. The farmers, like many factories, lost many dollars from the methods of field branches of eastern houses, and the interwoven seed problem. Southern had not as yet re-established its reputation as soon as it went back to the pure seed. The marketing of it suffered from the district's recent black eye at times, and the resultant meagre offers for it formed the necessary bed of discontent necessary for the co-operative bug to propagate in. The Society of Equity, and many local pools had their fling, with invariable failure.

Now the biggest venture of them all to date is occupying the center of the stage. It is in the throes of inadequate capital, wild rumors, and the man size task of disciplining its members. It has a rather boomerang sort of a job. If it gets satisfactory prices one year for its members, and the large number of independents, the farmer does his darndest to swamp the demand for his product the next year. If it had not been for the late spring, the June drought, and the terrible frosts of this year, the 1923 crop would have pushed the pool, and many packers, into oblivion.

They had the luck to start in an auspicious year when all farm products were down. In 1922, tobacco, together with livestock, corn and other grains, raised a good deal in price. The northern was fought after, and the southern found a ready sale at good prices. The first year was quite a success. Opinion differs whether it was the method, or economic changes, that caused it.

State's Contribution to World Market

Since 1900, Wisconsin has annually furnished approximataely 30,000,000 pounds of binders to the world market. Many of the most famous brands made are bound with binders from this state. This is especially so in class B, C and D cigars. Companies such as the General Cigar, Lorillard, Cullman, Rosenwald, Weil, Fendrich, Consolidated, American, Spitzner, and others too numerous to mention, use it as standard binders on their best cigars, or the cigars of their customers.

When the buying methods, and ignorant seed distributors began to cause grief to the reputation of the southern districts, the northern regions came in with a vengeance. The valleys of Vernon and Crawford counties produced the fancy end of the state's crop. Since then Grant, Monroe, Jackson, and Trempealeau, came into favor. With virgin soil, narrow rich valleys overlaid with an inch, or two, of new silt each spring, these counties continued to produce the wonder binder that made the state so famous.

Edgerton rose on her famous ascendant as a world's tobacco center with the reputation of Pomeroy's disciples, and their product. It became a hive of industry with the rise of tobacco, and has retained its position as the leader ever since. W. T. Pomeroy was soon joined by men of high ideals like Andrew Jenson, Charles Mabbett, and Hal Childs. The packing fraternity of the state has kept its remarkable standing as men of the highest ideals.

Of late years, the northern growing regions have built up famous packing centers like Viroqua, Westby, and Sparta. For years the northern tobacco has drawn bigger prices. As a result, the southern sections had to content themselves with low prices. When the stemmers came in, they bought more than half of the tobacco grown. As a result of these unsatisfactory conditions, the bull-headed growers of the south were gradually weaned away from vicious practices of under fertilization, quantity, rather than quality production, and carelessness in seed selection.

Dairying in Wisconsin goes hand in hand with tobacco and one can generally find the tobacco acreage directly proportional to the number of head of livestock on the farm; and, tobacco of quality is generally found where that proportion is right.

Prosperity Ahead for Wisconsin Growers

The years of propaganda on seed selection, fertilization, proper growing practices, and smaller yields, is now seeing its fruition in the south. It is rapidly coming back into favor as a quality binder. Last year the difference in northern and southern was five or more cents a pound. Today southern is selling for thirty cents as a top, with thirty-two the present top for northern.

Wisconsin growers should be entering upon a long period of prosperity. Growers are rapidly becoming educated to seed values, and other important phases. This has come through the best of all teachers, old man experience. They should not soon forget it. With these hard knocks behind them, the intelligent growers of this state assure the world of a quality crop each year for the future.

Causes Contributing to Wisconsin's Lean Tobacco Crop for 1923

Growers Have This Year Had Indelibly Impressed Upon Them the Fact That Tobacco Growing Is a Real Gamble—The Crowning Calamity Was the Big Frost of September 14, Which Either Ruined or Damaged All Tobacco Remaining in Fields

By PROFESSOR JAMES JOHNSON
Horticulturist at the University of Wisconsin College of Agriculture at Madison, Wis.

THE STATEMENT is often made that farming is a game of chance. Tobacco growers especially are inclined to the idea that the culture of the leaf is the greatest gamble of them all. This belief is especially prevalent after seasons of crop or market failures. It certainly does seem at times as though more forms of failure and damage may befall the tobacco crop than that of any other farm product. This is partly due to the large number of field operations or processes through which the leaf must pass from the seed to the finished product.

Costs Are Considerable

The cost of labor, materials and equipment involved, is therefore considerable, and the risk carried is consequently large as compared to most other products of field, orchard or garden. When good fortune does fall to the lot of the tobacco grower, therefore, he expects, and rightfully so, to reap the full benefit, and make up for the lean years of the past, and those to come. It is the successful years that keep the grower in the game, together with the realization that there are no other certainties in money making either on the farm or in the city.

1923 Season a Lean One in Wisconsin

The 1923 Wisconsin season will prove to be one of the lean ones for most Wisconsin growers, due largely to the "big frost" of September 14, which either ruined or more or less damaged all of the tobacco left in the fields. The loss according to most estimates totaled over one-half the acreage grown. It has been estimated as high as $4,000,000 to the growers and, although the actual loss may be considerably less than this, certainly the potential loss approaches this figure, since a large part of the leaf damaged showed possibilities of high grade leaf.

The frost damage came, however, as a climax to a series of uncertainties, throughout the season to many growers. Everything that Nature had to offer in the way of drought, continued rains, extremes of heat and cold and hail visited one or more of the Wisconsin sections during the season but, in spite of these setbacks, remarkably good crops were produced and harvested before the frost particularly in the southern section.

Weather Delayed Seed-Sowing

The season started out with the plant-beds somewhat behind owing to a cold and wet spring, which delayed both the preparation and sowing of the beds as well as the growth of the plants. With the onslaught of warm weather in June, however, the plants grew with such great rapidity that in most cases the time of planting was normal. The crop for the most part obtained a good start in the fields, except for a small part of the acreage transplanted during some extremely hot weather and which had to be reset because of burning out.

Dry Weather Did Considerable Damage

Cut worm damage was small and root-rot was held in check by the warm weather so that prospects were again promising. The hot and subsequently dry weather, however, began to show its effects in the latter part of July with many of the early crops, especially in the northern section, and a short crop was in prospect for many growers. Most diseases with the exception of mosaic, which became very prevalent, were held in check by the weather. Considerable damage from the tobacco worms occurred in some fields, but these were not uncommonly numerous for the most part. Windstorms were especially rare, although a hail storm did considerable damage in one small area.

Laboring Under Difficulties

The drought was finally broken, earlier in the southern district than in the northern, and the crop began to take on a new vigor of growth and good prospects were again in sight. The latter part of August and the early part of September, however, favored the growers with too much rainfall. Not only was the harvesting of the earliest crops carried out under difficulties, but the later crops were retarded in ripening, thereby adding to the acreage normally in the fields at that season of the year and hence increasing substantially the heavy toll collected by Jack Frost.

A fine field of Wisconsin tobacco on the farm of Harley W. Jefferson

Curing Weather Has Not Been Ideal

The curing weather on the whole has not been ideal, the temperatures being relatively low and the humidity relatively high and some shed damage is expected. On the whole, however, the cured leaf of the pre-frost harvest seems to have good color, and those who were fortunate enough to harvest a leafy crop before the frost have prospects of attractive prices.

Tobacco Growing a Gamble

Certainly tobacco growing is a gamble, but there are no quitters among the regular growers in Wisconsin. Next year they expect the best ever.

Commercial Importance of Tobacco Produced in the State of Ohio

The Thread of Economic Value Attaching to Tobacco, Dating Back to Early Colonial Days—Pioneers Learned Monetary Value of Tobacco, Which Was Used As Money—European Demand for New World Product Gave First Settlers Sustenance

By DAVID D. LONG

Soil Specialist, Soil Improvement Committee, Southern Fertilizer Association, Atlanta, Ga.

OHIO has become notable as a tobacco state, but it is impossible to study the economic value of tobacco in any one state where it is a crop of importance without perceiving the profound and deep economic or commercial impression which the production of tobacco made on the early settler on the eastern shores of the American continent, shortly after European civilization established itself in the great unknown New World. That thread of economic value to tobacco, dating back to the early period of settlement and colonial days when tobacco was money, follows through to every state in which tobacco is produced commercially.

Tobacco Brought Necessities of Life

The plastic mind of man, made so open and impressionable by the newness of things in a new region, was indelibly stamped with the fact that tobacco was the crop which brought in the necessities of life. Wherever the new American traveled, his mind carried the impression and he carried the tobacco seed.

The question often arises as to what form agriculture of the new continent of America would have taken had it not been for the rapid growth of the use of tobacco throughout the countries of Europe with its consequent demand for the new world product. Would other crops adapted to the conditions of the early settlers have been produced in sufficient quantities to afford sustenance to the settlers and produced enough in addition to create a surplus of capital for pushing back the frontier?

Possibly they would have, but yet one dare not lose sight of the fact that the first stages of growth are the most necessary and exacting for full nourishment, whether it be a child, a young plant or a young colony.

In the territory now embraced as the state of Ohio history records the production of tobacco by the Indians.

This is nothing unusual, for in the eastern part of the United States in those early days, wherever you found Indians it was practically certain that you would find tobacco.

The tobacco industry of Ohio, however, did not develop from the nucleus afforded by the small areas of tobacco grown by the Indians in this territory, as was the case in the great tobacco development in Virginia and North Carolina. Tobacco was really carried to Ohio in its early days of settlement by those settlers who, from early times, were inoculated with the fact that tobacco was a money crop. Virginians and North Carolinians carried the idea across the Alleghenies to Kentucky and from there is was but a short distance across the Ohio River to what is now the great Burley district of southern Ohio.

Cigar Filler Types

Tobacco in the Miami Valley region, a large producer of the cigar filler tobacco, was introduced from the eastern coast of the United States, but from Connecticut instead of Virginia, as was the Burley region.

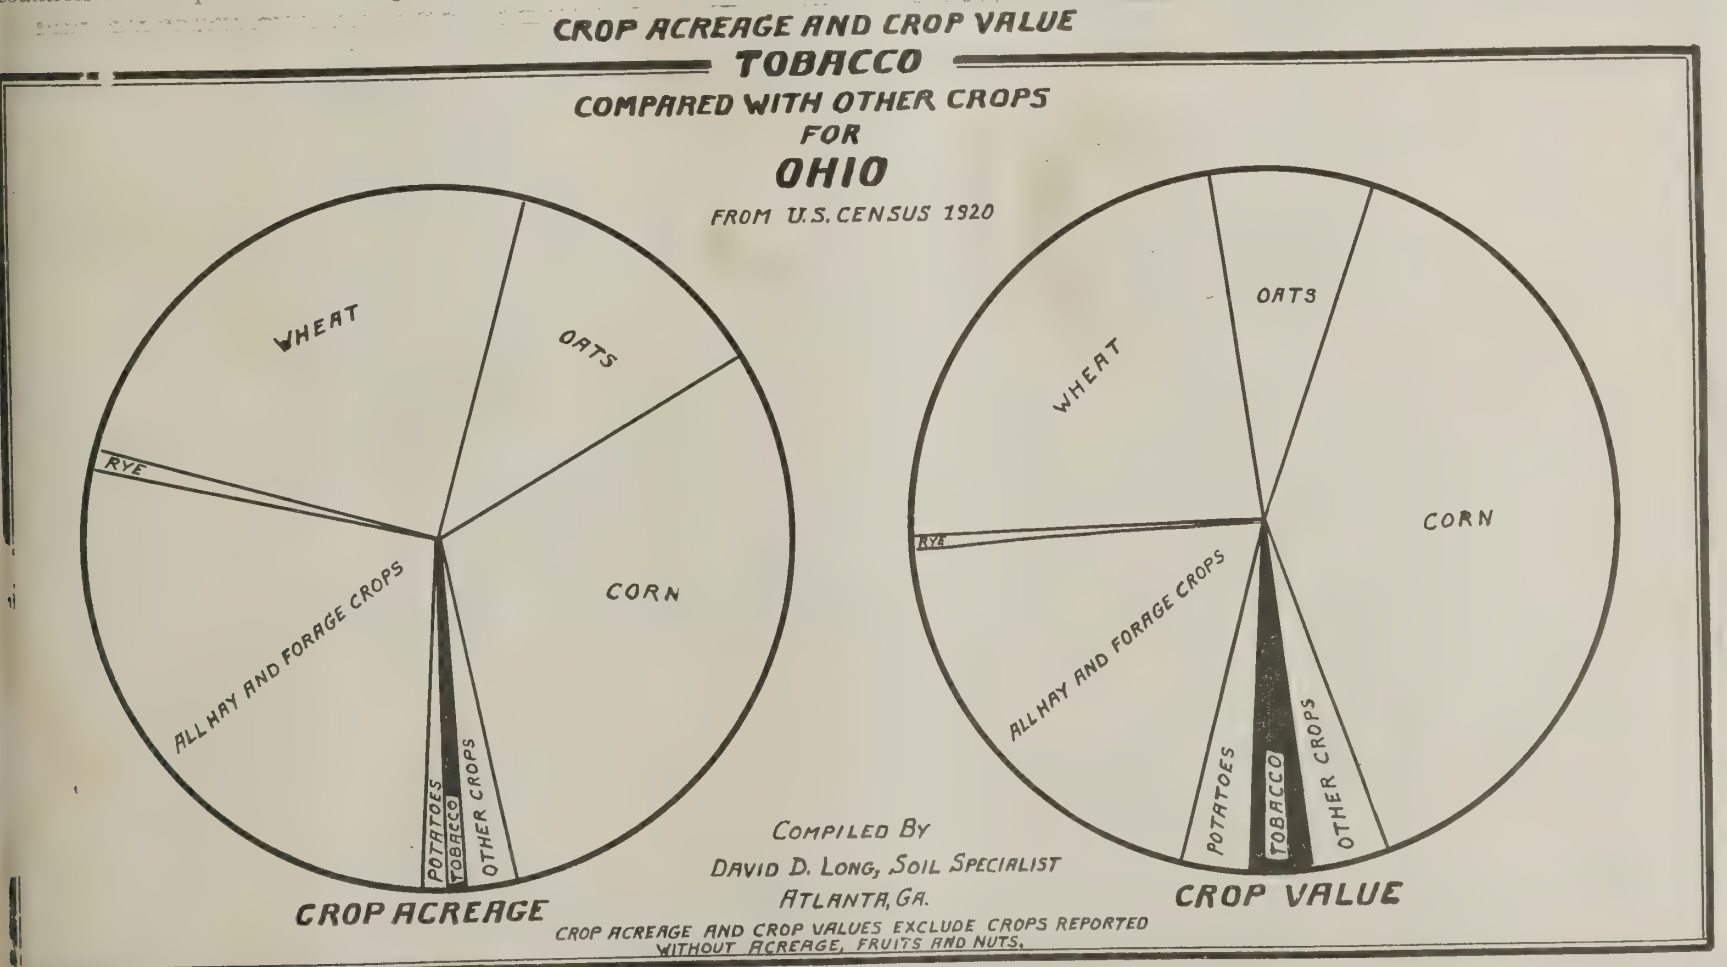
The wealth producing power of tobacco has apparently held true to its form in Ohio, as it has in all times and in all states. Plate 1 graphically shows the acre value of tobacco compared with the other crops of Ohio as revealed by the 14th census, taken in 1920. Here at a glance is shown how much more an acre of tobacco returns to the state than an acre of any of general farm crops and even exceeds that of special crops, as sugar beets and potatoes.

The data from which Plate 1 was graphed pertains to the state of Ohio as a whole. A more detailed analysis of the wealth producing power of tobacco per acre as compared with other crops on the same basis, is given in Table No. 1, as follows:

***Table No. 1—Crop Acreage, Crop Value, and Crop Value per Acre, Tobacco Compared to Other Crops in Ohio**

Crop	Acreage	Value	Value Per Acre
Tobacco ...	75,789	$ 13,528,302	$178.50
Corn	3,563,352	217,274,709	60.80
Wheat	2,922,592	127,873,574	43.60
Oats	1,452,052	39,795,590	27.40
Rye	116,464	2,582,991	22.20
All Hay and Forage Crop	3,258,082	109,948,109	33.75
Potatoes ...	124,917	17,657,811	141,40
Sugar Beets	33,561	3,836,861	114.40
Alfalfa** ..	94,418	5,637,120	59.60
Timothy and Clover** ..	1,190,646	36,678,875	30.80

*From U. S. Census, 1920.
**Included with total of all Hay and Forage Crops.



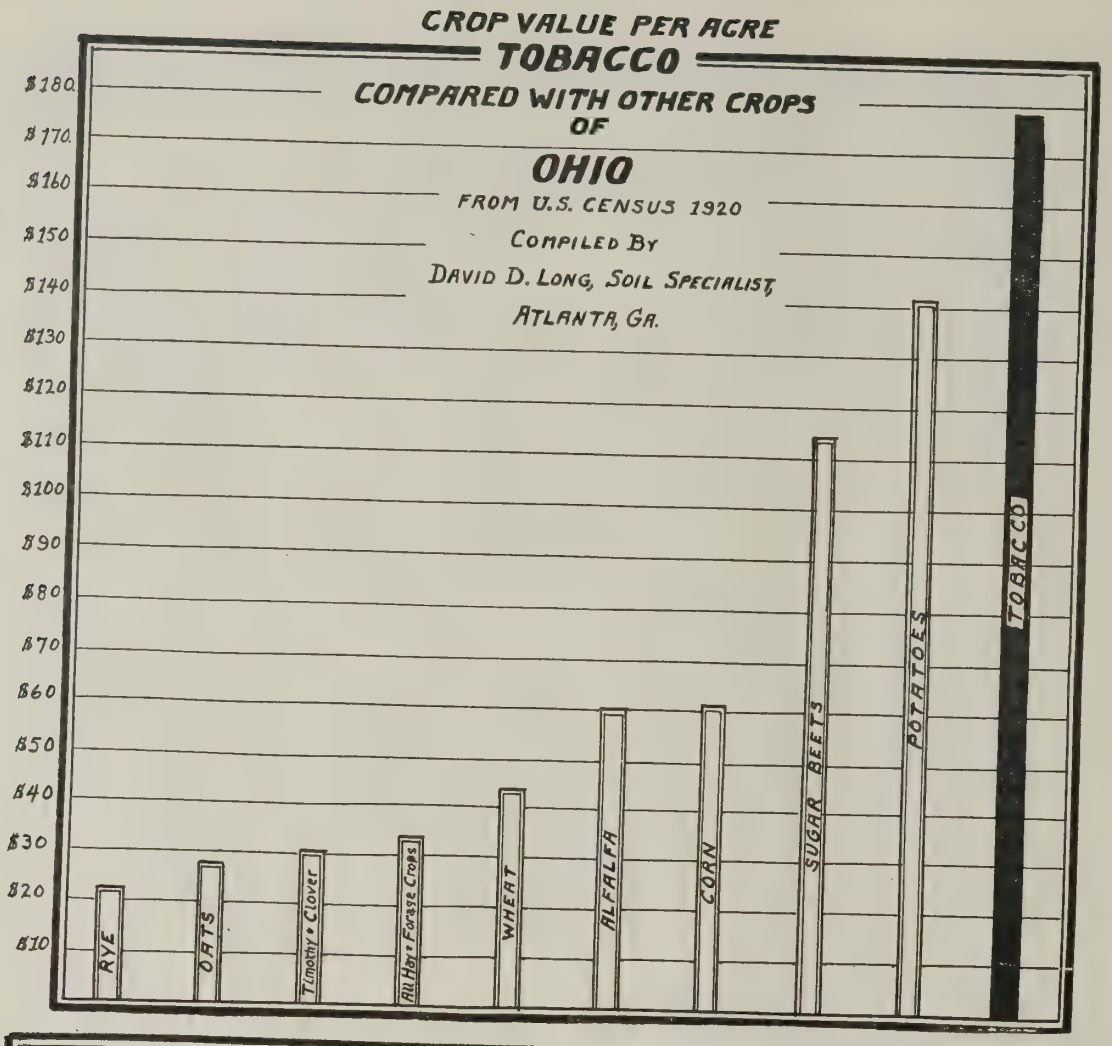


Plate I

The table shows the acreage, total value and value per acre for tobacco and the other chief crops of the state.

The statistics in this table established the fact that it requires of corn, the chief crop in acreage and value in the state, 2.94 acres to equal the value of one acre of tobacco.

For wheat, the second crop in acreage and value in the state and one of the most essential for human sustenance, there is required 4.1 acres to produce a value equal to the average acre of

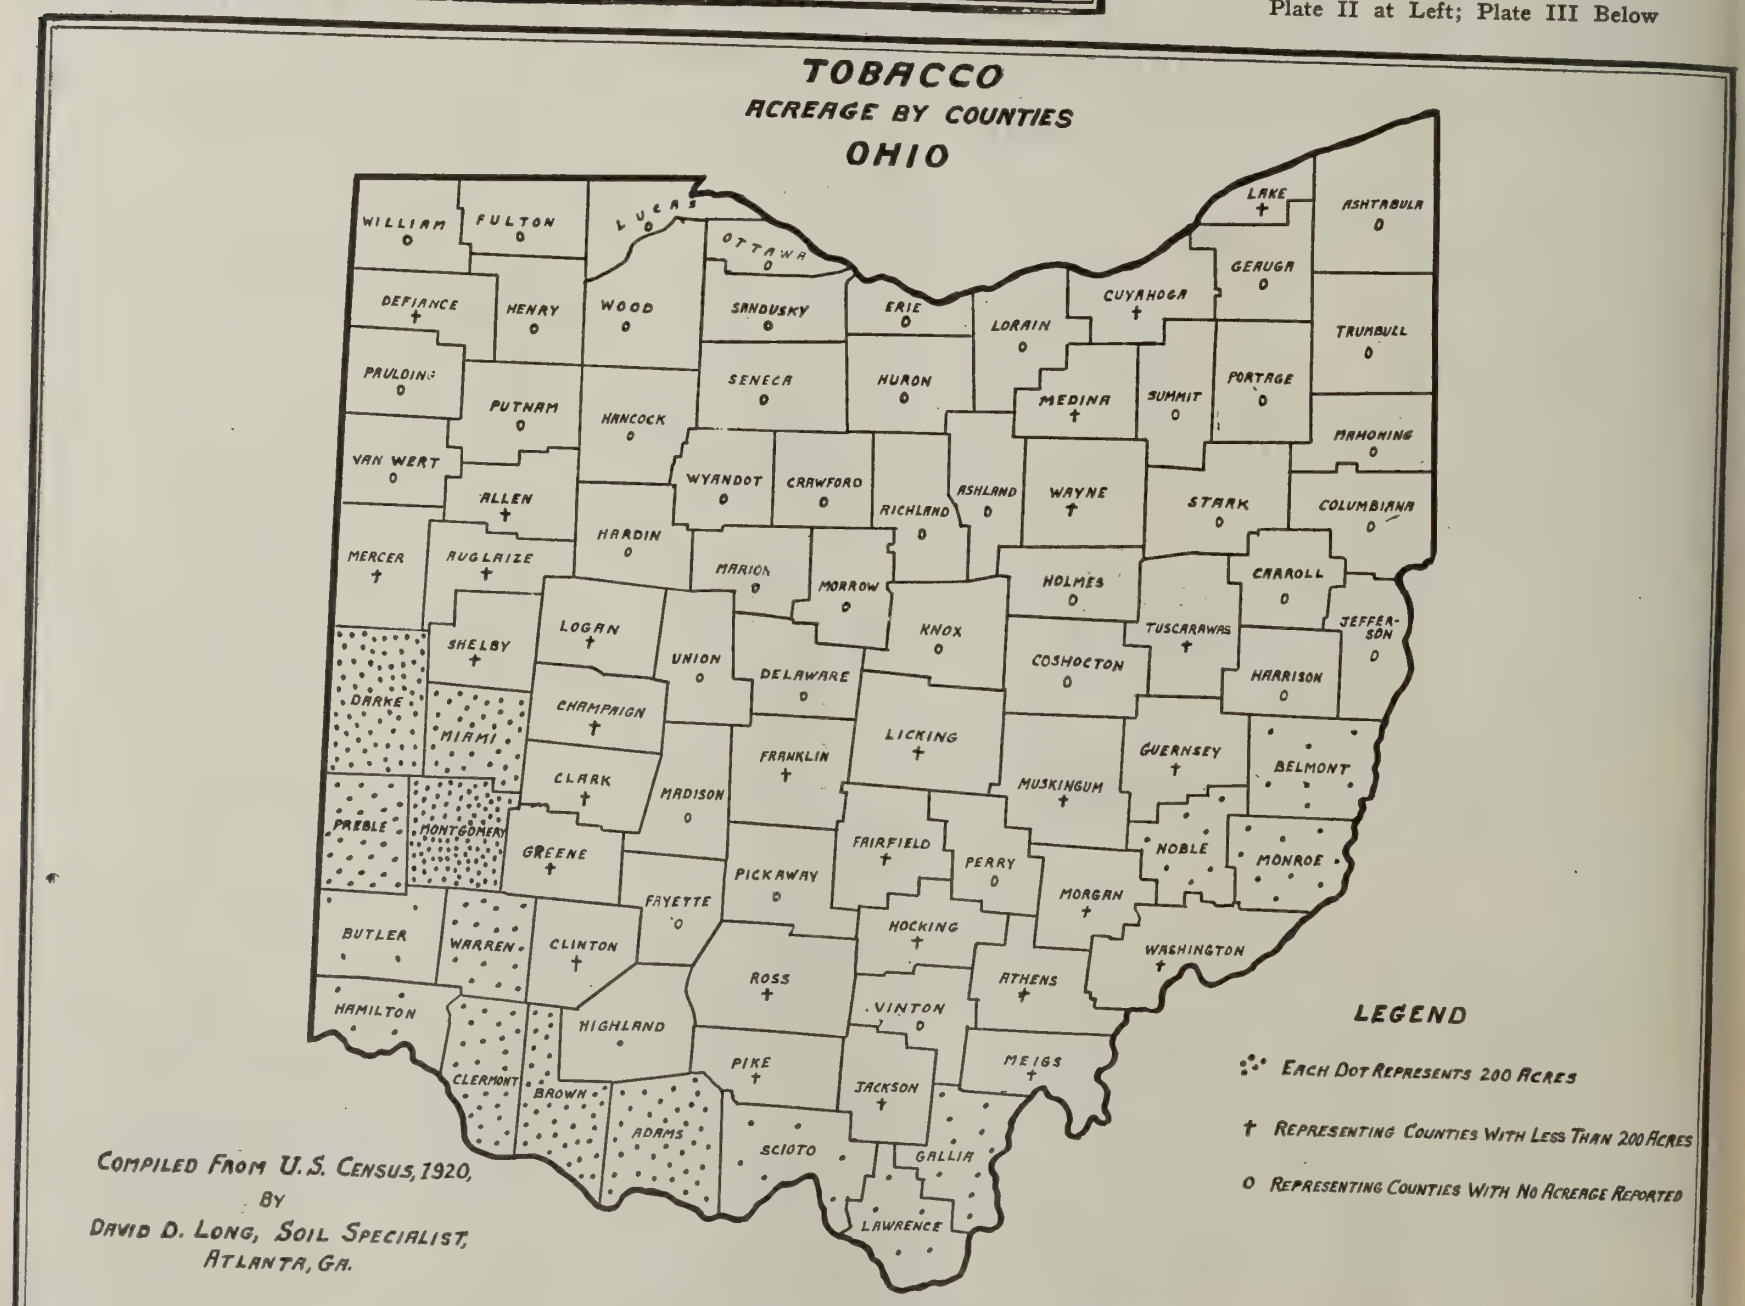
tobacco, which forms a comfort and solace for the mind as wheat supplies nourishment and food for the body.

Tobacco Stands Out Boldly

Oats is the third crop in point of acreage and value but it has a low wealth producing power per acre. It, therefore, requires 6.5 acres of oats to bring to the state a value equal to one acre of tobacco.

Of rye there are required 8 acres to equal the value of one acre of tobacco.

Alfalfa is a valuable crop not only for its feeding value but for the improvement of the soil and as generally considered has a high producing power per acre, yet there is required three acres of alfalfa to produce the money value equal to one acre of tobacco.



The Best of Three Special Crops

Potatoes and sugar beets are special crops and of all special crops there is naturally expected a high acreage value. Tobacco, however, is a more specialized crop, particularly in value as it requires 1.56 acres of sugar beets and 1.26 acres of potatoes to equal the value of one acre of tobacco.

The value of tobacco in the state of Ohio may be illustrated in another manner. In Plate II, for instance, there is graphically shown how the total acreages of all the crops of the State, exclusive of those few crops reported without acreage, fruits and nuts, are divided.

It is noted here that tobacco occupies a very small percentage of this crop acreage.

Plate II at Left; Plate III Below

Makes Conspicuous Showing

There is also graphed in this Plate a division of the crop value produced on this acreage. The percentage of this value as produced by tobacco becomes conspicuously greater than in the acreage. The percentage of value for tobacco is far greater than the percentage of acreage which it occupies. In fact, the 75,789 acres of tobacco in the state is but .6 of 1 per cent of the total crop acreage of the state, that is exclusive of fruits and nuts. The value produced on this acreage is 2.5 per cent of the gross value of the total acreage. in other words, for every 1 per cent of crop acreage tobacco produces 4.15 per cent of crop value. This relationship of percentage value for each

Wheat	24.8	23.3	.94
Oats	12.3	7.2	.58
Rye	.9	.4	.44
All Hay & Forage Crops	27.6	20.0	.72
Potatoes	1.1	3.2	2.91
Other Crops	2.5	3.8	....
	100.0	100.0	....

*Based on U. S. Census, 1920.

The Best of Three Best Percentages

There will be found in this table the percentage of crop acreage which the important crops of the state occupy and also the percentage of crop values which they return.

acreage, this small acreage however, is wealth producing. The corn acreage of the state is 47 times that of tobacco, yet the value of the corn produced on this acreage is only 16 times the value of the tobacco crop. In the same manner the wheat acreage is 38.5 times that of tobacco, yet the value of the wheat crop produced on this acreage is but 9.4 times that of tobacco.

Where Tobacco Is Grown in Ohio

Plate III shows where tobacco is grown throughout the state. Each dot represents 200 acres. Counties having an acreage of less than 200 or no acreage reported are shown by other symbols. In this plate the tobacco producing counties of the Miami Valley stand out con-

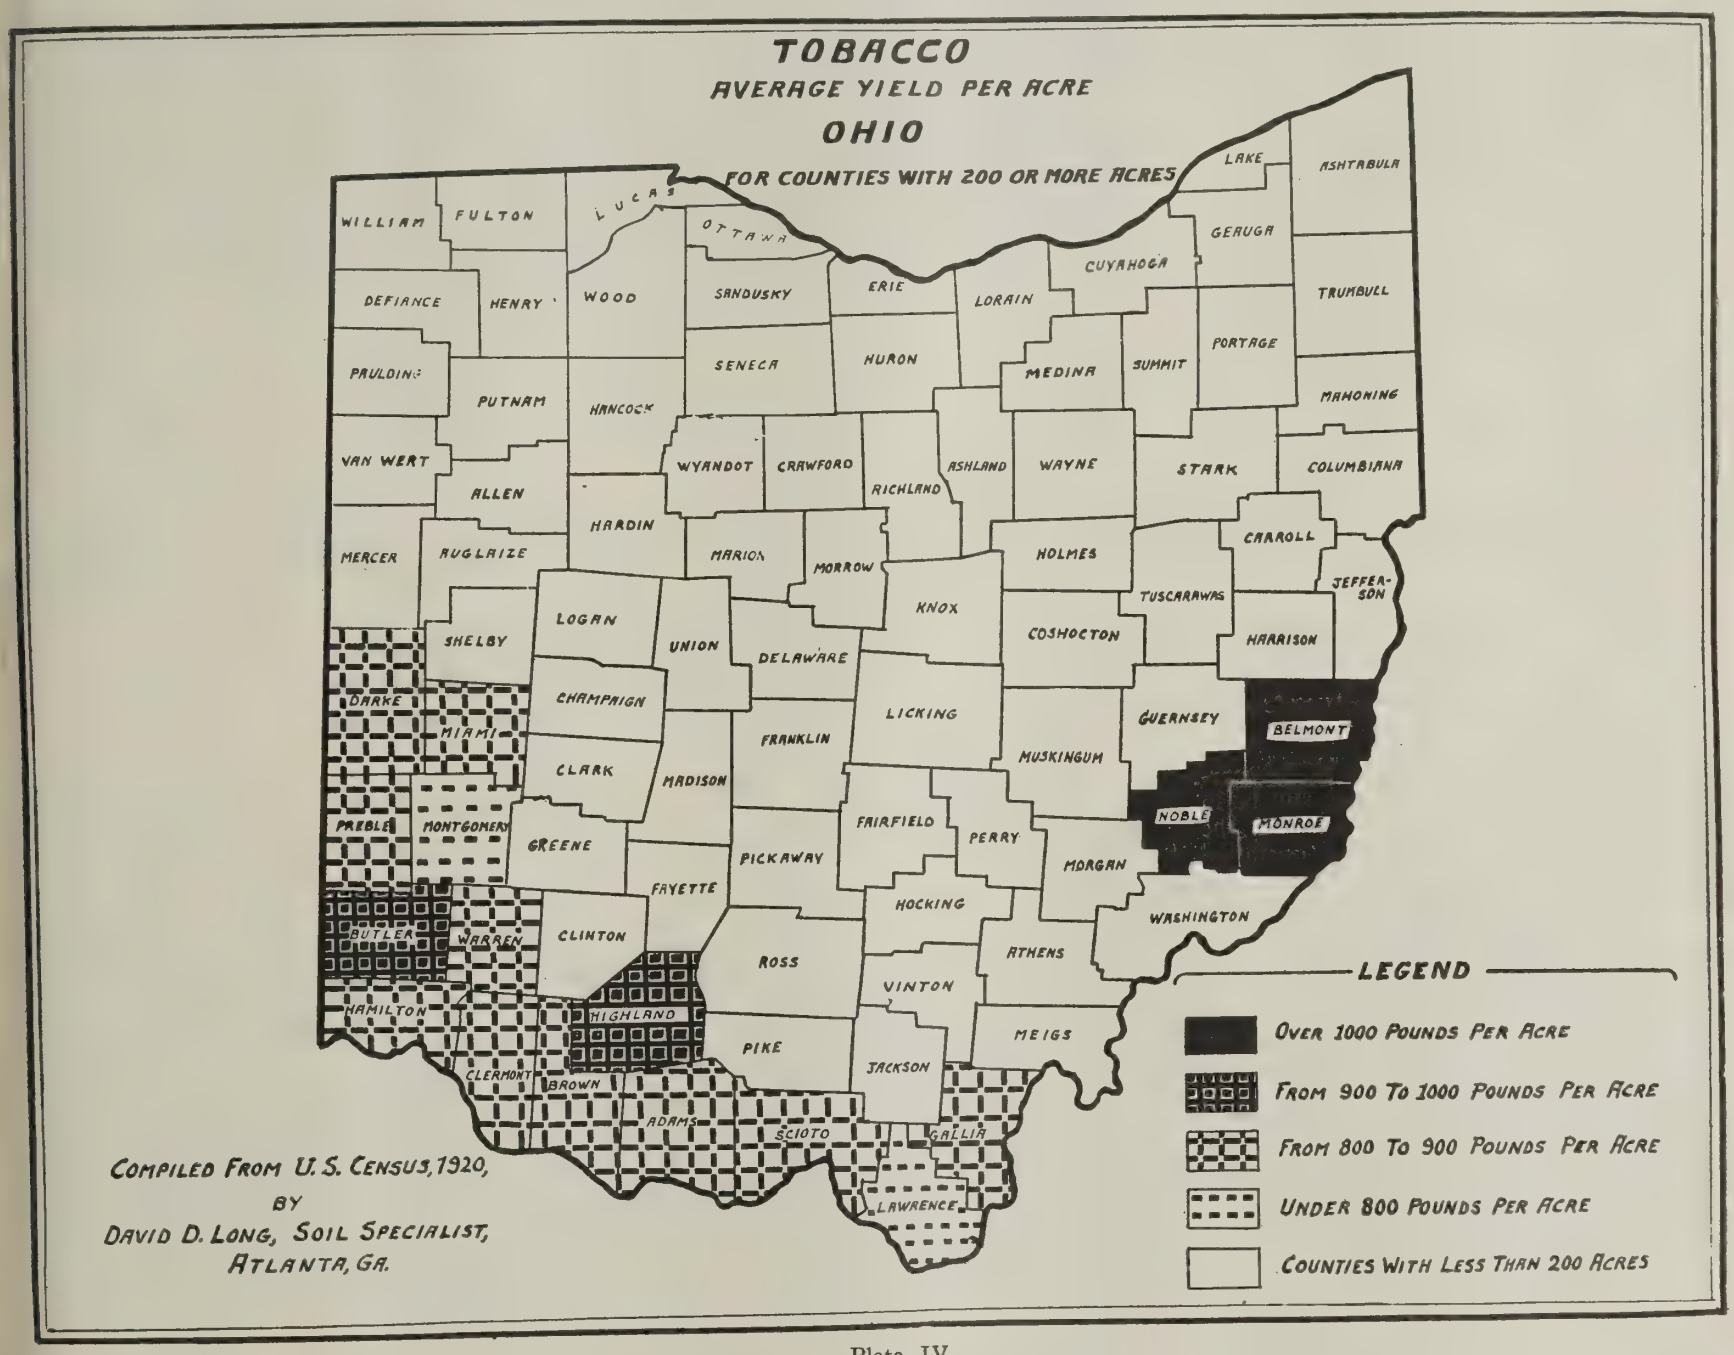


Plate IV

percentage of acreage is the highest for any crop of the state and marks tobacco as a distinctive crop of value.

In Table No. 2 there is given the data upon which Plate II, is graphed.

Table No. 2—Per Cent of Crop Acreage, Per Cent of Crop Value and Per Cent of Value for One Per Cent Acreage Tobacco Compared to Other Crops in Ohio*

Crop	*Per cent of Crop Acreage*	*Per cent of Crop Value*	*Per cent of Value for 1% of Acreage*
Tobacco	.6	2.5	4.16
Corn	30.2	39.6	1.31

In the third column of this table, showing the percentage of values for on per cent of acreage, there will be noted a low factor of returns for wheat, oats, rye and all hay and forage crops combined. Only corn, potatoes and tobacco return a greater percentage of value than the percentage of acreage which they occupy and of all these, tobacco returns the greatest.

Tobacco cannot be considered a general farm crop in the state of Ohio in the sense of the word that it is in the state of Kentucky, inasmuch as but 7.9 per cent of all the farms in Ohio report an acreage of tobacco. These 20,294 farms include, of course, those farms on which a very small acreage is planted, many of the acres being grown for personal consumption.

Although the 75,789 acres of tobacco in Ohio seem small in comparison with the total crop spicuously as do also the counties bordering on the Ohio River in the Burley region. Three counties of the eastern or export region are also conspicuous in that section.

Compilations of the yield per acre for counties having 200 or more acres are graphically shown in Plate IV. It is here noted that the three eastern counties comprising the bulk of the export region have the highest yields due to an appreciable extent to the character of tobacco produced. Majority of the counties range in yield from 800 to 900 pounds per acre. Highland and Butler counties are the two counties that have a yield of 900 to 1,000 pounds, with Montgomery and Lawrence counties range in yield between 700 to 800 pounds.

Montgomery county has the greatest acreage and, consequently, the largest yield of any of

the counties of the state. Darke County is second in point of acreage and in point of total production.

Confined Chiefly to 17 Counties

The Census of 1920, from which all the data has been secured, also reveals that the tobacco production within the state of Ohio is confined chiefly to 17 counties, each having over 200 acres. Of the 75,789 acres of tobacco in the state these 17 counties have a total of 74,484 acres or 98.2 per cent of the total acreage of the state. The remaining acreage is scattered among 28 counties, which are reported by the census as having an acreage varying from 1 to 182.

In Ohio a very efficient four year crop rotation consists of tobacco followed by wheat, which is in turn sown to timothy and clover. The fourth year the timothy and clover is turned under and followed by corn. Supposing an Ohio farmer during the census year of 1919 followed this rotation on his plowed land and assuming that his returns were the average of the state, he would find that the money returns on the one-fourth of his farm producing tobacco would be $43.30 per acre greater than the combined value of the other three crops.

Productive Power Strongly Exemplified

The wealth producing power of tobacco is here exemplified in a striking manner which cannot help but leave an impression on any farmer.

To produce on one acre a value of $43.30 in excess of the value of three acres, one each of wheat, timothy and clover, and corn, is an agricultural feat which few farmers can accomplish except through the instrumentally of a highly specialized crop, such as tobacco. In fact, the value of an acre of tobacco in Ohio as reported by the United States Census of 1920, is equal to the combined value of two acres of wheat, one of timothy and clover and one of corn.

First Year of the Northern Wisconsin Co-operative Tobacco Pool

Much Enthusiasm Displayed Over Possibilities of Selling Tobacco by the New Mutual Marketing System—Considerable Criticism Called Forth by Certain Practices — Over-Centralization One Cause of Complaint — Remedies Suggested

By ROBERT B. McINTOSH

POOLING of interests in the marketing of tobacco may still be in the experimental stages, but the close of the first year's operation of the Northern Wisconsin Co-operative Tobacco Pool has found the growers and the buyers enthusiastic over the possibilities of marketing tobacco by this new system. The grower favors it because it makes possible orderly marketing instead of dumping, and the buyer, because he knows where he can secure the type of tobacco which he desires. However, the members are frank to admit that, although many difficulties have been successfully solved, there still remain grave problems that call for serious consideration. A survey among the members indicates that the center of criticism lies in the fact that they feel that the pool is too highly centralized.

Over-Centralization

How far a co-operative marketing agency can be centralized so as to secure a properly balanced machine is a problem which is not peculiar to the Wisconsin pool. Authorities generally agree that one of the leading causes for the failure of pools has been over-centralization. Nobody questions the fact that the failure of the U. S. Grain Growers, Inc., was due mainly to the reason that the directors were not the chosen representatives of a participating constituency. The members were not well informed and had no active voice in outlining policies.

Changes Opinions

Ed Cunningham, the great authority who was called in to save the organization, and who at one time inclined strongly towards centralized marketing agencies, has reversed himself as shown in his recent speeches in which he has pointed out that a permanent success cannot be made of co-operative marketing without a local organization through which the farmer can participate.

A Favorite Object Lesson

The California Fruit Growers' Exchange is invariably cited by co-operative marketing enthusiasts to show the success of this method of disposing of farm products. However, one of the paramount reasons for its success has been the perfecting of a form of representative government which keeps every member in close active touch with the exchanges. To show that such is the case, reference need be made to no less an authority than the organization's general manager, Mr. Powell, who has been very outspoken in pointing out the dangers of centralization.

Evils of Centralization

That the Wisconsin pool is rapidly reaching the point where its members are merely cogs in the machine, rather than an active force in defining the policies of the corporation, is generally known. As to the selling end, nobody would seriously contend that the membership should participate directly as the nature of selling is such that satisfactory results can only be secured by vesting a central head with broad selling powers. However, the operating end calls for different considerations and it is there that the evils of centralization have been felt.

Some Causes for Complaint

For the purpose of handling the tobacco, the territory covered by the pool has been divided into leaf departments. These leaf departments form the foundation of the operating function of the corporation and it is against them that the major share of the complaint has been registered. An analysis of the departments shows that each department is in charge of a manager who is appointed from the central office. The managers appoint all leaf department employees.

The Voiceless Membership

Thus, it may be seen that the members have no voice in the organization of the local departments which is the very condition that authorities such as Cunningham and Powell point out should be avoided if a successful co-operative agency is going to exist. The local organization is where the members make their deliveries, where the packing and sampling is done and, in general, is the place where the individual member comes in contact with the pool.

Operating Units

As the departments are purely operating units of the pool, and as it is the operating function which has been the center of the criticism, it has been pointed out that a great step would be made away from the danger of centralization if the leaf department managers were elected at annual meetings where the affairs of the local organizations could be passed upon by the members.

Remedies Suggested

Additional remedies pointing away from an over-centralized organization have been made by men who have made a close study of the pool. That the minutes of the meetings of the Board of Directors be printed in the pool bulletin; that the annual convention cease to be an advisory body and be clothed with actual powers; that the arbitrary one man system of grading be discontinued; that the executive committee's powers be limited to consideration of routine affairs, are all suggestions which it is hoped the officials will adopt, so that a representative pool may emerge, one that will allay rumors and suspicions, the inevitable result of which is disrupting to the morale of the organization.

Conditions Under Which Wisconsin Gets the Best Growing Results

Bulletin Entitled "Tobacco in Wisconsin," Written by James Johnson and C. M. Slagg, Tells How Many Problems Have Been Solved—Sandy Loam Soils of State Have Been Productive of Finest Tobacco — Results of Recent Experiments

GROWING of tobacco in Wisconsin and the conditions attendant upon the cultivation of the "weed" make an interesting story, and it is exceptionally well told in a bulletin entitled, "Tobacco in Wisconsin," written by James Johnson and C. M. Slagg, and put out as one of the publications of the Agricultural Experiment Station of the University of Wisconsin.

In its introductory the report says:

"The tobacco crop is one of the six crops standing highest in farm value in Wisconsin, and is exceeded only by potatoes as a special or cash crop. A twenty-year average for this state in round numbers shows an acreage of 43,000, a production of 52,000,000 pounds with a value of over $6,000,000. High prices occasioned by war conditions brought the value of the 1918 crop up close to $20,000,000 and stimulated production but prices and acreage are again approaching normal.

Normal Yield Varies Considerably

"The acre yield may normally vary between 1,000 and 2,000 pounds of cured leaf. The average yield for the state in any one year, however, is said to vary from 900 pounds in poor years like 1915 to 1,400 pounds in good years, for instance 1900 or 1916. The average over a period of years is about 1,250 pounds.

"The price per pound has varied widely the last few years owing to abnormal conditions. Prices of from 7 to 42 cents were, in fact, reported for the 1920 crop. Normally, a range of from 10 to 20 cents a pound may be expected as representing the variation in market value of the leaf on the farm. The average price paid for the Wisconsin crop over a twenty-year period is between 11 and 12 cents.

"The returns per acre will ordinarily range between $125 and $250. The actual profit naturally will vary greatly owing to annual and individual differences in cost of production. A good crop should bring on the average, however, a net profit of about $100 per acre in return for the risk involved and the managerial responsibility carried.

"In addition to horses, wagons, plow, disc, harrow and cultivators, the tobacco grower needs considerable special equipment of which the curing shed is the most expensive. Tobacco lath, transplanting machine, seed-bed frames and sheeting or canvas covers, tobacco axes, spears, hauling rack, packing box, packing paper and twine, and other minor equipment is necessary. The best growers are continually selecting and improving the equipment, and keeping it in proper repair, thereby helping to reduce the cost of production."

Concerning the type of tobacco grown the report says:

"Fully ten or twelve different types (distinct varieties) of tobacco are grown in the United States in as many, or more, districts or sections. These tobaccos are used by the trade for different purposes. There is a distinct localization or specialization, therefore, in regard to the type grown in each district; and the prices of cured leaf depend largely upon the relative supply and demand and upon the quality of the type produced in each section. For this reason, efforts to market new types in a section, or to market tobacco outside the regular growing sections usually result in failure.

Cigar-Binder Growing Region

"The Wisconsin tobacco district is recognized as a cigar-binder growing region because the varieties grown and the quality produced are satisfactory for that purpose. Cigar-binder tobacco must be relatively sound and of good and uniform quality, but a large part of the leaf produced in Wisconsin is not suitable for that purpose, so that there is still a large opportunity for general improvement of the grade of tobacco produced in this state.

"The finest quality of tobacco is usually grown on the sandy loam soils of Wisconsin when adequately fertilized. Such soils are quite typical of Vernon and Crawford Counties. In the "southern" district, tobacco is grown on light clay loam and on black prairie loams. These soils are usually higher in natural fertility and produce a larger yield per acre, but frequently a higher percentage of darker and heavier leaf. New soils of this type, however, or soils properly managed so as to keep up the vegetable matter, produce tobacco of very desirable quality.

"The growing of tobacco should not be attempted upon heavy clays or on muck or peat soils because they will not ordinarily produce a good quality of leaf."

Passing on to a discussion of "quality" the bulletin says:

"Quality in tobacco is frequently an indefinite and sometimes an obscure term. Its meaning varies with different manufacturers and with different types of tobacco, and sometimes changes as the 'fashion' of the types desired change. Generally speaking, a cigar binder leaf should have the desirable qualities of a cigar wrapper leaf but does not need them in so marked a degree.

Conditions Necessary to Quality

"First, of course, the leaf must be sound and have sufficient size to permit the cutting of at least one binder from each side of the leaf. It is very important that the leaf have good 'burn,' but this is usually taken for granted with Wisconsin tobacco if the general appearance is desirable. The color of the leaf (including uniformity of color), the texture (grain and relative coarseness of the leaf structure) and the body or thickness of the leaf, are of primary importance. The size of the veins, elasticity, flavor, aroma, and style are also to be considered.

"The buyers of binder leaf ordinarily prefer a medium-sized leaf (22-24 inches long) of a light brown uniform color, close grained, of medium body, and good elasticity.

"A number of so-called varieties of tobacco are grown commercially in Wisconsin. Many of these, although under different names, are practically identical and make up what properly may be called the Havana Seed or Spanish type. In some cases fairly marked differences in yield and appearance of the plants are observable, and in other cases the variety name has been so well established as to warrant its continued use. Of the Havana seed types, the Connecticut Havana, Comstock Spanish and Connecticut Havana No. 38 varieties are regarded as standard for this type.

"Another group of varieties which is usually classed as 'Big-Seed' are grown, but the classification of these is not in all cases distinct, and varieties which cannot be classed in either of these types can be found. 'Big-Seed' types usually have a larger leaf, and take on a more distinct drooping habit of growth than the Havana Seed types. On the whole they are not considered so desirable for binder purposes as Havana Seed although they usually give a larger yield per acre. This has been found in many cases to be due as much to greater resistance to root-rot as to an inherent power to give greater yield. Consequently, on new ground free from root-rot there is really no good reason for growing these types.

"The Wisconsin Experiment Station in recent years has attempted to obtain a strain of tobacco,

A field of tobacco, on the Harper farm in Wisconsin, one day before the frost in September

with a habit of growth and quality similar to Havana Seed but with marked resistance to root rot. It has not as yet entirely succeeded but a strain distributed by the Experiment Station as 'Resistant Cigar Binder Seed' has been widely grown and on the whole very favorably received. Further improvement along this line is anticipated.

"Several tobacco growers and dealers in Wisconsin grow and sell tobacco seed. Such seed is reliable in most instances as to variety name and germinating capacity. Growers who sell seed only occasionally may not always furnish a product so reliable as to variety name or germination. A large amount of seed is exchanged and sold, of course, between individuals personally acquainted, or through recommendations from buyers. Tobacco seed is a very small expense in connection with growing the crop, since it usually sells for 50 cents an ounce, an amount sufficient for from two to four acres.

"Many growers select their own seed, a good practice when a desirable type has been obtained. Where more than one strain of tobacco is grown in close proximity, however, mixing is likely to result due to crossing through the flowers. This can be prevented by "bagging" the seed heads. This is done by inverting a twelve-pound size manila paper bag over the flower head as soon as it is strong enough to support the bag. First remove all open flowers or pods which may have formed. The seed plants saved should be of uniform type; and if plants are saved which are thought to be of different strains, the seed should be saved separately. If a "pure strain" of seed is being used, variation should not occur and the likelihood of any improvement being made by selection is very small. Careful attention to selection will help to keep the seed up to the original standard by eliminating any undesirable types which may creep in.

A casing room of Greens Tobacco Co., at Janesville, Wis.

A sorting room of Greens Tobacco Co., at Janesville, Wis.

Time for Saving the Seed

"In Wisconsin the seed is usually sown between April 15 and May 1, although on steamed beds seeds may be sown as late as May 7 with fair certainty of having plants for transplanting by June 20 to 30.

"The essentials for the proper curing of tobacco are favorable weather conditions, a properly built shed, and a thorough knowledge of the practical principles of managing and curing. A large portion of the poorly cured tobacco produced in Wisconsin can be attributed to the fact that many of the sheds are improperly constructed and others are badly in need of repair. Sheds with leaking roofs and broken ventilators cannot be relied upon to cure tobacco evenly. A model curing barn allows a perfect circulation of air when desired and permits a rapid drying out, but can be closed tightly so as effectively to keep out or retain a moist atmosphere when desired. On the whole, relatively high temperatures and moderately humid weather are most favorable for curing. The rate of curing is much reduced by low temperatures. Very moist weather extending over a considerable period of time is liable to result in damage and the grower must then rely upon his judgment in handling the curing process to prevent damage.

Principle of Ventilation

"To obtain a proper circulation of air it is necessary to have ventilators at the top and bottom of the shed so that the air may pass, as it were, through a large flue. The shed should be built so as to allow a horizontal ventilator to be attached below the sill, extending the full length on both sides of the shed. The roof or ridge ventilator may run along the entire length of the shed or a series of small galvanized iron chimneys containing dampers which can be regulated from the ground by means of ropes may be used. With the ventilators at the top and bottom open, dry air may enter at the bottom of the shed and once inside will absorb moisture. Moist air is lighter than dry air and therefore will tend to rise. As it rises through the tiers of tobacco it gets warmer and lighter, absorbing more and more moisture, and finally forces itself out through the top ventilators. This system works perfectly when the air outside the shed is dry, but should it become laden with moisture, however, the drying effect naturally stops, and the shed may be closed up tightly to prevent

A packing room of Greens Tobacco Co., at Janesville, Wis.

more moisture getting in. If the weather is moist for a long time at a critical period of curing, it may be necessary to use artificial heat to start circulation and dry to prevent damage.

"In order to produce a rapid change in the temperature and humidity of the shed when desired, it is also necessary to have ventilators, preferably horizontal, just below each tier of tobacco, on both sides of the shed. These are used especially at the beginning of the curing process, and later to bring the leaf into 'case' for stripping."

Origin and Development of Connecticut-Havana No. 38 in Wisconsin

Improvement Brought About By Scientific Breeding and Selection — Much Time and Careful Attention Given to Subject at the Wisconsin Experiment Station — Improved Strain of Wisconsin Cigar Binder Tobacco Was Undertaken in 1908

By PROF. JAMES JOHNSON

Associated with the Wisconsin Experiment Station, Madison, Wis.

THE INSTANCES of improved types of tobacco, which are accepted as such commercially, together with data covering a number of years to show where such improvement lies, are sufficiently rare to warrant recording. In 1908 a project for the production of an improved strain of Wisconsin cigar binder tobacco was undertaken, together with a study of certain principles of inheritance involved in crosses and in simple selection with tobacco. Some of the results secured on the latter problem are to be published elsewhere. It is desired here to record only certain aspects of the production of a commercial strain of tobacco.

During the summer of 1908, about 2 acres of Connecticut Havana tobacco were grown at the Experiment Station Farm at Madison, largely for seed purposes, with the idea of introducing this variety widely throughout the tobacco-growing regions of Wisconsin. Several hundred pounds of this seed were distributed annually for a period of three years and it met with considerable success. A great many growers, however, reported that although the quality was very satisfactory the yield of this type should be increased. The exact history of the strain of Connecticut Havana which was grown is not definitely known, although at the time of its introduction here it was not far removed from some of the best strains grown under this name in the Connecticut Valley. Repeated comparisons with the widely grown variety of Comstock Spanish of Wisconsin, the Connecticut Havana, and the Zimmer Spanish of Ohio, showed that they were all practically identical and could be all classed in one group as "Havana Seed."

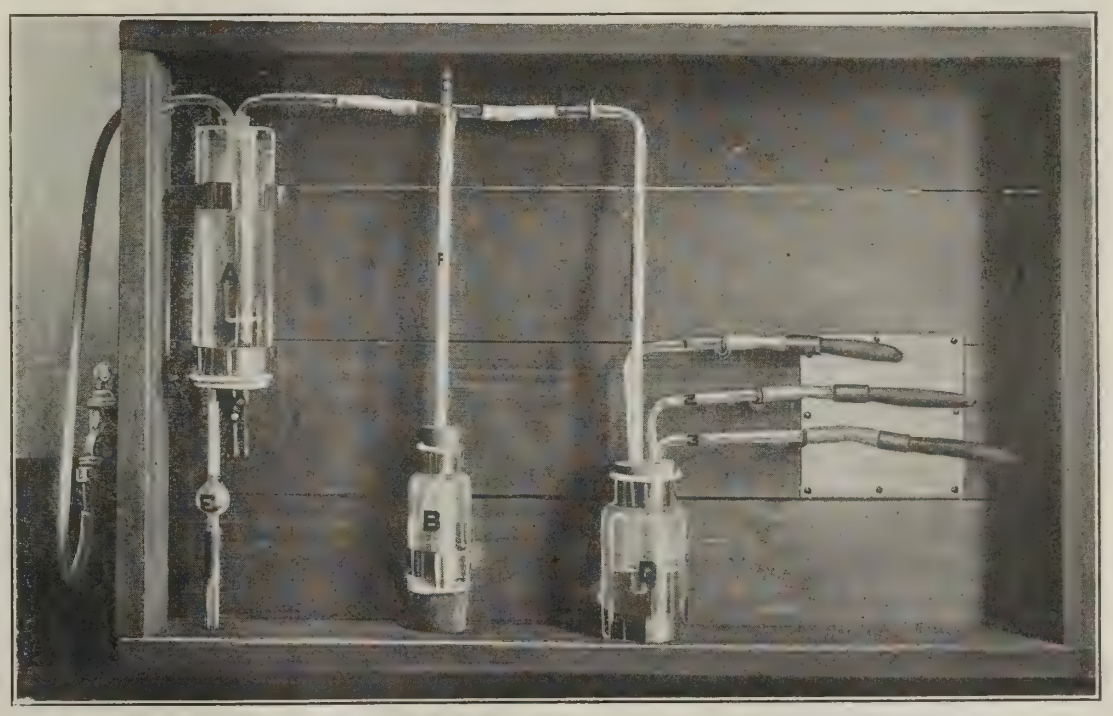
Grown for Seed

The Connecticut Havana grown for seed in 1908 was presumably "pure-bred" seed. A great deal of attention was paid to roguing out seed plants and selecting and bagging plants for further study during this year. Seed from about thirty-five plants was self-fertilized and the majority of these sowed separately and transplanted into progeny rows in 1909. (i.e. the seed from each plant was sown separately in rows.) It became evident from this test that three fairly distinct types of tobacco were present in the

Typical Wisconsin scene at harvest time

progeny plant, but that the progeny from each parent plant was remarkably uniform. The majority of the rows were practically identical and typical Connecticut Havana tobacco, but two rows, viz., Selection No. 26 and Selection No. 27, stood out distinctly from the others. Type 26 differed from the normal type in that the leaves were fewer in number but considerably larger in size, and also were more pendant than those of 27.

Further, the stalk was shorter, thicker, and tended to lodge more than the normal type under unfavorable weather conditions. Type 26 also budded slightly earlier and matured earlier than the normal. Type 27, on the other hand, differed from the normal in that it possessed a greater number of leaves, which on the whole, were somewhat smaller in size than the normal. The leaves were very erect in position. The stalk was a little more slender, somewhat taller than normal, but very strong, and rarely lodged. This strain budded and matured as a general rule on an average of a week or ten days later than the normal.



"Mutations" From the Normal

It is assumed that strains 26 and 27 are "mutations" from the normal. The reasons for this assumption lie primarily in the fact that both types differ from any other variety or strain which has previously or since been grown at the station, and hence their occurrence in the Connecticut Havana variety was presumably not due to an intermixture of seed. On the other hand, these strains have now been grown for ten years and during this time have shown no sign of segregation, but have remained remarkably uniform as to type.

Both strains 26 and 27 possessed some commercial advantages over the normal, as, for instance, the size of the leaf in 26 and the number of leaves in 27. On the other hand, both possessed points of lesser value than the normal, as for instance, the reduced number of leaves in 26 and the reduced size of leaves in 27. The quality of the leaf in both seemed to be in no way inferior to that of the normal, although the time of maturity of 27 might, under certain conditions, prove undesirable.

A Desirable Intermediate

It at once became evident that, if the desirable qualities of the two strains could be combined into one plant, a considerable improvement over the normal might be expected, accordingly this cross was made along with a large number of other crosses of varieties and strains made during 1909 for the same purpose. The first generation of the cross 26 x 27 was given in 1910. The cross showed to a very large extent a very desirable intermediate condition of the characters of the two parents, and in an unexpected manner, produced a plant whose conformation very closely approached the ideal in mind.

Smoking machine used by Prof. James Johnson at University of Wisconsin to determine the burning quality of tobacco. Wisconsin is noted for the good burning quality of its tobacco

This type was given the number 38 as a means of readily distinguishing it from the numerous other types grown. The second generation of the cross was grown in small numbers in 1911, but in 1912 and succeeding generations was grown in large numbers although data were unfortunately not taken upon large numbers in the second generation. Field observations upon a large number of individuals, however, have convinced the writer that there was no marked segregation into types such as occurred when certain varieties of tobacco were crossed and grown under similar conditions.

"Blended" Inheritance

When the segeregation was of such character that it could not be detected or did not occur at all may be regarded as an open question. The writer is inclined to believe, however, as a result of data and observations on this and other crosses in tobacco, that under certain conditions,

where the strains crossed are closely related, "blended" inheritance only may occur, segregation into parent types and intermediates being absent in the second filial generation.

Whether this assumption, which has been noted in several variety crosses of tobacco (together with segregation in others) be true or not, it is evident that differences in habit and form of growth and in quality which cannot be detected by careful observation can have no significance from a commercial standpoint, although segregation in characters concerned in quality may occur.

New Strain Recommended

No evidence of such segregation has been found, but it is exceedingly important that no segregation strain, no matter how small the variability may be, should be introduced into cultivation. In order to be further certain of this, therefore, the new strain was grown for four years at the station before being distributed to growers and then the distribution was limited to small amounts for experimental purposes. Following fairly extensive distribution in 1916, however, the writer was convinced that the quality was sufficiently uniform to warrant the general recommendation of this seed to Wisconsin growers.

Cured Product Successful

The strain has met with considerable favor among the growers from the standpoint of appearance and yield in the field and from the standpoint of the cured product on the part of the buyers. The strain owes its value, not to its being widely different from the best varieties grown in the state, but rather to its general similarity to these varieties combined with the fact that it is a distinct improvement over them in some respects. Such improvement apparently could not be obtained from the standard variety by simple selection alone, as has been shown by such trials carried on simultaneously.

Chief Advantages

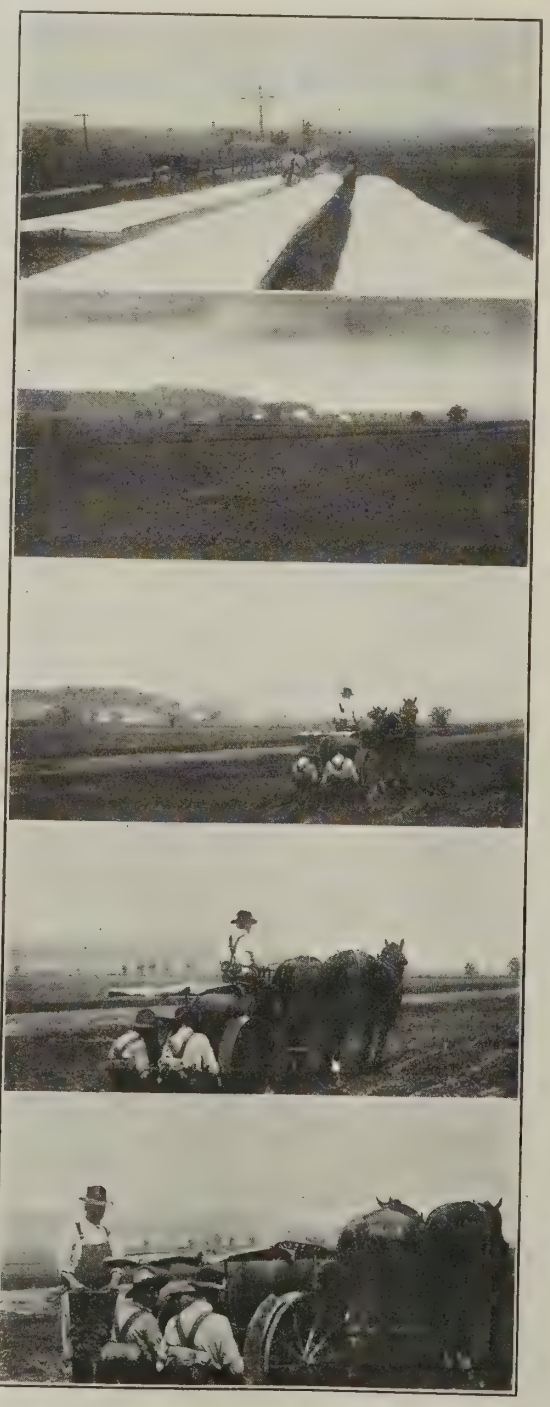
The chief advantages claimed for Connecticut Havana No. 38 are due to the desirable habit of growth it presents in the field, the leaves being quite erect in position, rendering the necessary field operations more easily accomplished. The leaves are quite uniform in size from top to bottom of the plant and are somewhat broader in proportion to their length than those of the ordinary Havana seed. It possesses on the average one or two more leaves to the plant than does the ordinary Havana, while, at the same time, it has a greater average in size of leaf. The quality is not inferior to that of Connecticut Havana seed, at least under Wisconsin conditions.

Weil & Sons

Weil & Sons of 170 Water street, New York city, now consisting of Arthur C. Weil and Paul H. Hirschhorn, the latter of whom had long been associated with the leaf department of the General Cigar Company, is one of the oldest houses on Water street. This firm has made Northern Wisconsin binders their mainstay for many years.

Their representatives in Wisconsin are William Smith & Sons of Evansville, Wis., William Smith having been with the firm a quarter of a century. Within late years he has been breaking in his son Harley to the business and that young man is ably following in his father's footsteps.

A Sound Policy



It has been a policy of Weil & Sons to build up their organization on a permanent basis. As an illustration of this their Pennsylvania representative may be pointed out, he having been associated with them over 40 years. He is D. W. Graybill.

They have always prided themselves on the fact that their customers for binders consist of only the highest grade and more successful manufacturers and in all their years in business they have never lost a customer except through a concern discontinuing or selling out. That is a business record of which they are justifiably proud.

Weil & Sons were established in the "early seventies." The original partners were Leopold Weil, Richard L. Weil and E. J. Weil. To build up a substantial trade the firm adopted a broad policy of honest dealing, business-like methods and dependability.

They aimed from the start to procure and handle only desirable cigar tobacco in order that the best interest of the manufacturers who were their customers might be served. In 1914 Leopold Weil died and Arthur C. entered the firm. Two years later Richard L. Weil died and Paul H. Hirschhorn, a cousin of President Fred Hirschhorn of the General Cigar Co., became a partner.

Arthur C. Weil and Paul H. Hirschhorn, the present partners, are both men who are well known to the leaf tobacco trade and are both regarded as prominent figures in the trade. They know the business from A to Z. They are progressive and are business "go-getters" who refuse to wait for business to come when others may be satisfied to rest on their oars and complain of dull times. They are also optimistic and have a never failing faculty of looking on the bright side of things. This quality has figured not a little in their success and has tended to attract many new friends to them as well as serving to hold all the old ones.

Various scenes on the tobacco farms of the Harper Leaf Tobacco Co., Towah, Wis.

The Jefferson Leaf Tobacco Co.

One of the leading packers of Northern Wisconsin tobacco is the Jefferson Leaf Tobacco Company of Sparta, Wis., whose New York office is at 151 Water street.

Organized in 1909 by W. L. Jefferson and his son, Harley W. Jefferson, the company has

Three warehouses of the Jefferson Leaf Tobacco Co., at Black River Falls, Wis.

rapidly progressed until today it occupies a prominent and honorable position in the trade.

Previous to the date of organization Mr. Jefferson was Wisconsin state manager for the American Cigar Company while his son, Harley, was manager at the Sparta plant of that company.

An idea of the extent of the business being done by the Jefferson company is indicated by the fact that it bought over 4,000,000 pounds of the 1922 crop and packed over 7,000 cases of the binder grades.

It packs exclusively high grade Wisconsin binders, bulk sweated inch sized Northern Bees. The sampling of the 1922 crop has just been completed and Mr. Jefferson characterizes it as the leafiest and best quality grown in years. Samples may now be seen at the New York office.

The concern is a progressive one, constantly rising to each new emergency by providing the necessary facilities to enable it to keep pace with the ever increasing business demands placed upon it. Today it has handling, packing and storage houses at Sparta and Black River, Wis., which are thoroughly modern and improved in every way.

These houses have a storage capacity for 17,500 cases. The Sparta house which is the largest will store 12,500 cases and the Black River one will store 500 cases.

Since the organization of the company Mr. Jefferson has taken three other sons into the firm.

The Jefferson Company is now connected with the Industrial Leaf Tobacco Company which also has its offices at 151 Water street, New York City. Harley W. Jefferson is also a vice-president of the latter company and is permanently located at the New York headquarters.

A Notable Figure in Tobacco Experimental Work

Professor James Johnson, whose interesting article on Wisconsin's 1923 tobacco crop appears in another part of this issue of TOBACCO, was born on a farm near Deerfield, Dane County, Wis., in 1886. He is a graduate of the Deerfield High School and University of Wisconsin, from which he graduated in 1909 with a B. A. degree. Immediately following graduation he was retained as assistant instructor in Horticulture at the University of Wisconsin and has since devoted most of his time to experimental work along the lines of plant diseases and insects which affect tobacco.

In 1922 he was made full professor and since 1917 has also been agent of the Federal Department of Agriculture. One of his most important achievements was the discovery of the organism which causes black rot in tobacco and the conditions under which that organism thrives.

He carried on extensive experiments in soil steaming of tobacco beds and was directly responsible for the introduction of the system into Wisconsin. His study of the root-rot disease has resulted in the development by him of several strains of root-rot resistant seed.

The development of Connecticut-Havana No. 38 by breeding and selection was personally conducted by Prof. Johnson. This strain has met with favor from both buyers and growers of Wisconsin tobacco.

In addition to several experiments of a technical nature that are being conducted he is continuing experimental work with wild fire, root rot, mosaic and tobacco curing under controlled conditions. His experimental work is proving

Prof. James Johnson

of great benfit to the tobacco growers of Wisconsin who are endeavoring to produce tobacco of quality.

The National Menace

Not long ago a kindly man visited the *Courant* office to set it right upon two matters. One of these related to tobacco. It ought not to be raised; it ought not to be used in any form by any civilized, not to say Christian man. He had heard, the visitor admitted, that women used it in some forms but that was too horrible to believe. Certainly no woman not altogether lost to decency would fall so low as to smoke cigarettes.

For cigarettes belong in the subcellar of the bottomless pit. They were, he said, filled with opium and were sure to ruin the health and morals of those who acquired the habit of smoking the accursed things. What will he say when he learns that these foes to morality are growing in favor? He will note that they are if he sees a recent report of the internal revenue bureau which is enabled to keep tabs on cigarettes to some extent by means of its monthly sales of stamps.

The demand for stamps indicates that cigarette consumption in the United States this year promises to make a record, both in the number used and in increase over the previous year. In the first eight months of this year the domestic consumption was 42,828,000,000 which, we are told, is 312 per cent, above the figure for 1913, which shows how sin increases in a miserable and naughty world.

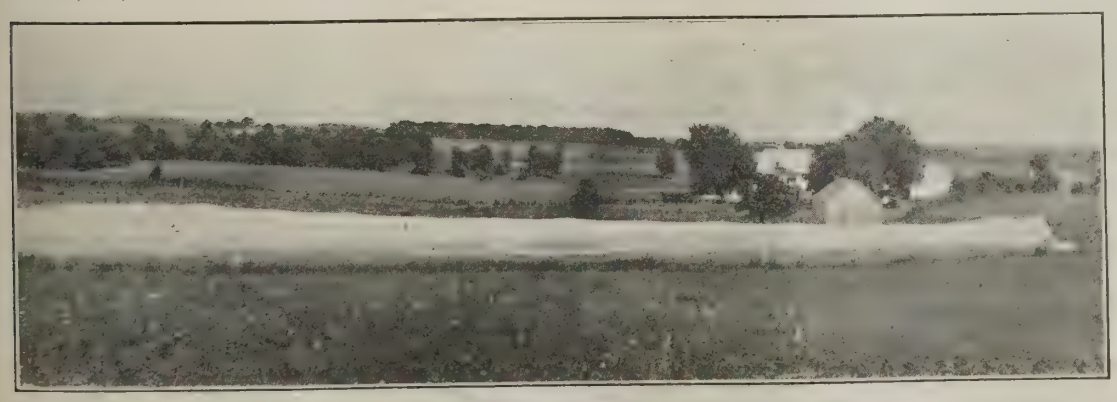
Reminiscences of the Leaf Tobacco Industry in Early Cincinnati

Names of Pioneers Date Back to Year 1818—Some of Those Most Prominent in the Handling of and Dealing in Tobacco Were Henry and Frederick Besuden — Joseph Foos Was One of First to Grow White Burley in Ohio—Wooden Indian Life.

EARLY HISTORY of the tobacco industry in Cincinati is full of interesting reminiscences. But the name of the first pioneer in Cincinnati whose business was the handling of leaf tobacco or its products is not a matter of record. For this writing we have names and location of such men as far back as 1818. There were at that time Casper Hopple, at 7 Lower Market street; David Weaver, in an alley near Sixth street and Broadway; Burrows & Tunis, at Walnut and Second streets; Lambert Cole, Walnut, between front and Second streets; Christian Dunham, Symmes street; between Lawrence and Pike streets; Benjamin Farmer, 24 West Front street; David Musselman, 181 Main street; Samuel Zebold, 62 East Front street. With a population of 10,000 there were 70 workmen in these shops making an output worth $65,000 for the year.

Twelve years later, when the population was 28,000, there were 30 tobacconists. The name of Hopple—that of James Hopple & Co. —was still at 7 Lower Market street. The Hopples seem to have been the most enduring at that time in the tobacco industry. In 1841, when the population was 46,000, there was employment in such shops for 158 hands, who produced to the value of $325,000 a year.

A prominent name along with the Hopples those days was that of the Bodmanns. On the west side of Main street, north of Sixth, stands the Bodmann Building as a mark for that name, for there, in 1831, Ferdinand Bodmann has his "Spanish cigar manufactory," and the business was still there in 1840.



Native of Germany

Ferdinand Bodmann was born in Germany in 1801. He was graduated at Bamberg College in 1817, and was fitted for banking business and to the charge of French correspondence. But his father, Davis C. Bodmann, with three sons, came to America and located at Hagerstown, Md.; the mother had died. In 1827 Ferdinand married Kate Poplem, of Baltimore, and there, in 1827, was born their son Charles, who was soon to come with his parents to Cincinnati. Ferdinand, who died in 1874, had for many years the fine residence on Mt. Auburn. To this day there is still a tobacco warehouse named after this family.

Henry Besuden was born (1825) in Germany and at the age of 18 came, with his father's family, to this country and to Ohio, locating on a farm at Mt. Pleasent. In Germany, after education in the public schools, he had worked three years as apprentice and journeyman at the trade of cigar maker.

In Cincinnati, in 1847, he opened a shop for rolling and selling cigars, employing three men in the making of the goods.

In 1858, when he took in his brother Frederick as a partner, still at 93 Walnut street, he had a pay roll of 27 men. Frederick had been running a little business of his own on the south side of Lower Market street, between Sycamore and Broadway.

A Wisconsin field of shadegrown tobacco. A movement is under way to secure financial aid from the Legislature to carry on further experiments with shadegrown in the State.

Development of White Burley

About this time, in the neighboring county of Brown, Captain Fred Kanz had a considerable plantation. A discovery by Joseph Foos, working some of that land, led to the development, in 1860, of the famous "White Burley" tobacco. Foos had procured ordinary burley seed from George Barklay. Plants from this seed were very strange to the planters, some of them being almost as white as milk. The result was a crop of the finest tobacco and the foundation of splendid harvests.

Business Grew

In the midst of such discoveries and activities the Besuden business grew during many years. In 1857 came the business disaster of the Ohio Life and Trust Co.; this

was when Henry Besuden was in New York purchasing tobacco and had already bought $30,000 worth, but he went ahead and bought $10,000 worth more. Such was Mr. Besuden's financial position even then that he was able to pay the entire amount before the four and six months credit he then had was exhausted.

Owed to New York Jobbers

About $20,000 of this was due to Crawford & Palmer, the largest tobacco jobbers of New York. That firm gave to Mr. Besuden a beautiful pitcher and goblet set, of hammered silver, as an appreciation of his having saved them from financial embarrassment or even ruin by that prepayment. After 1864 the Besudens dealt only in hogshead tobacco, and were among the heaviest dealers in the country. They sold to nearly all the large American manufacturers and had the largest export trade of Cincinnati. Their sales to France, Spain and Italy were large. One of their sales to the Italian Government was of 1,892 hogsheads, for $250,000. This firm's credit was practically unlimited. On one occasion Henry Besuden decided to accept a volunteered loan of $200,000.

Son Had Charge of 700 Acre Plantation

Henry Besuden's first marriage (1848) was to Margaret Vurdemann. John H. Besuden, born of this union, was long in charge of his father's great plantation of 700 acres, four miles from Winchester, Ky., and formerly known as the General Groom Farm. His second marriage (1882) was to Mathilde Reif, of Columbia Township. Children born of this union were Frederick, David, George, Mathilde, Henrietta, Chauncey and Waldemar.

Mr. Besuden's residence until the early fifties, while he had his little shop and then his growing business at 93 Walnut street, was on Bremen street, between Thirteenth and Fourteenth streets. Later, for a few years, commencing in 1856, it was out on Duck Creek. In 1854 he bought 12 acres in Columbia Township, where he erected a cottage for a country residence. This cottage was succeeded by his elegant brick mansion, which he occupied in 1878. His residences on Everett and Clinton streets were spacious and elegant.

Learned Cigarmaking

All of Cincinnati's first Besudens had learned the trade of cigarmaker and worked at it, boy and man. Henry and his brother Frederick developed great businesses. Herman Besuden, in 1853 was still at that trade at 544 Elm street. Three years later Henry was a tobacconist at 93 Walnut street and Frederick was a cigar maker, south side Lower Market street between Sycamore and Broadway. Herman Besuden had shifted from his trade to keeping of a coffee saloon at 59 Lower Market street. This son developed to catering at the famous "Indian Queen." He had taken that name for his place from that of a former Indian Queen coffee house at 95 Court street.

Experiences of Long Ago

Many years ago my old friend George S. Bennett, then a veteran in journalism and theatrical management, and at one time a Deputy United States Marshall and living at the Burnet House, in 1853, and finally a Deputy Police Court Clerk, says "Conteur" in the *Cincinnati Enquirer*, often spoke of the times of the "Indian Queen," of the days when he was "local editor" of the *Enquirer*, at 88 Main street; of daily and nightly resort there of men of the newspaper life. Although the near-by St. Charles Bank Exchange and Frank Piepenbring's and other Broadway places were convenient, there was enticement of cheapness and comfort at the "Indian Queen" that appealed to them and to hundreds of steamboat men and people of the stage.

The Rare Wooden Indian

Occasionally, even in 1923, one finds an effigy in wood, life size and appropriately painted of an Indian of one sex or the other, holding a sheaf of tobacco leaves or a bundle of cigars, inviting to business within.

The National Menace

(*Continued from page 29*)

The consumption of cigarettes last year was 53,582,000,000, making this year's prospective increase about 10,400,000,000 or, to delight the statisticians, 19.4 per cent. The consumption of 53,119,000,000 in 1919 brought the largest previous increase, 13.8 per cent. The figures given are, as has been said, calculated from the monthly sales of stamps and production in this country is approximated by adding exports to consumption. Imports are small and are disregarded.

On this basis production will reach 76,000,000,000 as exports during the first seven months slightly exceeded a billion per month. The rise in total production over 1922 will be 12,900,000,000 or 20.4 per cent., signifying that the popularity of the cigarette is not waning. They may be sinful morally and dangerous physically but they are surely sought after. A war which ended many things marked the dawn of a new era for the cigarette.—*Hartford (Conn.) Courant.*

When Relief Comes

Nothing is more terrifying than a guilty secret; and we suppose a man who has done a great wrong never feels thoroughly safe until the Department of Justice has started a searching investigation.—*Ohio State Journal.*

After all nothing satisfies like a good cigar

Cincinnati Cigar Factories Have Good Outlook

Production Proceeding at Normal Seasonal Rate—Good Gain Made in Output During First Nine Months of Year—Retail Trade Shows Fair Average—Pipes Get Share.

CINCINNATI, Ohio, Oct. 20.—Cigar production in this city is going along at a normal rate for this time of the year, and it looks as though there is to be a prosperous season just ahead for the Cincinnati factories. The figures for the month of September, as made public by the federal government, show that there has been a good gain in production during the first nine months of this year as compared with the same period of 1922.

But despite this fact the first two months of the current fiscal year show a decrease as compared with the first two months of the fiscal year in 1922. The decrease, however, is not serious and the rate of production now being maintained by the factories in this city is practically sure to wipe out this decrease by the end of October.

Good Prospects

If all indications are true the records for October will surpass those of last year, even though October, November and December of 1922, were good production months. Factories operated on a heavy schedule through the latter part of last year and it will be a task for the Cincinnati factories to show a gain this year.

But several of the local plants are already complaining that their main source of worry is getting sufficient help to man their factories properly in order to turn out the orders that they have booked ahead for the holiday season.

Encouraging Features

One of the most encouraging features about the situation is the number of Christmas orders of liberal size which are now being placed with Cincinnati factories. Retailers are remembering the rush that they had during the holidays last year and how many of them suffered for the lack of goods at a time when demand was at its height, thereby losing valuable trade and profit. They hope to avoid this situation in 1923, by having sufficient stock on hand to meet the needs of their customers.

Cincinnati factories are gratified that the retailers and jobbers are doing the right thing and are not waiting until a few weeks before Christmas before actually placing their business.

Cincinnati retailers are pleased with the trend that sales have taken in the past few weeks. There has been a gradually, but nevertheless steady improvement in conditions, especially in the downtown business section.

Many Visitors in Queen City

The number of conventions held in Cincinnati within the course of the past month has aided materially in giving life to the retail trade. Excellent weather has brought out more than the usual quota of visitors to witness the racing at the Latonia track across the river in Kentucky.

All this has resulted in good business for the retailer, especially those who have the hotel stands. Some retailers, however, say that conditions could be much better than they are at present and that trade for this time of the year is actually below normal. These retailers grant the fact that their stores have shown an increase in the past few weeks, but, despite these increases, the volume of sales which they are making daily should amount to a higher total than it does at present.

Good Holiday Trade Anticipated

There is every cause for the belief that the holiday business this year will measure up to that of last year and possibly surpass it. It probably seems as though this is a highly debatable subject, which it is, but this statement is made as the result of listening to the expressed opinions of men in all branches of the trade in Cincinnati.

Jobbers Get Good Share of Business

Local jobbing houses have not been suffering for the lack of good business. As a matter of fact there were a few weeks recently when the wholesale branch of the trade was better than any other one branch. There has been no reduction in the volume of business done, as compared with today, but the retail and the manufacturing both have picked up and are giving the wholesalers a run for their money.

The business being done by the jobbers with the small towns and cities in the Cincinnati territory is excellent. Jobbing houses say that they are well satisfied with the volume of business that they are doing not only on cigars, but on cigarettes and pipes as well.

Pipe Holding Its Own

The pipe business has held its own through the early fall season. All during this year there has been a strong and insistent demand for high grade pipes. Pipe smokers, instead of purchasing the cheap pipes as they did in former days, have turned to the higher-priced, higher-quality pipe for smoking comfort. The number of pipes ranging from two dollars to five dollars that are sold in Cincinnati has taken a big jump upward this year, and indications point to a continued demand for pipes ranging between these figures.

Pipe repair work has been going along steadily, too, with those houses that specialize in this line of work having all that they can take care of comfortably. Charles Keyer, probably the best known pipe man in the city, is at work on plans for an addition to his present store which will provide added space for a pipe repair department of adequate proportions and at the same time more room for warehouse facilities.

Jobbing Business Ahead

The pipe jobbing business in this city is way ahead of last year and it is believed on good authority that there is an ever increasing number of smokers who are smoking pipes. This may be due to the fact that retailers are doing more than they have in the past to push their pipe sales. Many retailers have made little or no effort to attract their customers to pipes with the result that their pipe business was always held at a minimum figure. But more progressive retailers have used their window space for fine pipe displays and have shown displays of pipes in glass cases within the store. These retailers have had the satisfaction of seeing their business grow tremendously on pipes.

Wm. G. Miller Passes Out

William G. Miller, 58 years old, senior partner of the firm of Henry Miller's Sons, 309 Race street, one of the oldest leaf-tobacco dealers in the middle west, died at his home Wednesday, following a lingering illness. Mr. Miller was widely known in tobacco circles. Besides his widow he is survived by four daughters and one son, William G. Miller.—QUSEE.

Henry Laupheimer

BALTIMORE, Md., Oct. 24.—Henry Laupheimer, president of Kraus & Co., Inc., Baltimore, Md., died suddenly yesterday morning from an acute heart attack just as he was preparing to leave his home for business.

Mr. Laupheimer was 64 years of age and had been associated with Kraus & Co., Inc., for many years, having established the firm in conjunction with the late Henry Kraus and Samuel Dealham, Jr.

Mr. Laupheimer is survived by his widow, Mrs. Julia Laupheimer, two daughters, Mrs. M. B. Strouse and Mrs. L. J. Nathan, and one son, Millard H. Laupheimer.

Funeral services Thursday morning, October 25, from his late home the Emersonian Apartments of this city.

Mr. Laupheimer was a Mason, a member of the Suburban and Phoenix Clubs of Baltimore and was widely known in philanthropic and civic affairs.

William K. Ackley

EAST HARTFORD, Conn., Oct. 24.—William Kilbourne Ackley, 55 years of age, was found dead in his bed at his home, No. 1910 Main street, Sunday morning. When he failed to appear for breakfast his daughter called him several times until at last, receiving no response, she entered his room and found him dead. Last evening a number of Mr. Ackley's friends were at his home and Mr. Ackley

William K. Ackley

entertained them until about 10 o'clock, when he retired. These friends declare that to all appearances Mr. Ackley was in his usual good health.

Mr. Ackley was a prominent business man, having been in the grain business for more than twenty years. He also sold farm implements. He was a notable tobacco grower and packer, and was for a number of years secretary of the New England Tobacco Growers' Association.

He was prominent in fraternal circles, and was a 32nd degree Mason. He was a member of Orient Lodge No. 62, A.F.& A.M.; Pythagorian Chapter No. 17, R.A.M.; Wolcott Council No. 1, R.S.M.; Washington Commandery No. 1, Knights Templar; Spinx Temple A.A. O.N.M.S., Syria Grotto; Bigelow Chapter No. 33, O.E.S.; and the Putnam Phalanx of Hartford.

Mr. Ackley was born in East Hartford, and lived here practically all of his life and his interests here were varied. He leaves his wife, Helen Roberts Ackley, three daughters, Marion K., Mary E. and Frances; one son, Frederick R. Ackley; and one sister, Mrs. Lewis B. Green of New York City.

Mr. Ackley was a member of the First Congregational Church and for many years was its treasurer.

The funeral services were held this afternoon at 2 o'clock at his late home. Rev. Dr. P. Miles Snyder, pastor of the First Congregational Church, officiated at the services. Burial in the family lot in the Center Cemetery.

* * *

A Valued Correspondent

William K. Ackley was the highly esteemed Hartford correspondent of TOBACCO for many years. He was valued not so much for his erudition, but mainly for the correct knowledge he possessed regarding his subjects, and the fairness he displayed when writing about them. He was an enthusiastic advocate of Connecticut as a tobacco producing state and was ever ready to disiminate information about the local crops, market conditions and statistics. He rendered this journal faithful and efficient service.

Personally, William K. Ackley was a man of exceptionally fine character, who endeared himself to everyone with whom he came in contact. His bigness of heart, broad mind and liberal views toward the rights of others were some of his outstanding characteristics, and his untimely passing removes one of the best known and most highly respected of the New England tobacco growers and packers. His sudden demise in the prime of life will be sincerely mourned by a host of friends in the tobacco industries, and this is especially true of those in the office of TOBACCO, all of whom extend heartfelt sympathy to the bereaved family.

Konrad Badenhop

C. G. Wilson, Inc., of New York, has received by cable advice of the sudden death in Manila of Konrad Badenhop.

Mr. Badenhop was a resident of the Philippines, and had been since the American occupation, since when he was prominently associated with the tobacco industry. He was well liked by all who knew his agreeable disposition.

For nearly twenty years Mr. Badenhop was identified with El Oriente Cigar Factory, having risen to the position of assistant manager.

Only a few months ago Mr. Badenhop decided to open up a factory of his own. His untimely death prevented the fulfillment of his ambitious plans, in which undoubtedly he would have succeeded.

Detroit Sees Signs of Oncoming Holiday Season

"Shop Early" Cards Foretell Approaching of Yuletide—Interiors of Cigar Factories Disclose Substantial Evidences of Present and Prospective Prosperity.

DETROIT, Mich., Oct. 20.—One of the surest signs of the approaching holiday season is the "Shop Early" cards that are making their appearance daily in the windows of Detroit shops. This is, no doubt, always one of the first visible signs, but a peep behind the scenes with Detroit cigar manufacturers will disclose more concrete evidence, or facts, that the holiday season is almost upon us and a very prosperous one, it gives every evidence of being, from a manufacturer's point of view at least, judging from the number of orders already on file for holiday packing.

Looks Like Banner Year

Without a single exception, and this writer has interviewed nearly every one of note, Detroit cigar manufacturers have enough orders on file to assure uninterrupted capacity production until January 1. The year 1923 bids fair to be the banner one for Detroit cigar manufacturers, so far as volume of business is concerned. New production records are being established daily.

Faces Herculean Task

Sam T. Gilbert, president of the Webster Cigar Co., is literally snowed under with orders for "Webster" cigars. He is more than three million behind on orders at this time and holiday demands just beginning to roll in.

Showing Steady Increase

Jake Mazer of the Mazer Cigar Manufacturing Co. is oversold on his fast selling brands by five million. El Javana, Dime Bank, Humo, Miss Detroit, Detroit Hand Made and Macies are all showing a steady increase in all territories.

Demand Exceeds Production

R. G. Dun cigars are being shipped from the Schwartz factory at the rate of 150,000 a day, and still they are unable to catch up with the ever increasing demand.

Wm. Legge & Sons are hard pressed to fill orders for Sol Smith Russel and Mark Hopkins cigars.

A Banner Year

The Spietz Cigar Co. is at top production on Robert Emmet cigars. Tom Monroe, vice-president, tells this writer

"Lucky Strike" Proves to be Appropriate Phrase

American Tobacco Co., Makers of Lucky Strike Cigarettes, Has Made Another "Lucky Strike"—Nathan Glantz Lucky Strike Orchestra Broadcasting Saturday Evenings.

"Lucky Strike" appears to be a most appropriate phrase. The American Tobacco Co. has made billions of Lucky Strike cigarettes, and now that company has made another "Lucky Strike" in arranging to broadcast a weekly dance program through WEAF, the broadcasting station of the American Telephone & Telegraph Co. in New York. Its Nathan Glantz Lucky Strike Orchestra probably has a greater following than any other radio dance feature as a result of the widespread good will which it has earned through WEAF.

An important reason for the large number of listeners to this radio feature is the fact that it appears on the program at regular intervals and that the audience can count on hearing it every Saturday evening from 10:00 to 11:00. This enables enthusiastic listeners to hold radio dance parties with the assurance that good dance music is available.

Increasing Popularity of Lucky Strike Cigarettes

The radio audience is expressing its appreciation to the American Tobacco Co. in no uncertain terms and a heavy volume of mail is being received after each program. The value of good will for Lucky Strike cigarettes, thus created, can hardly be measured and it is another compliment to the initiative of the tobacco company that it has utilized this new medium so effectively. The name Lucky Strike is impressed on the radio audience in a most favorable and welcome manner through a most acceptable program.

The celebrated Nathan Glantz "Lucky Strike" Orchestra broadcasting weekly dance program through the American Telephone & Telegraph Station, New York

The Lucky Strike Orchestra, which plays under the direction of Nathan Glantz is one of the finest combinations of popular dance musicians in the country and their work has been recorded in scores of phonograph records. Nathan Glantz is the originator of the laughing and weeping saxophone and frequently gives the radio audience saxophone solo numbers which are well appreciated.

Redounds to Credit of Company Utilizing Facilities

WEAF has been placed in operation by the American Telephone & Telegraph Co. as a result of scores of applications from prominent concerns which desired to erect broadcasting stations for their own use. Had even a small proportion of these requests been acceded to, a hopeless confusion would have resulted because of the interference created by many stations operating simultaneously. WEAF is available to such companies at a specific charge and meets the needs of the situation at a fraction of the expense and trouble for each company utilizing it as compared with the cost of operating their own station. A radio audience has been built up as a result of the excellent musical, educational and entertainment features offered by WEAF which redounds to the credit of every company which utilizes the facilities.

The general public little realizes the magnitude of the task of preparing programs. The problems of a radio broadcasting program director are indeed manifold. The public constantly demands artists of skill and distinction and a diversity of entertainment which is difficult to maintain. Procuring such talent is a task of greater magnitude than booking for a chain of vaudeville theaters. A vaudeville manager provides a new three hour program once a week making a total of about twelve hours of new program each month.

"On the Air" 123 Hours

Compare this with the work of the program director of WEAF. During a recent month this station was "on the air" for a period of 123 hours. All of this was new program. In radio broadcasting there can be no duplication of this 123 hours, 75 hours were rendered by artists and speakers who came to the studio at 195 Broadway to broadcast. The remaining 48 hours of programs were obtained from points outside the studio, connected with the broadcasting station by wire telephone lines. The 61 programs given in these 48 hours were rendered at ten different points, including the Capitol Theater, The Town Hall, Carnegie Hall, Bedford Branch Y. M. C. A. (Brooklyn), Hotel Astor, Hotel Biltmore and the Casino Theater.

Contributing Celebrities

The use of telephone lines in connection with radio broadcasting has made available to the radio audience, artists and speakers who cannot be secured for broadcasting at the studio. Such celebrities as Louise Homer of the Metropolitan Opera Co., Walter Chamlee, world famous tenor, and such prominent men as Governor Smith, Governor Miller, Governor Preuss, Hon. Edwin Denby, Hon. John J. Davis, Hon. James W. Gerard, Senator Royal S. Copeland, Chauncey M. Depew, John E. Edgerton, Howard Elliott, Harrington Everson, Charles M. Schwab, Martin W. Littleton, Robert Olyphant, Dr. Robert Halsey, Dr. S. Parkes Cadman, Augustus Thomas, Raymond Hitch-

The new WEAF studios, with their magnificent equipment, embody the latest and most complete developments in the art of radio broadcasting.

THE SPORT-BRIAR
The Newest in Pipes!

ACTUAL SIZE

The SPORT-BRIAR has created a sensation among pipe-smokers everywhere it has been introduced, because it overcomes all the common objections to the ordinary pipe.

Be the first distributor of the SPORT-BRIAR in your city. It sells on sight at a margin of profit that makes it worth while for you to feature as one of your leading articles.

RETAILS FOR THREE DOLLARS

Here Are the Reasons Why the SPORT-BRIAR Should Be on the Counter and Display Case of Every up-to-date Cigar Merchant

1. Smokes as well in rain or high winds as indoors.
2. Absolutely prevents the scatter of ashes or sparks.
3. While holding as much tobacco as the ordinary pipe, it occupies no more room than a cigar, lights at the tip like a cigar and smokes any kind of tobacco.
4. Can be safely pocketed fully lighted, and will not bulge the clothes.
5. Made of the purest, selected real French briar by the most skillful workmen in France. Mechanically, it is a joy to see.
6. Its patented nicotine absorber (removable for cleansing) gives SPORT-BRIAR smokers the purest and coolest smoke in the world.

cock, Lord Robert Cecil, Governor Silzer have been heard by means of wire lines used in connection with the station. It is program features of this kind which have made WEAF one of the most popular on the air.

New Broadcasting Studios

Several months ago WEAF opened new broadcasting studios which embody the latest developments in the art of radio broadcasting. The most important feature of the new arrangement is the use of two studios each controlled from one sound proof announcer's booth. They eliminate much of the time loss between numbers of the program. Thus, while a band is assembling in the large studio, an artist performs in the small studio. Then, when the band is ready, the announcer switches from the small to the large studio without any annoying delay to the radio audience. And, while the

Enormous aerial tower on top of American Telephone & Telegraph building, from which "Lucky Strike" melodies are broadcasted.

band performs, artists in the small studio prepare for their next broadcast. This arrangement secures not only smoother running programs but gives artists an opportunity to rest between numbers.

The booth has large plate glass windows so that the announcer can see everything going on in both studios. Thus he knows when the artists are ready and how they are placed before the microphone. The announcing microphone, placed on a desk before him, is used for three purposes: first, when it is switched "on the air," it "picks up" the announcements and introductions to artists, second, it operates loud speakers in the studios which repeat the announcements for the information of the artists being introduced, and third, it provides direct communication from the announcer to artists in the studio which is *not* "on the air." By this means the announcer can check up the pronounciation of difficult titles and names and suggest the proper placement of artists in relation to the microphone.

In placing his singers and instruments, the announcer does not have to depend upon fortunate judgment and guess work to obtain the best reproduction because a loud speaker in his booth gives him a reproduction of the program as heard by the radio audience. His monitoring is certain and definite; he hears the same result as the radio fan with his loud speaker and, through the windows of his booth, sees at a glance the cause of any defect in placement. The new facilities eliminate all the uncertainties which exist when the studio director is present in the studio when attempting to place artists.

Switches on the announcer's instrument board permit instantaneous transfer from one microphone to another. Not only is there control for the two microphones in each studio. This has been furnished in crophone, but also for those at remote control installations. One man control makes it possible to eliminate all delays in switching from one point to another. Thus, when the announcer states, "The next voice you will hear is that of Dr. S. Parkes Cadman at the Bedford Branch of the Y. M. C. A. in Brooklyn," the microphone at that point can be switched on instantly.

There is a large and comfortable reception room with doors leading directly into each studio. This has been furnished in a most inviting and home-like manner.

With this excellent background of reputation and equipment Nathan Glantz's Lucky Strike Orchestra is making the fullest use of the opportunity which is offered.—Edgar H. Felix.

T. M. A. Seeks Carload Rating on Cigars

Following up the resolution adopted at its recent Convention, George C. Lucas, Traffic Manager of the T. M. A. recently docketed with the Consolidated Classification Committee a petition for the granting of a carload rating on cigars.

The Classification Committee on Wednesday of last week granted a hearing on the Association's petition at which Mr. Lucas in company with Mr. Figgatt, Traffic Manager of the American Cigar Co., Mr. Goudy, Traffic Manager of the General Cigar Co., and Mr. Walsh, Assistant Traffic Manager of P. Lorillard Co., appeared and urged the granting of the rating requested.

Under the present classification, shipments of cigars in any quantity, carload or less carload, carry a first class rate. This it was pointed out by the Association's representatives is a most unjust discrimination. Of all the commodities that move by freight there are but a very few on which a carload rating is not provided, cigars being one of those, but differing from the rest in that there is practically no possibility of there ever being a carload movement on the others.

Possibilities Demonstrated

In pointing out this discrimination, the possibility of carload movements of cigars was amply demonstrated by communications filed with the Committee by the Deisel-Wemmer Co. and Otto Eisenlohr & Bros., and the representations of the representatives of the American Cigar Co., the General Cigar Co. and the P. Lorillard Co.

Attention was also directed to the recent trend in the industry toward centralization and the impetus that this factor has given to the possibility of manufacturers shipping their cigars to large distributing centers.

And finally, the advantage from the carrier's standpoint in having cigars move in carload lots instead of in less than carload lots was pointed out because of the reduction in chances of pilferage in transit.

All in all a most formidable case was made out in favor of granting the carload rating requested and while it is, of course, contrary to the policy of the Committee to reach any decision at such hearings, the Association's representatives accorded a splendid reception and it is hoped that a favorable decision will be reached by the Committee on the T. M. A.'s petition within the next thirty days.

Kiwanians Get Agreeable Surprise

Johnstown, Pa., Oct. 18.—Probably the most interesting and appreciated part of today's program at the luncheon of the Kiwanis Club was the silent boost by John A. Kauffman, secretary-treasurer of William P. Strauss & Co.

Each pipe smoker in the club was presented with a Kaywoodie pipe, put up in a neat package and in a case. For those who did not smoke a pipe, a box of John Carver cigars was supplied. A short time ago a campaign was conducted in the club to determine the heaviest pipe smoker, and the expert knowledge of pipe smokers of the club was asked at that time, and a record of the names kept. Today each of the 25 members who smoke a pipe received a pipe with the compliments of the tobacco firm which Mr. Kaufman represents, and in order that the remainder of the club members present, some 50 of them, would not be slighted, they were presented with cigars. Newspaper reporters covering the meeting were also presented with cigars. A rising vote of thanks was given Mr. Strauss and Mr. Kaufman.

Progress Being Made by the Marine Cigar Co., Inc.

NEW ORLEANS, La., Oct. 20.—The Marine Cigar Co., Inc., is forging right ahead with no let up in speed, and today is numbered among the successful plants in operation here. Its promoters are watchful of every avenue of trade that leads to their establishment in Gallatin street and with well directed efforts are applying themselves energetically to the development of new lines of business. It covers the local and contiguous field thoroughly with modern and up-to-date vehicles and has in its employ a corps of active and well trained solicitors. The prestige of the Belkoma brand of cigars, a five, ten and two for twenty-five cent seller, once a prime favorite here, is being revived and it is again being brought into the limelight by the Marine Cigar Co., Inc. The brand is meeting with a big sale in the West and the Pacific Coast States. "Sam" Levy, the western representative at Denver, is sending in gratifying orders from San Francisco, Portland, Seattle and points in Wyoming, Utah, Colorado, New Mexico and Arizona. George F. Reid, of Memphis, Tenn., is the southern representative, covering the more important cities of the south.

A brace of delivery "buses", and trio of Belkoma hustlers

The Belkoma cigar is also being manufactured as triangulores.—a shape that is quite popular in the south and southwest—and is being made a special feature by the Marine Cigar Co., Inc. The managers and owners of the factory are themselves experienced cigar makers, know a good piece of goods when they see it, and allow nothing to leave their factory that does not bear the stamp of their approval. The factory has just celebrated its first anniversary, and making a good start on the second lap.

Another Carload Supply of Chesterfields

ALBANY, N. Y., Oct. 20.—Twenty-three salesmen can sell a lot of Chesterfields! So perhaps that's the reason the Dearstyne Brothers Tobacco Co. of Albany, N. Y., now find it necessary to buy this popular brand of the Liggett & Myers Tobacco Co. cigarettes in carload lots!

Anyway, the big shipment was unloaded this week, and immediately transferred to the immense Dearstyne warehouse at Broadway and Steuben street. Five floors in the new Dearstyne building are now completely stocked with cigars, cigarettes, tobaccos, pipes, confectionery, and novelties.

This, then, makes the Dearstyne firm the largest tobacconists, at wholesale, in the entire Capitol District. William W. Dearstyne, active head of the firm, is ably assisted by Edmund C. Dearstyne, Frank S. Dearstyne and James E. Dearstyne. Also as well, Cap'n P. C. Doyle, Fatima and Chesterfield boss in this sector, surely deserves a line for putting Chesterfields in position to be ordered in car lots!—THE SMOKER.

Pipes and Smokers' Articles Wanted

WASHINGTON, D. C., Oct. 24.—T. L. Hughes, of the Tobacco Section, Department of Commerce, has an inquiry from Australia in connection with purchases of pipes and smokers' articles. Anyone interested can obtain the name of the inquirer by applying to Mr. Hughes.

New Orleans News

NEW ORLEANS, La., Oct. 20.—The local papers in making announcement of the removal of A. Falk & Son, from their old quarters in Chartres street to their new daylight factory at Decatur and Bienville streets, have nothing but praise for Mr. Falk, senior, who founded the house here in 1892, and his son, F. N. Falk, who was admitted to the firm when he attained his majority. Among some of the features of the new factory, which is equipped with everything to increase the efficiency of its workmen and provide an abundance of light and wholesome air, are automatic electric elevators, exhaust fans, internal telephone system, cooking paraphernalia, rest rooms, etc. The enterprise represents an investment of $45,000. F. F. Lang is superintendent of the cigar production end of the factory and F. Gougis, the stripping division. The house warming proved an event in local cigar manufacturing circles and was well attended by jobbers and manufacturers.

A. F. Babin, of Falk & Babin, was doing the city with the crews of Valloft & Dreux, during the week, pending the illness of Charles Dreux, who is now convalescent. Falk & Babin are trying to straighten out things in their new establishment on North Peters street, into which they recently moved. Mr. Falk, who looks after matters on the manufacturing end of the line is up to his ears in work.

Representative Cohn, of Leo Hirch, leaf tobacco merchant of New York, passed through New Orleans en route home and was a caller at M. Trelles & Co.'s. He reported a very satisfactory trip.

G. Ponsetti, a pioneer in the retail cigar business of New Orleans, has been overtaken by business adversities; his place is now in the hands of creditors.

Representative Lowry, of the Yellow Cab Cigar Co., with headquarters in Memphis, was in the city during the week and was included among visitors at M. Trelles & Co.

Herman Leiser, president of the Pan-American Cigar Co., has just returned to New Orleans from an extended tour of the west, in which he combined business and pleasure. He found conditions in the industry quite satisfactory, and is feeling optimistic about the business for 1924. He appointed G. C. Johnston of Los Angeles, Cal., distributor for the Pacific Coast.

Marcus Schewed, of Reading, Pa., representing the Renaldo Cigar Mfg. Co., after a stay of two weeks here; has left for headquarters, promising to return in fifteen days, when he will make a more thorough canvass of the Louisiana and

If you want more Profits—

YOU can't make money on slow-moving cigars—no matter how big your margin. It takes a nationally known, rapid-selling brand like Cinco to speed up your turnover and give you a worthwhile return on your investment.

Most cigar distributors have too much money tied up in brands which have only a limited sale. Duplicate lines, scattered buying, too much stock and slow turnover eat up your profits.

Get rid of the dead wood and put all your effort behind the cigars that are your bread and butter. Your investment will be smaller and your profits larger.

an Francisco Anticipates Good Holiday Trade

arger Factories Where Strikes Have Occurred Had Surplus Stocks Sufficient to Meet Requirements for Some Time—Best Wages Did Not Prevent a Strike—News Notes.

San Francisco, Cal., Oct. 16.—Not en strikes in the western territory can erfere much with a good output and liday trade which are anticipated by cal factories. In the larger factories here the strikes have occurred, surplus ock had already been made up, partly to prepared against any holiday rush and rprise; and partly to keep the cigar akers steadily employed; so they are in sition to announce that their trade will t suffer for holiday supplies. The aller factories, hiring few people, are ways able to get what little help they ed anyhow; for even a striker will rk a little while to get something to . And these smaller factories are find- better call for their products than y had anticipated.

Pushing Work on New Factory

The Petri Cigar Co. has secured help ough to pack the cigars needed to fill liday orders; having already a suffint supply made up to be safe. Know- the objection that many smokers have Chinese made cigars, they are seeking avoid the hiring of Chinese, even ough the larger portion of the strikers y out. The company is pushing forrd to completion the duplicate plant Pittsburg, where there are many lians and other Europeans to whom the ployment will be welcome.

To Pay Wages Others Pay

Cimino, Cortini & Co. have a few at rk filling in on some sizes, and making ew ahead; as they already have quite supply on hand in preparation for the liday trade. As they were putting out choice article of Havana and Havana nd five-and-a-half inch, selling for the ne price as the usual six inch cigar out by most of the western factories, y were giving the workmen three dols more than the general rate being d, in order to hold the best workers. t this did not save them from the ike. So they have now announced that en their workers come back, it will be the same wages paid by other facies.

Mrs. Hannah O'Conner, who is going ad with the cigar manufacture which been built up by her husband is hav- excellent success at Eureka with her ncess cigar. She is steadily building trade, and expects to continue to do as she is now building a new factory.

Had Successful Trip

Following his trip through the northst and British Columbia, Harold Horn, salesman for the Golden State Leaf House has made the Eureka territory. He reports considerable prosperity there. Received a good run of orders, though immediately following a competitor, which in itself is enough to indicate that the local factories are doing well. He reports that Portland is a live town, and the cigar stands there are very partial to their home-town products. Astoria seems to be coming back all right. Whole blocks are being rebuilt at once, and much more substantially than before the fire. The local cigar factories are doing very well.

Goldberg & Leonhardt, the Sansome Street leaf dealers, are enjoying a good run of orders, with the revival of the season's business among the interior factories. Indications are for a good season generally.

Dealers Smile

What with the baseball returns, and the American Legion Convention, the local dealers are smiling; for the crowds enticed out on the streets, are smoking crowds. Megaphone and radio in various parts of the city announce to big crowds the progress of the great games, and a sudden and spontaneous cheer frequently told that something had happened, and showed, too, how close the average fan followed every move of the game and every player. Following this, the American Legion is making merry with the freedom of the city; and when the boys turn loose for a good time there is something doing. So it is not surprising that the local trade says, "Going better."

Sam Israel, the Jackson Street jobber, keeps in line with the times, by placing at the service of neighbors and patrons a sensitive radio receiving set, which kept them posted on the progress of the game.

The campaign of Adolph Judell, Secretary-Treasurer of H. L. Judell & Co., for Supervisor, looks now like a sure winner. To the endorsement of the Veteran's Club and the United Voters, he has secured the indorsement of the Hotel Men's Club and of the Lafayette Club, the leading organization of the French-American.

Judell Business Activities

H. L. Judell Co. are realizing an increase in their city distribution; and to help care for this trade have added to their staff A. J. Brunoni. The Alhambra campaign pushes steadily forward. The half million just received were more than half sold when they arrived, most of them

NEW YORK, THURSDAY, OCTOBER 25, 1923

FORD AGAINST TOBACCO

"Two billions of dollars a year for tobacco. And this doesn't include the indirect cost, via soil depletion, drain on efficiency, ill health, shortened lives.

"Booze at its pre-Volstead worst took a direct toll from national economy of only a little more than a billion and a half dollars. And John Barleycorn's indirect levies, so gross in form that they were easily visualized, were less, say some students of the subject, than are Lady Nicotine's more subtly taken indirect tribute today."—*Dearborn Independent.*

Henry Ford appears to have joined the Women's Christian Temperance Union, in spirit if not in fact, says the Cheboygan (Mich.) *Tribune.* The evidence is contained in a broadside delivered against tobacco in the current issue of his personal journal the *Dearborn Independent.*

That article reveals the true spirit of the reformer. It gives only one side of the question. It brushes aside all defense of tobacco as mere emotional effusion and piles figures upon figures to prove that the economic cost of the use of tobacco in this country is considerably more than $2,000,000,000 a year. That must be a painful waste when viewed as misguided use of funds which might properly buy nearly 6,500,000 Ford automobiles.

Mr. Ford's investigator finds that the smoking of one cigar by a person unaccustomed to smoking reduced that person's efficiency 13 per cent, and in the case of old smokers reduced it 11 per cent. The tests of relative efficiency were "throwing handballs or shooting at targets." It moves us to wonder if Mr. Ford selects his employees according to their ability to hit a mark with ball or gun.

Also he finds that there are eleven different chemicals yielded by tobacco, among them several deadly poisons, such as nicotine, carbon monoxide and furfurol. "Some students" are quoted anonymously as "of the opinion that the aggregate of harm thus done is greater than that ever done by alcohol."

Thus does tobacco cloud the brain, shake the nerves, and shorten the life of its users. Presumably it reduces the sum total of their enjoyment of life correspondingly. How much better it would be for a man engaged in jerking a lever 183 times an hour eight hours a day, in the Ford factory, to have a brain always as clear as a bell in order that he might jerk that lever more efficiently and more thoroughly enjoy such a life of constructive effort.

It is excellent propaganda for the use of those whose lives are devoted to the noble task of deciding what is not good or pleasant or profitable for their fellow beings and ordering them not to do it. Mr. Ford will prove an invaluable recruit to their ranks. But in the meantime it may be well for some millions of peaceful citizens of this country who find comfort and pleasure in tobacco to take heed lest a higher ethical economic and moral group kick them upstairs to its own rarefied atmosphere.

TOBACCO NEXT

Rumors multiply to the effect that a campaign is to be started—perhaps has been started—looking to the prohibition of the manufacture and use, and, of course, the growth, of tobacco. Such a policy would fit in well with our present standardizing tendency, and regulatory methods. To some Americans it is painful and intolerable that men or communities should differ from one another, and so it is thought to be necessary to make them all alike, and to do it by statute or constitutional amendment. So it would not be surprising if there were an attempt to make the nation uniformly non tobacco-using. Nothing more is necessary than to win a majority to that way of thinking. For it is an axiom in our political mathematics that whatever the majority decides is right, and hence, of course, it is supreme over the life of the individual, and over his morals.

Peter the Great, the student of history may recall, regulated the lives of his subjects in much the same way, even going so far as to prescribe the length of men's beards, imposing a graduated tax proportionate to their length. So our majority is being transformed into a sort of Peter, and whenever the Constitution interferes with the process the Constitution must be got out of the way by "amendment." When we get—what we seem to be after—a thoroughly trained, trimmed, disciplined and regimented population, we shall need to give ourselves no further concern about the millennium, for we shall be living in it.

Yet variety is no bad thing. It at least makes for joy and picturesqueness—also the truest and firmest unity is that rooted in variety. In nonessentials liberty and in all things charity—that is an old rule, given by high authority. If tobacco were abolished there would be no smokers to whom the non-smokers could point as sinners. But doubless there would be other sinners left, and other people to point at them—and reform them. Certain it is that we are rapidly and with a high degree of success building up a Peterarchy in these states. But what, one wonders, is to become of the hard-pressed Nordics?—*Indianapolis News.*

THE CIGARETTE

When the Scotch miners who had been entombed for nine days were rescued the first thing they asked for was cigarettes. The incident is one more proof of the fact that in crises like this one smokers turn to tobacco as a means of soothing their nerves and easing the reaction. It was not water these miners craved, nor food, but a smoke. When the Titanic was sinking John Jacob Astor calmly lit a cigarette to help him to face certain death with the courage, the sang froid, that tradition demands as fitting to the occasion. During the war men cruelly wounded and suffering intense pain found in the cigarette a sort of anesthetic that enabled them to endure the necessarily rough treatment of the first aid stations. In all this there may be a strong argument, which the anti-nicotine people will be quick to seize upon, against smoking as a habit. They will argue that what is so obviously a drug as to be efficacious in times of great tension or pain is not wholesome as a steady practice. Yet it is obvious that if the foes of tobacco had their way mankind would be deprived of a great comfort.—*New Bedford (Mass.) Standard.*

SMOKERS! BEWARE OF THE ANT

While deep laid plans are being set for campaign against the use of tobacco, bo manufacturers and the Bureau of Intern Revenue find that the consumption of ci arettes and cigars is increasing. This is sign that should cool the order of reforme who expect to stop smoking by legislati enactment. Europe, Asia and Africa g along without tobacco up to four hundr years ago. The world could get along wit out tobacco again. But if men of all colo did abstain from using it they would do voluntarily, and not otherwise. If they ga up tobacco of their own accord, there wou have to be a worthwile incentive. There m be more reasons against smoking than the are in favor of it. But they are not nece sarily better reasons. Men obtain solace a inspiration from smoking, and the bene that they obtain from it outweighs the har Nobody could object to an educational pro aganda against tobacco. However, no oth sort of campaign would be popular or effe tive.—*Waterbury (Conn.) Democrat.*

LADY NICOTINE, ACTRESS

Why leave Lady Nicotine out of th dramatis personæ of the modern dram when she plays such an important role? Sh figures large in the action and situations comedy and tragedy, of farce and melodram She is the silent herald of deep thought be uttered, of an epigram to be delivere She gives away the villain in the manner which she goes up in smoke from his snee ing lips. She helps the comedian put acro his "stuff". She fills in gaps in action and lines. She labels the beautiful woman wh holds a cigarette between her pink fingers red lips as a vamp or an adventuress. Th male trifler would be nothing without h help, and the flapper might be mistaken for sensible girl. Lady Nicotine identifies the all. In some plays she has the star par Why not put her name in the cast.—*Washington Post.*

SENSIBLE VIEW

In discussing threatened legislation again the use of tobacco, the president of the Hamp den County Woman's Christian Temperanc Union speaks wisely in declaring that, as rule, members of the organization are not i favor of the enactment of laws in that dire tion at the present time. She sagely observe that the members, or a majority of then prefer to see the present laws enforced befor others of a similar prohibitive nature ar sought. That is a sane, sensible view of th situation to take and one that will be cor curred in even by many users of the weed.

In this city not so very long ago we hear considerable in opposition to the excess c legislation with which the nation is curse It would be a monumental blunder to add t this record the enactment of a law against th use of tobacco. Some anti-tobacco fanatic perhaps fired to enthusiasm by the fact tha the Volstead act was finally put through would undoubtedly like to go and do likewis in the case of tobacco. But the more con servative leaders in the antiweed caus readily see the futility of such proceedings.

The Woman's Christian Temperance Unio is entirely within its province when it seek to put an end to the use of tobacco through vigorous campaign of education, but it woul be foolish on its part to go further. It ma well take a leaf out of the notebook of th prohibitionists to find out how difficult it is t enforce a law of this nature. And, when all i said and done, people have a right to say whether they shall use tobacco or not Tobacco and booze cannot be placed in th same category.—*Springfield (Mass.) News.*

How Northern Wisconsin Co-operative Tobacco Pool Helps Growers

Important Points on Which Pool Endeavors to Keep its Members Informed —Organization is Open to Any Firm or Person—Pool Controls Over 75 Per Cent of All Tobacco Raised in Wisconsin and Maintains Several Local Organizations

By SELMER NEPRUD

Field Manager of The Northern Wisconsin Co-operative Tobacco Pool.

STUBBORN opposition to any new undertaking, or any new movement, which is apt to change practices previously in operation, may always be expected.

In Wisconsin, particularly, this is true during the period of organization and the first year of the operation of the Tobacco Pool. Propaganda was circulated at all times detrimental to the Pool by certain interests that were opposed and are opposed to the Pool organization.

The Pool Directors and the Pool officials all fully realize that the Pool can not long exist if they adopt a policy of holding out for unreasonably high prices. However, they do insist that it is no more than fair that the tobacco producer, as well as the cigar and tobacco manufacturer, be allowed a fair margin of profit.

At all meetings that have been held at local delivery points the officials of the Pool have endeavored to impress this fact upon the individual growers.

To Help Grower Is Aim of Pool

It will be the aim of the Pool to handle tobacco on a quality and grade basis, in order to be able to pay the grower for extra time and effort necessary to produce a crop of quality that will be desired by the manufacturer.

In order to create and maintain interest in the art of producing tobacco of quality,—the Pool officials try to keep their membership informed as to:

3—Best seeds.
4—Cultivation of crop.
5—When to top.
6—When to sucker and harvest.
7—How to handle tobacco in sheds.
8—How to strip and prepare tobacco for the warehouse.

In this work Professor James Johnson of the University, who has devoted years to experimental work with tobacco, is always ready with timely articles and suggestions.

Pool Open to One and All

Any person or firm can come to the Pool to buy tobacco. The Pool, which is an organization of growers, is producing tobacco to sell. Last year as little as 80,000 pounds was sold to a small independent packer. The story that two large tobacco concerns were favored by the Pool was propaganda circulated to create discontent and mistrust among representatives of other tobacco firms doing business in Wisconsin.

In short, it is the aim of the Northern Wisconsin Co-operative Tobacco Pool to adopt those principles of doing business that have proved successful in other lines of industry. To raise a quality of tobacco that will be in demand, by the manufacturer, and to co-operate with the manufacturer and handlers of tobacco in order that all may exist with a fair margin of profit.

The Pool controls over 75 per cent of the tobacco grown in the State of Wisconsin and, during the last year, has probably had as large a per cent of increase in members, as any tobacco pool in this country.

Where Pool Has Organizations

Local organizations of the Pool are at the present time erecting warehouses at De Soto, Genoa, Chaseburg, Coon Valley and Independence. The necessary funds were available at Westby and La Farge but, on account of the frost, building operations were postponed until next spring. The Pool also operates warehouses at Viroqua, Soldiers Grove, Gays Mills, Edgerton, Stoughton, Deerfield, Chippewa Falls, Janesville and Madison.

The Pool is being built on a solid foundation, with orderly marketing being its primary aim. With some fifty local committees of seven members, it expects to meet any poisonous propaganda that may be started against it.

ne on Campus of the College of Agriculture, University of Wisconsin, showing some Holstein cattle recently shipped to Japan. Tobacco and livestock guarantees against abandoned farms in Wisconsin. Many years ago the pioneers in agricultural education foresaw the necessity of livestock on the farm in order to make farming profitable and at the same time maintain the fertility of the soil.

Character of Membership

The Pool's membership is 100 per cent human and is doing business on the square. The only way you can really get to know the organization is to get in touch with it in a business way.

"See that man over there," said the gossip dining at a fashionable restaurant.

"Yes," replied the customers' man.

"Well, he is James R. Smith, from Peoria, Ill., who has just made $200,000 on the market."

"Indeed! Well, you are wrong four ways. He is H. R. Jones, from Springfield, Mass. The amount was $20,000. And he lost it."—*Wall Street Journal.*

Tobacco Products

I have a block of Tobacco Products "A" bought a number of points below the present market. While I know there is a consolidation plan in the wind that will include this company, do you think it would be best for me in view of the market trend to take my profit and get out?

ANSWER.—As you undoubtedly know, Tobacco Products "A," beyond being entitled to priority in the receipt of noncumulative 7 per cent dividends, has no preference over the common shares. In all other respects, such as voting right and participation in assets upon dissolution, it is co-equal with the junior stock. There are outstanding prior obligations consisting of $3,900,000 7 per cent notes, subject to a sinking fund of $200,000 annually, and $8,000,000 7 per cent cumulative preferred stock.

Tobacco Products Corporation is largely interested in the manufacture of cigarettes and tobacco, and has an outlet for its products through its interest in United Cigar Stores. This consists of a 90 per cent ownership of the stock of United Retail Stores, which in turn owns 93 per cent of the outstanding common stock of United Cigar. United Retail Stores is to be dissolved in the near future so hereafter the dividends on the stocks which it holds will accrue directly to the benefit of the parent company. The result should be an increase in Tobacco Products' net income. At the same time, United Cigar, from which the bulk of dividends will be drawn, has not in recent years shown a sustained ability to earn it $12 dividend by more than a moderate margin.

Earning power as applied to the "A" stock indicates that there should be no difficulty in covering the 7 per cent dividend. This calls for $3,136,000 annually, and is just about covered by the dividend received from United Cigar. In addition, at no time in the past five years has Tobacco Products from its other interests earned less than $1,000,000 net after making allowance for present charges senior to that of the "A" stock.

Nothing definite has as yet been published with regard to the proposed amalgamation of Tobacco Products with other companies. In any such scheme, however, the "A" shares should receive favorable treatment. Even were nothing to develop on this score, the stock selling around 87 on an 8.1 per cent basis would scarcely be called high in view of the company's earning power or when compared with stocks of other tobacco companies.

The answer to your query depends entirely upon your motive in making your

(*Continued from page* 31)

1923 will be the banner year in the history of his firm.

Pleased with Business

Max Fruhauf, vice-president of San Telmo Cigar Manufacturing Co., was all smiles, as usual, when I called on him. He reported that the demand for Robert Bacon, Joan of Arc, Court Royal and Saturday Evening Post is well in advance of supply. He also reported that orders for holiday packing are coming in fast. Production has already started on one-fortieths and special Christmas packs.

Regaining Former Prestige

The Fields Cigar Corp., under the able direction of Isaac Goldberg, is rapidly developing and expanding their business in this territory. T-R cigars, at one time the largest seller in its class in this market, is rapidly regaining its old time popularity, through sheer quality. Production at the Detroit plant is rapidly approaching capacity, and with holiday orders coming in daily, future prospects look very bright.

A Popular Line

Blackstone cigars, the quality product of Waitt & Bond, of Newark, N. J., and jobbed in Detroit by Chas. J. Becker, have more than tripled in volume of sales during the past six months, is the report of Mr. Becker. A popular addition to the Blackstone line in Detroit is the five-cent Juniors, packed one-twentieths in wood. The first two shipments received by Mr. Becker were not even placed in the humidor; and back orders are already piling up.

Howes-Shoemaker Co., local jobbers, have added for distribution, Poppers Ace and Don Julian cigars. Both of these brands are well known in this market.—Jim.

American Tobacco Co. Not to Split Common Stock

American Tobacco Co. can be eliminated from the ranks of those of the tobacco companies which have been mentioned as contemplating a split-up of the common shares. It can be stated definitely that the company has not and is not considering any split-up of its common stock nor is it likely to.

American Tobacco Co. along with Lorillard and American Snuff has been prominently mentioned as offering possibilities of a stock split-up following on the heels of the announcement of contemplated action of Liggett & Myers which is about to issue four new shares of common for each old share, reducing the par value from $100 to $25.

Furthermore, American Tobacco Co. is not interested in any information of new organizations or combinations of cigarette producers.

The company publishes but one statement of earnings annually and adheres to a policy of making no estimates of earnings but as one of the leading producers of cigarettes, American is benefiting from increased consumption this year, which should be reflected in the 1923 figures. Earlier in the year the company announced that it was planning to materially increase cigarette production. Sales of its leading brand of cigarette this year are well ahead of those of 1922.

The company last year showed net earnings available for all dividends of $18,968,000 equal to $17.64 a share on the $97,625,000 combined amount of common and common B stock outstanding. After all dividend payments, there was added to surplus $5,055,955. Sales of $143,968,000 last year were $12,000,000 below those of 1921, the banner year but this year should show improvement.

Gross sales, surplus available for all dividends and amount a share earned on the combined amount of common and common B stocks of American Tobacco are shown below:

	Gross sales	Net for divs.	Amt. a share on common
1922	$143,901,000	$18,075,000	$17.64
1921	155,963,000	18,117,000	16.85
1920	143,106,000	14,277,000	13.38
1919	146,023,000	15,922,000	*31.83
1918	144,470,000	17,496,000	*33.45

*Amount a share earned on the common stock, none of the common B outstanding during these two years.—*Daily Financial America.*

"Why Molds Should Be Used"

Cincinnati, Ohio, Oct. 20.—An announcement has been made by the Miller, DuBrul & Peters Manufacturing Co., makers of cigars and cigarette machinery, that a number of cash prizes will be offered by the company for the best letters on the subject, "Why Molds Should be Used in the Manufacture of Cigars." In making the announcement the company is careful to state that what will count in winning the decision of the judges is not excellent literary style and beautiful phrases, but ideas. Officials of the company believe that there are many reasons why cigar molds should be used that their customers and others in the industry can tell them about. With this in mind the company is willing to pay liberally for the ideas presented by the winners of the contest.

The complete details of the contest have not yet been made public, but it is expected that it will not be long until the rules are given out through the medium of the trade press. Manufacturers are asked to pass the word about the contest on down to the workers in their factories.—Qusee.

The International Match Corporation

It was stated unofficially that the International Match Corporation will shortly issue approximately $15,000,000 of debenture bonds to finance expansion of the company in Central and South America, these bonds will be guaranteed by the Swedish Match Co.

The contemplated $15,000,000 debenture bond issue of the International Match Co., guaranteed by the Swedish Match Co. will be required, it was stated, to finance the expansion of the Swedish match industry in South and Central America. Incorporated in June, the International Match Co. is acquiring from the Swedish Match Co. and other important groups in the industry, 42 manufacturing plants in European and other countries. Control of these companies will be acquired by issuance of common stock of the International Match Co.

The Swedish Match Co. which will own a majority of the capital stock of

the International Match Co. controls through stock ownership, the match manufacturing plants of Sweden. During the past 20 years, the earnings of the Swedish Match Co. and its predecessors have averaged 26.3 per cent on the common stock outstanding from time to time. It is understood that both sales and net profits for the current year will exceed those of last year.

The formation of the American corporation has been accomplished to provide a vehicle for the permanent establishment of the Swedish Match Co. in this country. It is the belief of the officials of the company that although, Swedish matches constitute about 65 per cent of the world's export business, a closer relationship with the Western Hemisphere will be of material advantage to the companies. South America is at present a small market, but great expansion is thought to be possible there through the establishment of manufacturing plants in the leading South American countries.

Better Market at Greenville

GREENVILLE, N. C., Oct. 22.—Last week was a better week on the tobacco market than the week before, both as to pounds and prices—better for the seller and buyer. The grades were better and prices correspondingly so, or more so. Advances on all grades were upward, ranging as high as $10 per hundred. Some tobacco went over the dollar mark by a good margin. Tobacco continues to come from distant fields, some more than a hundred miles, and by truck, too. Some comes from away up in Virginia.

Sales increased last week over the week before. Last week's sales were 2,019,032 pounds. The average was much better, being $24.14 per hundred. This means that farmers received nearly half a million dollars for their tobacco sold here.

E. B. Ficklin, of the E. B. Ficklin Tobacco Co., is expected home from Europe in a few days. This is his second trip over this year, in the interest of his firm.

F. D. Foxhall, who had been indisposed, is back on the market, in good condition, and is looking after the sales on his floors. He had been out for a week or two.—KING.

Federal Crop Report

WASHINGTON, D. C., Oct. 24.—Tobacco is curing well in Connecticut and Massachusetts due to favorable weather conditions, according to reports received by the Department of Agriculture from agricultural statisticians in the different states. The announcement of the Bureau of Agricultural Economics, of the department concerning the tobacco conditions continues:

"It is reported as suffering from house burn in Maryland, Kentucky, and West Virginia. Considerable pole sweat is also noted in Maryland where exceptionally good yields on a decreased acreage were had. There was a large production with quality below the average in North Carolina. The crop has all been harvested in Tennessee and mostly cured. It has suffered a heavy damage from wildfire."

Returns from the West

E. A. Dinnsen, of the Industrial Leaf Tobacco Co., of 151 Water street, has returned from a long Western trip, during which he booked many orders for Porto Rican and Wisconsin tobacco.

"Pray for It and 'Cuss' for It"

HOPKINSVILLE, Ky., Oct. 20.—Ralph M. Barker, warehouse director for the Burley Tobacco Association, opened the fired district membership campaign for the Dark Pool today by addressing an overflow audience of farmers and business men in the auditorium of the Hopkinsville Chamber of Commerce.

For one hour Mr. Barker held the attention of the farmers by his vivid story of accomplishment in the Burley District. His short, quick sentences found a ready response in the crowd and the more important points of his argument were vigorously applauded.

He told the growers how the Burley Association had started with a membership equal to that of the Dark District and how it had grown in the two intervening years to more than 92,000. "And you can do the same thing down here," he said. "But you must not depend upon the hired workers to do it. It is the duty of every loyal member of this Pool to get behind the officers in this membership drive which will put you in control of the dark tobacco crop.

"You've got to be willing to get out and fight for the Pool, pray for it and cuss for it. Until it was organized you were giving your tobacco away for whatever was offered. Now you are naming your own price.

"When a man stands on a street corner and talks against the organization, he is not hurting the officers, who are your employees, he is hurting you. Suppose I were to go out on your farm and criticise your hogs, your cattle and other property, you would hit me between the eyes, and yet you let a man criticise your association, which is the biggest thing you have."

Mr. Barker told his audience how the Burley growers received practically nothing in 1920 for a crop that cost 26 cents a pound to produce. He said it was the best crop of smoking tobacco that had ever come out of the ground of central Kentucky and that its sale left the farmers poverty-stricken.

"And when we brought this marketing contract up to that district some of the growers signed it without reading it," he said. "They were in such a despairing condition that they declared that matters could not be made worse and that they were ready for anything. The first year we operated we obtained twenty-one cents a pound for them and we will get around twenty-eight cents for the 1922 crop.

"Down here you growers were not nearly as hard pushed when the association was formed. But it has helped you and will continue to help you. All it needs is your loyal support. If you members will get out and work you can sign this district up solid before the delivery season begins."

Immediately following Mr. Barker's address R. E. Cooper, director of warehouses for the Dark Association, made a short talk in which he also stressed the need of active co-operation within the ranks.

"We have over two-thirds of the growers in this district signed up now," he said. "If every one of these men will get out and try to get new members we will have a 100 per cent association before the end of the season. Just because you have men hired to run this campaign for you don't think your responsibility ends."

Mr. Cooper then turned the meeting over to Clifton Rodes, manager of the Field Service Division, who obtained pledges of assistance for the active drive which will open next week.

MARINE CIGAR CO., Inc. :: New Orleans, La.

R. M. Barker Addresses Home Town People

HOPKINSVILLE, Ky., Oct. 20.—Ralph M. Barker, director of warehouses of the Burley Tobacco Growers Co-operative Association, addressed a large crowd here today, including many growers of dark tobacco and officials of the Dark Tobacco Growers Co-operative Association. Mr. Barker told of the progress of the burley co-operative and the loyalty of the burley growers as the chief essential to that progress.

While in Hopkinsville, Director Barker completed arrangements for the joint use of a number of receiving plants by both the tobacco associations in the so-called border counties which grow both burley and dark tobacco and in which the operations of two receiving plants will not be necessary because one house can look after both crops.

Ukrainian Exports Are Not Permissible

WASHINGTON, D. C., Oct. 24.—In connection with the question of exporting tobacco from the Ukraine, raised by the Ukrainian Commissariat of Foreign Trade, the latter was informed by the Council of National Economy that, since the total supply of tobacco in the entire territory of the Soviet Republic, including this year's crop, will not exceed 700,000 poods (one pood equals 36 pounds), while the annual requirements of the tobacco industry of the Republic amounts to about 513,000 poods, the Council considers it impossible to permit any exportation. The report reached Washington from unofficial sources.

French Lick Pilgrims

Many prominent tobacco men are "taking the waters" at French Lick Springs, Ind., this week, including John H. Duys, of H. Duys & Co.; Al Mendelsohn, of Meyer & Mendelsohn; Percival R. Lowe, the leaf tobacco broker; Luis Toro, president of the Porto-Rican American Tobacco Co.; D. Emil Klein, of the D. Emil Klein Co., and Julius Lichtenstein, president of the Consolidated Cigar Corp.

Hartford Colleagues Confer

I. M. Jacoby, of Meyer & Mendelsohn, 169 Water street, paid a flying visit to Hartford early this week to confer with his colleagues.

The Zanthi Tobacco Crop

WASHINGTON, D. C., Oct. 24.—The Tobacco Division of the Department of Commerce has received the following report from Athens regarding this year's tobacco crop at Zanthi:

According to official information received at the Ministry of Agriculture, it is estimated that the tobacco crop of the district of Zanthi for the present year will be approximately twice as large as that of 1922. In 1922 the production of Zanthi amounted to 4,230,000 pounds of tobacco.—LAMM.

Kilfeather in Bankruptcy

NEW HAVEN, Conn., Oct. 20.—John P. Kilfeather, a cigar manufacturer, filed a petition in bankruptcy late Thursday. Schedules show liaiblities of $666,399.75 and assets of $478,484.26.

French Imports Are Lower

WASHINGTON, D. C., Oct. 24.—Imports of tobacco into France for the first six months of this year have fallen off about 50 per cent according to information just received by the Tobacco Division of the Department of Commerce. The figures show that for the first six months of last year imports of tobacco into France totalled 24,480 metric tons while during the same period this year the imports were 12,375 metric tons.—LAMM.

Buys Choice Leaf Tobacco

E. H. Thalheimer, of A. Kafka & Co., cigar manufacturers, of New Haven, Conn., who has been surveying the New York market, has made large purchases of choice leaf tobacco.

Buys Fancy Sumatra

Milton Heineman, of Heineman Bros., Baltimore, cigar manufacturers, was in New York last week when he purchased some fancy Sumatra leaf for his organization.

To Visit Tampa

Manuel B. Perez, Havana leaf dealer, of 97 Water street, plans to visit Tampa in the near future. Mr. Perez is optimistic regarding the future of the Havana industry.

Still Touring the South

Ira Strouse, of Strouse & Holzman, 197 Water street, is continuing his tour of the south. This week he is scheduled to call on the leading cigar manufacturers of Tampa and New Orleans.

On Jury Duty

Ray C. Clark, of D. Dreux, Inc., dealers in Sumatra and Java leaf, of 136 Water street, is unable to visit his clients this week, as he is doing jury duty.

Sells Out

DECATUR, Ill., Oct. 20.—Jeff Mosely has sold his cigar and confectionery business to Curly Jordan.

After all nothing satisfies like a good cigar

We specialize in tobaccos of quality for good cigars

STERN-MENDELSOHN CO., INC.

HAVANA & PORTO RICO

165 FRONT ST., NEW YORK

Tampa Tidings

TAMPA, Fla., Oct. 20.—Marcelino Perez Co., have consummated the removal f their New York office to Tampa. This ore closely identifies Manny and Bob ith us as citizens of Tampa, and their reat manufacturing business as an un-ivided Tampa enterprise. New York is o longer their headquarters. The ansplanting of their head office in Tampa as taken place with the minimum amount f inconvenience, but has, necessarily, aused some delay in the transacting of ie daily routine of office affairs. Cor-espondents and customers, knowing the rcumstances, can overlook that, and now iat the office is functioning in Tampa, in rest assured that the usual prompt ttention is again being given to their ffairs. Communications addressed to iem, Post Office Box 691, Tampa, Fla., the short cut to their attention.

On Short Visit from Havana

Santiago Torano, of Torano & Co., lavana tobacco deaers who own large arehouses in the Cuban capital, arrived Tampa, Sunday on the steamship *uba*. When interviewed Monday morn-g while at the Garcia & Vega factory, Ir. Torano reiterated the statements of ocal buyers regarding the high prices be-g charged for Cuban tobacco. He said iat the old crop was nearly all sold out. If conditions are favorable," he added, he new crop, which will be ready for ie market next July or August, will be good one."

Gotham Visitors

Ira Strouse, of Strouse & Holzman, ew York, leaf tobacco dealers, is in ampa, calling on the various factories.

A. Rosenweig, of Adolph Rosenweig Son, of New York City, is among the af tobacco dealers who are in the city siting the manufacturers in the interests their tobacco concerns.

hompson Buys Key West Factory

Thompson & Co. announce the purchase the large, well equipped Mi Favorita ctory in Key West. This factory was r many years operated by Park & Til-rd, whose business was recently ac-iired by the Schulte interests. The avis branch is now making Mi Favorita d El Telegrapho brands. The acquisi-n of this factory gives Thompson & Co. capacity of 300,000 cigars daily, or ap-oximately 8,000,000 per month.

Local cigar and tobacco men, who left r Havana on the P. & O. steamship *uba* Thursday at noon, included Francis-Gonzales, manager of the Garcia & ega factory, and Emilio Suarez, local af tobacco dealer.

Mariano Alvarez, general manager of Santaella & Co., manufacturers of ptimo cigars, expects to spend two eeks on business in New York.

The firm of Lopez, Alvarez & Co., anufacturers of L-A cigars, who pur-ased the fire station at 1313 Eighth enue, have remodelled it into a first ass factory and are now operating in eir new home.

Says Havana Prices are Soaring

Joe Perez, of Marcelino Perez & Co., turned from Havana Sunday on the eamship *Cuba*. Mr. Perez states that ices are soaring in Cuba constantly, d that they may go still higher. He ys the large New York brokers are rchasing vast quantities of tobacco, as shortage is expected in a few months.

Harry Mendelsohn of Stern-Mendel-hn Co., New York leaf dealers, has been ending the week interviewing the trade Tampa. He goes from here to Key est.

Wisconsin Tobacco Market

EDGERTON, Wis., Oct. 19.—While the market remains quiet there seems to be a feeling of expectancy creeping in, prompted no doubt by the appearance in the state of a few big operators and some inquiries being made. Looking over the situation seems to be the main reason for these visits, but as the season advances it would seem that a buying movement would start soon. Sampling of the 1922 is being completed and samples will be ready for inspection soon, the New York market expecting the advance guard to arrive this week.

It is reported that the Jefferson Leaf Tobacco Co. have recently disposed of 4,000 to 5,000 cases of 1922 goods. Representatives of Julius Marqusee are reported to be buying crops of the good portion of the 1923 in northern Dane county, at prices ranging from 25 to 30 cents. No buying of the damaged portion is being done.

Tobacco men riding the growing sections report much of the crop as suffering shed damage, some of a very serious nature, and the curing process advancing slowly.

The decision of the Supreme court in the rehearing of the Pool-Bekkedal case, which was to have been rendered October 16, has been set for a later date, about the middle of November.

Tobacco Notes

A. B. Shannon of Portage was an Edgerton caller Tuesday.

O. T. Rime of Orfordville was a business caller in Edgerton Tuesday.

T. W. Dickinson sampled a packing of 1922 for E. A. Sorenson & Co. at Whitehall last week.

H. M. Lott, tobacco broker, Tampa, Florida, visited the Wisconsin tobacco markets recently.

H. R. Kinney, representative of H. Duys & Co., New York, visited this market last week.

Julius Marqusee and Herman Cohen, New York, with Ed. Haskins of Janesville called on dealers in this market the fore part of the week.

S. W. Morrow, leaf man for Bloch Bros., Wheeling, W. Va., visited the Edgerton branch and conferred with Manager H. McInnes, Tuesday.—*Reporter.*

Novelty Packages Aid Sales

A great many stories are told of how the novelty of the package may greatly influence the sale of the product irrespective of the contents. Some of them are interesting merely as flashes in the pan, with no lasting benefits, says *Printers' Ink,* while others seem to bloom with perennial delight.

A smile is going the rounds over the clever trick turned by an English firm manufacturing cigarettes.

As first introduced, the brand did not appear to have worthwhile sales. The competition was entirely too keen, despite the advertising. And then—

A golfer made a suggestion.

On the outside face of the container there was printed a score card for golf. It was no mere make-shift but a genuine, practical, altogether likable sort of score card, with plenty of room for marking.

As soon as this new package was advertised, the box with its feature being reproduced in an illustration, golfers began to sit up and take notice.

The package made a substantial object on which to keep score, and there was always the handy cigarette. It is said that this single feature started British Consuls on the high road to success.

Inspects Local Market

Vivian Myers, of the Le Roy Myers Cigar Co., Savannah, Ga., has been inspecting samples of leaf tobacco in the local market.

CAUTION

THE LA ROSA DE PARIS CIGARS are not genuine unless our name (Starlight Bros.) is printed on the labels attached to the inside of the box. Every box bears our name in order to protect smokers against unscrupulous sellers who are trying to supplant the well-known LA ROSA DE PARIS CIGARS by inferior goods.

MACHINES
FOR
The Cigarette Industry

The Comas Cigarette Machine Company

manufactures cigarette machinery of unsurpassed design and construction, including the following:

COMAS STANDARD CIGARETTE MACHINE, for Spanish form of cigarettes; capacity 90,000 a day.

COMAS JUNIOR CIGARETTE MACHINE, for Spanish form of cigarettes; capacity 30,000 a day.

COMAS AMERICAN CIGARETTE MACHINE, for American form of cigarettes; capacity 250,000 a day.

COMAS IMPROVED AUTOMATIC FEEDERS, adapted to any standard style of cigarette machine.

COMAS IMPROVED CIRCULAR KNIFE GRINDER.

The company furnishes also Tobacco Cutters, Tobacco Granulators, Tobacco Stem Flatteners, and other machines for the cigarette industry.

Machines in use in all parts of the world. Write for illustrated catalogue.

COMAS CIGARETTE MACHINE COMPANY, SALEM VIRGINIA, U.S.A.

The Tobacco Situation

For several weeks past the Burley Co-operative Association has been engaged in a survey of the tobacco acreage in the burley belt in an effort to ascertain as nearly as possible the yield of the crop in 1923. This survey is progressing very satisfactorily, and it will only be a short time until the Association will have a fairly good line on the crop and can arrive at a careful estimate of the total amount in pounds of the 1923 crop. As a matter, of course, this estimate cannot be absolutely accurate. That cannot be ascertained until the crop is weighed out and sold. For months the cry has been made that there would be a great overproduction; that the large increase in acreage would make it impossible to sell the entire crop as the supply would greatly exceed the demand. But will it? The Co-operative Association has on hands thirty-six million pounds of the 1922 crop—all of fine quality. Statistics have shown that it takes about 280,000,000 pounds to run the manufactories. Practically all of the tobacco grown in 1922 is now held by the Association and not by speculators. It is in the hands of business men who know how to handle the situation. It is, therefore, necessary for the present crop to weigh out practically 250,000,000 pounds to furnish enough of the weed to satisfy the demands and requirements of the factories. Two months ago the tobacco crop indicated a yield of more than 320,000,000 pounds, but this amound of production is no longer considered. The rainy weather during August hurt the crop materially, and since housing began thousands upon thousands of pounds have been damaged, much of it rotting in the field and barn, until now estimates made by careful men do not place the yield above 295,000,000 pounds, and we believe that this yield will be cut heavily by weight, the outlook being for a lighter crop in weight than last year, even with the increased acreage. And the quality of the weed is hurt. This can be seen by a visit to barns in different sections. The crop as a whole does not indicate that real bright, fine tobacco will be in the majority. As a result there is every reason to believe that the Co-operative will sell its 1922 holdings for its established price, and have plenty of buyers for the new pooled crop. The pool men should sit "steady in the boat."—Mt. Sterling (Ky.) *Gazette.*

Tobacco Culture in Campbell County, Tennessee

Our farmers in Campbell County have experimented in tobacco raising now for two seasons. The results are very gratifying. Tobacco is destined to be one of our greatest money crops and that in the near future. It will never reach its full development however until market facilities are provided whereby it can be sold at home. This means a loose leaf warehouse in La Follette, the center of the tobacco growing section of Campbell County.

Warehouse Needed at La Follette

It is time for our far-seeing business men to begin thinking about a warehouse for La Follette. There is no reason why our farmers should be compelled to take their tobacco out of the county, when they could save the expense. If the sales were conducted in La Follette, the money would be kept in the community where it was earned and local business would get the benefit of it.

The best investment the business interests of La Follette could make would be in such a warehouse. Not only would it pay from the standpoint of dollars and cents, but it would also pay handsomely in good will which is, after all, a business man's most valuable asset.

We formerly lived in a little Western Kentucky town of 1,600 people. This town had three enormous tobacco warehouses. When tobacco began to move, money was plentiful, old accounts were settled, bank deposits increased and prosperity was in evidence everywhere. We have the same possibilities here if we will only rise to the occasion and provide a local market for Campbell County tobacco.—*La Follette (Tenn.) Press.*

The Connecticut Crop

SUFFIELD, Conn., Oct. 20.—Tobacco warehouses all up and down the Connecticut valley are busy sorting the excellent crop just harvested, and hundreds of skilled hands are now given employment handling the leaf. The broadleaf is reported to have passed through the sweating stage, for sampling, in excellent condition, and today finds several million pounds of broadleaf of this year's growth, on the market. Some delay in taking down the leaf in the tobacco barns has been caused by the prolonged drought and the lack of outdoor moisture. Nearly all of the Havana seed leaf is reported to have been sold.

Practically ninety per cent of the tobacco that is grown in the open in the Connecticut valley is controlled by the Connecticut Valley Tobacco Growers' Association, and the price is fixed in pools, according to grade.

Just at present there is a lull in buying, by cigar manufacturers, but the period of quickened trade from this source is believed to be near at hand.

Concerning the amount of the crop, the Government forecast for Oct. 1, for the Connecticut valley, gives 63,000,000 pounds, as compared with 46,925,000 pounds in 1922, and the October forecast shows a decline of 2.5 per cent as compared with the forecast of Sept. 1. This year's yield is referred to as a 95 per cent crop, while the average for the past ten years is a 92 per cent yield. But the yield in pounds does not tell the whole story, for tobacco growers claim that the yield per acre this year is the largest they can recall, and the price per pound, already paid or contracted, is the highest, comparing even with the peak of war prices. This apparently means handsome profits for the growers, as the cost per acre for growing a heavy crop is but little if any more than that of raising a light-weight, inferior crop.

Shadegrown in Good Condition

J. Arens, of Henry Oppenheimer & Co., 182 Water street, who has been supervising the Connecticut activities of the organization, reports that the shade-grown leaf is in splendid condition and that there is a good quantity of light tobacco.

John B. Cobb Estate Over $4,000,000

STAMFORD, Conn., Oct. 20.—An estate of $4,182,708, was left by the late John Rockwell Cobb, tobacco magnate and general capitalist who on April 9, last, died on a train en route from Hot Springs, Ark., to New York. The inventory was filed in probate court here by Williamson V. Fuller and Thomas E. Hille, of New York, and William P. Honour, of Stamford, as appraisers.

Of the estate $4,000,000 is in securities. The Strawberry Hill residence of Mr. Cobb is valued at $126,000. A town house in New York and a shooting lodge at Greensboro, N. C., are included. Three Remington paintings and one Detaille are valued at $10,000.

Mr. Cobb, who was a founder and director in the Riker-Hegeman Co., first vice-president of the American Tobacco Co. and a vice-president of the Consolidated Tobacco Co., leaves his estate under a trust fund to his wife, who is to receive $25,000 a year and the use of the Stamford and New York homes. On the death the estate is to go to two daughters, Mrs. Mary Howard Gilmour and Mrs. Lucy Cobb Hill, both of Stamford. At that time also University of Virginia is to get a sum "not to exceed $140,000," Mr. Cobb having already given that institution $50,000 for a chemical laboratory.

W. P. Gilmour, son-in-law, and an executor, is to get $25,000, while George W. Hill, Jr., grandson, gets $150,000 and a shooting camp in Canada, the North Carolina property now going to the two daughters, who also get the residue of the estate when Mrs. Cobb dies.

Canadian Tobacco Ruined by Frost

The more one knows about the chances of success in growing cotton, or tobacco, or corn, or truck, or strawberries, or dewberries, or cantaloupes, or peaches or anything else in eastern North Carolina the wonder is that the 250,000 new settlers which have gone to Canada this year did not come to this wonderful coastal region with its fertile lands and ideal climate. While tobacco in Ontario was in the field and the farmers were in mortal fear of frost, the tobacco growers of eastern North Carolina had harvested and sold their weed and had cover crops on the land which produced their tobacco.

Growing tobacco in Ontario, on the contrary, is a gamble. Their crop had every promise of turning out satisfactorily but frost came along and nipped the hopes of the farmers in the bud. A killing frost occurred in that country, September 13 and 14 and destroyed all tobacco in the fields. That means practically the entire crop and the loss falls heavily on those who had hoped to succeed with the flue process of curing the weed. They had imported some experienced young tobacco men from the bright belt in North Carolina, but when the hopes of the Canadians were blasted, the Tar Heel tobacco experts had to come back to their own frostless Eldorado.

Three young Carolinians, Russell Searce, of Reidsville, and Sam Wright and Hardy Poindexter, of Ruffin, returned home a few days ago from Leamington, Ontario, where they have been flue curing tobacco for the Canadians. Raising flue-cured tobacco in Canada is a new industry and it was attempted in a strip of territory 30 miles wide and 60 miles long, in the province of Ontario. White burley tobacco, however, has been grown in that section for several years. A very fair quality of both types of the weed can be produced there, but the one deterrent factor is the danger of early frosts.

Production this year had promised about 10,000,000 pounds, but only a third of it had been cut when the frost came. No tobacco was cut after the frost, as it was utterly destroyed. The Canadian growers are greatly discouraged over their heavy losses this season, and it is doubtful whether another crop as large as that this year will be planted again. This is the earliest killing frost in the country in 26 years. Many farmers had gone in heavily for tobacco and consequently their losses are serious.

Why people insist on trying to live outside of the "nation's garden spot" is past understanding. Of course, it is because they know little about this wonderful country and we have taken no trouble to let them know about it. Here is where we grow the nation's greatest tobacco crops. Men come here from other states to grow tobacco because they can grow quality stuff and where there are markets and warehouses for handling our big crop of 400,000,000 pounds. In Canada growing tobacco is an experiment. In eastern North Carolina it is an industry. Our crop this year may bring $100,000,000.—*Wilmington (N. C.) Star.*

Better Feeling Prevails at Danville

DANVILLE, Va., Oct. 23.—A distinctive improvement in the quality of tobacco brought to both the auction floors and to the co-operative marketing organization receiving stations, has resulted during the past few days in a better feeling among the farmers and the warehousemen.

On the auction floors which reflect the trend of the market more readily than the co-operative receiving stations since the prices are a public matter, the Danville average has risen steadily as the nondescript types seen at the opening gave way to the better grades. Heavy sales are in evidence this week and the market report is expected to show the largest quantity of tobacco sold in any week since the market opened.

Official figures for sales on the seven local warehouse floors during the past week show the disposal of 1,225,871 pounds, sold for $262,492.54, the average price being $21.41. The previous week more than half a million pounds was sold for an average of $18.96.

Sales for the season in Danville now amount to 2,328,353 pounds sold for $468,002.32 or at an average price of $20.10.

The record single sale for the season in point of price has been recorded at Acrees warehouse where M. O. Nelson, the manager, reports that J. A. Younger sold 790 pounds of wrappers, some of them fancy, for $407.50, his average being $51.51. One pile of wrappers sold at eighty cents a pound.—TETLEY.

Visiting Japanese Arouse Great Interest

DANVILLE, Va., Oct. 22.—Speculation was rife here a few days ago when four Japanese, representatives of the Japanese government monopoly, arrived in Danville and followed the sales for the day accompanied by representatives of the local firm of Pemberton & Penn, which, for 25 years, has represented the monopoly in Danville. Certain grades were bought eagerly by buyers for the local firm on Japanese account, these being largely lugs with good body, and some wrappers. Some observers of the sales reported that this demand resulted in a favorable price reaction on those grades.

In Market for Some Tobacco

At the offices of Pemberton & Penn, Inc., where inquiries were made relative to the significance of the appearance of the foreign visitors, a guarded statement was made, this to the effect that the Japanese representatives were in consultation with members of the firm and that they were on the market for "some tobacco." No indication of the amount bought was given nor could anything relative to future activities on account of the monopoly be gleaned. They remained here one day only.—TETLEY.

Oil Burning Curing Device Demonstrated

DANVILLE, Va., Oct. 22.—The first practical demonstration of the oil burning device invented by J. A. Wilson of this city for use in the curing of leaf tobacco was given on a nearby farm recently in the presence of a score or more farmers, some of them large landowners. The result of the demonstration found the observers impressed with its possibilities, some going so far as to say that the oil burner probably would revolutionize the present wood curing method. The burner was attached to the barn within which a number of suckers had been placed in order to demonstrate the curing properties of the heat. Crude oil was fed to the burner which was ignited. Various degrees of temperature were readily attained and maintained at will, a valve controlling the heat. The temperature in the barn was finally brought to 200 degrees. Examination of the leaf after the curing process failed to reveal any aroma of crude oil as had been expected by some. Mr. Wilson claims that the oil burner will cure tobacco at a rate much cheaper than by the wood method. He has applied for a patent and intends to market the device.—TETLEY.

Unsatisfactory Prices

RICHMOND, Va., Oct. 20.—Virginia tobacco growers have experienced some uneasiness because of the comparatively low prices that have been received for Virginia bright leaf since the opening of the co-operative warehouse on Oct. 9. Tobacco is selling for less than it did at the beginning of the season last year, according to J. J. Owen, assistant state commissioner agriculture, but the quality of the tobacco that has reached the warehouses is not the best.

A comparatively small amount of the crop has reached the markets and the growers, it is said, do not fear that present conditions will continue. Although several causes are advanced for off quotations the main reason is said to be the fight being waged between the organized growers and the independent warehouses. Last season the independent dealers started off by advancing prices and this year the tactics adopted are said to be exactly the reverse.

Due to the retarded season, the quality this year is not the best grade for cigarette tobacco and this is expected to have some effect on prices for a few months.

Mebane Sales Improve

MEBANE, N. C., Oct. 20.—Mebane's tobacco market is showing some improvement over the former weeks of the season. The best tobacco is bringing $50 to $60, and the best, experienced tobacco men say, is by no means on the market yet.

Mebane has a reputation for good prices, and the average will doubtless pull her up to a high place this season among the markets of the state.

Henderson Average, $19.75

HENDERSON, N. C., Oct. 20.—Sales on the Henderson auction tobacco market for the week amounted to 340,454 pounds, which sold for $67,259.81, at an average of $19.75. This gives a total for the season through this week of 971,530 pounds, which sold for $183,996.80, for an average of $18.94 per hundred.

These figures give the market fully 50 per cent more than was sold last week, with an average of 35 cents per hundred higher, and raises the season average from $18.49 per hundred at the close of business last week, as compared with $18.94 at the end of the present week.

Sales for each day of the past week were as follows:

	Pounds	Price	Average
Monday	80,002	$16,425.56	$20.53
Tuesday	67,714	13,823.73	20.41
Wednesday ..	69,974	13,129.94	18.76
Thursday	64,732	12,578.46	19.43
Friday	58,032	11,302.02	19.47

The average for the season thus far is from three to five cents under the price for the same period a year ago. According to reports received here from the State Department of Agriculture, Raleigh, reporting officially for business up to October, say that warehousemen have been unanimous in remarking that the tobacco offered during the month of September was very poor. Sales consisted mostly of a common quality of lugs and tips, with very little good tobacco being sold. Some damage was reported from rains in some sections, with the crop as a rule not as good as expected, and with

reports that the quality is not as good as last year.

The crop report just issued shows the condition of the crop at harvest as 84 per cent of normal, with a forecasted yield of 347,000,000 pounds. Final sales for the 1922 season were given as only 265,513 pounds. By the same reckoning the Henderson market for September, 1922, averaged $22.30 per hundred pounds, while that of 1923 was only $18.66.

Criticizes Pool System

GREENSBORO, N. C., Oct. 21.—The author of a letter published in today's issue of the Greensboro *Daily News*, says:

We see from the papers that an effort is being made to organize the wheat growers of the northwest into an organization similar to the tobacco pool of the south, and that the success of this tobacco pool is cited as a model.

Co-operative marketing is being offered to all growers of farm products as a panacea for all their ills. This policy is receiving a boost just at this time by the very interesting papers being published from Prof. Branson and others. Prof. Branson writes very interestingly of the operations of the co-operative associations of northern Europe who sell their farm products through their own established agencies, in London and other thickly populated districts, where they come into direct contact with the consumer.

Now, Mr. Editor, Prof. Branson has given us the facts as to the operation and outcome of these associations in Denmark, Norway and elsewhere. Will someone kindly tell us the present status of these pools nearer home? The ones in which we are more interested. Here, where conditions are so different from what they are over there. We hear many conflicting rumors as to the operation of these so-called pools nearer home. The writer would say that he has socialistic leanings and has been at some pains to learn something of the facts in the case, especially of this tobacco pool.

U. S. Conditions

Conditions in the United States are quite different from the conditions described by Prof. Branson. It is impossible to go into details of the subject in a paper of this kind. So we would confine ourselves to asking a few questions which some of your many readers no doubt can answer.

Is it a fact, that, of about 110 associations organized during the last ten years among farmers of the United States more than 100 have ended disastrously? Is it a fact, that after the cotton pool sold their holdings of the 1922 crop at around 26 cents, cotton advanced to 30 cents and at no time since has it been as low as the price the pool cashed in? Is it a fact, that the low price of the tobacco crop marketed 1920 and 1921 was owing to the unprecedented dry season, because of which a large per cent of the crop was used as fertilizer and the remainder sold for higher figures than have been obtained since? Is it a fact, that many types of our domestic tobaccos have been on a steady decline ever since the pool was formed and began operation two years ago? Is it a fact that these types of tobacco were lower last year than the year before and that the pool as well as outsiders sold their holdings at these reduced figures? Is it a further fact that these same types of tobacco as well as others are lower this year than last and that the pool is now selling these tobaccos at these

reduced figures? Is it a fact that the Georgia tobacco crop where no pool operates sold this season at higher figures than are prevailing in South Carolina, North Carolina or Virginia? Is it a fact that a majority of the pool members would sever their relation with the pool and are only held by the contract?

Accepting the prices obtained on the open market as the value of the 1922 crop is it a fact that our merchants and others are financially embarrassed because of the millions of dollars owing the producers by the pool which many believe can never be paid except with money collected from the sale of the 1923 crop?

What has become of the peanut pool? Is it still functioning or has it followed its predecessors "up salt river"? Is the following signed article by C. Boswell, of Black Creek, North Carolina, and published in the *Wilson Times* of the tenth, true?

"A man near Fremont who is a member of the tobacco association has a wife and two small children. He delivered his tobacco to the pool at Fremont. There was one lot of 300 pounds which was so common the managers refused to receive or make any advance on it. He carried it home and gave it to his little son, who carried it to Wilson, sold it on the open market and realized $9 from the sale. The managers of the pool hearing of this sale went to this man's house and collected from him five cents per pound for selling the tobacco on the open market. The man paid them $15, the $9 his boy had received and six additional of his own."

Oxford Average, $19.27

OXFORD, N. C., Oct. 20.—Total sales for the week, 369,497 pounds; average price per 100 pounds, $19.27. Sold to date of 1923 crop, 938,231 pounds; average price per 100 pounds, $17.53. Sold to same time last year, 2,827,317 pounds; average price per 100 pounds, $27.25.

New Bern Average, $16.28

NEW BERN, N. C., Oct. 20.—Total sales for the week, 36,086 pounds; average price per 100 pounds, $16.28. Sold to date of 1923 crop, 406,262 pounds; average price per 100 pounds, $16.18.—M. E. TYSON.

Co-operative Deliveries

RALEIGH, N. C., Oct. 20.—The Tobacco Growers' Co-Operative Association has received over 45,500,000 pounds of tobacco from the South Carolina and Eastern belts this year, according to the official report of deliveries to date given out at a meeting of the tobacco association's directors held in Raleigh. President Norwood, of the association, stated that the organized tobacco farmers of the Eastern and Southern district have already delivered more tobacco to their association than during the entire season of 1922, with a majority of the North Carolina crop still unmarketed.

New members have joined the marketing association at nearly every receiving point in the old belt since the co-operative season opened with higher advances than those of last year, according to directors from Western North Carolina and Virginia.

Operating expenses of the association, including all salary and in handling of the 1922 crop of tobacco, have come to only $1.56 per 100 pounds, according to the latest figures for handling 163,000,000 pounds of tobacco delivered by members.

Advances on the association floors in Wake County have already reached the $25 mark, according to E. M. Talley, association warehouseman at Fuquay Springs, who stated that 600 pounds of wrappers brought in by Edward Mabrey, of Angier, brought a first cash advance of $25 per 100. Other markets of the association are reporting very high-grade deliveries and first cash payments to individuals for their entire loads which averaged over $20 per 100 in the opening week.

Match Imports and Exports

WASHINGTON, D. C., Oct. 24.—There were 284,967 gross boxes of matches imported into the United States during August, according to an announcement just made by the Department of Commerce. They were valued at $136,046.

By far the largest quantity of these matches came from Sweden, with the second largest quantity coming from the Netherlands and the third from Norway.

Domestic exports of matches were valued at $14,736, according to the announcement, of which the largest quantities went to France and Nicaragua.—LAMM.

Owensboro Outlook

OWENSBORO, Ky., Oct. 20.—A good general rain during the week has proved helpful in development of tobacco curing, and it seems now that by December 1 tobacco will be sufficiently cured to market.

While the Board of Trade has not definitely determined as to date of opening sales it is probable it will be about December 3.—J. S. PHELON.

On all markets. We air dry and steam dry on most of the loose markets, and have the latest improved Philadelphia Textile Steam Dryer in our Louisville Factory for handling Leaf and Strips. Orders and correspondence respectfully solicited.

Burley Community Locals

BLOOMFIELD, Ky., Oct. 20.—The work of organizing community locals of the Burley Tobacco Growers' Co-operative Association was started here today when Miss Verna Elsinger, director of social service of the association; William Collins, chief of the field service division, and J. D. Craddock, assistant in the field service, spoke to a large crowd of men and women of Nelson county.

Miss Elsinger outlined the purposes of the community local, the improvement of health and home conditions, better care of babies, better school surroundings and an interest in the work of the men. She told how the morale of the association had been helped in the counties so far organized through the participation of the women and children in the community locals and how initiative had been developed by the fact that many persons who had done nothing for the association previously had found out that there was something they could do to help.

Miss Elsinger said in part:

Must Have Loyalty

"Two factors are important to the success of a co-operative organization such as ours. The first, an efficient central merchandising machinery. The thrilling story of the burley co-operative's achievement in this line is now a familiar one to all Kentucky. The second important factor is the individual member. The loyalty, the intelligent thought and the active support which each of the 92,000 members give to the association is in the final analysis, its greatest source of strength or of weakness, as the case may be.

"European co-operatives, small in area and membership as compared with our own, have had these advantages. There has been a development beginning with a small group, coming together as neighbors, imbued with a spirit of co-operation and developing out of that a co-operative machinery. Our own organization on the other hand, forced by the dire necessity of hard times, built first its central machinery. We now approach the second step: the development of a neighborly co-operative spirit; the closer contact between the individual grower and his association, the development of a unity and solidarity which can come only from people joining together working hand in hand for a common cause.

"Every member should know what the association is, what it is trying to do, how it is doing it. He should be voting and taking an active share in the association's work. He should be so well informed that he can meet criticisms from the outside and fight insidious propaganda. He should be actively working with his fellow members for the success of a cause which means progress and prosperity for thousands of men, women and children.

Local Is Only Means

"The means by which he can do this is a gathering of neighbors in a community local. In most of the locals, a discussion plan is being followed with the result that hundreds of members are learning for the first time the elementary facts in regard to co-operative marketing; facts which every member should know. The farmer is learning in detail some of the facts about his business which often he has not had the time nor opportunity to take up before. He is learning why co-operative marketing is the only sound system of marketing farm products in our present industrial society.

"He is learning the standing of the burley association as a business organization; its credit with the banks, with the War Finance Corporation and so on. Moreover, he is thinking and making suggestions on ways and means of improving details in the organization. Instead of sitting around on soap boxes, discussing with his neighbors the things he doesn't like, he is bringing them up in local meeting. If the facts are not clear, he is asking headquarters for information which will make them clear. In other words, he is recognizing his part in the organization, his obligation to it, he is becoming an active, not a passive member."

Porter Praises Pool

SHELBYVILLE, Tenn., Oct. 20.—J. Sherman Porter, of Lexington, Ky., editor of the *Burley Tobacco Grower,* addressed a large crowd of general farmers and tobacco growers here this afternoon on the co-operative marketing of farm products with special reference to Burley tobacco.

Mr. Porter urged the growers to pay no attention to statements of interests hostile to co-operative marketing in regard to the Burley pool, but to "write to any newspaper man, any merchant, any banker, any lawyer, any physician, any tobacco grower or to anyone else who does business with the tobacco growers of Kentucky, as to whether the organization has improved conditions, and we shall cheerfully abide by what they answer."

Paducah Prospects

PADUCAH, Ky., Oct. 20.—Sales of hogshead tobacco have been light again this week. However the Association has made sales of several small lots of leaf tobacco, but the prices and number of hogsheads have not been given out. There is considerable inquiry for both leaf and lugs, most of which is of the common and medium grades.

The past week has been pleasant with moderate to warm temperature, fine weather for curing the new crop. A warm, gentle rain set in on Tuesday, which continued until Thursday, which gave a goood season, which will greatly benefit tobacco hanging in the barns, especially the early cut and cured tobacco, and it will also benefit that part of the crop that has just been cured.

We have had opportunity to examine tobacco in the barns and I am convinced that our first ideas regarding quality were correct. Colors are generally good, being brown to light brown, and the tobacco is leafy with lots of length. In fact the percentage of long tobacco will run as high as we have ever seen. The better part of the crop runs on the light cigar style, and the greater part of it is smooth and clean, but lacks body. However, there is a fair sprinkle of heavy tobacco in the crop, and we think, taking it all in all, that we have a very useful crop of tobacco that will be desirable for export and home use.

The percentage of low grades will be heavy on account of wild fire, and many crops have been injured to the extent that they will only make lugs and trashes. The percentage of low grades will be much larger than usual.

All of the crop has been cut and the late cuttings are being cured now. There has been no frost so far, consequently no damage from this source. The early cured tobacco is in good condition for stripping and classing, and no doubt some tobacco will be gotten ready for early marketing, and we may see some movement by November 1, but we don't look for any activity until the middle of November to December 1.

What prices may be remains to be seen. Of course this will depend largely upon the supply and demand. We have a large crop, the greater part of which is controlled by the Co-operative Association, and how prices will compare with last year we cannot say.—W. B. KENNEDY.

Burley Legal Matters

LEXINGTON, Ky., Oct. 22.—Judge Charles Marshall, of the Shelby Circuit Court, has decided the case of the Burley Tobacco Growers' Co-operative Association against J. B. Turner, of Shelbyville, in favor of the association and has awarded the association an order of delivery directing Turner to deliver the tobacco grown on his Oldham County farm to the association as provided in his contract.

At a preliminary hearing of the matter when first brought before him, Judge Marshall granted the association a temporary injunction preventing Turner from selling the crop over the loose leaf floors, or delivering it to any person or corporation other than the co-operative. The Court of Appeals refused a dissolution of the injunction and Judge Marshall finally disposed of the case by granting an order of delivery.

Turner was represented by Ogden, Edwards and Peak, of Louisville, and the association by Carmel Hallmeyer, of Lexington, and Stanley F. Reed, of Maysville.

Announcement was made today at the offices of the legal department that the association will appeal the decision of Judge Sidney Gaines, of Burlington, in the case of the association against the city of Carrollton, in which the city is seeking to assess the tobacco in the hands of the association for taxes and in which the court decided for the city, refusing the injunction asked for by the association.

Sim Weisenback, of Fayette county, who was sued by the co-operative for damages recently, settled the claim against him in full by paying 5 cents a pound on all tobacco sold, a $25 attorney's fee and $5.60 court costs, the total amount being $123.10.

PORTO RICAN

The Tobacco Inevitable to a Good Mild Cigar

Manufacturers who have been the most successful in "getting a run" on certain brands of cigars are those who have produced a cigar that is mild to the taste, free in its burning qualities and at the same time fragrant in aroma.

No tobacco in the world combines all these requisites to a good mild cigar in so marked a degree as Porto Rican. In fact, much of the popularity attained by the "Mild Havanas" is attributable to the ideal blending of Porto Rican Tobacco in the filler.

"A WORD TO THE WISE"

Cigar Manufacturers should be sufficient. If you are not using Porto Rican Tobacco at present, try it, and see if your customers are not better satisfied. But ——

BE SURE YOU GET PORTO RICAN

There is no excuse for paying for something you do not get. By means of stamps of various colors the Government of Porto Rica CLASSIFIES all Tobacco exported from that Island either in the leaf or as cigars, as follows:

CIGARS

WHITE—Manufactured in P. R. with Tobacco Produced in P. R.
BLUE —Manufactured in P. R. with Porto Rican and other tobacco.
PINK —Manufactured in P. R. with tobacco not a product of P. R.

TOBACCO

WHITE—Genuine Porto Rican growth.
BLUE —Mixture of tobacco grown in P. R. and other countries.
PINK —Tobacco of foreign growth.

Wisconsin Leaf Curing in Way to Please Buyers

Alternating Rain and Frosts Give Satisfactory Colors to Hanging Tobacco—Products of Few Hundred Acres Piled in Sheds—Pool Has Considerable of Southern Carryover.

EDGERTON, Wis., Oct. 21.—The weather the past two weeks has been unusually rainy and very cold between times. The last two nights have witnessed two heavy frosts. Those operators who like to see several frosts visit the hanging tobacco before it entirely colors out are quite well pleased with the progress of curing the last few days.

Perhaps two hundred to five hundred acres in the state are now in the pile in the shed as a result of the recent case weather. There are no entire crops among them down, however, but many growers always take a little down the first few visits of case weather. It gives them a good sample of the crop, for themselves and the early buyers who might happen to be along, and enables them to have more shed room in the meantime.

Curing Out With Beautiful Colors

The leaf that escaped the prevalent damage that occurred in the shed early in the season is curing out with a beautiful color, even in tint, and crops of this character are being constantly pecked at—in the south especially, at astonishing prices. The rains have held the buyers in a lot the past week, but several crops in the south have continued to ring down 30 cents with regularity during that period of time.

The last of the unlucky crops are all in the shed now. Two weeks ago saw much of it still in the field, that is now in the sheds. The writer's estimate of some weeks ago that 90 per cent of the entire crop in the south would eventually see the inside of the sheds is not changed at the present time.

Hard to Find Binders

In the north somewhat vain searchings continue for unsold fine crops of binders. Most of it is gone, and the rest of it is hard to find, if there is any. Only about ten per cent of the fields out during September's disastrous frosts will be shedded in the north. The rest of it is still out, and much of it is already plowed under.

The state's October estimate of the total yield of the 1923 Wisconsin crop is 43,000,000 pounds, instead of the 53,000,000-pound estimate of the first of September. In other words, the state estimates that ten million pounds of the crop will be left in the field. No effort was made to figure the poundage of the damaged tobacco that was out those memorable nights of September 12 and 13.

Sampling Almost Completed

Sampling of the '23 is almost completed. The characterization of the northern '23 is that it has fine attributes of color, size, and spread, but that the tobacco lacked the customary amount of gummyness. Perhaps a little more than the usual amount of black-rot was found in it, but nothing of serious proportions. About ten days of cleaning it out will be needed by the average packer. Nor will the total poundage thrown out amount to much.

Eastern inquiries for the '22 have been persistent. One good-sized packing went by the board last week to a New York house. There seems to be a slight difference between the amount of enhancement in values that took place as a result of the frosts and shed damage to the 1923 crop. The figures that the packing of the Hubbell's commanded are not known for publication, but they were high.

Pool Prices

The pool people have not sold the 2,000,000 pounds of southern carried over by them from the '22 crop. About 1,700 cases of natural shorts are held for 16 cents, marked weights. B's bulked once are higher, and the others as follows:

D-2's	28c	marked weights
D-1's	30c	" "
C-2's	32c	" "
C-1's	34c	" "
B-2's	36c	" "
B-1's	38s	" "

The sale is not making much headway, as one would think at those prices. The writer does not know, but he is given to understand that the shrinkage is considered rather high, as the shrinkage also contains the decrease in weight undergone while in the bundle. The weighings were made at the farm in April and May of the unsold crops, and went into the packing that Summer at the crop weights of the bundle, at that early time.

Also, there is the fact that these two million pounds form the unsold residue of all the Pool's holdings of the 1922 southern. The rather short crop of 1922 was entirely sold on a rather stiff market with the exception of this tobacco.

Supply Not Equal to Demand

The country is being scoured for all tobacco in cases. Many anxious inquiries among the trade of late have caused this. The supply is entirely inadequate to go around.

Many shipments of small lots of tobacco have gone out of this market the past month, and the country is being picked very clean of old goods. Outside of a few local equities old packings, there is practically nothing left to shoot at.

The trade still holds to the opinion that about 25 per cent of the 1923 southern binder supply was affected by shed damage of September.—BADGER.

Wisconsin Tobacco Crop Cut 30 Per Cent

MADISON, Wis., Oct. 20.—Low yields of hay and extensive frost damage to tobacco are reported in the October survey of the Wisconsin crop reporting service.

A record Wisconsin tobacco crop was in prospect at the time of the frost of Sept. 12 and 13 the report said. Practically all unharvested tobacco was injured by the frost, and about half the crop remained to be harvested. The damage varied considerably depending upon the location of fields. Condition is estimated by reporters to be 70 per cent of normal. The total production of both frosted and undamaged tobacco is forecast to be 43 million pounds compared to 46 million pounds last year. The difference of 10 million pounds between the Sept. 1 and the Oct. 1 forecast is an indication of the frost damage.

New Northern Wisconsin Pool Warehouses

MADISON, Wis., Oct. 20.—Warehouses of the Northern Wisconsin Co-operative Tobacco pool at Chasburg, Genoa, Coon Valley, De Soto and Independence are expected to be completed in six weeks. John Holtan, sales and warehouse manager for the pool, is procuring equipment for the warehouses, which will each accommodate 50 sorters.

Opens New Establishment

TOMAHAWK, Wis., Oct. 19.—H. J. Taylor has opened a cigar and pool business here.

Pennsylvania Tobacco Sales Come to a Slow Down

Lancaster Market Shows Symptoms of Suspended Animation—The New Crop a Source of Genuine Satisfaction—Acclaimed as Having Good Burning Qualities—Prices Not Fully Settled.

LANCASTER, Pa., Oct. 22.—The Lancster tobacco market is in a state of susended animation as regards both the new rop and the stocks of 1921 and 1922 ill on hand. Buying of the 1923 crop, hich had been going on to some slight xtent up until the past week, has slowed own and within the last few days has ome to a dead stop. Activity on the old ocks has shown no increase, although satisfactory undercurrent of small sales eeps the goods moving and optimism on e tobacco outlook up to par.

The new crop is a source of genuine tisfaction to packers, and growers also re well pleased with the outcome of what ooked, earlier in the season, like a very ediocre crop. The yield this year will e above the average of the past several ears, and the quality is very good. The ercentage of large leaves is not high, but is desirable condition will be more than ompensated for by the fine texture and eight which is becoming apparent as e crop nears a finished cure.

Tests Burning Qualities

Always on the lookout for the burning ualities of the leaf, and fearing a "dry eather" crop worse than a plague, packs in all sections of the county have gone the trouble of experimenting with this ear's product to settle this important uestion. City and county packers unite acclaiming the 1923 crop to have the xcellent burning qualities which have rned for Pennsylvania cigar leaf its putation. The burn is all that it should , tobacco men declare, and state that en in its present half-cured condition e leaf shows promise of possessing unually good burning qualities.

Since the "burn" of a crop may alone ake it very valuable, or absolutely orthless, in the manufacture of cigars, e good quality of the 1923 crop in this spect should cause a good demand for e leaf. The burn of the Lancasterown cigar leaf has been good for the st several years, and is steadily imoving under the application of specially mpounded fertilizers, which eliminate ose elements that detract from the color d burn of the leaf. Several years of perimental work along these lines by unty Agent F. S. Bucher, and a long ries of tests which were conducted by ederal Tobacco Expert Otto Olson, ve resulted in greatly improving the gar leaf along these lines.

Price Tendencies

The price which will be paid for the op now hanging in the sheds may be eatly influenced by another crop condiin which came as a result of the three eeks of excellent weather which folwed at the close of the growing season. his is the uniform development of the f. There is sufficient good tobacco in y section of the county that a buyer ay wish to visit, and he can very easily k his territory at random and find ough high quality leaf to make up a od "B" packing. It is often the case the growing of tobacco that all of the od leaf will be bunched in one section. hen this occurs, a rush of buyers to e favored spot usually results, and ices vary greatly.

Growers in the southern end of the unty report some tobacco having been ught in that neighborhood recently. ices in these transactions have hovered tween 17 and 20 cents. No other acity has been reported and it is extremeunlikely that the buying campaign will gin in earnest before the first of the ar. When operations do begin, it is rd to say just what the price will be. obacco men have not changed their forecasts of the price that they expect the 1923 crop to bring, and are more emphatic than ever in their declarations that it is very unlikely that it will soar above 20 cents.

While the jobbing trade which patronizes Lancaster independent packers speaks of conditions in the tobacco world with umbrage and looks gloomily to future prospects, they nevertheless adopt the rather paradoxical position of placing orders almost continually and are steadily drawing on their stock which is held in the local warehouses. While no large single orders have been placed, the aggregate of the numerous small transactions will reach a respectable total and indicate a condition in the cigar industry which is probably not quite as bad as might be believed from superficial information.

Packers in this section report a very good demand for low-grade binders and fillers fit for grinding from the York county manufacturing district. Quite an amount of tobacco has gone to the neighboring county and the demand seems as yet to have been unsatisfied.—KEYSTONE.

Advice on Pipe Smoking

"To the real pipe fan," Myrie writes us encouragingly, "there is only one form of smoking worth considering—his pipe.

"It must be a sound, sappy piece of French or Italian brier root. It must be of proper dimensions and design. Its draft must be right. If it is not radically wrong, carbonization or caking will eventually straighten out this defect.

"As for the cluck in the pipe's innards that makes you say 'wum' and make your exit, it can be eliminated by blowing into the pipe after every dozenth draw upon it. Occasionally the moisture can be expelled through the mouthpiece by a wide sweep of the arm, after which the mouthpiece is furtively dried on the palm of the hand or a convenient portiere curtain.

"The incurable 'wet' smoker may have his pipe made with a well of the desired capacity, or with a patented device incorporated in it.

"If you take up any real game—chess or bridge or golf—you don't grouse because you can't master it in a day. Its charm lies in its intricacies. So consider the greatest game of them all smoking the virgin brier."

* * *

We wish we could believe that it was our increasing skill in the art of pipe smoking that makes the ordeal slightly less unendurable. We doubt it. We are inclined to believe that our sense of taste is developing a protective atrophy; that our ideas of what is pleasant and desirable in life are becoming mummified by nicotine.

We are a wet smoker. We doubt whether any one is so fluent a smoker as we are. Knowing our qualifications, we question whether any patented device would ease our misery. What we need is a pipe with a complete plumbing system.

We have learned one thing, anyhow. We have discovered why the usual pipe material is known as "brier." To any one still in ignorance on that point one glance at our excoriated tongue will bring enlightenment.—FREDERIC F. VAN DE WATER, in *New York Tribune*.

Studying Local Conditions

Sim Reinach, the Chicago leaf dealer, is making a close study of New York conditions this week.

Philadelphia Cigar Factories Keep Up Activity

Continue Efforts to Increase Production to Supply Exceptionally Large, and Unusually Early Demands for Holiday Goods—Labor Conditions Improving—Trade News.

PHILADELPHIA, Oct. 23.—The past week saw a continuation of efforts to increase production to supply an exceptionally large and unusually early demands for holiday goods. Meantime, the orders for immediate deliveries show no signs of slackening.

Labor conditions are steadily improving and manufacturers are able, because of the more responsive attitude of hands, to increase output without sacrificing quality. Jobbers, too, join in the good reports of present day experiences and of future possibilities, their only plaint being that collections continue to be slow.

A week of bright, sunshiny weather stimulated retail sales, despite the fact that it was of August or September qualities rather than those of October. Warm and unseasonable as it was, it did not seem to check the interest shown by bulk purchasers of holiday goods for distribution among employes or patrons. The vogue for giving holiday expression in the shape of cigars is very pronounced.

Receiver Appointed

During the week the Court appointed Maurice Craine, of S. Weinberg, leaf dealer, receiver for the Progressive Cigar Corporation, 1201 Race St., whose failure was reported in these columns last week. The factory which the company maintained until recently at Twelfth and Race streets, has been closed. In fact, for some time past production of the firm's leader, Madam Butterfly, has been in the hands of others. The partners in the Progressive Co. are Max Lipschutz and Morris Cravis. This is the second time that the firm was reported in straitened circumstances in the last two years. On the previous occasion a compromise was effected on the basis of a forty per cent settlement, although it is understood that this was not completely carried out. The receiver is now engaged in an effort to ascertain assets and liabilities and until further progress is made through appraisal, it is a mere guess what percentage can be made available for the creditors. Announcement of the firm's difficulties came with no sense of surprise to the trade.

Compromise Offered and Accepted

A 25 per cent compromise was offered to and accepted by the creditors of the Spencer Morris Cigar Co., 812 Winter street, of which Morris Bryer is proprietor. After a discussion of the conditions, creditors agreed to accept a ten per cent immediate cash payment, the remaining 15 per cent in the form of notes payable in 3, 6 and 12 months, secured by guarantees. The business is to be continued. It was established originally by Benjamin and Morris Bryer, first on Cherry street, near Thirteenth, and later at its present headquarters. Benjamin Bryer consequently withdrew to enter the retail business, conducting stands at Twelfth and Filbert streets, and in the Schaff Building, Fifteenth and Race streets.

Contract Awarded for Second Eisenlohr Memorial Building

Second of the generous benefactions made by the late Louis H. Eisenlohr, of Otto Eisenlohr & Bros., will be used for the erection of a new four story and basement Nurses Home on the grounds of the Methodist Episcopal Hospital, Broad and Wolfe streets. The bequest, according to the statement of Charles M. Boswell, Corresponding Secretary of the Hospital, will amount to $146,516, and during the week a contract was awarded to Cramp & Co. for the erection of the building, which is to be of fire proof construction, to cost $140,000. Architect Horace W. Castor has prepared plans for the building, to contain 50 bedrooms, eight baths, a reception room and one suite of rooms with bath. Mr. Eisenlohr, who died June 7, 1922, left $300,000 to charity, as previously published, to be distributed by his executors, Charles J. Eisenlohr and Daniel Housman.

Distributors Appointed

Many distributors throughout Ohio and New York were appointed by George I. Watson, of the Associated Cigar Mfg. Co., 1039 Race street, who returned a few days ago after a three weeks' trip through that territory. The firm is running to capacity its three out of town factories on Rey Oma and Dependo, and will make special holiday packings of 40ths for the coming season.

New Holiday Packings

The new holiday packing for Adlons and 44's which the Consolidated Cigar Corporation, Eleventh and Wharton streets, is to place on the market has enjoyed so favorable a reception that a large increase in the original estimates will be made. It is proposed to wrap five Adlon Perfectos and five 44 Invincibles in tin foil, a preservative of freshness and aroma, in a handy pocket pack. The firm is maintaining three salesmen doing missionary work on the street, arranging window displays of both Adlons and 44's all over the city, working under the direction of Louis Levenson, salesmanager. Herbert Weil, of the Consolidated Cigar Corporation, New York, visited the local offices during the week.

To Please Patrons

In order to accommodate patrons the G. H. P. Cigar Co., Third and Brown streets, will put up limited packings of its leader, El Producto, in 40ths in three sizes, 2 for 25 cents, 3 for 50 and 50 cents straight. Distribution for the new packings will begin the first of November.

The full complement of salesmen for the Girard Cigar Co., 315 N. Seventh street, is now on the road with the regular stock lines, and these are selling very well. Edward Weil left the home office during the week to travel through New York and Pennsylvania and then westward as far as Michigan.

Brisk Gift Trade Anticipated

Preparations of the holiday packing of 40ths in Marietta's, Lew Wallace and La Madrid, by P. C. Fulweiler & Bros., 927 Sansom street, is now in progress in anticipation of the holiday gift trade far in excess of those of a year ago, the estimate being made on the basis of orders already in hand.

Samuel Olster, of the Ruyera Lopez Cigar Mfg. Co., 137 N. Third street, has deferred proposed road trips in order to give his time to the supervising of the newly acquired retail stand at Thirteenth and Market streets, run in connection with the National Drug Co.'s store there.

Holiday needs of the retail trade are being looked after by Frau & Pena, 1536 Columbia avenue, by special packing of its leaders, Mi Ydillo, Mi Escudo and Beldad, each of which will be packed in 10 shapes in 40ths and regular boxes.

York County News

Five New Factories Opened

YORK, Pa., Oct. 22.—Five new cigar factories were opened during September in the York division of the U. S. Internal Revenue Department, and one closed down, according to a report received from the Philadelphia district office. The factory which ceased operations was owned by the Contesta Cigar Co., located in York. The new factories and their locations are here given: United Tobacco company, Seven Valleys; Jacob E. Knisely, Windsor; Marcus Auschnitt, York; Penn Cigar, Red Lion, and John G. Bergdoll, York. George C. Enders, deputy revenue collector in the stamp department of the

ɔcal office, who had been on his annual acation for 10 days, has resumed his ıties.

Tobacco Crop Best in Years

Farmers in the southern section of ork county have completed cutting their ɔbacco and claim the 1923 crop is the ɛst in years. The color of the tobacco a dark green instead of the light yel-w that has usually prevailed and is ıe to the perfect weather conditions ıat have existed during late Summer.

One reason that is given for the suc-ɛssful crop is that the farmers have arned to grow tobacco. Instead of anting in different fields from year to ɛar as is customary with other crops, e rotation system has been abandoned ıd the tobacco planted in the same field ɛr and over again. The field is fer-ılized with stable manure, potash, cot-ın seed mead and green bone.

The crop this year is clean and the af free of worm holes and flea bites. or was there any hail to cut the leaves. he crop yield is expected by the farm-s to be 2,000 pounds to the acre.

The result has been so satisfactory is year that the farmers contemplate creasing their acreage next year. A rmer residing in East Hopewell town-ip who has been growing tobacco for years stated that he has never har-ɛsted a better crop. He estimates that his township alone there will be not ss than 20 carloads of tobacco for le. While the tobacco in different parts the county has been inspected by a ımber of dealers, no sales have yet been ported.

Working on Full Time

The El Francisco Cigar Co., Wrights-lle, S. Lewis Reisinger, foreman, which ıd been on a short time schedule for veral months, is now working full ne, having received a large order for gars, which will keep the factory busy r several months to come.

The factory which has been opened Wrightsville by Clarence Gable who ırchased the factory and fixtures of . H. Raab & Son, Second and Hellam reets, is working full time, with Wil-ım U. Carr, foreman. The present ɔrking force, it is said, will be in-eased.

Arthur H. Thompson, of the firm of E. Brooks Cigar Co., Red Lion, has ıturned from a business trip to the ıuth.

Vernon D. Frey, of the firm of A. C. ey & Co., cigar manufacturers, Red ɔn, is on a business trip to the north-st. Upon his return trip he is to ɔp at Omaha, Neb., where he will visit sister, Miss Naomi Frey.

C. M. Ehehalt, Red Lion, cigar ɔker, has returned from a seven weeks' p to the northwest in the interest of cigar trade.

Both the Havana Cigar Co. and the hn C. Herman Cigar Co., of Dover, e enjoying a period of prosperity and e rushed with orders for the Christmas de. Both factories are working full ne.

The Fix-Haynie Cigar Co., has opened second branch factory in this city. ıe new factory is located at the ex-me south end of Queen street. The ıer factory is located on North Queen eet near the Pennsylvania Railroad. e additional factory will increase the tput of the Fix-Haynie plants about quarter million cigars a week. Isaac jahn is the district manager for the x-Haynie plants.

Popper's 8-Cent cigar, made by E. pper & Co., Inc., New York, has re-ıtly been added to the line handled by ylor Brothers, 668 West Market street. a campaign with the firm's special resentative the Saylors have had most ıtifying results and have placed the ınd in many stores.

A campaign on the El Poderso cigar, nufactured by A. C. Fehsenfeld Cigar ., Baltimore, has just been finished by S. L. Etter & Son, North George street, jobbers. A special salesman for the company accompanied Sam Etter over the territory and many orders were booked.

Black Cigarettes Hit York

YORK, Pa., Oct. 20.—The black cigarette is the latest fad to reach York,—cigarettes rolled in black papers, as black as the inside of an ink bottle at midnight, and having elegant gold tips. These cigarettes of sombre wrappers have been placed on sale in cigar stores and are high priced. They are Turkish, but have an English name; the name has a London flavor.

Why black cigarettes? Of what advantage are they over those rolled in white papers? Are they intended for folks in mourning? Are they for smoking at funerals? Will undertakers adopt them as their brand? These are the questions asked by a local paper, which makes comment on them as follows:

"It is claimed for the black cigarettes that the rice paper wrappers are treated chemically to remove the offensive taste that ignited rice paper has for some smokers. For women who want to smoke surreptitiously the black cigarette has the advantage of being inconspicuous and easily concealed.

"How far the fad of black cigarettes is going to go in York remains to be seen. A man and two women—theatrical people probably—smoking cigarettes of this new brand in an all night restaurant attracted considerable attention.

"'What are they smoking?' was whispered by people at the other tables, who were not aware that the black cigarettes had arrived in York. It is said that boys in the York High School are affecting them."

Baltimore Market

BALTIMORE, Md., Oct. 19.—Gieske & Niemann, leaf tobacco merchants, make report, as follows:

MARYLAND: We have to report for the last week receipts of 588 hogsheads, against sales of 1,536 hogsheads. Market has been very strong with prices advancing on all grades.

OHIO: No receipts nor sales.

Charles Denby Going Strong

Willem Quanjer, New York representative of H. Fendrich, Inc., of Evansville, Ind., manufacturers of the celebrated Charles Denby cigar, reports an enormous demand for this high-grade brand.

San Francisco

(*Continued from page* 39)

going east. The South West Cigar Co. at Dallas, Texas, is having fine placement. Fighting Bob among their local trade seems to be enjoying a still greater popularity.

Michalitschke Bros. & Co., in addition to the Epco, recently taken on, will also distribute the D. C. Tampa five cent clear Havana cigar.

Conditions Appear Good

Leo Michaels, Vice-president of the Tobacco Products Corporation, has returned from his trip to Nevada, Utah, and the northwest, and reports that conditions seemed everywhere of the best.

Word received from A. Dahlman, the Demuth pipe representative, informs that he is at Denver, and has had a very successful trade trip so far on his return from the East, and that he will be back at the Golden Gate in a very short time.

The Reiss-Premier Pipe Co., located at 87 New Montgomery street, reports that it is having an excellent season for the pipe trade.

New Orleans

(*Continued from page* 35)

Mississippi field. The New South Cigar & Tobacco Co. job the Renaldo brands.

H. G. Whitlock and W. E. Harris, of the American Tobacco Co., are visiting the New Orleans distributors of 111 cigarettes, and Blue Boar combination pipe, the New South Cigar & Tobacco Co. The success of One Eleven cigarettes in New Orleans has been phenomenal.

A. Wolfe, representing Cuesta, Rey & Co., of Tampa, is in town, looking after the interests of his factory. He reports a good measure of success.

B. Haine, water color artist, and L. A. Haily, of the Hava-Tampa Cigar Co., have been in the city for the past fortnight looking after the business of the factory, whose products the New South Cigar & Tobacco Co. distributes. They report business very satisfactory.

Had Narrow Escape

Vice-president DeBen of the Crescent Cigar & Tobacco Co., narrowly escaped death, while out with his wife and mother auto riding in the suburbs a few nights ago. A heavy car, driven by some inexperienced chauffeur, ran into his Dodge Sedan as he swerved his car to avoid the impact. Apart from considerable damage to his auto and a slight injury from shock suffered by Mrs. DeBen, they escaped from what might have proved a tragic affair.

Roi-Tans Much in Evidence

A. B. Wyatt, Mississippi representative of H. T. Cottam & Co., New Orleans distributors, is in attendance at the big fair in Jackson, selling, sampling, smoking and advertising Roi-Tan cigars. Gus Block doing similar work at the Shreveport, La., fair, declares that judging from the crowds smoking Roi-Tans one would think there were no other cigars being sold these days. Modlin-Cook Cigar Co., Shreveport, La.; Corr-Williams Tobacco Co., Jackson, Miss.; The Tom Lynn Grocery Co., Meridian, Miss., and scores of other jobbers in the states named, are forwarding flattering orders for Roi-Tans.

To quote L. M. Haynie, manager of H. T. Cottam's cigar department, "Roi-Tans are selling bigger and bigger every day, in every way, in Louisiana and Mississippi." The firm is also doing a fine business in Little Toms, Cubanolas, St. Charles, Havana Smokers, and Washington Hand Mades. It is their belief that the Roi-Tan "ad" in TOBACCO helped them considerably.

Sigmund Loeb Dies

Sigmund Loeb, a valued employe of Valloft & Dreux, is dead. He has been engaged as city salesman for the firm for nearly twenty years, and was held in high esteem by both his employers and the trade.—CRESCENT.

Chicago

(*Continued from page* 49)

gars. Clever electric La Palina signs burn in the windows at night.

The Yellow Cab Co. has stocked several sizes of Pancho Orango Cigars for use in the company's commissaries. Frank Murray closed this important deal.

The Central Manufacturing District Club on 35th street, reports Pancho Orango, made in Bond cigars, as being asked for, more than any other brand it carries.

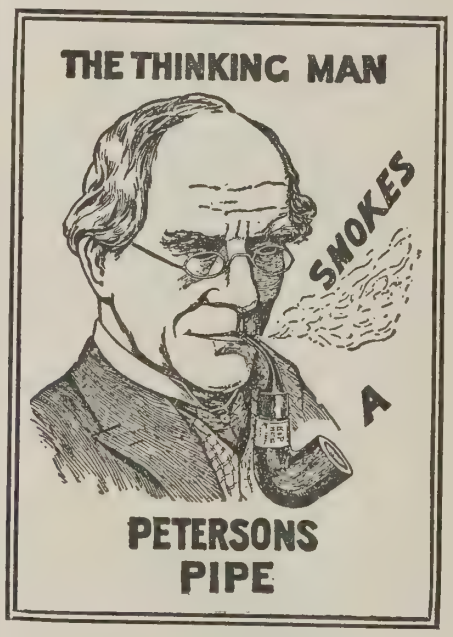
The Pleasing Personality

Good reports are given out by the dealers regarding the sale of Personality cigars. While only on the market here a few weeks, hundreds of duplicate orders have been received by Ryan & Raphael Cigar Co., the distributors.

One-Eleven Cigarettes

In all the General Cigar Co.'s windows was a full showing of One-Eleven cigarettes.

The Wm. J. Seidenberg Havana smoker, at 2 for 15 cents, is repeating rapidly for the Berkhoff Restaurant at Adams and State streets.



Dry Move Puts Damper on Cigar Trade

Mayor Dever in his fight to eliminate booze, has closed up over 1,000 coffee shops, near beer saloons and billiard halls. This has worked a hardship on all the local cigar jobbers who have extended credit to these people. Most of the places have been locked by the government agents and the agents and the owners have departed, leaving the creditors to whistle.—H. L. H.

CLASSIFIED ADVERTISING

DISTRIBUTORS AND BROKERS wanted for our quality cigars, retailing at 3 for 10c and 2 for 5c, hand made, long filler. Sample shipments charged; however, credited on first order. Mella Cigar Factory, 304 S. 12th St., Louisville, Ky.

SITUATION WANTED. Young man, eight years on Amsterdam tobacco market, experienced in European trade, wants position with tobacco concern on Kentucky or Virginia markets. Address: Amsterdam, care of Tobacco, 10 E. 39th St., New York City.

A Manila Brand

The Success of your Manila Business depends on your Manila Brand.

Job-lotting is dangerous. Besides you never can build anything with nondescript, fly-by-night cigars that are here today and gone tomorrow.

Put in the Brand That is Going to Carry You on to a Steady, Profitable Business

Manila Importers and Jobbers are offering wonderful values in cigars selling from 5 to 25 cents that win the good opinion of Smokers.
